

# Operational Intelligence, LLC

1069 West Broad St #771 Falls Church, VA 22046

## GENERAL SERVICES ADMINISTRATION

### **Federal Acquisition Service**

*Authorized Federal Supply Schedule Price List*

Online access to contract ordering information, terms and conditions, up-to-date pricing, and the option to create an electronic delivery order is available through **GSA Advantage!**<sup>™</sup>, a menu-driven database system. The internet address for **GSA Advantage!**<sup>™</sup> is:  
**<http://www.GSAAdvantage.gov>**.

### **Schedule for ooCORP - Professional Services Schedule (PSS)**

**Federal Supply Group: PSS Class:**

**Contract Number: 47QRAA18D000B**

**For more information on ordering from Federal Supply Schedules, click on the FSS Schedules button at <http://www.gsa.gov/schedules-ordering>**

**Contract Period: October 20, 2017 – October 19, 2022**

**Contractor:** OPERATIONAL INTELLIGENCE, LLC  
800 CORPORATE DR  
STE 301  
STAFFORD, VA 22554-4889

**Business Size:** Women-Owned Small Business  
Service-Disabled Veteran-Owned Small Business

**Telephone:** (703) 559-0030  
**Web Site:** <http://www.oi-llc.com>  
**Email:** [paul.burkey@oi-llc.com](mailto:paul.burkey@oi-llc.com)  
**Contract Administration:** Paul F Burkey

### CUSTOMER INFORMATION:

**1a. Table of Awarded Special Item Number(s) with appropriate cross-reference to page numbers:**

SIN	Recovery	SIN Description
874-1	874-1RC	Integrated Consulting Services
874-7	874-7RC	Integrated Business Program Support Services

**1b. Identification of the lowest-priced model number and lowest unit price for that model for each special item number awarded in the contract. This price is the Government price based on a unit of one, exclusive of any quantity/dollar volume, prompt payment, or any other concession affecting price. Those contracts that have unit prices based on the geographic location of the customer, should show the range of the lowest price, and cite the areas to which the prices apply. Not applicable**

**1c. If the Contractor is proposing hourly rates, a description of all corresponding commercial job titles, experience, functional responsibility, and education for those types of employees or subcontractors who will perform services shall be**

**provided. If hourly rates are not applicable, indicate “Not applicable” for this item.** See Price List

2. **Maximum Order:** \$500,000
3. **Minimum Order:** \$100.00
4. **Geographic Coverage (delivery Area):** Domestic only: 50 St, DC, Territ.
5. **Point(s) of production (city, county, and state or foreign country):** Same as company address
6. **Discount from list prices or statement of net price:** Government net prices (discounts already deducted). See Price List
7. **Quantity discounts:** None
8. **Prompt payment terms:** Net 30 days
- 9a. **Notification that government purchase cards are accepted up to the micro-purchase threshold:** Yes
- 9b. **Notification whether Government purchase cards are accepted or not accepted above the micro-purchase threshold:** Contact Contractor
10. **Foreign items (list items by country of origin):** None
- 11a. **Time of Delivery (Contractor insert number of days):** Specified on the Task Order
- 11b. **Expedited Delivery. The Contractor will insert the sentence “Items available for expedited delivery are noted in this price list.” under this heading. The Contractor may use a symbol of its choosing to highlight items in its price list that have expedited delivery:** Contact Contractor
- 11c. **Overnight and 2-day delivery. The Contractor will indicate whether overnight and 2-day delivery are available. Also, the Contractor will indicate that the schedule customer may contact the Contractor for rates for overnight and 2-day delivery:** Contact Contractor
- 11d. **Urgent Requirements. The Contractor will note in its Price List the “Urgent Requirements” clause of its contract and advise agencies that they can also contact the Contractor’s representative to effectuate a faster delivery:** Contact Contractor
12. **F.O.B Point(s):** Not applicable
- 13a. **Ordering Address(es):** Same as company address
- 13b. **Ordering procedures: For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPAs), and a sample BPA can be found at the GSA/FSS Schedule homepage ([fss.gsa.gov/schedules](https://fss.gsa.gov/schedules)).**
14. **Payment address(es):** Same as company address
15. **Warranty provision.:** Not applicable
16. **Export Packing Charges (if applicable):** Not applicable

