INFORMATION FOR ORDERING ACTIVITIES APPLICABLE TO ALL SPECIAL ITEM NUMBERS

SPECIAL NOTICE TO AGENCIES: Small Business Participation

SBA strongly supports the participation of small business concerns in the Federal Acquisition Service. To enhance Small Business Participation SBA policy allows agencies to include in their procurement base and goals, the dollar value of orders expected to be placed against the Federal Supply Schedules, and to report accomplishments against these goals.

For orders exceeding the micropurchase threshold, FAR 8.404 requires agencies to consider the catalogs/pricelists of at least three schedule contractors or consider reasonably available information by using the GSA Advantage!™ on-line shopping service (www.gsaadvantage.gov). The catalogs/pricelists, GSA Advantage!™ and the Federal Acquisition Service Home Page (www.gsa.gov/fas) contain information on a broad array of products and services offered by small business concerns.

This information should be used as a tool to assist ordering activities in meeting or exceeding established small business goals. It should also be used as a tool to assist in including small, small disadvantaged, and women-owned small businesses among those considered when selecting pricelists for a best value determination.

For orders exceeding the micropurchase threshold, customers are to give preference to small business concerns when two or more items at the same delivered price will satisfy their requirement.

ADDITIONAL INFORMATION FOR DOCUMENT CONVERSION SERVICES DESCRIPTION: The process of document conversion involves state-of-the-art scanning of the original document's text and graphic image into digital data, which is then transferred to a new media and formatted for use in a document imaging and storage system. Comprehensive DCS are used to transfer text and graphic images in existing documents (e.g., correspondence, files, technical manuals, land records, charts, engineering drawings, legal instruments, etc.) in whatever media they currently exist (e.g., paper, aperture cards, microfiche, microfilm, roll film, etc.) onto a new delivery/ storage media (e.g., CD-ROM disks, 4mm/8mm magnetic tape, magnetic storage disks, aperture cards, microfiche, microfilm, roll film, etc.) in any required format (e.g., raster images, ASCII text, SGML tagged for electronic distribution or publishing, PDF image files, etc.) required for use in a document imaging and storage system. Customized coding and indexing options are also available as part of the document conversion process. This SIN includes transcription and medical transcription services; it excludes transcriptions for Title III Monitoring.

SCOPE: Document conversion consists of scanning document images and converting them into electronic digital data, which is then transferred into a new format, and media for use in a document imaging, retrieval, and storage system. This SOW addresses the "backfile and day-forward conversion" of documents, which includes both file and data format and media conversion. It does not include data processing and communications equipment (e.g., digital computers, display devices, software, LAN/WAN networks), which may be employed in a document imaging, retrieval, and storage system. The types of DCS may include, but is not limited to: - Index data migration - Project evaluation or discovery - Optical mark scanning (OMR) - PDF Electronic file forms - Web Hosting (ASP)

GENERAL REQUIREMENTS: Unless otherwise specified by the ordering activity, the following general requirements are applicable to document conversion performed under this contract:

a. Contractor Responsibility - The Contractor shall be responsible for furnishing all items used in performing the work unless otherwise specified or approved by the Contracting Officer. The Contractor will act independently and not as an agent of the Government.
b. Document Conversion - The contractor shall scan a variety of source documents (e.g., correspondence, files, technical manuals, land records, charts, engineering drawings, or legal instruments) from a variety of source media (e.g., paper, film, microfiche, aperture cards, magnetic

8161 Maple Lawn Blvd. | Second Floor | Fulton, Maryland 20759 | Phone: 301-490-7725 | Fax: 410-884-9122

tape, or Mylar) having varying degrees of image quality (e.g., crisp originals, faded, poor contrast, or overexposed photographs) using character recognition (e.g., OCR, ICR) into a compressed digital file (e.g., C4 compressed image file format) and deliver that file in a variety of output file formats (e.g., PDF, SGML, HTML, XML, CAD, word processing) on a variety of output media (e.g., optical disks, magnetic tape, or CD-ROM).

c. Image Enhancement - The contractor shall perform image enhancement immediately after scanning. Image enhancement shall allow soiled, faded, deteriorated, and inferior quality images to be "cleaned-up". The image enhancement process shall reduce background noise and improve uneven line widths, dull edges, faded areas, and uneven illumination. If required by the ordering activity, special image enhancement (e.g., removal of date stamps and other markings, deskewing images to within 5 degrees or less of skew, cropping, rotation) shall be accomplished during the document conversion process.

