On-line access to contract ordering information, terms and conditions, up-to-date pricing, and the option to create an electronic delivery order is available through GSA Advantage!™, a menu-driven database system. The INTERNET address for GSA Advantage!™ is: http://www.GSAAdvantage.gov.

Schedule for – Multiple Award Schedule - Consolidated
Federal Supply Group: Professional Services: 541715, 541330ENG, 541611, 54151S
Contract Number: 47QRAA18D000L
Price List current as of Modification #PS-A812, effective April 30, 2020
For more information on ordering from Federal Supply Schedules, click on the FSS Schedules button at http://www.gsa.gov/schedules-ordering
Contract Period: October 19, 2017 – October 18, 2022

Contractor: The Perduco Group, Inc.
2647 Commons Blvd
Beavercreek, OH 45431

Business Size: Other than Small Business

Telephone: (323) 924-1587
Web Site: http://www.theperducogroup.com/
E-mail: michelle.allamon@linquest.com
Contract Administration: Michelle Allamon

1b. Identification of the lowest priced model number and lowest unit price for that model for each special item number awarded in the contract. This price is the Government price based on a unit of one, exclusive of any quantity/dollar volume, prompt payment, or any other concession affecting price. Those contracts that have unit prices based on the geographic location of the customer, should show the range of the lowest price, and cite the areas to which the prices apply.

1c. If the Contractor is proposing hourly rates a description of all corresponding commercial job titles, experience, functional responsibility and education for those types of employees or subcontractors who will perform services shall be provided. If hourly rates are not applicable, indicate “Not applicable” for this item.

2. Maximum Order:

3. Minimum Order: $100.00

4. Geographic Coverage (delivery Area): Domestic only

5. Point(s) of production (city, county, and state or foreign country): Same as company address

7. Quantity discounts: None Offered

8. Prompt payment terms: Net 30 days Information for Ordering Offices: Prompt payment terms cannot be negotiated out of the contractual agreement in exchange for other concessions.

9a. Notification that government purchase cards are accepted up to the micro-purchase threshold: Yes

9b. Notification whether Government purchase cards are accepted or not accepted above the micro-purchase threshold: Will not accept over the micro-purchase threshold limit.

10. Foreign items (list items by country of origin): None

11a. Time of Delivery (Contractor insert number of days): Specified on the Task Order

11b. Expedited Delivery. The Contractor will insert the sentence “Items available for expedited delivery are noted in this price list,” under this heading. The Contractor may use a symbol of its choosing to highlight items in its price list that have expedited delivery: Contact Contractor

11c. Overnight and 2-day delivery. The Contractor will indicate whether overnight and 2-day delivery are available. Also, the Contractor will indicate that the schedule customer may contact the Contractor for rates for overnight and 2-day delivery: Contact Contractor

11d. Urgent Requirements. The Contractor will note in its price list the “Urgent Requirements” clause of its contract and advice agencies that they can also contact the Contractor’s representative to affect a faster delivery: Contact Contractor
12. F.O.B. Point(s): Destination

13a. Ordering Address(es): Same as Contractor

13b. Ordering procedures: For supplies and services, the ordering procedures and information on Blanket Purchase Agreement (BPA’s) are found in Federal Acquisition Regulation (FAR) 8.405-3.

14. Payment address(es): Same as company address

15. Warranty provision: Contractor’s standard commercial warranty.

16. Export Packing Charges (if applicable): N/A

17. Terms and conditions of Government purchase card acceptance (any thresholds above the micro-purchase level): Contact Contractor

18. Terms and conditions of rental, maintenance, and repair (if applicable): N/A

19. Terms and conditions of installation (if applicable): N/A

20. Terms and conditions of repair parts indicating date of parts price lists and any discounts from list prices (if applicable): N/A

21. List of Service and distribution points (if applicable): N/A

22. List of participating dealers (if applicable): N/A

23. Preventive maintenance (if applicable): N/A

24a. Environmental attributes, e.g., recycled content, energy efficiency, and/or reduced pollutants: N/A

