Utility Bill Auditing: Our forensic utility bill audit, Bill Audit, is a simple way to start saving today and continue those savings year after year. Unbiased and on a mission to save you money without additional work on your end, we’ll examine all the utility billing data for your electric, gas, water/sewer and steam billing to uncover billing and meter errors, evaluate rate plan modifications, confirm the accuracy of your deregulated energy purchases, and maximize overall savings. Using innovative proprietary software to manage and analyze utility related data, our expert staff are able to conduct a comprehensive review going back up to six years – a review that not only results in a cost reduction in bills, but also pinpoints operational waste and highlights potential physical efficiency improvements. The proof is in the data: our audits result in greater overall savings than those of other firms and more net dollars in our clients’ pockets. We have been in business for 27 years, audited more than 16,000 buildings and recouped nearly $500 Million for our clients. With savings that begin almost immediately as you recoup lost dollars, and cost reductions and efficiencies that continue year after year, the Forensic Audit is the first step in developing an ongoing partnership. We find more savings so that you can save more. No matter your industry, UtiliSave has the expertise to save you money today – and in the years to come.

1b. Identification of the lowest priced model number and lowest unit price:

<table>
