1b. Identification of the lowest priced model number and lowest unit price for that model for each special item number awarded in the contract. This price is the Government price based on a unit of one, exclusive of any quantity/dollar volume, prompt payment, or any other concession affecting price. Those contracts that have unit prices based on the geographic location of the customer, should show the range of the lowest price, and cite the areas to which the prices apply. Not Applicable

1c. If the Contractor is proposing hourly rates a description of all corresponding commercial job titles, experience, functional responsibility and education for those types of employees or subcontractors who will perform services shall be provided. If hourly rates are not applicable, indicate “Not applicable” for this item. Not Applicable
2. **Maximum Order:** $1,000,000.00

3. **Minimum Order:** $100.00

4. **Geographic Coverage (delivery Area):** Domestic Only

5. **Point(s) of production (city, county, and state or foreign country):** Same as company address

6. **Discount from list prices or statement of net price:** Government net prices (discounts already deducted).

7. **Quantity discounts:** 2% discount for orders over $250,000

8. **Prompt payment terms:** 0.5% 20 days; Net 30 days (Information for Ordering Offices: Prompt payment terms cannot be negotiated out of the contractual agreement in exchange for other concessions.)

9. **Foreign items (list items by country of origin):** None

10a. **Time of Delivery (Contractor insert number of days):** Specified on the Task Order

10b. **Expedited Delivery:** The Contractor will insert the sentence “Items available for expedited delivery are noted in this price list.” under this heading. The Contractor may use a symbol of its choosing to highlight items in its price list that have expedited delivery: Contact Contractor

10c. **Overnight and 2-day delivery:** The Contractor will indicate whether overnight and 2-day delivery are available. Also, the Contractor will indicate that the schedule customer may contact the Contractor for rates for overnight and 2-day delivery: Contact Contractor

10d. **Urgent Requirements:** The Contractor will note in its price list the “Urgent Requirements” clause of its contract and advise agencies that they can also contact the Contractor’s representative to effect a faster delivery: Contact Contractor

11. **F.O.B Points(s):** Destination

12a. **Ordering Address(es):** Same as Contractor

12b. **Ordering procedures:** For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPA’s), are found in Federal Acquisition Regulation (FAR) 8.405-3.

13. **Payment address(es):** Same as company address

14. **Warranty provision:** Contractor’s standard commercial warranty.

15. **Export Packing Charges (if applicable):** N/A

16. **Terms and conditions of rental, maintenance, and repair (if applicable):** N/A

17. **Terms and conditions of installation (if applicable):** N/A

18a. **Terms and conditions of repair parts indicating date of parts price lists and any discounts from list prices (if applicable):** N/A
18b. Terms and conditions for any other services (if applicable): N/A

19. List of service and distribution points (if applicable): N/A

20. List of participating dealers (if applicable): N/A

21. Preventive maintenance (if applicable): N/A

22a. Environmental attributes, e.g., recycled content, energy efficiency, and/or reduced pollutants: N/A

22b. If applicable, indicate that Section 508 compliance information is available on Electronic and Information Technology (EIT) supplies and services and show where full details can be found (e.g. contractor’s website or other location.) The EIT standards can be found at: www.Section508.gov. N/A

23. Unique Entity Identifier (UEI) number: JLF9Z53SN8F3

24. Notification regarding registration in System for Award management (SAM) database: Registered

Final Pricing:
The rates shown below include the Industrial Funding Fee (IFF) of 0.75%.

Service Contract Act: The Service Contract Act (SCA) is applicable to this contract as it applies to the entire Multiple Award Schedule (MAS) Schedule and all services provided. While no specific labor categories have been identified as being subject to SCA due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CRF 541.300), this contract still maintains the provisions and protections for SCA eligible labor categories. If and / or when the contractor adds SCA labor categories / employees to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCA matrix identifying the GSA labor category titles, the occupational code, SCA labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.
1. Architect/Manager
Individual provides overall technical leadership for the development of a portfolio of large-scale, web-based, customer-facing software products. The Software Architect collaborates with peer architects, product managers, business analysts, tech leads, and software engineers to deliver high-quality SaaS products to the market. The Software Architect participates in all phases of the software development lifecycle, driving the application design and overseeing its implementation. The Software Architect typically serves as the architect for products that involve multiple business owners, concurrent work streams, and geographically distributed Agile teams. The Software Architect provides direction to software engineers and tech leads, but does not have direct managerial responsibilities.

