Federal Supply Service

Authorized Federal Supply Schedule Price List

On-line access to contract ordering information, terms and conditions, up-to-date pricing, and the option to create an electronic delivery order are available through GSA Advantage!™, a menu-driven database system. The INTERNET address for GSA Advantage!™ is GSAAAdvantage.gov

**Federal Supply Schedule (FSS) 621 II
Medical Laboratory Testing and Analysis Services
Product Service Code Q301**

Contract Number: 36F79722D0028

Contract Period: **December 1, 2021** through **November 30, 2026**

Modification P00002

Effective 4/01/2022

*(For more information on ordering from Federal Supply Schedules, enter the following address into your web browser:

Business Size: Service-Disabled Veteran Owned Small Business (SDVOSB)

Data Universal Number System (DUNS) Number: 021104354

System For Award Management (SAM) Cage Code: 8SRD9

SAM UE ID : PNKHDVRXZC29

“Prices Shown Herein are Net (discount deducted).”

Customer Information:

Table of awarded special item number(s):

SIN 621 -	Description
200	Anatomic Pathology
201	Clinical Chemistry
203	Cytology
204	Clinical Drugs of Abuse and Toxicology
205	Endocrinology
207	Hemostasis
208	Immunology
209	Microbiology
211	Serology
212	Urinalysis

Business Hours	Daily, Monday - Friday (8am - 5pm)
Standard Delivery Time / TurnAround Times (TAT)	<p>Delivery:</p> <p>Routine Test - 2 days</p> <p>Complex Tests – 4 days</p> <p>Turn Around Times:</p> <p>3 days (after receipt of order) Assay Schedule - daily</p>
Expedited Delivery Time for STAT Services	Provided at no additional charge to the Government
Additional Routine (Non-STAT) or Unscheduled Pickups	Provided at no additional charge to the Government
Reperformance of Services	<p>If a testing error occurs, repeat tests will be ordered, if necessary, at no additional cost to the ordering activity. Repeat tests shall be the same test originally ordered. Before repeat tests can be ordered, Central Tox must verify that there is sufficient viable sample to re-run the test. Once this is verified, Central Tox will immediately add the repeat test. If there is not adequate sample to complete the testing, Central Tox will notify the ordering activity that testing could not be repeated. Additionally, repeat testing will be performed, at no additional cost to the ordering activity, if the results do not, in the opinion of the requesting physician, fit the clinical picture of the patient. When requesting these tests, the requesting physician or representative will explain the conditions of the patient, or any discrepancies observed.</p> <p>Samples requested to be re-tested are treated as new samples, where aliquots are taken from the raw specimen. During the initial accessioning of the specimen, a 1 mL aliquot of specimen is transferred to an appropriately labeled borosilicate glass culture tube which is then capped. These preserved samples are held in racks for 60 days within refrigerators that are monitored to have temperatures within 2°C to 8°C. A 200 ul sample is needed for an extraction, that is required to obtain confirmatory data and 0.5 mL of specimen is needed for a retest of drug screening data. If a specimen is requested to be re-analyzed, the specimen will come from the preserved storage sample to be re-extracted for confirmatory data or re-screen for presumptive screening data.</p>

	<p>Following the initial analysis of specimens on the Olympus AU640, the data is checked for any error flags indicating the need for a dilution or presence of clots. In the event of a clotted or concentrated specimen, the specimen is re-analyzed as a 5X dilution using synthetic urine to dilute the sample. The accession number, error flag, associated assay, dilution factor and updated result are documented on a laboratory worksheet that is included with the screening data and extraction paperwork for review by the reporting analyst.</p> <p>During the processing of confirmatory data, samples deemed to be “false positives” are manually entered as zero in the LIMS results entry module. Reasons for calling a result a false positive are noted in the data summary sheets; these reasons include ion ratios being out, retention time shifts, and poor chromatography. Existing values for results needing to be repeated are deleted and the specimen number, dilution factor (if needed), date repeated, and reason repeated are logged into a laboratory spreadsheet located on the local network. The results from the repeated specimen are then manually entered into the LIMS prior to reporting to the client.</p> <p>In Central Tox’s facility, the number of tests requiring a re-test is below 0.5%. The samples are stored at 2-8C and are only re-tested if they are still within the time limits the company has established for a valid test.</p> <p>The re-test is performed exactly as the original test in all cases. In some instances, when a particular drug is at a very high concentration, Central Tox may need to dilute the sample prior to the re-test.</p>
FOB Point(s)	FOB Destination 48 contiguous States, (excluding California and Rhode Island).
Credit Card Acceptance	Accepted at all dollar amounts.
Minimum Order	1 Test Unit
Payment Terms	1% Ten (10) Days, Net 30; credits card excluded
Annual Rebate	None
Commercial Price List	Central Tox LLC Price List; effective 01/01/2020
Number of Accepted Items	750
