a. Definitions.

"Contractor" means the person, firm, unincorporated association, joint venture, partnership, or corporation that is a party to this contract.

"Contractor and its affiliates" and "Contractor or its affiliates" refers to the Contractor, its chief executives, directors, officers, subsidiaries, affiliates, subcontractors at any tier, and consultants and any joint venture involving the Contractor, any entity into or with which the Contractor subsequently merges or affiliates, or any other successor or assignee of the Contractor.

An "Organizational conflict of interest" exists when the nature of the work to be performed under a proposed ordering activity contract, without some restriction on ordering activities by the Contractor and its affiliates, may either (i) result in an unfair competitive advantage to the Contractor or its affiliates or (ii) impair the Contractor's or its affiliates' objectivity in performing contract work.

b. To avoid an organizational or financial conflict of interest and to avoid prejudicing the best interests of the ordering activity, ordering activities may place restrictions on the Contractors, its affiliates, chief executives, directors, subsidiaries and subcontractors at any tier when placing orders against schedule contracts. Such restrictions shall be consistent with FAR

9.505 and shall be designed to avoid, neutralize, or mitigate organizational conflicts of interest that might otherwise exist in situations related to individual orders placed against the schedule contract. Examples of situations, which may require restrictions, are provided at FAR 9.508.

13. INVOICES

The Contractor, upon completion of the work ordered, shall submit invoices. Progress payments may be authorized by the ordering activity on individual orders if appropriate. Progress payments shall be based upon completion of defined milestones or interim products. Invoices shall be submitted monthly for recurring services performed during the preceding month.

14. **RESUMES**

Resumes shall be provided to the GSA Contracting Officer or the user ordering activity upon request or as required. The contractor is required to provide personnel meeting the qualifications specified under any labor categories quoted on a Time & Materials order or that form the Firm Fixed Price.

15. APPROVAL OFSUBCONTRACTS

The ordering activity may require that the Contractor receive, from the ordering activity's Contracting Officer, written consent before placing any subcontract for furnishing any of the work called for in a task order.

The audit will: (a) require a minimum of thirty (30) days prior written notice; (b) be conducted no more than once per calendar year; (c) be limited to a three (3) year audit period unless non-compliance findings are noted, in which case the audit period can be expanded; (d) be conducted during reasonable business hours; and (e) be subject to reasonable confidentiality requirements and applicable security requirements.
- 5. **OWNERSHIP AND ATTRIBUTION.** All right, title and interest in and to the Product, including all corrections, enhancements, or other modifications made by DigitalGlobe or any third party, and all Intellectual Property Rights therein

are the sole and exclusive property of DigitalGlobe or its suppliers, as applicable. All rights not expressly granted to Customer in these License Terms are reserved by DigitalGlobe. Customer will not delete, alter, cover or distort any copyright, trademark or other proprietary rights notice placed by DigitalGlobe on or in the Products and will ensure that all notices are reproduced on all copies. All Derivatives must include the following copyright notice on or adjacent to the Derivative: [Product] © [YEAR] DigitalGlobe, Inc.

6. LIMITED WARRANTY AND DISCLAIMER. THE PRODUCT IS PROVIDED "AS IS," WITHOUT ANY WARRANTY OF ANY KIND, WHETHER EXPRESS, IMPLIED OR STATUTORY, INCLUDING, WITHOUT LIMITATION, WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, NON-INFRINGEMENT OR NON-MISAPPROPRIATION OF INTELLECTUAL PROPERTY RIGHTS OF A THIRD PARTY, CUSTOM, TRADE, QUIET ENJOYMENT, ACCURACY OF INFORMATION, CONTENT OR RESULTS, OR CONDITIONS ARISING UNDER ANY OTHER LEGAL REQUIREMENT. DIGITALGLOBE DOES NOT WARRANT THAT THE PRODUCTS WILL BE ACCURATE, CURRENT OR COMPLETE, THAT THE PRODUCTS WILL MEET CUSTOMER'S NEEDS OR EXPECTATIONS OR THAT THE OPERATION OF THE PRODUCTS WILL BE ERROR FREE OR UNINTERRUPTED. FURTHER, SPATIAL, SPECTRAL AND TEMPORAL ACCURACY IS NOT GUARANTEED. This clause does not limit or disclaim any of the warranties specified in the GSA Schedule 70 contract under FAR 52.212-4(o). In the event of a breach of warranty, the U.S. Government reserves all rights and remedies under the contract, the Federal Acquisition Regulations, and the Contract Disputes Act, 41 U.S.C. 7101-7109.

