SIN Descriptions

541611  Business Administrative Services

Management and Financial Consulting, Acquisition and Grants Management Support, and Business Program and Project Management Services

Provide operating advice and assistance on administrative and management issues. Examples include: strategic and organizational planning, business process improvement, acquisition and grants management support, facilitation, surveys, assessment and improvement of financial management systems, financial reporting and analysis, due diligence in validating an agency’s portfolio of assets and related support services, strategic financial planning, financial policy formulation and development, special cost studies, actuarial services, economic and regulatory analysis, benchmarking and program metrics, and business program and project management.

Inherently Governmental services as identified in FAR 7.503 or by the ordering agency are prohibited. It is the responsibility of the Contracting Officer placing the order to make this determination. Ordering activities must require prospective contractors to identify potential conflicts of interest and address those, prior to task order award.

Personal services as defined in FAR 37.104 are prohibited.

541219  Financial Services

Budget and Financial Management Services

Services include accounting, budgeting, and complementary financial services such as: transaction analysis, transaction processing, data analysis and summarization, technical assistance in devising new or revised accounting policies and procedures, classifying accounting transactions, special studies to improve accounting operations, assessment and improvement of budget formulation and execution processes, special reviews to resolve budget formulation or budget execution issues, and technical assistance to improve budget preparation or execution processes.

541330ENG  Technical and Engineering Services (non-IT)

Engineering Services

Services include applying physical laws and principles of engineering in the design, development, and utilization of machines, materials, instruments, processes, and systems. Services may involve any of the following activities: provision of advice, concept development, requirements analysis, preparation of feasibility studies, preparation of preliminary and final plans and designs, provision of technical services during the construction or installation phase, inspection and evaluation of engineering projects, and related services.

NOTE: Services under this SIN cannot include architect-engineer services as defined in the Brooks Act and FAR Part 2, or construction services as defined in FAR Parts 2 and 36.
OLM Order-Level Materials

OLMs are supplies and/or services acquired in direct support of an individual task or delivery order placed against a Schedule contract or BPA. OLM pricing is not established at the Schedule contract or BPA level, but at the order level. Since OLMs are identified and acquired at the order level, the ordering contracting officer (OCO) is responsible for making a fair and reasonable price determination for all OLMs. OLMs are procured under a special ordering procedure that simplifies the process for acquiring supplies and services necessary to support individual task or delivery orders placed against a Schedule contract or BPA. Using this new procedure, ancillary supplies and services not known at the time of the Schedule award may be included and priced at the order level. OLM SIN-Level Requirements / Ordering Instructions: OLMs are: - Purchased under the authority of the FSS Program - Unknown until an order is placed - Defined and priced at the ordering activity level in accordance with GSAR clause 552.238 - 115 Special Ordering Procedures for the Acquisition of Order-Level Materials. (Price analysis for OLMs is not conducted when awarding the FSS contract or FSS BPA; therefore, GSAR 538.270 and 538.271 do not apply to OLMs) - Only authorized for use in direct support of another awarded SIN. - Only authorized for inclusion at the order level under a Time-and-Materials (T&M) or Labor-Hour (LH) Contract Line Item Number (CLIN) - Subject to a Not To Exceed (NTE) ceiling price OLMs are not: - Open Market Items. - Items awarded under ancillary supplies/services or other direct cost (ODC) SINs (these items are defined, priced, and awarded at the FSS contract level) OLM Pricing: - Prices for items provided under the Order-Level Materials SIN must be inclusive of the Industrial Funding Fee (IFF). - The value of OLMs in a task or delivery order, or the cumulative value of OLMs in orders against an FSS BPA awarded under an FSS contract, cannot exceed 33.33%. NOTE: When used in conjunction with a Cooperative Purchasing eligible SIN, this SIN is Cooperative Purchasing Eligible.

Interfaces with all areas of project including customer, computer services, and client services. Receives assignments in the form of specific tasks for the work to be completed. Develops resolutions to problems of limited scope.

