Unique Identification (UID) / Radio Frequency Identification (RFID)
Special Item Number (SIN) 617 13
This process is used to improve inventory management and reduce operating costs for a variety of applications, including supply chain management, logistics, and anti-counterfeiting.

Unique Identification (UID) is a system of distinguishing one object from another. UID of items requires that qualifying items have a data matrix inscribed either directly on the item or on a permanent machine-readable label affixed to the item. As of January 1, 2004, UID has been a mandatory Department of Defense (DoD) requirement for all acquisitions. It is also mandatory, since January 1, 2006 for all legacy items and all Government Furnished Property (GFP).

Radio Frequency Identification (RFID) is a method of remotely storing and retrieving data using devices called RFID tags/transponders. An RFID tag is a small object integrated with a silicon chip, such as an adhesive sticker, that can be attached to or incorporated into a product. RFID tags contain antennas to enable them to receive and respond to radio-frequency queries from an RFID transceiver. RFID allows for individual items to have a unique identifier and can identify many items at once. RFID enables consumer packaged goods companies, retailers and other industries to improve their operating efficiency throughout their supply chains.

Using GSA Schedules Is Simple

The Multiple Award Schedule
A Multiple Award Schedule (MAS), also known as a GSA Schedule, is one of the most powerful procurement tools available to you. Essentially, a MAS is a listing of awarded contractors that can be used by all federal entities to achieve their missions. GSA awards contracts to responsible companies that offer commercial items falling within the general descriptions of the Schedules. We have determined that prices are fair and reasonable by comparing the prices or discounts that a company offers the government with the prices or discounts that the company offers its best commercial customers. This negotiation objective is commonly known as “most favored customer” pricing. Ordering agencies simply follow the streamlined ordering procedures contained in Federal Acquisition Regulation Subpart 8.4.

It’s That Easy
The MAS program mirrors commercial buying practices more than any other procurement process in the federal government. GSA provides customers access to products and services at volume discount pricing on a direct delivery basis. This means you’ll experience shorter procurement lead times, lower administrative costs, and reduced internal staff hours devoted to obtaining these products.

The MAS program was designed with federal customers in mind, and it provides a vast array of commercial items and services that can be purchased quickly and easily. Not only does your agency receive fast, direct access to industry leaders, but you can also obtain many other products and services through other Schedules as well.

Cutting the Red Tape
When placing orders under a Multiple Award Schedule, you do not need to synopsize your requirements, formally “set aside” for small business, or make a separate determination of fair and reasonable pricing. GSA has already complied with these requirements and determined that prices are fair and reasonable. By utilizing the Schedules, you can avoid the stress and work normally associated with conducting your own procurement.

It Never Hurts to Ask for Extra Savings
The price reduction clause allows contractors to offer you a price reduction on any product at any time. The reduction can be based on an individual circumstance such as ordering a large volume of services. Agencies may negotiate price reductions, and Schedule contractors are free to offer spot discount pricing.

Additionally, FAR 8.405 requires ordering activities to seek price reductions when the order value is expected to exceed the established Maximum Order (MO) Threshold. When ordering at or above the Maximum Order Threshold, federal buyers should inquire about further Schedule price discounts. The contractor may then do one of the following:
- Offer a new lower price for this purchase
- Offer the lowest price available under the contract, or
- Decline the order within five days

A delivery order that exceeds the maximum order may be placed with the contractor selected in accordance with FAR 8.404. The order may be placed under the Schedule contract.

Flexible Purchasing Options with Blanket Purchase Agreements
If you are dealing with repetitive buys, Blanket Purchase Agreements (BPAs) are for you.

A BPA is a simplified method of filling recurring needs for services and products, while leveraging your buying power by taking advantage of quantity discounts, thereby saving administrative time and reducing paperwork. A BPA can be thought of as an “account” established by you (the customer) with a Schedule contractor. By setting up a BPA, you save time and resources. Simplify your ordering by processing a BPA once and then use it as your agency’s needs occur.

With a MAS BPA, you can order as little as you want, as much as you want, and as often as you want. You are not restricted by any dollar limitations when placing orders under a MAS BPA. Also, a BPA can be set up for your field offices across the nation to use, allowing them to participate in your BPA and place orders directly with Schedule contractors. In doing so, your entire agency reaps the benefits of additional discounts negotiated into your own BPA.

For further guidance on establishing a BPA, visit our GSA Center for Acquisition Excellence Campus at www.gsa.gov/centerforacquisitionexcellence.

Total Solutions through Contractor Teaming Arrangements
For complex tasks, Contractor Teaming Arrangements may be desirable from both government and industry perspectives. A Contractor Teaming Arrangement allows two or more GSA Schedule contractors to work together to meet agency requirements, allowing them to compete for orders for which they may not qualify independently. Contractors on the same Schedule, or across multiple Schedules, can team up.