d. Indexing - The contractor shall provide an index (in both hardcopy and digital format) for all converted data. The index shall permit tracking, retrieval, and storage of converted documents. The index shall be as specified by the ordering activity and shall consist, as a minimum, of the document number, document title, page number, revision level, and date. The index shall be structured from the source data and may be incorporated in the raster image header, incorporated as PDF Bookmarks, or provided separately, as specified by the ordering activity.

e. Data Entry - The contractor shall provide keystroke data entry, as required

f. Delivery Media - The contractor shall deliver the digitally converted data in an output media (e.g., CD-ROM, 4mm DAT or 8mm magnetic tape; 9-Track 1600 BPI or 6250 BPI magnetic tape; 3.5 inch, 5.25 inch, 12 inch, or 14 inch Write-Once Read-Many (WORM) optical or magnetic disks and/or Write-Many Read-Many optical disks) and output format (e.g., PDF text and/or image files, TIIF, BMP, JPEG, HTML, ASCII text, SGML tagged for electronic distribution or publishing, XML, CAD, word processing), as specified by the ordering activity. Delivery media shall be labeled in such a manner as to identify the contents of the deliverable.

g. Source Document Inspection - The contractor shall inspect all source documents and shall notify the ordering activity's Contracting Officer of any condition which will likely prevent successful performance of the work required. Such notification shall be received by the Contracting Officer within ten (10) working days (or as stipulated on the individual agency task order) following receipt of the source documents.

h. Quality Assurance - Unless otherwise specified by the ordering activity, the contractor shall perform 100% quality assurance of the scanned images to ensure that an image is produced for each page or microform frame; the image is equal to or better than the readability of the source page or microform frame; and the image is in accordance with the ordering activity's requirements. Marginal images (e.g., due to poor source images or film quality) shall be electronically marked and specified as such in the production reports. All indexing elements and SGML tagged data shall be parsed to ensure compliance with the requirements prior to delivery. Hollerith data shall be verified against the information contained in the title block of the document and will be edited, if necessary, to ensure the accuracy of the fields (e.g., document type, drawing number, drawing revision, sheet revision, card number, number of cards, drawing size, rights code, and security code). The ordering activity reserves the right to perform quality assurance on any products produced under this contract. Failure to meet quality assurance standards will result in re-work at the contractor's expense or contract termination, as appropriate.

i. Corrections - Document conversion errors caused by the contractor shall be considered corrections and shall not be charged to the ordering activity as an additional digitized item. Unless otherwise specified by the ordering activity, the contractor shall be liable for corrections for 12 months from output media delivery.

ACRONYMS AND DEFINITIONS

a. ASCII (American Standard Code for Information Interchange). An 8 bit code representing English letters, characters and numbers. Seven bits are used to identify each individual entity (128 maximum) with one bit for parity. Extended ASCII uses of eight bits to represent up to 256

8161 Maple Lawn Blvd. | Second Floor | Fulton, Maryland 20759 | Phone: 301-490-7725 | Fax: 410-884-9122

characters with no parity bit. Most computers use ASCII to represent text, which makes it possible to transfer data from one computer to another.