7. INDEMNIFICATION

7.1 INDEMNIFICATION BY DIGITALGLOBE. DigitalGlobe will indemnify and hold Customer harmless from and against any claim or action by a Third Party against Customer, and all losses, damages, costs, penalties, fees and reasonable attorney's fees (collectively, "Losses") incurred by Customer therefrom, arising out of a claim that the DG Crowdsourcing product, including the Campaign Results, infringes any United States copyright or misappropriates any trade secret rights of any Third Party.

7.2 INTENTIONALLY LEFT BLANK

- **7.3 SUBSTITUTES**. Should Customer's use of the Campaign Results be restricted, encumbered, or enjoined by reason of any infringement, DigitalGlobe will promptly, at its election, and at no additional cost to Customer: (a) obtain for Customer the right to continue to use the Campaign Results as provided in these License Terms; (b) modify the Campaign Results so as to render it non-infringing (provided that DigitalGlobe's modification will not materially affect Customer's intended use, or the performance, of the Licensed Images), or (c) replace the Campaign Results with equally suitable, non-infringing alternatives, which will be subject to the provisions of these License Terms. To the extent the options provided in subsections (a) through (c) above are not commercially feasible, DigitalGlobe will have the right to immediately terminate these License Terms and provide a refund of a prorated portion of the annual license fee paid in advance by Customer based on the number of days remaining in such annual period.
- **7.4 EXCEPTIONS**. Notwithstanding the foregoing, DigitalGlobe assumes no liability (and will have no indemnification obligation under Section 7.1 of these Terms and Conditions) arising from or related to any claim by a Third Party alleging infringement based on (a) the use of the Campaign Results in combination with other products, methods, processes not provided by the DigitalGlobe, if such infringement would have been avoided without such combination; (b) modification of the Campaign Results made by Customer unless such infringement would have existed without such modification; (c) the continuation of allegedly infringing activities by Customer after notification by DigitalGlobe of a court ordered injunction disallowing the continued use of the Campaign Results; or (d) the use by Customer of prior versions of any Campaign Results after the DigitalGlobe has provided Customer with an updated version of the foregoing.
- 7.5 INDEMNIFICATION PROCEDURES. In order to obtain the benefit of any indemnification hereunder, the party seeking indemnification (the "Indemnitee") will provide the other party (the "Indemnitor") with prompt notice of any written threat, warning, or notice of any Third Party claim or action subject to indemnification hereunder, and copies of all papers served upon or received by the Indemnitee relating thereto. The Indemnitor will have the sole right to conduct the defense, to the extent permitted by 28 U.S.C. 516 of any such claim or action and all negotiations for its settlement or compromise unless otherwise mutually agreed to in writing between the Parties hereto (provided, however, that the Indemnitor will not have the right to bind the Indemnitee to any agreement without its prior written consent, which consent will not be unreasonably withheld or delayed). The Indemnitee will provide reasonable assistance to the Indemnitor (at the Indemnitor's expense) regarding the defense of such claim or action. This Article 7 provides Customer's sole and exclusive remedy in connection with any infringement claims asserted by a Third Party based on the DG Crowdsourcing product, including the Campaign Results.
- 8. LIMITATION OF LIABILITY. IN NO EVENT WILL DIGITALGLOBE BE LIABLE FOR ANY SPECIAL, INDIRECT, INCIDENTAL, EXEMPLARY, PUNITIVE OR CONSEQUENTIAL DAMAGES, WHETHER OR NOT FORESEEABLE AND WHETHER OR NOT A PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF THE DAMAGES AND NOTWITHSTANDING ANY FAILURE OF THE ESSENTIAL PURPOSE OF THIS AGREEMENT OR ANY LIMITED REMEDY HEREUNDER. IN NO EVENT WILL DIGITALGLOBE'S TOTAL LIABILITY ARISING OUT OF OR IN CONNECTION WITH THE PRODUCTS EXCEED THE FEES PAID BY CUSTOMER FOR THE PRODUCT GIVING RISE TO THE CLAIM. THE FOREGOING LIMITATIONS APPLY TO ALL CAUSES OF

ACTION IN THE AGGREGATE, INCLUDING WITHOUT LIMITATION, BREACH OF CONTRACT, BREACH OF WARRANTY, INDEMNIFICATION, NEGLIGENCE, STRICT LIABILITY, MISREPRESENTATION AND OTHER TORTS AND STATUTORY CLAIMS. This clause shall not impair the U.S. Government's right to recover for fraud or crimes arising out of or related to this Government Contract under any federal fraud statute, including the False Claims Act, 31 U.S.C. §§ 3729-3733.