- 17. Terms and conditions of Government purchase card acceptance (any thresholds above the micro-purchase level):** None
- 18. Terms and conditions of rental, maintenance, and repair (if applicable):** Not applicable
- 19. Terms and conditions of installation (if applicable):** Not applicable
- 20. Terms and conditions of repair parts indicating date of parts price lists and any discounts from list prices (if applicable):** Not applicable
- 21. Terms and conditions for any other services (if applicable):** Not Applicable
- 22. List of service and distribution points (if applicable):** Not applicable
- 23. List of participating dealers (if applicable):** Not applicable
- 24. Preventive maintenance (if applicable):** Not applicable
- 25a. Environmental attributes, e.g., recycled content, energy efficiency, and/or reduced pollutants:** Not applicable
- 25b. If applicable, indicate that Section 508 compliance information is available on Electronic and Information Technology (EIT) supplies and services and show where full details can be found (e.g. contactor's website or other location.) The EIT standards can be found at: [www.Section508.gov/](http://www.Section508.gov/).**
- 26. Data Universal Numbering System (DUNS) number:** 828235551  
**CAGE Code:** 56PG8
- 27. Notification regarding registration in System for Award Management (SAM) database:** Registered
- 28. Final Pricing:**  
The rates shown below include the Industrial Funding Fee (IFF) of 0.75%:

<b>OI-LLC Labor Category Descriptions</b>	
<b>Skill Level Definitions</b> (*Not applicable to Operations SME or Intelligence SME)	
<b>Level I (Entry/Junior): minimum of 1 year of experience</b>	
Requires a HS Diploma and a minimum of 1 year of experience in the field or in a related area. Has knowledge of commonly-used concepts, practices, and procedures within a particular field. Primary job functions do not require exercising independent judgment. Works under general supervision; reports to a supervisor or manager.	
<b>Level II (Intermediate): minimum of 5 years of experience</b>	
Requires a minimum of a Bachelor's degree and a minimum of 5 years of experience in the field or in a related area. Familiar with a variety of the field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Leads and directs the work of others. Reports to a supervisor or manager.	
<b>Level III (Senior): minimum of 12 years of experience</b>	
Requires a minimum of a Bachelor's degree and a minimum of 12 years of experience in the field or in a related area. Familiar with a variety of the field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals and independently performs a wide variety of complicated tasks. Provides consultation on complex projects and is considered to be the top level contributor/specialist. Leads and directs the work of others. Reports to an executive or director.	
<b>LABOR CATEGORY DESCRIPTION</b>	
<b>Administrative Support</b>	Includes clerical personnel, administrative services personnel, and technical publications personnel. Performs administrative duties in a staff activity. Performs specialized assignments relating to typing, word processing, graphics illustration using computers with very little direction. Performs a variety of support services such as operation of reproduction equipment to produce large volumes of documents, courier service and mail service, etc. Maintains personnel and other files; prepares correspondence, schedules and coordinates travel. Assists in the preparation of documents and supports the development of contract deliverables and reports. Responsible for integrating the graphics generated with automated tools and the deliverable documents.