Education and Experience: Associate’s Degree and a minimum of 7 years of experience within the scope of the contract.

Geospatial Analyst I
Description: Analyzes geographic information about the earth's surface and the objects found on it as well as providing technical and analytical support to address issues such as environmental management, exploration, mining, etc. Duties may include compiling geographic data from a variety of sources including censuses, field observation, satellite imagery, aerial photographs, and existing maps as well as analyzing spatial data for geographic statistics to incorporate into documents and reports. Works on day-to-day objectives with limited impact beyond the scope of own work area/project team. Works under supervision on less complex projects/assignments. Solves simple, routine technical problems following established procedures and policies.

Develops products, solutions, processes using basic principles, theories, and concepts within own technical specialty. Requires basic knowledge of and ability to apply principles, theories, and concepts of narrow technical domain.

Education and Experience: Bachelor’s Degree and a minimum of 0 years of experience within the scope of the contract.

Geospatial Analyst II
Description: Analyzes geographic information about the earth’s surface and the objects found on it as well as providing technical and analytical support to address issues such as environmental management, exploration, mining, etc. Duties may include compiling geographic data from a variety of sources including censuses, field observation, satellite imagery, aerial photographs, and existing maps as well as analyzing spatial data for geographic statistics to incorporate into documents and reports. Works to achieve day-to-day objectives with moderate impact on the area/project team. Works independently on larger, moderately complex projects/assignments. May assist other technical staff with tasks and assignments. Addresses somewhat complex technical issues/problems using internal best practice and through collaboration with colleagues. Develops solutions to technical problems that require depth of technical knowledge but are typically limited in complexity. Requires working knowledge of and ability to apply standards, principles, theories, concepts, and techniques of technical domain.

Education and Experience: Bachelor’s Degree and a minimum of 3 years of experience within the scope of the contract.
LABOR CATEGORY DESCRIPTIONS

* These are minimum requirements, staff that exceed these education and experience requirements may be aligned to the labor categories at ProCleared, LLC’s discretion.

Geospatial Analyst III

Description: Analyzes geographic information about the earth's surface and the objects found on it as well as providing technical and analytical support to address issues such as environmental management, exploration, mining, etc. Duties may include compiling geographic data from a variety of sources including censuses, field observation, satellite imagery, aerial photographs, and existing maps as well as analyzing spatial data for geographic statistics to incorporate into documents and reports. Works independently to achieve day-to-day objectives with significant impact on operational results or project deliverables. Responsible for entire projects or processes within a technical area. Typically, responsible for coaching and reviewing the work of lower level technical staff. Develops technical solutions that require collaboration with internal experts, deep analyses and understanding of impact on end-product/solution. Develops solutions to technical problems and issues that are unclear and require deep technical knowledge. Requires deep understanding of and ability to apply principles, theories, and concepts of technical domain and has broad understanding of other related specialty areas.

Education and Experience: Bachelor’s Degree and a minimum of 10 years of experience within the scope of the contract.

Geospatial Analyst IV

Description: Analyzes geographic information about the earth's surface and the objects found on it as well as providing technical and analytical support to address issues such as environmental management, exploration, mining, etc. Duties may include compiling geographic data from a variety of sources including censuses, field observation, satellite imagery, aerial photographs, and existing maps as well as analyzing spatial data for geographic statistics to incorporate into documents and reports. Works to achieve key project/program objectives and deliverables. Responsible for entire projects or processes spanning multiple technical areas. Manages large projects or processes with moderate impact on the achievement of sub-family results. Develops solutions to complex technical issues and problems that impact multiple area or disciplines. Regularly employs ingenuity and creativity to develop new technical solutions and systems in order to achieve functional objectives. Requires expert knowledge of and ability to apply advanced technical principles, theories, and concepts.

Education and Experience: Bachelor’s Degree and a minimum of 20 years of experience within the scope of the contract.