By using Contractor Teaming Arrangements, contractors can complement each other’s unique capabilities while offering government agencies the best turnkey solutions, based on a combination of performance, cost and delivery of acquired services. You can benefit from using Contractor Teaming Arrangements by buying a total solution, rather than making separate buys from various contractors. Visit www.gsa.gov/schedules for more information.

Small Business Means Big Business
The GSA and the Small Business Administration (SBA) strongly support the participation of small business concerns in the Multiple Award Schedules program. To enhance small business participation, SBA policy requires agencies to include in their procurement base and goals the dollar value of orders expected to be placed against the Multiple Award Schedules, and to report accomplishments against these goals.

For more details, please visit www.sba.gov.

The GSA Schedules eLibrary Web site contains information on business size and socioeconomic status. This information should be used as a tool to assist ordering activities in meeting or exceeding established small business goals. While utilizing the information found on this Web site, you are also encouraged to consider small, 8(a), small disadvantaged, veteran-owned, service-disabled veteran-owned, HUBZone and women-owned small businesses when
making a “best value” determination. To visit GSA Schedules eLibrary, log on to www.gsa.gov/elibrary.

**Variable Contract Periods**
Generally, Multiple Award Schedules no longer have a prescribed beginning and ending date. The schedule periods will be continuous, and will contain contracts with contract periods that commence on the Date of Award (DOA) and expire in five years (exclusive of any options) from the DOA.

**Authorized Users**
The agencies and activities named below may use contracts established under GSA Schedules:

- All federal agencies and activities in the executive, legislative and judicial branches;
- Government contractors authorized in writing by a federal agency pursuant to 48 CFR 51.1;
- Mixed ownership government corporations (as defined in the Government Corporation Control Act);
- The government of the District of Columbia; and
- Other activities and organizations authorized by statute or regulation to use GSA as a source of supply.

*Note:* The GSA Order, Eligibility to Use GSA Sources of Supply and Services, provides further information regarding agencies and activities authorized to use GSA Schedules.

**Disaster Recovery Purchasing (Section 833)**
Disaster Recovery Purchasing makes all GSA Multiple Award Schedules available to all state and local governments to enable them to respond and assist in the recovery from a disaster.

State and local governmental entities may use GSA Schedule contracts to purchase products and services in advance of a major disaster declared by the president, as well as in the aftermath of an emergency event. State and local governmental entities are responsible for ensuring that the products or services purchased are to be used to facilitate recovery.

This is a voluntary program for Schedule contract holders and state and local governments.

All GSA Multiple Award Schedule contracts are open to state and local government agencies for the specific purpose of disaster recovery only.

For more information visit: www.gsa.gov/disasterrecovery.

**Geographic Coverage**
All GSA Schedules provide contractors the opportunity to offer worldwide coverage. Schedule contractors may offer any of the following three categories of geographic coverage:

- Domestic, which will cover delivery to the 48 contiguous states; Washington, DC; Alaska, Hawaii, and Puerto Rico; and U.S. territories;
- Worldwide, which will cover delivery domestically and overseas; and
- Overseas Only, which will cover delivery to overseas destinations.

**Ordering Procedures for Supplies, and Services Not Requiring a Statement of Work (SOW)**

Ordering activities shall use the procedures in Federal Acquisition Regulation (FAR) 8.405-1 when ordering Schedule contract supplies and fixed-price services for a specific task, where a Statement of Work (SOW) is not required — e.g., installation, maintenance, and repair.

*Note:* Ordering activities shall use the procedures in FAR 8.405-2, Ordering Procedures for Services Requiring a Statement of Work (SOW), when ordering Schedule contract services priced at hourly rates.

When ordering services exceeding $100,000 using Department of Defense (DoD) funds, ordering activities shall follow the Defense Federal Acquisition Regulation Supplement (DFARS), which has been amended to implement Section 803 of the National Defense Authorization Act for Fiscal Year 2002 (Public Law 107-107). DoD offices and non-DoD activities placing orders on behalf of DoD should refer to DFARS 208.404-70 for additional information regarding ordering procedures and documentation requirements.

**Orders At, Or Below, The Micro-Purchase Threshold**
The ordering activity may place orders with any GSA Schedule contractor that can meet the agency’s needs. The ordering activity should attempt to distribute orders among Schedule contractors.

**Orders Exceeding The Micro-Purchase Threshold, But Not Exceeding The Maximum Order Threshold**

*Note:* Each Schedule contract has a maximum order threshold, which will vary by special item number. The maximum order threshold represents the point where, given the dollar value of the potential order, the ordering activity shall seek a price reduction.

