**LABOR CATEGORY DESCRIPTIONS**

**Jr. Engineer**
Responsible for design, development, implementation, and analysis of technical products and systems. Performs engineering design evaluations. May develop a range of products. Recommends alterations to development and design to improve quality of products and/or procedures. Requires a Bachelor's degree in engineering and 0-4 years of experience in the field or in a related area. Familiar with standard concepts, practices, and procedures within a particular field. Relies on limited experience and judgment to plan and accomplish goals. Performs a variety of tasks. Works under general supervision. Typically reports to a supervisor or manager.

**Mid-Level Engineer/Program Manager**
Responsible for design, development, implementation, and analysis of technical products and systems, as well as coordination and completion of projects. Provides expert judgment and analysis for the design, development and implementation of technical products and systems. Resolves highly complex technical issues and conducts advanced research. Performs engineering design evaluations. May develop a range of products. Recommends...
alterations to development and design to improve quality of products and/or procedures. Sets deadlines, assigns responsibilities, and monitors and summarizes progress of project. Prepares reports for upper management regarding status of project. Requires a Bachelor's degree in engineering and 4-8 years of experience in the field or in a related area. Familiar with a variety of the field's concepts, practices, and procedures. Relies on experience and judgment to plan and accomplish goals. Performs a variety of complicated tasks. A wide degree of creativity and latitude is expected. Leads and directs the work of others. May report to an executive or a manager or head of a unit/department.

**Sr. Engineer/Program Manager**

Provides expert consultation in one or more areas for the design, development and implementation of technical products and systems. Recognized as technical leader and resource. Recommends alterations and enhancements to improve quality of products and/or procedures. Responsible for all internal activities and product development. Requires a Bachelor's degree in engineering and at least 8 years of experience in the field or in a related area. Demonstrates expertise in a variety of the field's concepts, practices, and procedures. Coordinates and monitors the scheduling, pricing, and technical performance of company programs. Responsibilities also include aiding in the negotiation of contracts and contractual changes and coordinating preparations of proposals, plans, specifications, and financial conditions of contracts. Develops new business and expands product line. Ensures adherence to master plans and schedules, develops solutions to program problems, and directs work of incumbents assigned to program from various departments. Ensures projects are completed on time and within budget. Acts as advisor to program team regarding projects, tasks, and operations. Relies on extensive experience and judgment to plan and accomplish goals. May provide consultation on complex projects and is considered to be the top level contributor/specialist. Typically reports to a unit/department head.