Instructor/Instruction Systems Design (ISD) I

Description: Develops, maintains, and delivers basic, intermediate, and advanced training classes to government agencies and the Department of Defense (DoD). Responsible for instructing participants on services, procedures, processes, techniques, tactics, products, or skills development. Uses instructional methods and formats such as, guided discussions, practical exercises, lectures, demonstrations, small group exercises, seminars, workshops, field training, laboratories, Computer-Based Training (CBT) and Web Based Training (WBT). Uses Instructional technology, including but not limited to Blackboard. Conducts assessment strategy in accordance with the course design, including instructor observation, testing, and grading. Provides formal and informal student feedback. Utilizes the ADDIE methodology of instruction/instructional systems design to continually evaluate, update, and maintain course materials and curriculum. Power Point presentations, formative and summative assessments, and Agile to the list of instructional technology. Provides subject matter expertise throughout the curriculum creation process, including content review and feedback to development staff. Relevant instructional experience includes, but is not limited to, experience developing and delivering technical training and educational courses in academic, commercial, government, or industrial organizations. Works on assignments that are moderately complex in nature. Requires the use of judgment to resolve problems and to make routine recommendations. Generally, receives no instruction on routine work and general instructions on new assignments. Follows standard practices and procedures.

Education and Experience: Bachelor’s Degree and a minimum of 6 years of experience within the scope of the contract.
LABOR CATEGORY DESCRIPTIONS

* These are minimum requirements, staff that exceed these education and experience requirements may be aligned to the labor categories at ProCleared, LLC's discretion.

Instructor/Instruction Systems Design (ISD) II

**Description:** Develops, maintains, and delivers basic, intermediate, and advanced training classes to government agencies and the Department of Defense (DoD). Responsible for instructing participants on services, procedures, processes, techniques, tactics, products, or skills development. Uses instructional methods and formats such as, guided discussions, practical exercises, lectures, demonstrations, small group exercises, seminars, workshops, field training, laboratories, Computer-Based Training (CBT) and Web Based Training (WBT). Uses Instructional technology, including but not limited to Blackboard. Conducts assessment strategy in accordance with the course design, including instructor observation, testing, and grading. Provides formal and informal student feedback. Utilizes the ADDIE methodology of instruction/instructional systems design to continually evaluate, update, and maintain course materials and curriculum. Would also add Power Point presentations, formative and summative assessments, and Agile to the list of instructional technology. Provides subject matter expertise throughout the curriculum creation process, including content review and feedback to development staff. Relevant instructional experience includes, but is not limited to, experience developing and delivering technical training and educational courses in academic, commercial, government, or industrial organizations. Works on problems of diverse scope where analysis of data requires evaluation of identifiable factors. Exercises independent judgment within generally defined training policies, procedures, and goals in selecting methods and techniques. Supervises or provides guidance to other personnel.

**Education and Experience:** Bachelor’s Degree and a minimum of 10 years of experience within the scope of the contract.

Instructor/Instruction Systems Design (ISD) III

**Description:** Develops, maintains, and delivers basic, intermediate, and advanced training classes to government agencies and the Department of Defense (DoD). Responsible for instructing participants on services, procedures, processes, techniques, tactics, products, or skills development. Uses instructional methods and formats such as, guided discussions, practical exercises, lectures, demonstrations, small group exercises, seminars, workshops, field training, laboratories, Computer-Based Training (CBT) and Web Based Training (WBT). Uses Instructional technology, including but not limited to Blackboard. Conducts assessment strategy in accordance with the course design, including instructor observation, testing, and grading. Provides formal and informal student feedback. Utilizes the ADDIE methodology of instruction/instructional systems design to continually evaluate, update, and maintain course materials and curriculum. Power Point presentations, formative and summative assessments, and Agile to the list of instructional technology. Provides subject matter expertise throughout the curriculum creation process, including content review and feedback to development staff. Relevant instructional experience includes, but is not limited to, experience developing and delivering technical training and educational courses in academic, commercial, government, or industrial organizations. Works on extremely complex problems where analysis of situations or data requires an evaluation of intangible variables. Exercises independent judgment in developing methods, techniques, and evaluation criteria for obtaining results. Supervises or provides guidance to other personnel.