- **11.3 AMENDMENT.** This Agreement may be amended or supplemented only by a writing that refers to these License Terms and that is signed by both parties.
- **11.4 WAIVER.** The failure or delay by a party to require performance of any provision of these License Terms does not constitute a waiver. All waivers must be in writing and signed by the party granting the waiver. The waiver by a party of any of its rights or remedies in a particular instance will not be construed as a waiver of the same or a different right or remedy in a subsequent instance.
- **11.5 SEVERABILITY**. If any provision of these License Terms is invalid, illegal or unenforceable, that provision will be deemed to be restated so that it is enforceable to the maximum extent permissible under law and is consistent with the original intent and economic terms of the invalid provision.
- **11.6 RELATIONSHIP OF THE PARTIES**. Nothing in these License Terms will be construed to create any franchise, joint venture, trust or commercial partnership or any other partnership between the parties. Neither party will have any authority to contract for or to bind the other party in any manner and will not represent itself as an agent of the other party or as otherwise authorized to act for or on behalf of the other party.
- **11.7 COMPLIANCE WITH LAWS.** Customer is responsible for its own compliance with laws, regulations and other legal requirements applicable to the conduct of its business and these License Terms, and agrees to comply with all these laws, regulations and other legal requirements including, without limitation, the Foreign Corrupt Practices Act of the United States of America and the Convention on Combating Bribery of Foreign Government Officials.
- **11.8 INTERNATIONAL TRADE COMPLIANCE.** The Product is subject to the customs and export control laws and regulations of the United States and any country in which the Products are manufactured, received or used, including, without limitation, the Export Administration Regulations and the International Traffic in Arms Regulations. Customer will comply with these laws, regulations and rules in the performance of its obligations under these License Terms. Further, Customer will not provide the Product to blocked, prohibited or restricted individuals and entities as required by the U.S. Department of Treasury Office of Foreign Assets Control ("OFAC"), including, without limitation, the Denied Persons List, Unverified List and Entity List. Customer will not knowingly do business with criminal organizations, terrorist organizations or other people or groups, either directly or indirectly, that are likely to use the Product for purposes that are illegal or adverse to the interests of the United States Government or the Company generally. Customer will provide Company with the assurances and official documents that Company may request periodically to verify Customer's compliance with these License Terms.
- 11.9 FORCE MAJEURE. Except for Customer's obligation to make payment under these License Terms, neither party will be liable for any failure or delay in fulfilling or performing any term of these License Terms when and to the extent the failure or delay is caused by or results from acts beyond that party's reasonable control, including, without limitation, acts of God, fire, earthquake, storm, flood, power outage, strike, war, act of terrorism, law, export control regulation, instructions of government authorities or judgment of a court (not arising out of breach by the party of these License Terms). The party

suffering a force majeure event will promptly give notice to the other party, stating the period of time the occurrence is expected to continue.

- **11.10 GOVERNING LAW AND DISPUTE RESOLUTION**. All disputes relating to these License Terms are subject to Federal Acquisition Regulation 52.233-1.
- **11.12 NO THIRD-PARTY BENEFICIARIES**. Nothing in these License Terms, either express or implied, is intended to or will confer upon any third party any legal or equitable right, benefit or remedy of any nature whatsoever under or by reason of these License Terms.
- **11.13 NOTICES.** Except for routine operational correspondence, all notices, demands, consents and other communications required or permitted to be given under these License Terms must be in writing and will be considered delivered and effective upon receipt (or when delivery is refused) when: (a) personally delivered; (b) sent by registered or certified mail (postage prepaid, return receipt requested); (c) sent by nationally-recognized private carrier (e.g., Federal Express, DHL, etc.) (with signature required and all fees prepaid); or (d) sent by email with confirmation of transmission. Notices must be sent to Customer and DigitalGlobe at those addresses set forth under the signature blocks, or at another address as a party may designate in writing.
- **11.14 COUNTERPARTS**. This Agreement may be executed in one or more counterparts, each of which when executed will be deemed to be an original but all of which taken together will constitute one and the same Agreement.
- **11.15 CONTROLLING LANGUAGE**. This Agreement is drafted in the English language only. English will be the controlling language in all respects, and all versions of these License Terms in any other language are for accommodation only and will not be binding on the parties.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

Crowdsourcing Product Pricing

DigitalGlobe's satellite constellation collects millions of square kilometers of earth imagery every day, gathering amazing high-resolution data about our planet. To gain actionable insight about important locations, objects, and events across the globe, our crowdsourcing platform taps into an online network of thousands of imagery analysts. Using an intuitive web interface and advanced geospatial consensus algorithms, the DigitalGlobe Crowdsourcing platform transforms pixels into answers. Exploiting satellite imagery with human analysts is an expert process that takes time. By applying hundreds or thousands of people to the problem, DigitalGlobe Crowdsourcing increases the scale and speed of analysis immensely, while still retaining the accuracy of human insight. Now it is possible to analyze 100,000 square kilometers of imagery in a single day—a task that might take a single analyst weeks.