24b. If applicable, indicate that Section 508 compliance information is available on Electronic and Information Technology (EIT) supplies and services and show where full details can be found (e.g. contractor’s website or other location.) The EIT standards can be found at: www.Section508.gov/

25. Data Universal Numbering System (DUNS) number: 967691143

26. Notification regarding registration in the System for Award Management (SAM) database: Registered

27. Final Pricing:
The rates shown below include the Industrial Funding Fee (IFF) of 0.75%.

**Service Contract Act:** The Service Contract Labor Standards (SCLS) is applicable to this contract as it applies to the entire Multiple Award Schedule and all services provided. While no specific labor categories have been identified as being subject to SCLS due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CRF 541.300), this contract still maintains the provisions and protections for SCLS eligible labor categories. If and / or when the contractor adds SCLS labor categories / employees to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCLS matrix identifying the GSA labor category titles, the occupational code, SCLS labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.

**Labor Category Descriptions**

1. **SOFTWARE ENGINEER I:**
**Functional Duties/Responsibilities:** Under direct supervision designs, modifies, develops, writes, and implements software programming applications. Supports and/or installs software applications/operating systems. Participates in the testing process through test review and analysis, test witnessing and certification of software.

**Minimum Education:** A High School diploma or Associates degree is required. Bachelor’s degree in computer science or engineering is preferred.

**Minimum Experience Requirements:** One (1) year of relevant experience with software development.

**Required/Supplemental Certifications:** None required.

2.) **RESEARCH ENGINEER I:**

**Functional Duties/Responsibilities:** Under direct supervision provides support in the areas of business systems, software, or business processes by applying theories, engineering principles, models, and other technical solutions to provide possible solutions to specific problems. Participates in coordinating analytical processes, team meetings, and interacting with various business and government agencies. Must have a general understanding of best practices within their field of expertise and with direct supervision have the ability to apply standardized scientific or engineering procedures and techniques to those practices within a project. Research Engineer will report to a program manager or area supervisor. Flexibility and freedom to conduct detailed analysis and research is given to prospective engineer. Understanding devise modeling, operational mathematics, various statistical methods, and other operational concepts are expected.

**Minimum Education:** A Bachelor’s degree in any engineering field, science, administration, or related field.

**Minimum Experience Requirements:** One (1) year of relevant experience.

**Required/Supplemental Certifications:** None required.

3.) **RESEARCH ENGINEER II:**

**Functional Duties/Responsibilities:** Provides support in the areas of business systems, software, or business processes by applying theories, engineering principles, models, and other technical solutions to provide possible solutions to specific problems. Participates in coordinating analytical processes, team meetings, and interacting with various business and government agencies. Must have a more in-depth understanding of best practices within their field of expertise and have the ability to apply standardized scientific or engineering procedures and techniques to those practices within a project. Research Engineer will report to a program manager or area supervisor. Flexibility and freedom to conduct detailed analysis and research is given to prospective engineer. Understanding devise modeling, operational mathematics, various statistical methods, and other operational concepts are expected.

**Minimum Education:** A Bachelor’s degree in any engineering field, science, administration, or related field.

**Minimum Experience Requirements:** Three (3) years of relevant experience.

**Required/Supplemental Certifications:** None required.
4.) SOFTWARE ENGINEER III:

**Functional Duties/Responsibilities:** Designs, modifies, develops, writes, and implements software applications. Supports and/or installs software applications/operating systems. Participates in the testing process through test review and analysis, test witnessing and certification of software. Familiar with a variety of the field’s concepts, practices, and procedures. Relies on experience and judgement to plan and accomplish goals. Performs a variety of complicated tasks. May lead and direct the work of others. A wide degree of creativity and latitude is expected.

**Minimum Education:** A Bachelor’s degree in computer science, electronic or electrical engineering, software engineering or related field.