**Education and Experience:** Bachelor’s Degree and a minimum of 15 years of experience within the scope of the contract.
LABOR CATEGORY DESCRIPTIONS

* These are minimum requirements, staff that exceed these education and experience requirements may be aligned to the labor categories at ProCleared, LLC's discretion.

Instructor/Instruction Systems Design (ISD) IV

**Description:** Develops, maintains, and delivers basic, intermediate, and advanced training classes to government agencies and the Department of Defense (DoD). Responsible for instructing participants on services, procedures, processes, techniques, tactics, products, or skills development. Uses instructional methods and formats such as, guided discussions, practical exercises, lectures, demonstrations, small group exercises, seminars, workshops, field training, laboratories, Computer-Based Training (CBT) and Web Based Training (WBT). Uses Instructional technology, including but not limited to Blackboard. Conducts assessment strategy in accordance with the course design, including instructor observation, testing, and grading. Provides formal and informal student feedback. Utilizes the ADDIE methodology of instruction/instructional systems design to continually evaluate, update, and maintain course materials and curriculum. Power Point presentations, formative and summative assessments, and Agile to the list of instructional technology. Provides subject matter expertise throughout the curriculum creation process, including content review and feedback to development staff. Relevant instructional experience includes, but is not limited to, experience developing and delivering technical training and educational courses in academic, commercial, government, or industrial organizations. Works on extremely complex problems where analysis of situations or data requires an evaluation of intangible variables. Exercises independent judgment in developing methods, techniques, and evaluation criteria for obtaining results.

**Education and Experience:** Bachelor’s Degree and a minimum of 20 years of experience within the scope of the contract.

Program Project Manager I

**Description:** Individual responsible for daily operations of a team or work unit (direct supervision of the staff, assignment of work, schedules, day-to-day workflow, and operating costs) relating to professional services such as but not limited to engineering, logistics, consulting, facilitation, and training. Responsibilities may include cost, schedule, and technical performance of a specific unit or work package on a large system development-type task or broad responsibility for all aspects of program/project performance on a small technical services-type task.

**Education and Experience:** Bachelor’s Degree and a minimum of 4 years of experience within the scope of the contract.

Program/Project Manager II

**Description:** Responsible for complex projects. Manages both internal and external project teams and interacts with department heads, customer agency representatives at the ordering agency, and individuals of similar status in the private sector. Provides direct customer liaison at the project management level and user level. Develops and implements systems and performance strategies. Develops and maintains management controls to ensure projects are completed on time, within budget, and in compliance with customer specifications. Develops personnel skill requirements, selects prospective candidates, and monitors performance to achieve project objectives. Has full responsible for the project’s tasks and deliverables.

**Education and Experience:** Bachelor’s Degree and a minimum of 8 years of experience within the scope of the contract.
LABOR CATEGORY DESCRIPTIONS

* These are minimum requirements, staff that exceed these education and experience requirements may be aligned to the labor categories at ProCleared, LLC’s discretion.

Program/Project Manager III

**Description:** Provides broad management authority over very large projects and initiatives, which potentially span multiple accounts or customers. Serves as the interface with government management personnel, contracts managers, and customer agency representatives. Responsible for formulating and enforcing work standards, assigning contractor schedules, reviewing work quality, communicating policies, purposes, and goals of the organization to subordinates. Manages contract and project performance. Experience is required in complete project development from inception to deployment, with a demonstrated ability to provide guidance and direction in project execution.

**Education and Experience:** Bachelor’s Degree and a minimum of 12 years of experience within the scope of the contract.