<b>Business Case Analysis Specialist</b>	Identifies costs for existing IT systems (maintenance, operations, etc). Identifies life cycle costs for proposed IT systems (development, operations, maintenance). Identifies cost savings/cost avoidance associated with retirement of old system or improved performance of new system.
<b>Chief Scientist</b>	Performs the functions of a technical expert in the relevant scientific field in the support of major programs or system development. Applies scientific expertise in defining and resolving system issues, performing analysis and developing plans and requirements in the subject-matter area for complex systems. Coordinates and manages the preparation of analyses, evaluations, and recommendations for proper implementation of programs and systems.
<b>Computer Security Systems Engineer</b>	Performs a variety of routine project tasks applied to specialized technology problems. Tasks involve integration of electronic processes or methodologies to resolve total system problems, or technology problems as they relate to Information Assurance requirements. Conducts security assessments and security consulting services. Analyzes information security requirements. Applies operating system security configuration. Applies analytical and systematic approaches in the resolution of problems of work flow, organization, and planning. Conducts security certification and accreditation for information technologies.
<b>Computer Security Systems Specialist</b>	Analyzes and defines Information Assurance security requirements for Multiple Security Levels (MSL) systems and non-MLS systems. Designs, develops, engineers, and implements solutions to MLS and non-MLS requirements. Gathers and organizes technical information about an organization's missions, goals, and requirements, existing security products, and ongoing programs in the Information Assurance arena.
<b>Computer Systems Analyst</b>	Analyzes and develops computer software possessing a wide range of capabilities, including numerous engineering, business, and records management functions. Develops plans for automated information systems from project inception to conclusion. Analyzes user interfaces, maintain hardware and software performance tuning, analyze workload and computer usage, maintain interfaces with outside systems, analyze downtimes, analyze proposed system modifications, upgrades and new COTS. Analyzes the problem and the information to be processed. Defines the problem, and develops system requirements and program specifications, from which programmers prepare detailed flow charts, programs, and tests. Coordinates closely with programmers to ensure proper implementation of program and system specifications. Develops, in conjunction with functional users, system alternative solutions.
<b>Consultant</b>	Gathers facts through research, interviewing, surveys, etc. analyze the client's business, draw conclusions, prepare final reports and gives presentations. Is proficient in the use of key analysis and graphics tools. Uses in-depth consultative skills and business knowledge based on accumulated experience and education aligned to practice business objectives and processes. Manage the fact finding, analysis, and development of hypothesis/ conclusions, production of final reports and delivery of presentations. Has expert knowledge of practice, consulting group and matrixed organization operations and business objectives. Has in-depth knowledge of market/ industry and service line.