**Minimum Experience Requirements:** Five (5) years of relevant experience in the field of engineering.

**Required/Supplemental Certifications:** None required.

5.) SYSTEM ANALYST II:

**Functional Duties/Responsibilities:** Provides the skills necessary to analyze business and management problems, and to recommend modifications of existing system designs, or the development of new system designs, to maximize efficient use of existing data. Responsible for independent, single-system studies of medium complexity requiring familiarity with several phases of systems analysis and the development of analytical procedures. May provide analysis related to the design, development, and integration of hardware, software, man-machine interfaces and all system level requirements to provide an integrated IT solution.

**Minimum Education:** A Bachelor’s degree in computer science, electronic or electrical engineering, software engineering or related field.

**Minimum Experience Requirements:** Three (3) years of systems analysis experience required.

**Required/Supplemental Certifications:** None required.

6.) DATA ANALYST III:

**Functional Duties/Responsibilities:** Collects and organizes data and examines it to spot trends and glean information that can be used to make business decisions. Requires understanding of data structures and business processes. May require ability to develop and maintain computer system environment, including integration of the operating system and application software. May prepare detailed specifications from which software or analytical programs will be written. May also perform database design, installation, development, and tuning.

**Minimum Education:** A Bachelor’s degree in computer science, electronic or electrical engineering, software engineering or related field.

**Minimum Experience Requirements:** Five (5) years of systems analysis experience required.

**Required/Supplemental Certifications:** None required.

7.) OPERATIONS RESEARCH ANALYST II:

**Functional Duties/Responsibilities:** Analyzes actual and predictable, interacting, operational activities of a military, governmental, or business system to obtain a quantitative, rational basis
for decision-making through the application of logic and scientific or economic disciplines and techniques. Participates in planning, scheduling, and coordinating selected analytical process phases or assists in working any selection of subcomponents of the exercise/gaming activity. Devises modeling and measuring techniques; utilizes mathematics, statistical methods, engineering methods, operational mathematics techniques (linear programming, game theory, probability theory, symbolic language, etc.) and other principles and laws of scientific and economic disciplines. Possesses specific knowledge of analytical models, simulations and gaming tools. Applies extensive technical expertise, and has full knowledge of other related disciplines. Guides the successful completion of major programs and may function in a project leadership role. Develops technical solutions to complex problems that require the regular use of ingenuity and creativity. Work is performed without appreciable direction. Exercises considerable latitude in determining technical objectives of assignment.

Minimum Education: A Bachelor’s degree in operations research, mathematics, engineering, or related field.

Minimum Experience Requirements: Five (5) years of experience in operations research or technical field.

Required/Supplemental Certifications: None required.

8.) DATA WAREHOUSE ENGINEER II:

Functional Duties/Responsibilities: Coordinates the design of the data warehouse and master data management architecture to maintain data integrity from data capture to end-user reporting. Facilitates change control, problem management, and communication among data architects, programmers, analysts, and engineers. Establishes and enforces processes to ensure a consistent, well managed, and well-integrated data warehouse infrastructure. Analyzes and identifies data and metadata requirements. Defines user requirements and database design specifications. Designs, implements, and supports data warehousing requirements. Implements business rules via stored procedures, middleware, or other technologies. Provides product support and maintenance design and construction. Prepares/implements data verification and testing methods for the data warehouse.

Minimum Education: A Bachelor’s degree in computer science, electronic or electrical engineering, software engineering or related field.

Minimum Experience Requirements: Five (5) years of systems analysis experience.

Required/Supplemental Certifications: None required.

9.) OPERATIONS RESEARCH ANALYST III:

Functional Duties/Responsibilities: Analyzes actual and predictable, interacting, operational activities of a military, governmental, or business system to obtain a quantitative, rational basis for decision-making through the application of logic and scientific or economic disciplines and techniques. Participates in planning, scheduling, and coordinating selected analytical process phases or assists in working any selection of subcomponents of the exercise/gaming activity. Devises modeling and measuring techniques; utilizes mathematics, statistical methods, engineering methods, operational mathematics techniques (linear programming, game theory, probability theory, symbolic language, etc.) and other principles and laws of scientific and economic disciplines. Possesses specific knowledge of analytical models, simulations and gaming tools. Applies extensive technical expertise, and has full knowledge of other related disciplines. Guides the successful completion of major programs and may function in a project leadership role.
role. Develops technical solutions to complex problems that require the regular use of ingenuity and creativity. Work is performed without appreciable direction. Exercises considerable latitude in determining technical objectives of assignment.