Program/Project Manager IV

**Description:** Provides broad management authority over very large projects and initiatives, which potentially span multiple accounts or customers. Directs program management teams with government management personnel, contracts managers, and customer agency representatives. Reviews and approves broad-scope project management plans, policies, and strategy.

Responsible for reviewing and approving work standards, contractor schedules, work quality, communicating policies, purposes, and goals of the organization to stakeholders. Final supervisor for contract and project performance. Experience is required in complete project development from inception to deployment, with a demonstrated ability to provide guidance and direction in project execution.

**Education and Experience:** Bachelor’s Degree and a minimum of 20 years of experience within the scope of the contract.

Security Specialist I

**Description:** Responsible for developing and maintaining Information Systems security, including disaster recovery, database protection and software development. Works alongside other IT security analysts to ensure that all applications are functional and secure. Familiar with a variety of the field’s concepts, practices, and procedures. Relies on experience and guidance from team lead as well as judgment to plan and accomplish goals. Performs a variety of tasks. Performs tasks as directed from senior Security Specialists. A wide degree of creativity and latitude is expected. Typically reports to a team lead or middle management.

**Education and Experience:** Associate’s Degree and a minimum of 3 years of experience within the scope of the contract.

Security Specialist II

**Description:** Responsible for developing and managing Information Systems security, including disaster recovery, database protection and software development. Supervises IT security analysts to ensure that all applications are functional and secure. Familiar with a variety of the field’s concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of tasks. Leads and directs the work of others. A wide degree of creativity and latitude is expected. Typically reports to top management.

**Education and Experience:** Associate’s Degree and a minimum of 7 years of experience within the scope of the contract.
LABOR CATEGORY DESCRIPTIONS

* These are minimum requirements, staff that exceed these education and experience requirements may be aligned to the labor categories at ProCleared, LLC’s discretion.

Security Specialist III

**Description:** Responsible for oversight of projects involving developing and managing Information Systems security, including disaster recovery, database protection and software development. Manages teams of IT security analysts to ensure that all applications are functional and secure. Familiar with a variety of the field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of tasks. Leads and directs the work of others. A wide degree of creativity and latitude is expected. Typically reports to Branch or Director-level leadership.

**Education and Experience:** Bachelor’s Degree and a minimum of 10 years of experience within the scope of the contract.

Security Specialist IV

**Description:** Responsible for oversight of projects involving developing and managing Information Systems security, including disaster recovery, database protection and software development. Manages teams of IT security analysts to ensure that all applications are functional and secure. Familiar with a variety of the field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Supervises subordinates and approves project plans, project scope, and policy. Supervises and provides direction to managers. A wide degree of creativity and latitude is expected. Typically reports to or works adjacent to Director-level leadership.

**Education and Experience:** Bachelor’s Degree and a minimum of 15 years of experience within the scope of the contract.

Subject Matter Expert (SME) I

**Description:** Extremely high level of technical competence and analytical skill. Expert knowledge in the particular field of technical specialization with in-depth understanding of the latest developments in the field. Generally assigned as team leader on complex tasks or those requiring significant interaction of various technical disciplines. Works under broad direction concerning general project and business goals. Develops overall project goals and project team structure for significant tasks. Has full technical responsibility for interpreting, organizing, executing, and coordinating aspects within broad objectives and limits. Approves preliminary and final reports.

**Education and Experience:** Bachelor’s Degree and a minimum of 8 years of experience within the scope of the contract.

Subject Matter Expert (SME) II

**Description:** Extremely high level of technical competence and analytical skill. Expert knowledge in the particular field of technical specialization with in-depth understanding of the latest developments in the field. Generally assigned as team leader on complex tasks or those requiring significant interaction of various technical disciplines. Works under broad direction concerning general project and business goals. Develops overall project goals and project team structure for significant tasks. Has full technical responsibility for interpreting, organizing, executing, and coordinating aspects within broad objectives and limits. Approves preliminary and final reports.