b. BMP (BitMaP) - The standard bit-mapped graphics format used in the Windows environment.
c. Backfile Conversion - Converts existing files for use in an imaging system.
d. BCR (Bar Code Recognition)- The recognition of bar code (i.e., A method of representing data by combining lines of varying width.).
e. CCITT (Consultative Committee on International Telephone and Telegraphy) sets standards for phones, faxes, modems, etc.
f. COLD (Computer Output to Laser Disk) - The computer system contains files of ASCII data (from input or application programs) or bit-mapped files previously scanned from microfilm documents or pictures. These output files are compress by a factor of 5-20:1 from the original documents and stored on WORM optical/laser disks.
g. DTD (Document Type Definition) - A description of the types of tags allowed in a document as well as the order in which they appear.
h. FTP (File Transfer Protocol) - An Internet protocol to move files from one computer to another.
i. Grayscale - The binary range of a graphic representation between pure black and pure white. A scale of 256 shades of gray will be a better representation than 16 shades.
j. HTML (Hypertext Markup Language) - HTML is a W3C standard (i.e., W3C HTML Recommendations) based upon SGML that is designed to specify the logical organization of a document. HTML instructions divide the text of a document into blocks called elements that define how the body of the document is to be displayed by the browser and those that define information about the document (e.g., title, relationship to other documents). Use of HTML instructions is based on detailed rules (e.g., the names of tags/elements, how they can be used), which are defined using SGML. There are three variants of HTML 4.0 (i.e., HTML 4.0 Transitional, HTML 4.0 Strict, and HTML 4.0 Frameset).
k. ICR (Intelligent Character Recognition) - The conversion of scanned images (bar codes or patterns of bits) to computer recognizable codes (ASCII characters and files) by means of software/programs, which define the rules of and algorithms for conversion.
l. ITU-T - CCITT renamed Telecommunication Standardization Section of the International Telecommunications Union.
m. JPEG (Joint Photographic Experts Group) - A compression algorithm for color image files.
n. Optical Character Recognition - The computer processing/conversion of scanned images both full text and forms to computer recognizable codes (ASCII letter, numbers, and characters).
o. PDF (Portable Document File) - PDF is a standard (i.e., Portable Document Format Reference Manual) provides a way of distributing, viewing, and printing documents with consistent appearance across a number of computer platforms. Files created from printed documents closely match the paper version including graphics, photographs, and fonts and are compressed for easy downloading and distribution. To view a .pdf file, an Adobe Acrobat Reader must be installed on the computer.
p. SGML (Standard Generalized Markup Language) - SGML is an ISO Standard (i.e., ISO 8879), which delineates a methodology of describing architecture for information exchange. SGML is a synthesis of three things: A Document Type Definition (DTD), a style sheet, and tagged data. The DTD describes which tags are allowed. The style sheet describes how the corresponding tag is to be formed. The tagged data is the document, in which every piece of data is "tagged", using tags defined in the DTD and Style Sheet.
q. Style Sheet - Describes how the SGML tag is to be formed.
r. TIFF (Tagged Image File Format) - One of the most widely supported files formats for storing bit-mapped images (8-bit color and grayscale) on personal computers. Includes several types and groups, which are compressed and uncompressed.
s. XML (extensible Markup Language) - XML is a W3C standard (i.e., W3C XML Recommendations) that could revolutionize the way intranet applications and document and non-document content are built and managed. XML promises "write once, publish anywhere" simplicity to users who don't have to become experts in Web programming languages. XML is an "instance" of SGML.

t. WORM (Write Once Read Many) - Permanent optical storage method where data once written, cannot be erased or altered.
u. W3C (World Wide Web Consortium) - W3C is an international industry consortium, which was founded in 1994 to lead the World Wide Web in developing common protocols that promote its evolution and ensure its interoperability. W3C develops standards, which are published in the form of Recommendations.

Verification:

Electronic records management systems or solutions must meet the applicable requirements as presented in the Universal Electronic Records Management (ERM) Requirements attachment to the solicitation. NARA created the Universal ERM Requirements to, (1) provide standards for agencies and existing Lines of Business to manage their electronic records; (2) help vendors determine capabilities for their ERM tools; and (3) help agencies identify the best tools to procure for their needs. For more information about the ERM Requirements contact NARA via PRMD@NARA.Gov. Note that these requirements will be periodically updated by NARA and will be incorporated into the MAS solicitation through a refresh and corresponding Mass Modification.

Security:
Background check

All vendor personnel with access to Federal records will be required to sign non-disclosure agreements. Some agencies may require vendor personnel obtain a security clearance before receiving access to records. Security clearances, when required on individual orders, will be obtained at the vendor's expense. b. Term licenses and/or maintenance may be discontinued by the ordering activity on thirty (30) calendar days written notice to the Contractor.

c. Annual Funding. When annually appropriated funds are cited on an order for term licenses and/or maintenance, the period of the term licenses and/or maintenance shall automatically expire on September 30 of the contract period, or at the end of the contract period, whichever occurs first. d. Cross-Year Funding Within Contract Period. Where an ordering activity's specific appropriation authority provides for funds in excess of a 12 month (fiscal year) period, the ordering activity may place an order under this schedule contract for a period up to the expiration of the contract period, notwithstanding the intervening fiscal years.

e. Ordering activities should notify the Contractor in writing thirty (30) calendar days prior to the expiration of an order, if the term licenses and/or maintenance is to be terminated at that time. a. The ordering activity may convert term licenses to perpetual licenses for any or all software at any time following acceptance of software. At the request of the ordering activity the Contractor shall furnish, within ten (l0) calendar days, for each software product that is contemplated for conversion, the total amount of conversion credits which have accrued while the software was on a term license and the date of the last update or enhancement.

b. Conversion credits which are provided shall, within the limits specified, continue to accrue from one contract period to the next, provided the software remains on a term license within the ordering activity.

c. The term license for each software product shall be discontinued on the day immediately preceding the effective date of conversion from a term license to a perpetual license.

d. The price the ordering activity shall pay will be the perpetual license price that prevailed at the time such software was initially ordered under a term license, or the perpetual license price prevailing at the time of conversion from a term license to a perpetual license, whichever is the less.