GeoWave

GeoWave products enable commercial enterprises and USG to create and manage geospatial operations around big data repositories. Core to all GeoWave products is the GeoWave open source software library that connects the scalability of distributed computing frameworks and key-value stores, with modern (web-based, scalable, etc.) geospatial software. This allows users of GeoWave software to store, retrieve, and analyze massive datasets. In contrast to GeoWave, software that works for traditional geospatial datasets and analyses (e.g., for location analysis in forestry) is typically not able to deal with the massive amounts of streaming data generated from modern collection methods. GeoWave is a unique technology capable of using modern, distributed computing platform technologies to deliver server-side fine-grained filtering and high performance. GeoWave was designed from the ground up to query spatiotemporal datasets containing billions or trillions of features interactively with 100 percent accuracy. This enables government and commercial customers to perform geospatial operations (locating, mapping, etc.) on data that would otherwise be impossibly large and unwieldy.

GeoWave works by indexing multidimensional data in a way that ensures values close together in multidimensional space are stored physically close together in the distributed data store of a user's choice. This makes it possible to execute spatiotemporal queries and processes for data in the magnitude of billions and of records quickly and efficiently. GeoWave allows for easy feature extension and platform integration, bridging the gap between distributed technologies and minimizing the learning curve for software application developers.

GeoWave product subscriptions and packages are priced based on the value they bring to customers. Commercial and government customers leverage GeoWave to create and manage geospatial operations around big data repositories. As GeoWave is built to manage massive sources of streaming data flowing from social media, cellphone, or similar "data firehoses," GeoWave packages are designed to incorporate all components required to handle these complex data successfully.

DGIS is uniquely qualified to deliver annual software subscriptions, Professional Services, Operation and Maintenance Support and Service-Level Agreements for xTerrain and GeoWave. While GeoWave relies on components developed and distributed using free and open source

licensing, DGIS retains the vast majority of development staff involved in developing these software products. In addition, DGIS owns material IP serving as key dependencies in core software, deployment packaging, and operation, as well as computational models powering the software.

<u>xTerrain</u>

xTerrain is a high-performance terrain and raster analysis system that includes a comprehensive suite of software, support and maintenance services. xTerrain simplifies the steps and decreases processing time for an analyst to perform typical terrain assessments, from identifying Helicopter Landing Zones (HLZs) to calculating cross country mobility and routes to Line of Sight operations and more. This is accomplished by making data available via a web application interface and a web service API and leveraging the best-available high-performance computing resources to generate analytic results rapidly. This allows analysts to focus more of their time on analytic questions and less on the process of acquiring data and configuring it to run on their local machine.

xTerrain works by making digital elevation model (DEM) and similar data available via web services and leveraging the best-available high-performance computing resources to quickly generate analytic results. xTerrain benefits to users include:

- Ease of use:
 - xTerrain eliminates the need for analysts to find, download and load data into a desktop Users can chose and run processing algorithms via a familiar, simple, GIS-like web interface
 - Once computed, terrain analytics data outputs may be served many times using standard, Open Geospatial Consortium (OGC) web services
- Speed
 - xTerrain uses the latest high-performance computing technology to accelerate, scale and enable terrain analytic workflows that impact missions
 - The system offers extremely fast processing speeds that enables large-scale batch analytics
- Greater efficiency
 - xTerrain pre-stages data in the cloud in an analysis-ready format, eliminating the need to locate and prepare various data
 - Interactive, iterative desktop-scale analytics and batch operations expand the range of intelligence questions that can be solved
- Easier integration
 - xTerrain was built to be integrated with new and existing workflows through commonly web services and standards and technology stacks (i.e. REST and OGC standards)
 - The system gives analysts the ability to review outputs from various raster datasets and analyze them in context with other data streams

xTerrain includes several openly available high- and low-resolution terrain datasets, as well as custom data tailored to the deployed environment and mission. Additional customer datasets can be added to xTerrain on request.

The system also includes several raster data derivative layers including slope, aspect and terrain based on mobility models described in academic papers. In addition to the pre-computed layers, xTerrain features interactive analytics that allow users to navigate to an area on the map and compute analytics such as viewsheds. Due to its ability to compute analytic very quickly, xTerrain

allows users to repeat the process quickly, while making corrections to model parameters and customizing and refining the results.

Commercial and government customers leverage xTerrain to create and manage geospatial operations around big data repositories. Note that xTerrain is built to work on extraordinarily large terrain datasets and xTerrain packages are designed to include all of the components required to successfully handle these complex data and efficiently deliver terrain analytics results.