Qualifications:
Bachelor’s Degree in computer science/STEM or related field and 5 years’ experience; or High School Diploma and 11 years Enterprise Architecture
3 years of architect or tech lead experience with customer-facing, large-scale, web-based applications
5 years of experience as an application developer implementing web applications

EDUCATION MAY BE SUBSTITUTED AS FOLLOWS:
2 YEARS EXPERIENCE = ASSOCIATE DEGREE; 6 YEARS EXPERIENCE = BACHELOR DEGREE; 8 YEARS EXPERIENCE = MASTERS DEGREE; 15 YEARS EXPERIENCE = PHD
Experience using: C#/.NET, MVC, SPA, JavaScript, responsive, REST, HTML5, CSS3, nHybernate, node, TLS/SSL, Hybris
Strong knowledge of XML, XSLT, and XPATH
Experience with designing, implementing, and tuning databases such as: MS-SQL, Oracle
Experience using security technologies
Experience with middleware technologies
Experience with web application hosting, deployment, and the management and optimization of the related IT infrastructures
Experience in deploying applications to cloud environments
Experience working within Scaled Agile Framework or large multi-site, Agile environments
Strong knowledge of architectural styles and design patterns.

2. Data Architect
Individual has experience in designing and developing reports, dashboards and ad-hoc queries, and calls for someone who is comfortable working with clients as well as state and federal agencies to discover requirements, then formulate them into solutions. Capable of gathering requirements from clients and agencies, understanding the user's requirement and converting requirements into functional/technical specifications and developing a strategy for designing and building Business Intelligence solutions. Create business intelligence tools, including design of related databases, spreadsheets, or outputs; publish and integrate reports; conduct or coordinate tests to ensure intelligence is consistent with defined needs; create or review technical design documentation to ensure the accurate development of reporting solutions; maintain library of model documents, templates or other reusable knowledge assets and provide technical support for existing reports, dashboards or other tools.

Qualifications
Bachelor’s Degree in computer science and 3 years’ experience or; or High School Diploma and 9 years Enterprise Architecture

EDUCATION MAY BE SUBSTITUTED AS FOLLOWS:
2 YEARS EXPERIENCE = ASSOCIATE DEGREE; 6 YEARS EXPERIENCE = BACHELOR DEGREE; 8 YEARS EXPERIENCE = MASTERS DEGREE; 15 YEARS EXPERIENCE = PHD
Minimum 3 years’ experience:
combined experience in data warehousing/business intelligence/analytics and reporting systems;
MS SQL Analysis Services (SSAS);
experience developing reports in MS SQL Server Reporting Services (SSRS) & Visual Studio;
MS SQL Integration Services (SSIS);
ETL scripting experience;
Experience with data warehouse creation desirable, but not required;
Experience with Crystal Reports and have the ability to interact and analyze existing reports;
Knowledge of MS SQL Profiler, query execution plans and SQL tuning techniques;
Experience building and executing sufficient tests of developed solutions;
Must have basic programming experience and working knowledge of software development tools

3. Developer (U.S. Based)
Individual has experience developing and implementing various Java based application. Write Java code for configuration and/or integration development. Work in a team using Agile methodology to deliver software. Collaborate with project teams for enhancements to existing applications. Design and develop application functionality. Application testing, debugging and deployments. Conduct analysis of organizational needs and goals for the development and implementation of application systems. Monitor operating efficiency of the application systems.