TERM LICENSE CESSATION

a. After a software product has been on a continuous term license for a period of _**12**_ months, a fully paid-up, non-exclusive, perpetual license for the software product shall automatically accrue to the ordering activity. The period of continuous term license for automatic accrual of a fully paid-up perpetual license does not have to be achieved during a particular fiscal year; it is a written Contractor commitment which continues to be available for software that is initially ordered under this contract, until a fully paid-up perpetual license accrues to the ordering activity. However, should the term license of the software be discontinued before the specified period of the continuous term license has been satisfied, the perpetual license accrual shall be forfeited.

b. The Contractor agrees to provide updates and maintenance service for the software after a perpetual license has accrued, at the prices and terms of Special Item Number l32-34, if the licensee elects to order such services. Title to the software shall remain with the Contractor.

UTILIZATION LIMITATIONS - (SIN 5511210 AND SIN 54151)

a. Software acquisition is limited to commercial computer software defined in FAR Part 2.101.

b. When acquired by the ordering activity, commercial computer software and related documentation so legend shall be subject to the following:

(1) Title to and ownership of the software and documentation shall remain with the Contractor, unless otherwise specified.

(2) Software licenses are by site and by ordering activity. An ordering activity is defined as a cabinet level or independent ordering activity. The software may be used by any subdivision of the ordering activity (service, bureau, division, command, etc.) that has access to the site the software is placed at, even if the subdivision did not participate in the acquisition of the software. Further, the software may be used on a sharing basis where multiple agencies have joint projects that can be satisfied by the use of the software placed at one ordering activity's site. This would allow other agencies access to one ordering activity's database. For ordering activity public domain databases, user agencies and third parties may use the computer program to enter, retrieve, analyze and present data. The user ordering activity will take appropriate action by instruction, agreement, or otherwise, to protect the Contractor's proprietary property with any third parties that are permitted access to the computer programs and documentation in connection with the user ordering activity's permitted use of the computer programs and documentation. For purposes of this section, all such permitted third parties shall be deemed agents of the user ordering activity.

8161 Maple Lawn Blvd. | Second Floor | Fulton, Maryland 20759 | Phone: 301-490-7725 | Fax: 410-884-9122

(3) Except as is provided in paragraph 8.b(2) above, the ordering activity shall not provide or otherwise make available the software or documentation, or any portion thereof, in any form, to any third party without the prior written approval of the Contractor. Third parties do not include prime Contractors, subcontractors and agents of the ordering activity who have the ordering activity's permission to use the licensed software and documentation at the facility, and who have agreed to use the licensed software and documentation only in accordance with these restrictions. This provision does not limit the right of the ordering activity to use software, documentation, or information therein, which the ordering activity may already have or obtains without restrictions.

(4) The ordering activity shall have the right to use the computer software and documentation with the computer for which it is acquired at any other facility to which that computer may be transferred, or in cases of Disaster Recovery, the ordering activity has the right to transfer the software to another site if the ordering activity site for which it is acquired is deemed to be unsafe for ordering activity personnel; to use the computer software and documentation with a backup computer when the primary computer is inoperative; to copy computer programs for safekeeping (archives) or backup purposes; to transfer a copy of the software to another site for purposes of benchmarking new hardware and/or software; and to modify the software and documentation or combine it with other software, provided that the unmodified portions shall remain subject to these restrictions.

(5) "Commercial Computer Software" may be marked with the Contractor's standard commercial restricted rights legend, but the schedule contract and schedule pricelist, including this clause, "Utilization Limitations" are the only governing terms and conditions, and shall take precedence and supersede any different or additional terms and conditions included in the standard commercial legend.

SOFTWARE CONVERSIONS - (SIN 511210)

Full monetary credit will be allowed to the ordering activity when conversion from one version of the software to another is made as the result of a change in operating system, or from one computer system to another.

Federal Supply Schedule contract BPAs eliminate contracting and open market costs such as: search for sources; the development of technical documents, solicitations and the evaluation of offers. Teaming Arrangements are permitted with Federal Supply Schedule Contractors in accordance with Federal Acquisition Regulation (FAR) 9.6.

This BPA will further decrease costs, reduce paperwork, and save time by eliminating the need for repetitive, individual purchases from the schedule contract. The end result is to create a purchasing mechanism for the ordering activity that works better and costs less.
