Reperformance of Services	The ordering activity reserves the right to request reperformance, if possible, of any nonconforming service or confirmation of a test result. If a testing error occurs, repeat tests will be ordered, if necessary, at no additional cost to the ordering activity. Repeat tests shall be the same test originally ordered. Before repeat tests can be ordered, MCI must verify that there is sufficient viable sample to re-run the test. Once this is verified, MCI will immediately add the repeat test. If there is not adequate sample to complete the testing, MCI will notify the ordering activity that testing could not be repeated. Additionally, repeat testing will be performed, at no additional cost to the ordering activity, if the results do not, in the

	opinion of the requesting physician, fit the clinical picture of the patient. When requesting these tests, the requesting physician or representative will explain the conditions of the patient, or any discrepancies observed. The MCI Diagnostic Laboratory will adhere to all requirements of the contract and/or agreement for initial specimens submitted for re-testing if needed. The rate at which MCI will invoice for retesting will be at no charge if MCI is responsible for the inadequate specimen handling or improper instrument maintenance. If MCI performs the laboratory testing request according to manufacturer recommendation and the specimen is properly handled by the Laboratory, the charge rate at which MCI will invoice for the re-testing will be at the contract FSS schedule rate.