Qualifications
Bachelor’s degree in a technical field (e.g. computer science, information systems, engineering) and 2 years Java developing experience or; High School Diploma and 8 years’ experience
EDUCATION MAY BE SUBSTITUTED AS FOLLOWS:
2 YEARS EXPERIENCE = ASSOCIATE DEGREE; 6 YEARS EXPERIENCE = BACHELOR DEGREE; 8 YEARS EXPERIENCE = MASTERS DEGREE; 15 YEARS EXPERIENCE = PHD
Minimum 2 years’ experience:
Java development experience
Java, Java EE, OOA/OOD, SDLC, XML, Hibernate, Web Services, HTML/CSS/Java Script, Struts, SQL
Familiar with Window, UNIX and Solaris environments would be preferred.

4. ETL Developer
Individual is has experience in designing and developing ETL/data integration processes and programs to support the data warehousing and business intelligence initiatives. The responsibilities include data analysis, source to target data mapping, job scheduling, development and testing of Data Stage ETL programs.

Qualifications:
Bachelor’s degree in computer science and 5 years of strong hands on experience working in ETL Datastage environment v8.x and above or; High School Diploma and 11 years support ETL jobs in production or; Troubleshoot and provide solutions in case of failures.
EDUCATION MAY BE SUBSTITUTED AS FOLLOWS:
2 YEARS EXPERIENCE = ASSOCIATE DEGREE; 6 YEARS EXPERIENCE = BACHELOR DEGREE; 8 YEARS EXPERIENCE = MASTERS DEGREE; 15 YEARS EXPERIENCE = PHD

Ensure all deliverables conform to ETL best practices and standards.
Experience using any modelling tools.
Experience using the Data Stage Java Integration and XML Output stages.
Strong experience working with Oracle 10/11g, SQL Server and MYSQL.
Experience with writing Oracle procedures, functions, packages, database triggers and troubleshooting PL/SQL and SQL.
Utilizes Source-target mappings, maintains documentation.
Complete understanding of data warehouse architecture, star schemas and snowflakes.
Experience in data profiling, data analysis, data quality checking.
Experience with documenting data models
5. **Hybris Java Developer**

Individual has experience in Java/JEE and e-commerce technologies and be well versed in delivering and supporting technical solutions. Must have knowledge in requirement gathering, analyses and implementation of technical solutions. Understands the current Hybris system implementation and customizations. Research and provides analysis of new features and functionality. Oversees upgrades and releases and identifies and resolve all bug issues.

**Qualifications**

Bachelor’s degree in a technical field (e.g. computer science, information systems, engineering) and 2 years Java developing experience or; High School Diploma and 8 years’ Java developing experience

**EDUCATION MAY BE SUBSTITUTED AS FOLLOWS:**

- 2 YEARS EXPERIENCE = ASSOCIATE DEGREE
- 6 YEARS EXPERIENCE = BACHELOR DEGREE
- 8 YEARS EXPERIENCE = MASTERS DEGREE
- 15 YEARS EXPERIENCE = PHD

Minimum 2 Years’ experience:

- Hybris/Java development experience.
- Java/J2EE, Spring (MVC, IOC), HTML, CSS and JavaScript, Jquery, Version control, continuous integration, relational database (SQL, MySQL), Web Services and Agile.

6. **Java Developer**

Individual has experience developing and implementing various Java based application. Write Java code for configuration and/or integration development. Work in a team using Agile methodology to deliver software. Collaborate with project teams for enhancements to existing applications. Design and develop application functionality. Application testing, debugging and deployments. Conduct analysis of organizational needs and goals for the development and implementation of application systems. Monitor operating efficiency of the application systems.

**Qualifications**

Bachelor’s degree in a technical field (e.g. computer science, information systems, engineering) and 2 years Java developing experience or; High School Diploma and 8 years’ Java developing experience

**EDUCATION MAY BE SUBSTITUTED AS FOLLOWS:**

- 2 YEARS EXPERIENCE = ASSOCIATE DEGREE
- 6 YEARS EXPERIENCE = BACHELOR DEGREE
- 8 YEARS EXPERIENCE = MASTERS DEGREE
- 15 YEARS EXPERIENCE = PHD

Minimum 2 Years’ experience:

- Java development experience.
- Java, Java EE, OOA/OOD, SDLC, XML, Hibernate, Web Services, HTML/CSS/Java Script, Struts, SQL Familiar with Window, UNIX and Solaris environments would be preferred.