To ensure a best value determination is made, as required by FAR 8.404(d), the ordering activity shall:

- Survey at least three Schedule contractors through the GSA Advantage!® online shopping service or review the catalogs or pricelists of at least three Schedule contractors, and seek additional price reductions where appropriate;
- Select the best value; and
- Place the order directly with the Schedule contractor.

When determining “best value,” the ordering activity may consider, among other factors, the following:

- Price, including any additional price reductions offered;
- Past performance;
- Special features of the supply or service required for effective program performance;
- Trade-in considerations;
- Probable life of the item selected compared with that of a comparable item;
- Warranty considerations;
- Maintenance availability;
- Environmental and energy efficiency considerations;
- Delivery terms; and
- Socioeconomic status.
Ordering activities may consider socioeconomic status when identifying contractors for consideration or competition for award of an order or a Blanket Purchase Agreement (BPA). At a minimum, ordering activities should consider, if available, at least one small business, veteran-owned small business, service disabled veteran-owned small business, HUBZone small business, woman-owned small business, or small disadvantaged business Schedule contractor. GSA Advantage!® and Schedules eLibrary contain information on small business representations of Schedule contractors.

Orders Exceeding The Maximum Order Threshold Or When Establishing A BPA
In addition to following the ordering procedures, above, for orders exceeding the micro-purchase threshold, but not exceeding the maximum order threshold, the ordering activity shall:

- Review the pricelists of additional Schedule contractors (the GSA Advantage!® online shopping service can be used to facilitate this review);
- Based upon the initial evaluation, seek price reductions from the Schedule contractors considered to offer the best value; and
- Place the order, or establish the BPA, with the Schedule contractor that provides the best value. If further price reductions are not offered, an order may still be placed.

Documentation
At a minimum, the ordering activity shall document:

- The Schedule contracts considered, noting the contractor from which the supply or service was purchased;
- A description of the supply or service purchased;
- The amount paid; and
- If applicable, the circumstances and rationale for restricting consideration of Schedule contractors to fewer than required in these ordering procedures (see FAR 8.405-6).

Multiple Award Schedule

Ordering and Best Value Determination Guidelines
It is important to follow the ordering procedures set forth in FAR 8.4. They require that you make a best value determination before placing Multiple Award Schedule orders above the micro-purchase threshold (currently $3,000). Here is a quick checklist to ensure you’ve gone through a best value determination process when following the ordering procedures for services on Schedule buys.

Did you prepare a request for quote, including a statement of work, that:
- Outlined the work to be performed, location of work, period of performance, deliverable schedule, applicable standards, acceptance criteria and any special requirements
- Requested contractors to submit either a firm-fixed price or a ceiling price to provide services outlined in the statement of work
- Requested a project plan or past performance/experience information, if necessary and appropriate
- Stated the basis to be used for selecting the contractor to receive the order

Did you provide the request to at least three sources under the Multiple Award Schedule?
Please list the names of the contractors to whom the request was provided:
_______________________________________________________________________________________________
_______________________________________________________________________________________________
_______________________________________________________________________________________________

Was the requirement in excess of the Schedule's maximum order? If yes, did you provide the request to additional sources under the Multiple Award Schedule AND ask for a price reduction? Please list the names of the contractors to whom the request was provided:
_______________________________________________________________________________________________
_______________________________________________________________________________________________
_______________________________________________________________________________________________

Did you evaluate responses against the factors identified in the request for quote and select the contractor that represents the best value? Indicate which of the non-price factors below were considered in your best value decision:
- Past performance (e.g., experience)
- Special features of the service
- Warranty considerations
- Technical qualifications
- Training
- Service availability
- Other:____________________________________________

Have you documented your Schedule buy? If yes, did you:
- Identify the service purchased
- Identify the Schedule contractor from which the services were purchased
- Identify the amount paid
- Document the evaluation of Schedule contractors’ quotes that formed the basis for selecting the contractor that received the order and the rationale for any trade-offs used in making the selection (if above the micro-purchase threshold)
- Include the basis for the determination to use a labor-hour or time-and-materials order (if other than a firm-fixed price order)

Best Value Blanket Purchase Agreement Multiple Award Schedule

(Insert Customer Name)

In the spirit of the Federal Acquisition Streamlining Act (Agency) and (Contractor) enter into a cooperative blanket purchase agreement to further reduce the administrative costs of acquiring commercial items from the General Services Administration (GSA) Multiple Award Schedule Contract(s) ________________.

Multiple Award Schedule contract BPAs eliminate contracting and open market costs such as: the search for sources; the development of technical documents and solicitations; and the evaluation of bids and offers. Contractor Team Arrangements are permitted with Multiple Award Schedule contractors in accordance with Federal Acquisition Regulation (FAR) Subpart 9.6.

This BPA will further decrease costs, reduce paperwork and save time by eliminating the need for repetitive, individual purchases from the Schedule contract. The end result is to create a purchasing mechanism for the government that works better and costs less.
