ATTAINX, INC.

Labor Category Descriptions:

For all of the below labor categories listed below, AttainX will accept:

- 2 year of work experience in lieu of High School Diploma
- 4 year of work experience in lieu of a Bachelor’s Degree
- 6 year of work experience in lieu of Master Degree
- Master’s degree can substitute for 2 year’s experience.

Administrative Support

Minimum/General Experience: At least three years of related hands-on experience with the specific application, domain, software or other requirements specified by an actual Statement of Work or Statement of Need.

General Experience: Experience in one or more of the following sub-disciplines, including but not limited to: Administrative Assistant, Technical Secretary, Data Entry and Support, Administrative Services or other administrative position or Clerical, in compliance with Industry and Government practices.

Education: High School or equivalency

System Analyst

Minimum/General Experience: At least three years of related hands-on experience with the specific application, domain, software or other requirements specified by an actual Statement of Work or Statement of Need.

Functional Responsibilities: Works with the enterprise architect to ensure that systems fit within the system-of-systems concept for the enterprise and reviews system solutions to verify that they maintain system interoperability. Assesses software solutions to evaluate the applicability of COTS approaches and evaluates hardware solutions to address best value approaches given life cycle cost and performance. Has full technical responsibility for interpreting, planning, organizing, executing, and coordination of assignments and is capable of planning and developing projects concerned with unique or controversial items having a major effect on the programs. Must be able to perform work involving the exploration of subject area, definition of scope, and selection of problem investigation areas.

Minimum Education: A Bachelor’s degree in Computer Science, Information Systems, Engineering, Business, or other related discipline.

Engineer

Minimum/General Experience: At least three years of related hands-on experience with the specific application, domain, software or other requirements specified by an actual Statement of Work or Statement of Need.

Functional Responsibilities: Fully competent professionals in all aspects of the subject matter area. Independently prepare criteria, computation/analyses, specifications, cost estimates, and technical reports in the specific area of technical expertise. Select and apply engineering techniques and procedures to analyze and evaluate specific problem, data, or other features of the work which are broad in scope and complexity. Review and evaluate the quantity, quality, and overall adequacy of results and conclusions drawn from accomplishment of engineering tasks.

Minimum Education: A Bachelor’s degree in Computer Science, Information Systems, Engineering, Business, or other related discipline.

Program and Project Manager

General Experience: At least 5 years’ experience in program planning, financial budgeting, financial management, tracking, reporting, and evaluating metrics, organizing and managing critical aspects of the development, production, deployment, and sustainment of capabilities, systems, subsystems, and equipment.

Functional Responsibilities: Responsible for the direction of a large, complex program(s) or a particular function(s), which may involve a single or several customer locations. Directs the efforts of a substantial number of administrative and professional support staff in carrying out the tasks necessary to meet program milestones. Must have demonstrated
capabilities for oral and written communications with all levels of staff and management. Must have in-depth knowledge of the areas for which responsibility is given. Identify and mitigate risks to the program. Assist customer and contractor personnel to develop and review program plans, deliverable status, milestone schedules, assignments, costs, etc. Ensures conformance with schedules and costs.

**Minimum Education:** A Bachelor’s degree in Computer Science, Information Systems, Engineering, Business, or other related discipline.

**Subject Matter Expert**

**General Experience:** At least 5 year’s experience as a professional subject matter expert in one or more of the following disciplines of Chemical, Civil: Electrical, or Mechanical Engineering or sub-disciplines related to them including, but not limited to the following examples: General, Reliability, Maintainability, Safety, Human Factors, Environmental, Logistics, Electrical, Mechanical, Systems, Electronics, Optical, Thermal, Software, Computer, Computer Systems, Aerospace, Instrument/Spacecraft, Geoscience, Calibration/Instrument, Manufacturing, Test (Non-Destructive and Destructive), Specification, Materials, Design, Bio-Engineering, Structural, Material/Munitions, Transportation, Geotechnical, Communications, Information Theory, Lasers & Electro Optics, Remote Sensing, Industrial, Engineering Management, EMSEC, Applied Mechanics, Business Management and Processes. Duties typically involve developing creative and innovative solutions to the customers problems; researching and analyzing customer requirements; applying expert knowledge to determine the accuracy and reasonableness of data; documenting and summarizing results and developing and recommending solutions. Makes high-level decisions and recommendations that may impact the technology strategy and related activities of the organization. Negotiates critical issues with top-level manager of other organizations and agencies. Demonstrates a high degree of creativity and foresight.

**Functional Responsibilities:** Professional experience as subject matter expert on very complex programs in one or more of the disciplines or sub-disciplines related to them as described in the General Experience section above. Provides state-of-the-art advice for concept planning/development, design, integration, test and evaluation and system lifecycle support. Applies expert knowledge of technologies related to their field of expertise; provides technical guidance and management to project leaders and program managers. Regularly serves as an advisor to all levels of staff on problems of unusual complexity. SME must be authority within their field of expertise and possess extensive knowledge of related fields.

**Minimum Education:** A Bachelor’s degree in Computer Science, Information Systems, Engineering, Business, or other related discipline.

**Training Specialist**

**General Experience:** Experience in the delivery of training instruction and services.

**Functional Responsibility:** Serves as lead instructor in delivering training and/or development programs where the subject matter or process is highly complex in nature. Formulates and provides overall direction for the training/development activities within the task. Works with functional analysts (subject matter experts), vendors, and clients to ensure that scope and depth of training/development activities are current and appropriate to client’s requirements. Develops criteria for evaluating the effectiveness of the activities. Updates course curricula and documentation on a continuous basis to ensure timeliness, relevance, and contractual compliance. Conducts formal classroom courses, workshops, seminars, and computer-based training. Formulates and provides overall direction for the training/development activities within a program. May provide daily supervision and direction to training staff. May provide consulting support on complex tasks.

**Minimum Education:** A Bachelor’s degree in Computer Science, Information Systems, Engineering, Business, or other related discipline.

**Test Engineer**

**General Experience:** At least 3 years experience in technical and engineering support for Test and Evaluation (T&E) activity areas: document review, test concept development, test plan development, test execution, test reporting, methodology development, data reduction and analysis, and end user operational testing.

**Functional Responsibilities:** Prepares criteria, computation/analyses, specifications, cost estimates, and technical reports in the specific area of technical expertise. Selects and applies engineering techniques and procedures to analyze and evaluate specific problem, data, or other features of the work which are broad in scope and complexity. Reviews and

*AttainX, Inc.*

*(P) (202)400-2259*
evaluates the quantity, quality, and overall adequacy of results and conclusions drawn from accomplishment of engineering tasks. Devises new approaches to problems encountered, and accomplishes assigned tasks with efficiency, dispatch, and thoroughness. Operates with general instructions; selected portions of work will be reviewed in detail to measure adequacy of approach, execution, and presentation

**Minimum Education:** A Bachelor’s degree in Computer Science, Information Systems, Engineering, Business, or other related discipline.