**Education and Experience:** Bachelor’s Degree and a minimum of 12 years of experience within the scope of the contract.
LABOR CATEGORY DESCRIPTIONS

* These are minimum requirements, staff that exceed these education and experience requirements may be aligned to the labor categories at ProCleared, LLC’s discretion.

Subject Matter Expert (SME) III

**Description:** Extremely high level of technical competence and analytical skill. Expert knowledge in the particular field of technical specialization with in-depth understanding of the latest developments in the field. Generally assigned as team leader on complex tasks or those requiring significant interaction of various technical disciplines. Works under broad direction concerning general project and business goals. Develops overall project goals and project team structure for significant tasks. Has full technical responsibility for interpreting, organizing, executing, and coordinating aspects within broad objectives and limits. Approves preliminary and final reports.

**Education and Experience:** Master’s Degree and a minimum of 20 years of experience within the scope of the contract.

Systems Architect I

**Description:** As directed by the team lead, establishes system information requirements using analysis of the information engineer(s) in the development of enterprise-wide or large-scale information systems. Designs architecture to include the software, hardware, and communications to support the total requirements as well as provide for present and future cross-functional requirements and interfaces. Ensures these systems are compatible and in compliance with the standards for open systems architectures. Evaluates problems of workflow, organization, and planning, and develops appropriate corrective action.

**Education and Experience:** Bachelor’s Degree and a minimum of 5 years of experience within the scope of the contract.

Systems Architect II

**Description:** Establishes system information requirements using analysis of the information engineer(s) in the development of enterprise-wide or large-scale information systems. Designs architecture to include the software, hardware, and communications to support the total requirements as well as provide for cross-functional requirements and interfaces. Ensures these systems are compatible and in compliance with the standards for open systems architectures. Evaluates problems of workflow, organization, and planning, and develops appropriate corrective action. Provides daily supervision and direction to staff.

**Education and Experience:** Bachelor’s Degree and a minimum of 10 years of experience within the scope of the contract.

Systems Architect III

**Description:** Designs, develops, and supervises implementation of solutions to complex applications problems, system administration issues, or network concerns. Performs systems management and integration functions. Analyzes science, engineering, business, and all other data processing problems for application to electronic data processing systems. Analyzes user requirements, procedures, and problems to automate or improve existing systems and review computer system capabilities, workflow, and scheduling limitations. May analyze or recommend commercially available software. Incorporates engineering strategies for introducing new technology into the organization’s infrastructure-related business processes. Develops future technology and architectural advancements to support CIO architectural strategy, technology migration, and integration and evolution. Applies knowledge of enterprise IT needs to design improved processes, generate valid requirements, and ensures these are consistent with the organization’s CIO enterprise technical architecture (ETA) and Federal Enterprise Architecture (FEA). Acts as an advisor and proposes changes to the ETA based on analysis of requirements and new technology. Works with appropriate parties to resolve discrepancies between proposed IT systems and enterprise quality and security standards.

Provides technical and administrative direction for personnel performing software development tasks, makes recommendations, if needed, for approval of major systems installations. Designs and develops computer software possessing a wide range of capabilities, including numerous engineering, business, and records management
LABOR CATEGORY DESCRIPTIONS

* These are minimum requirements, staff that exceed these education and experience requirements may be aligned to the labor categories at ProCleared, LLC’s discretion.

Education and Experience: Bachelor’s Degree and a minimum of 15 years of experience within the scope of the contract.