7. **Business Analyst**

Individual will act as the liaison between business users and the development teams by serving as a business problem solver. The position involves coordinating the process, questions, and techniques to efficiently obtain the information needed from the Business Users for successful application development projects. Must be able to sort through information provided by many people and develop a concise description of the business need. Individual must be capable of analyzing the business to identify problems and/or opportunities and to define solution characteristics. Individual must possess outstanding conceptual, analytical, communication, facilitation, and presentation skills with highly developed organization and management skills. Individual is responsible for collecting the detailed functional requirements to ensure the development team has all of the details to build and implement the solution, and making preparations to test the solution against those requirements.

**Qualifications**

Bachelor’s degree and 5 years experience on application development projects or; High School Diploma and 11 years’ experience on application development projects

**EDUCATION MAY BE SUBSTITUTED AS FOLLOWS:**
2 YEARS EXPERIENCE = ASSOCIATE DEGREE; 6 YEARS EXPERIENCE = BACHELOR DEGREE; 8 YEARS EXPERIENCE = MASTERS DEGREE; 15 YEARS EXPERIENCE = PHD
5 years previous business analyst experience on software development projects with participation in the full life cycle of the project
Experience creating proper testing plans and scripts from the finalized design documents
ITIL Certification

8. Sr. Business Analyst

Individual will act as the liaison between business users and the development teams by serving as a business problem solver. The position involves coordinating the process, questions, and techniques to efficiently obtain the information needed from the Business Users for successful application development projects. Must be able to sort through information provided by many people and develop a concise description of the business need. Individual must be capable of analyzing the business to identify problems and/or opportunities and to define solution characteristics. Individual must possess outstanding conceptual, analytical, communication, facilitation, and presentation skills with highly developed organization and management skills. Individual is responsible for collecting the detailed functional requirements to ensure the development team has all of the details to build and implement the solution, and making preparations to test the solution against those requirements.
Experience:
Bachelor’s degree and 7 years’ experience with application development projects or; High School Diploma and 13 years’ experience on application development projects
EDUCATION MAY BE SUBSTITUTED AS FOLLOWS:
2 YEARS EXPERIENCE = ASSOCIATE DEGREE; 6 YEARS EXPERIENCE = BACHELOR DEGREE; 8 YEARS EXPERIENCE = MASTERS DEGREE; 15 YEARS EXPERIENCE = PHD
Minimum 7 Years’ experience:
Business analyst experience on software development projects with participation in the full life cycle of the project
Experience creating proper testing plans and scripts from the finalized design documents
Minimum 3 Years’ experience:
Software documentation development
ITIL Certification

9. Sr. Financial Analyst

Individual will focus on financial reporting, business results analysis, budgeting and planning. Key aspects of this role include understanding the strategy, competitive landscape and business drivers to drive the targeted financial outcomes and providing financial advice and financial driven recommendations to improve business results. Lead forecast, budget, and long range planning (LRP) processes for the income statement and balance sheet of the business. Analyze financials and key metrics (i.e. actual to forecast/budget/prior year, upside/downside scenarios, trend analysis, etc). Must be able to provide thorough analysis and interpretation of metrics to ensure appropriate actions are taken to affect results including influencing decision making. Develop reports, dashboards and presentations that clearly articulate financial results to business partners, senior leadership and cross-functional teams. Provide reporting and analysis to various functional and business teams such as controllership, strategy, investor relations, external reporting, and various business teams. Strong ability to understand strategy and business drivers in order to properly analyze financials and articulate key drivers. Collaborate to accurately forecast and track results including key measures.