<b>Data/Configuration Management Specialist</b>	Supports configuration management planning. Describes provisions for configuration identification, change control, configuration status accounting, and configuration audits. Supports configuration planning. Identifies and maintains the original configuration of requirements documentation, design documentation, software, and related documentation. Responsible for configuration change control. Supports the change process so that only approved and validated changes are incorporated into product documents and related software. Responsible for configuration status accounting. Tracks all problems and changes in product documents and software and reports changes and current configuration. Responsible for configuration audits. Supports audits to verify that requirements of all baselines have been met.
<b>Engineer</b>	Provides engineering, technical, and managerial direction for problem definition, analysis, requirement development and implementation for complex systems in the engineering discipline required to meet technical requirements. Makes recommendations and advises on system development, improvements, optimization, or support efforts. Performs risk assessments and analysis employing modeling and simulation techniques.
<b>Functional Analyst</b>	Works on complex application problems involving all phases of systems analysis to provide solutions. Analyzes user needs to determine functional and cross-functional requirements. Performs functional allocation to identify required tasks and their interrelationships. Provides technical support for software development and integration tasks, including review of work products for correctness, adherence to the design concept and to user standards.
<b>Functional Expert Consultant</b>	Recognized for strong expertise in industry issues and trends. Utilize functional area expertise gained through direct industry experience to assess the operational and functional baseline of an organization and its organizational components. Work with senior managers and executives to provide industry vision and strategic direction with regard to their enterprise. Guide the determination of information technology inadequacies and/or deficiencies that affect the functional area's ability to support/meet organizational goals. Generate functional area strategies for enhanced IT operations in a cross-functional area mode throughout the organization. Participate in account strategy sessions, strategic assessments and design reviews to validate enterprise approach and associated work products.
<b>Homeland Security Specialist</b>	Provides technical and managerial direction for problem definition, analysis, requirements development, and implementation for complex systems in the Homeland Security area. Makes recommendations and advises on organization wide system improvements in the area(s) of the individual's specialized Homeland Security expertise.
<b>Information Assurance Consulting Engineer</b>	Establishes and satisfies complex system-wide information security requirements based upon the analysis of user, policy, regulatory, and resource demands. Supports customers at the highest levels in the development and implementation of doctrine and policies. Applies expertise to government and commercial common user systems, as well as to dedicated special purpose systems requiring specialized security features and procedures. Examples could include classified intelligence and command and control-related networks.
<b>Intel Analyst</b>	Performs task-relevant intelligence duties (e.g. Imagery Intelligence (IMINT)/Signals Intelligence (SIGINT) exploitation & reporting, all-source analysis, intelligence planning, collection management) supporting the planning and execution of military operations.
<b>Management Analyst</b>	Develops, analyzes, evaluates, advises on, and/or improves the effectiveness of work methods and procedures, organizations, manpower utilization, distribution of work assignments, delegations of authority, management controls, information and documentation systems, and similar functions of management.
<b>Modeling and Simulation Specialist</b>	Expert in modeling and simulation functions or operations such as, but not limited to exercises, plans, coordination, demonstrations, and instruction in the fields such as, but not limited to health, environmental, transportation, law enforcement, military, and civil agencies. Provides supervision and guidance on the proper operation and use of simulation models and exercises. Supports live, constructive, or virtual training.
<b>Program Manager</b>	Serves as the contractor's single contract manager, and shall be the contractor's authorized interface with the Government Contracting Officer (CO), the contract level Contracting Officer's Representative (COR), government management personnel and customer agency representatives. Responsible for formulating and enforcing work standards, assigning contractor schedules, reviewing overall contract performance and shall not serve in any other capacity under this contract.
<b>Project Control Specialist</b>	Analyze program to determine requirements. Track program process and control. Analyze the impact or potential impact of missed or inadequate deliverable on program accomplishment. Develop and present reports on analysis findings. Draft program documentation to support activities to higher-level management. Review and track performance metrics.
<b>Project Manager</b>	Responsible for the overall management of the specific task order(s) and insuring that the technical/financial solutions and schedules in the specific delivery orders are implemented in a timely manner. Organizes, directs and coordinates the planning and production of all activities associated with assigned delivery order projects. Demonstrates competent writing and oral communication skills. Ensures quality products and services are delivered.
<b>Quality Assurance Manager</b>	Directs quality assurance operations. Develops and controls quality programs. Monitors conformance with QA standards and procedures. Conducts quality assurance training for employees. Suggests methods for improving product quality, design, or processes.
<b>Quality Assurance Specialist</b>	Establishes and maintains a process for evaluating software and associated documentation. Determines the resources required for quality control. Maintains the level of quality throughout the software life cycle. Conducts formal and informal reviews at pre-determined points throughout the development life cycle.