Systems Architect IV

Description: Supervises full-lifecycle implementation of solutions to complex applications problems, system administration issues, or network concerns. Advises subordinates on systems management and integration functions. Analyzes science, engineering, business, and all other data processing problems for application to electronic data processing systems. Analyzes user requirements, procedures, and problems to automate or improve existing systems and review computer system capabilities, workflow, and scheduling limitations. May analyze or recommend commercially available software. Designs and approves engineering strategies for introducing new technology into the organization’s infrastructure-related business processes. Develops future technology and architectural advancements to support CIO architectural strategy, technology migration, and integration and evolution. Applies knowledge of enterprise IT needs to design improved processes, generate valid requirements, and ensures these are consistent with the organization’s CIO enterprise technical architecture (ETA) and Federal Enterprise Architecture (FEA). Acts as an advisor and proposes changes to the ETA based on analysis of requirements and new technology. Works with appropriate parties to resolve discrepancies between proposed IT systems and enterprise quality and security standards. Final stop solution for technical and administrative direction for personnel performing software development tasks, makes recommendations, if needed, for approval of major systems installations. Designs and develops computer software possessing a wide range of capabilities, including numerous engineering, business, and records management functions. Typically works directly under or adjacent to the CIO or Director.

Education and Experience: Bachelor’s Degree and a minimum of 20 years of experience within the scope of the contract.

Systems Engineer I

Description: Maintains general awareness of technical trends in information technology, develop and maintain an understanding of on-going IT projects, and business unit requirements; be able to apply the project management model (e.g. Spiral, Waterfall, Agile) selected for a given development effort; and provide analysis, design, development, deployment, and lifecycle support for innovative hardware systems and applications. Ensure systems being developed comply with the enterprise technical architecture; help project and program teams prepare for CIO Project Management Program control gates; and keep middle management apprised of project or program status. Usually tasked by a senior Systems Engineer.

Education and Experience: Bachelor’s Degree and a minimum of 5 years of experience within the scope of the contract.

Systems Engineer II

Description: Serves to maintain a strong awareness of technical trends in information technology, develop and maintain a strong awareness of on-going IT projects, and business unit requirements; be able to apply the project management model (e.g. Spiral, Waterfall, Agile) selected for a given development effort; and provide analysis, design, development, deployment, and lifecycle support for innovative hardware systems and applications. Work involves being able to develop end-to-end cost analysis for projects; ensure systems being developed comply with the enterprise technical architecture; help project and program teams prepare for CIO Project Management Program control gates; and keep senior management apprised of project or program status. Responsible for tasking teams or subordinate Systems Engineers.

Education and Experience: Bachelor’s Degree and a minimum of 10 years of experience within the scope of the contract.
LABOR CATEGORY DESCRIPTIONS

* These are minimum requirements, staff that exceed these education and experience requirements may be aligned to the labor categories at ProCleared, LLC’s discretion.

Systems Engineer III

**Description:** Serves to maintain a strong awareness of technical trends in information technology, develop and maintain a strong awareness of on-going IT projects, and business unit requirements; be able to apply the project management model (e.g. Spiral, Waterfall, Agile) selected for a given development effort; and provide analysis, design, development, deployment, and lifecycle support for innovative hardware systems and applications. Work involves being able to develop end-to-end cost analysis for projects; ensure systems being developed comply with the enterprise technical architecture; help project and program teams prepare for CIO Project Management Program control gates; and keep Branch or Director-level leadership apprised of project or program status.

**Education and Experience:** Bachelor’s Degree and a minimum of 15 years of experience within the scope of the contract.

Systems Engineer IV

**Description:** Supervises a team of Systems Engineers. Serves to maintain a strong awareness of technical trends in information technology, develop and maintain a strong awareness of on-going IT projects, and business unit requirements; be able to apply the project management model (e.g. Spiral, Waterfall, Agile) selected for a given development effort; and provide analysis, design, development, deployment, and lifecycle support for innovative hardware systems and applications. Work involves being able to develop end-to-end cost analysis for projects; ensure systems being developed comply with the enterprise technical architecture; reviews and supervises project and program team’s preparedness for CIO Project Management Program control gates; reports to or works adjacent to Branch or Director-level leadership and keeps all parties apprised of project or program status.