Qualifications
Bachelor’s degree or commensurate experience in Accounting, Finance or a related field of study and 10 years of experience or; High School Diploma and 16 years of experience
EDUCATION MAY BE SUBSTITUTED AS FOLLOWS:
2 YEARS EXPERIENCE = ASSOCIATE DEGREE; 6 YEARS EXPERIENCE = BACHELOR DEGREE; 8 YEARS EXPERIENCE = MASTERS DEGREE; 15 YEARS EXPERIENCE = PHD
Advanced proficiency with MS Excel ITIL Certification
10. Engineer Software -Mid

Individual sets up, configures and maintains integration systems in production processes, tests network servers to ensure efficiency and takes part in the implementation of simulators and test tools. The engineer also provides guidance and expert advice to clients and development personnel as needed. Evaluate system performance issues and propose recommendations to improve. Perform assessments to ensure compliance with policies and reviews and required evaluations to ensure compliance security policies. Assess and recommended improvements to system availability and user experience. Recommend hardware and/or software options to meet system specifications using recognized estimating approaches to support government cost estimates. Ensure all technical approaches/recommendations are in harmony with Enterprise System Engineering/Corporate Services vision. Identifies technical risks within programs, services and other activities and offer options to reduce risk.

Qualifications:
Bachelor’s and 7 years

11. Integrator

Individual sets up, configures and maintains integration systems in production processes, tests network servers to ensure efficiency and takes part in the implementation of simulators and test tools. The engineer also provides guidance and expert advice to clients and development personnel as needed. Evaluate system performance issues and propose recommendations to improve. Perform assessments to ensure compliance with policies and reviews and required evaluations to ensure compliance security policies. Assess and recommended improvements to system availability and user experience. Recommend hardware and/or software options to meet system specifications using recognized estimating approaches to support government cost estimates. Ensure all technical approaches/recommendations are in harmony with Enterprise System Engineering/Corporate Services vision.
Identifies technical risks within programs, services and other activities and offer options to reduce risk.
Identification, analysis, mitigation and reporting of risk.

**Qualifications:**
Bachelor’s degree and 7 years

12. **Solution Architect**
Individual must also possess the skills and leadership ability to direct future data-center migration and the mobile strategy development and implementation. Must possess authoritative knowledge of .NET framework, the C# programming language and the Team Foundation Server development environment. The lead developer must possess at least 8 years hands on experience in technical design, development and deployment of Web based Applications. Experience with object oriented technologies and Microsoft web technologies (.NET Framework 4.5 and familiar with changes in 4.5.1, Visual Studio Team System 2012/2013, ASP.NET and C#), AJAX, database technologies (SQL Server 2008r2), best practice techniques; knowledge of web services and demonstrated comprehensive knowledge and application of agile software development methodologies and processes.

**Qualifications:**
Master’s degree and 10 years

13. **Helpdesk Supervisor**
Individual is responsible for ensuring an outstanding level of customer services by providing direct IT support by supervising the Help Desk and managing the technical support staff. Responsible for leading the Helpdesk in engaging in more proactive planning and support and organizing the Helpdesk to be flexible and adaptable in meeting the changing needs of users. Supervise the Helpdesk support staff by defining and establishing schedules, setting priorities, providing support/direction and dealing with administrative issues as needed. Gather and analyze metrics to benchmark the helpdesk workload/performance and identify trends in call center issues. Work within the campus community to promote excellent customer service, effective response times and provide expert insights into general support issues. Enforce quality of service guidelines for dealing with customers, completing services, and overall customer satisfaction. Train helpdesk staff on operational procedures and troubleshooting techniques. Provide training on new hardware and/or software applications as requested. Ensure that staff provides timely and considerate customer service to end users by fielding Helpdesk calls and resolving technical issues. Assist all office staff and instructors, both in person and via the phone.
Creating user accounts and managing access control based on company policies
Analyzing and identifying trends in issue reporting and devising preventative solutions. Expected to offer suggestions for any noted process improvements and develop the new procedures.

**Qualifications:**
Bachelor’s Degree and 5 years

---

**14. Sr. Desktop Support Technician**

Individual is responsible for on-site and/or remote installation, implementation, maintenance, troubleshooting and/or repair of desktops, notebooks, printers, and associated peripherals. Serves as company liaison with customer on administrative and technical matters. Coordinates and Client End User on expectations and availability to conduct Managed Client Services Performs trouble shooting, parts replacement, system upgrades and basic deployments & repair on Client Assets in campus/remote locations. Identifies potential issues that could adversely impact End User experience and follows through on action steps. Strives to meet all Client SLAs & Customer Satisfaction Goals.