**Minimum Education:** A Bachelor’s degree in mathematics, operations research or technical field. Masters and/or PhD preferred.

**Minimum Experience Requirements:** Seven (7) years of experience in operations research or technical field.

**Required/Supplemental Certifications:** None required.

10.) **SUBJECT MATTER EXPERT II:**

**Functional Duties/Responsibilities:** Provides expert support, analysis and research into exceptionally complex problems, and processes relating to the subject matter. Serves as technical expert on executive-level project teams providing technical direction, interpretation and alternatives. Thinks independently and demonstrates exceptional written and oral communications skills. Applies extensive technical expertise, and has full knowledge of other related disciplines. Guides the successful completion of major programs and may function in a project leadership role. Develops technical solutions to complex problems that require the regular use of ingenuity and creativity. Work is performed without appreciable direction. Exercises considerable latitude in determining technical objectives of assignment.

**Minimum Education:** A Bachelor’s degree in required. Masters and/or PhD preferred.

**Minimum Experience Requirements:** Eight (8) years of experience is required.

**Required/Supplemental Certifications:** None required.

11.) **DATA ENGINEER V:**

**Functional Duties/Responsibilities:** Oversees various projects and system engineering. Responsible for monitoring databases across various projects within the companies’ portfolio. Mentors junior engineers and ensures individuals have the proper knowledge and training to support assigned projects. Must be cognizant of various projects and team deadlines. Applies advanced technical principles, theories, and concepts. Contributes to the development of new principles and concepts. Assignments are often self-initiated. Determines and pursues courses of action necessary to obtain desired results. Performs complex software design activities integrating multiple technologies. Provides architectural guidelines for all software design activities to current and future technological environments. Maintains state-of-the-art knowledge of technologies, planning, design, and analysis methodologies. Responsible for the design and architectural guidelines required for current and future software technological activities.

**Minimum Education:** A Bachelor’s degree in required. Masters and/or PhD preferred.

**Minimum Experience Requirements:** Ten (10) years of experience in the field of work is required.

**Required/Supplemental Certifications:** None required.

12.) **SUBJECT MATTER EXPERT III:**
Functional Duties/Responsibilities: With minimal direction, provides expert support, analysis and research into exceptionally complex problems, and processes relating to the subject matter. Serves as technical expert on executive-level project teams providing technical direction, interpretation and alternatives. Thinks independently and demonstrates exceptional written and oral communications skills. Applies extensive technical expertise, and has full knowledge of other related disciplines. Guides the successful completion of major programs and may function in a project leadership role. Develops technical solutions to complex problems that require the regular use of ingenuity and creativity. Work is performed without appreciable direction. Exercises considerable latitude in determining technical objectives of assignment.

Minimum Education: A Bachelor’s degree in required. Masters and/or PhD preferred.

Minimum Experience Requirements: Ten (10) years of experience in the field of work is required.

Required/Supplemental Certifications: None required.

13.) SUBJECT MATTER EXPERT IV:

Functional Duties/Responsibilities: Provides expert support, analysis and research into exceptionally complex problems, and processes relating to the subject matter. Serves as technical expert on executive-level project teams providing technical direction, interpretation and alternatives. Thinks independently and demonstrates exceptional written and oral communications skills. Applies advanced technical principles, theories, and concepts. Contributes to the development of new principles and concepts. Works on unusually complex technical problems and provides solutions which are highly innovative and ingenious. Works under consultative direction toward predetermined long-range goals and objectives. Assignments are often self-initiated. Determines and pursues courses of action necessary to obtain desired results. Develops advanced technological ideas and guides their development into a final product.

Minimum Education: A Bachelor’s degree in required. Masters and/or PhD preferred.

Minimum Experience Requirements: Twelve (12) years of experience in the field of work is required.

Required/Supplemental Certifications: None required.