<b>Requirements Engineer</b>	Typical associated tasks include but are not limited to requirements analysis, cost analysis, cost performance trade-off analysis, feasibility analysis, regulatory compliance support, technology conceptual designs, and special studies and analysis.
<b>Scientific Subject Matter Expert</b>	Provides technical knowledge and analysis of highly specialized applications and operational environment, high-level functional systems analysis, design, integration, documentation and implementation advice on exceptionally complex problems which require graduate level knowledge of the subject matter for effective implementation. Applies principles, methods and knowledge of the functional area of expertise to specific task order requirements, advanced mathematical principles and methods to exceptionally difficult and narrowly defined technical problems in engineering and other scientific applications to arrive at automated solutions. Designs and prepares technical reports, studies, and related documentation, makes charts and graphs to record results. Prepares and delivers presentations and briefings as required by the task order. Technical support includes technical advice on security requirements for highly specialized IT applications, technical report preparation or other services as required by the task order.
<b>Security Administrator</b>	Performs administration functions related to operating a secured facility, including classified document control, publication distribution, classification management and processing, coordination with Government Task Manger's and the Contractor's Program Manager. Provides audit support during the development of software and hardware. Conducts preliminary reviews of computer use and makes recommendations to management personnel regarding security needs for effective operations. Monitor physical security for conformance to government requirements.
<b>Strategic Planner</b>	Responsible for strategic planning of a sub-task of a large complex project. Organizes, directs, and coordinates strategic planning activities. Assists in developing mission and vision statements, subsequent goal delineation, provides guidance for building operational plans and specifying measurable outcomes to include capital outlay planning efforts in a consolidated strategic planning process, prioritizing those initiatives. Interfaces with appropriate Government management personnel, other contractor managers, and client agency representatives. Reviews strategic plans, ensures continuity plans grow out of definitions of agencies' business functions and the processes required for achieving outcomes. Ensures agencies build on their strategic planning efforts of prior years, revisiting their mission, vision, and goals in light of the strategic plan, and changing opportunities. Utilizes refined techniques for identifying, eliminating or mitigating solution, project, and business risk. Understands customer, industry and business trends. Applies this understanding to meet project objectives.
<b>Subject Matter Expert</b>	Provides extremely high level subject matter expertise for work described in the task. Provides advanced technical knowledge and analysis of highly specialized applications and operational environment, high-level functional systems analysis, design, integration, documentation, training, and implementation advice on complex problems which require doctorate level knowledge of the subject matter for effective implementation. Applies principles, methods, and knowledge of specific functional areas of expertise to specific task order requirements. Provides advice on esoteric problems which require extensive knowledge of the subject matter. Designs and prepares technical reports, studies, and related documentation, makes charts and graphs to record results, prepares and delivers presentations, training, and briefings as required by the task order.
<b>Systems Analyst</b>	Formulates/defines system scope and objectives for assigned projects. Devises or modifies procedures to solve complex problems considering computer equipment capacity and limitations, operating time and form of desired results. Prepares detailed specifications from which programs will be written. Responsible for program design, coding, testing, debugging and documentation. Has full technical knowledge of all phases of applications systems analysis and programming. Has good understanding of the business or function for which applications is designed.
<b>Systems Architect</b>	Establishes system information requirements using analysis of the information engineer(s) in the development of enterprise-wide or large-scale information systems. Designs architecture to include the software, hardware, and communications to support the total requirements as well as provide for present and future cross-functional requirements and interfaces. Ensures these systems are compatible and in compliance with the standards for open systems architectures, the Open Systems Interconnection (OSI) and International Standards Organization (ISO) reference models, and profiles of standards - such as Institute of Electrical and Electronic Engineers (IEEE) Open Systems Environment (OSE) reference model - as they apply to the implementation and specification of Information Management (IM) solution of the application platform, across the application program interface (API), and the external environment/software application. Ensures that the common operating environment is TAFIM compliant. Evaluates analytically and systematically problems of workflows, organization, and planning and develops appropriate corrective action.
<b>Systems Engineer</b>	Performs a variety of complex project tasks applied to specialized technology problems. Tasks involve integration of electronic processes or methodologies to resolve total system problems or technology problems. Applies analytical and systematic approaches in the resolution of problems of work flow, organization, and planning. Directs and assists system engineers in the application of system engineering principles to the solution of secure systems design problems. Expert knowledge of LANs, WANs, VPNs, routers, firewalls, network protocols, and other security and network operations and monitoring, vulnerability analysis, PKI, data encryption, key management, data warehousing, and data mining capabilities.
<b>Technical Writer/Editor</b>	Assist in collecting and organizing information for preparation of user manuals, training materials, installation guides, proposals, and reports. Edit functional descriptions, system specifications, user manuals, special reports, or any other customer deliverables and documents.
<b>Test Engineer</b>	Provides test and evaluation of hardware and/or software development. This includes developing and documenting test plans and procedures, conducting testing, and evaluating and documenting results. Prepares studies, plans, and analyses in support of the delivery order.