**Education and Experience:** Bachelor’s Degree and a minimum of 20 years of experience within the scope of the contract.

Systems Integrator I

**Description:** Responsible for maintaining integrity of systems-of-systems by defining requirements architecture (consistent with the Enterprise Architecture (EA), (described in 1.0 above) and interfaces. Receives tasking from senior Systems Integrators in relation to testing, documenting, and maintaining solutions to total systems or subsystems using internally created and/or commercial off-the-shelf products. Technical understanding of relationships, dependencies and requirements of hardware and software components. Receives direction from senior team members and ensures problem solution, appropriate risk reduction, and user satisfaction. Makes recommendations, if needed, on test and evaluation strategies for major systems’ installations.

Analyses, designs, tests, and evaluates network systems such as satellite networks, local area networks (LANs), wide area networks (WANS), the Internet, intranets, and other data communications systems ranging from a connection between two offices in the same building to globally distributed networks, voice mail, and e-mail systems of a multinational organization. Maintains network hardware and software. Monitors network to ensure network availability to all system users and perform necessary maintenance to support network availability. Ensures that adequate and appropriate planning is provided for hardware and communications for facilities. Prepares engineering plans and site installation technical design packages. Provides coordination in the analysis, acquisition and installation of hardware and software. Assesses and documents current site network configuration and user requirements.

**Education and Experience:** Bachelor’s Degree and a minimum of 5 years of experience within the scope of the contract.
LABOR CATEGORY DESCRIPTIONS

* These are minimum requirements, staff that exceed these education and experience requirements may be aligned to the labor categories at ProCleared, LLC’s discretion.

**Systems Integrator III**

**Description:** Responsible for maintaining integrity of systems-of-systems by defining requirements architecture (consistent with the Enterprise Architecture (EA), (described in 1.0 above) and interfaces. Plans, implements, tests, documents, and maintains solutions to total systems or subsystems using internally created and/or commercial off-the-shelf products. Knowledge or familiarity with a total systems perspective including a technical understanding of relationships, dependencies and requirements of hardware and software components. Coordinates with other team members and ensures problem solution, appropriate risk reduction, and user satisfaction. Makes recommendations, if needed, on test and evaluation strategies for major systems’ installations. Analyses, designs, tests, and evaluates network systems such as satellite networks, local area networks (LANs), wide area networks (WANs), the Internet, intranets, and other data communications systems ranging from a connection between two offices in the same building to globally distributed networks, voice mail, and e-mail systems of a multinational organization.

Performs network modeling, analysis, and planning including research related products and make necessary hardware and software recommendations. Installs, configures, and supports an organization's local area network (LAN), wide area network (WAN), and Internet system or a segment of a network system. Maintains network hardware and software. Monitors network to ensure network availability to all system users and perform necessary maintenance to support network availability. May supervise other network support and client server specialists and plan, coordinate, and implement network security measures. Ensures that adequate and appropriate planning is provided for hardware and communications for facilities. Prepares engineering plans and site installation technical design packages. Provides coordination in the analysis, acquisition and installation of hardware and software. Manages efforts of a staff engaged in facility additions, moves or changes including analysis, telecommunications (LAN, WAN, voice, video) planning, cabling, IT requirements, etc. Performs site surveys. Assesses and documents current site network configuration and user requirements.

**Education and Experience:** Bachelor’s Degree and a minimum of 10 years of experience within the scope of the contract.
* These are minimum requirements, staff that exceed these education and experience requirements may be aligned to the labor categories at ProCleared, LLC’s discretion.

and installation of hardware and software. “The Service Contract Act (SCA) is applicable to this contract and it includes SCA applicable labor categories. The prices for the indicated SCA labor categories are based on the U.S. Department of Labor Wage Determination Number(s) identified in the matrix. The prices offered are based on the preponderance of where work is performed, and should the contractor perform in an area with lower SCA rates, resulting in lower wages being paid, the task order prices will be discounted accordingly.”