**Qualifications:**
Bachelor’s Degree and 6 years

---

**15. Desktop Support Technician**

Individual is responsible for on-site and/or remote installation, implementation, maintenance, troubleshooting and/or repair of desktops, notebooks, printers, and associated peripherals. Serves as company liaison with customer on administrative and technical matters. Coordinates and Client End User on expectations and availability to conduct Managed Client Services Performs trouble shooting, parts replacement, system upgrades and basic deployments & repair on Client Assets in campus/remote locations. Identifies potential issues that could adversely impact End User experience and follows through on action steps. Strives to meet all Client SLAs & Customer Satisfaction Goals.

**Qualifications:**
Bachelor’s Degree and 4 years
16. **Tier 1 Helpdesk Support**
Individual is responsible for providing first level support for all end-users. Troubleshoot and resolve hardware, software and voice/data communication systems issues. Escalate calls when appropriate. Write concise, informative tickets. Follow up on all tickets in a timely manner and follow through to resolution. Experience using ticketing systems, writing technical support documentation and computer proficiency with hardware and software technologies are required. The ability to multi-task, prioritize and work under pressure are required.

**Qualifications:**
Bachelor’s Degree and 3 years

17. **Sr. SAP Analyst**
Individual is responsible for providing and serve as the key link between the Business and the IS organization. This resource will work with the departments world-wide and other SAP functional business analysts and technical developers to support and implement global processes and solutions in consolidation, planning, forecasting and reporting. Strong functional PLM/PPM, cProjects, cFolders, Project Systems, integration with SAP project systems, Sales, Quotes, MDG, FICO, and operations. Strong communication skills. Should be able to lead design sessions with the business. Hands on PPM configuration required. Provides specialist level functional and configuration knowledge in designing SAP solutions in the PLM modules of ECC 6. Good configuration knowledge of PS structures- WBS, network, milestones, standard structures, cost planning, user status profiles, budgeting, project quotation, time sheets, time sheet confirmations, goods issues, project stock, Results analysis – cost based and revenue based methods, completion contract method, period-end processing –overheads, results analysis, settlement.

**Qualifications:**
Bachelor’s Degree and 10 years

18. **Microsoft BI Developer**
Individual is responsible for providing detail-oriented business intelligence developer with excellent Microsoft SQL skills and experience working with large datasets and complex data models. Will participate in a wide variety of Analytic efforts, including the development/support of custom, end user facing reports and dashboard under Microsoft Business Intelligence platform. A solid experience designing and producing data structures optimized for business-driven reporting insights.
Design and develop semantics data layer based on the operational data models. Create dashboards, scorecards, and non-aggregated reports with Microsoft BI toolset. Reverse engineering the existing data cubes and report procedure logics. Participate in the software development lifecycle of complex data initiatives.

**Qualifications:**
Bachelor’s Degree and 5 years

19. **Information Engineer II**
Assists and participates in performing information systems development, functional and data requirements analysis, systems analysis and design, programming, program design, and documentation preparation. Implements information engineering projects; and performs systems analysis; design and programming using CASE and IE tools and methods, systems planning, business information planning, and business analysis.

**Qualifications:**
Bachelor’s Degree and 4 years

20. **Information Engineer III**
Performs information systems development, functional and data requirements analysis, systems analysis and design, programming, program design, and documentation preparation. Implements information engineering
projects; and performs systems analysis; design and programming using CASE and IE tools and methods, systems planning, business information planning, and business analysis.

Qualifications:
Bachelor’s Degree and 6 years

21. Business Analyst II
Experienced in performing a variety of routine logistics tasks. Participates in the design, implementation, operation, and performance of logistics functions, including supply chain, acquisition, distribution, and transportation. Works under supervision. Receives general instruction on routine work, detailed instruction on new assignments.

Qualifications:
Bachelor’s Degree and 4 years