<p><b>Threat Specialist</b></p>	<p>Supports customers in developing comprehensive, "total" solutions to threat-related problems—be they internal to the customer environment, domestic, or foreign. Assists in threat identification and assessment, threat reduction measures, crisis management, consequence management, and training and performance support. Conducts limited threat, vulnerability, and capability assessments including anti-terrorism scenario modeling and simulations. Identifies and implements threat reduction measures including plans, policies, and procedures; risk management planning; physical and cyber security; and business continuity planning. Assists in crisis response including first response; active defense; civil support; chemical, biological, radiological, and nuclear incident response; medical response; information continuity; and continuity of operations. Performs consequence activities including disaster recovery, restoration of operations, logistics management, information recovery, medical support and decontamination.</p>
<p><b>Training Facilitator</b></p>	<p>Conducts the research necessary to develop and revise training courses and prepares appropriate training catalogs. Develops all instructor materials (course outline, background material, and training aids). Develops all student materials (course manuals, workbooks, handouts, completion certificates, and course critique forms). Trains personnel by conducting formal classroom courses, workshops, seminars, and/or computer based/computer aided training.</p>
<p><b>Web Content Analyst</b></p>	<p>Provide support for developing &amp; providing Agency Web-site content that will motivate &amp; satisfy civilian user's needs so that they will regularly access the site &amp; utilize it as a major source for information, decision making and benefits delivery. Provide support for maintaining civil service handbook &amp; policies/procedures on the agency Web; assisting in developing agency newsletter &amp; civilian benefits communications; recommending new &amp; innovative web uses as well as training &amp; educating employees on the use &amp; benefits of using the Web. Provide support in the location &amp; pursuit of content &amp; surveying internal customers to gather feedback for site improvement &amp; enhancements.</p>
<p><b>Operations Subject Matter Expert</b>  <i>STAFF = Bachelors and 5 yrs Experience</i>  <i>SENIOR = Bachelors and 7 yrs Experience</i>  <i>PRINCIPAL = Bachelors and 10 yrs Experience</i></p>	<ul style="list-style-type: none"> <li>* Assist in the deployment, coordination and command execution of assigned and attached units providing counter IED and direct training support advice to a combatant commander and his forces.</li> <li>* Possess experience at tactical formations - Brigade and up. Multiple combat, combat support and combat service support disciplines required or equivalent academic or defense industry functional areas.</li> <li>* Develop and provide elements in identifying and addressing counter-IED capability gaps.</li> <li>* Provide analytical tools, software development, and systems engineering support to ensure interoperability and integration of emerging counter-IED technologies and tactics, techniques and procedures.</li> <li>* Interface with Combatant Commands, joint organizations, and OGAs on actions related to Joint IED Defeat initiatives.</li> <li>* Provide the capability to analyze the intelligence; operational TTPs; training and materiel solution inter-relationships; and articulate an overarching strategy to combat asymmetric threats and IEDs. Observe, collect, develop, validate, and disseminate emerging IED Defeat tactics, techniques, and procedures (TTPs).</li> <li>* Assist in identification, training, and integration of IED Defeat countermeasure technologies.</li> <li>* Provide investigative (law enforcement) advice to unit commanders.</li> <li>* Provide updates as required to JIEDDO OPS to ensure relevance of the JIEDDO strategy and counter-IED COP.</li> <li>* Provide support for the execution of JIEDDO strategic</li> </ul>
<p><b>Intelligence Subject Matter Expert</b>  <i>STAFF = Bachelors and 5 yrs Experience</i>  <i>SENIOR = Bachelors and 10 yrs Experience</i>  <i>PRINCIPAL = Bachelors and 15 yrs Experience</i></p>	<ul style="list-style-type: none"> <li>* Provide intelligence and forensic expertise and support in CONUS and as a member of a deployed unit with respect to munitions exploitation.</li> <li>* Support intelligence operations.</li> <li>* Provide exploitation and asymmetric threat analysis including the identification, development, and integration of countermeasure technologies.</li> <li>* Provide multi-intelligence analysis and fusion in support of counter-IED efforts and operations executed by committed war fighting units, integrating existing national-level products and databases to provide an enhanced level of information support.</li> <li>* Develop and integrate (for optimized employment of) enhanced Intelligence, Surveillance, and Reconnaissance assets.</li> <li>* Conduct multi-layered, multi-intelligence analysis to define patterns of IED network activity in order to narrow the search space to conduct CIED operations.</li> <li>* Provide intelligence targeting support products and "reach-back" support to forward-deployed elements as required.</li> </ul>
