<thead>
<tr>
<th>SIN</th>
<th>Maximum Order</th>
</tr>
</thead>
<tbody>
<tr>
<td>541330ENG</td>
<td>$1,000,000</td>
</tr>
<tr>
<td>541420</td>
<td>$500,000</td>
</tr>
<tr>
<td>541715</td>
<td>$100,000</td>
</tr>
</tbody>
</table>

3. Minimum Order: $100.00

4. Geographic Coverage (Delivery Area): Domestic only (includes all 50 states and Washington, D.C. only)

5. Point(s) of production (city, county, and state or foreign country): Same as company address.

6. Discount from list prices or statement of net price: Government net prices (discounts already deducted).

7. Quantity discounts: None.
8. Prompt payment terms. Information for Ordering Offices: Prompt payment terms cannot be negotiated out of the contractual agreement in exchange for other concessions: Net 30

9. Foreign items (list items by country of origin): None

10a. Time of Delivery (Contractor insert number of days): Contact Contractor.

10b. Expedited Delivery. Items available for expedited delivery are noted in this price list: Contact Contractor.

10c. Overnight and 2-day delivery. Contact Contractor.

10d. Urgent Requirements. Contact Contractor.

11. F.O.B. Point(s): Destination.

12a. Ordering Address(es): Same as Contractor. E-mail: Heather.Lacroix@chenegati.com.

12b. Ordering procedures: For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPAs), are found in Federal Acquisition Regulation (FAR) 8.405-3.

13. Payment address(es): Chenega Technical Innovations, LLC
   Attn: Chenega Corporation Accounting Department, Accounts Payable
   3000 C Street, Suite 301
   Anchorage, AK 99503
   Phone: 907-277-5706
   Email: CORP-AP@chenega.com

14. Warranty provision: Standard Commercial Warranty Terms & Conditions

15. Export Packing Charges (if applicable): N/A

16. Terms and conditions of rental, maintenance, and repair (if applicable). N/A

17. Terms and conditions of installation (if applicable). N/A

18a. Terms and conditions of repair parts indicating date of parts price lists and any discounts from list prices (if applicable). N/A

18b. Terms and conditions for any other services (if applicable). N/A

19. List of service and distribution points (if applicable). N/A

20. List of participating dealers (if applicable). N/A

21. Preventive maintenance (if applicable). N/A

22a. Special attributes such as environmental attributes (e.g., recycled content, energy efficiency, and/or reduced pollutants). N/A
22b. If applicable, indicate that Section 508 compliance information is available on Electronic and Information Technology (EIT) supplies and services and show where full details can be found (e.g. contractor’s website or other location). The EIT standards can be found at: www.Section508.gov/. As applicable

23. Data Universal Numbering System (DUNS) Number: 96-820-6123

24. Notification regarding registration in the System for Award Management (SAM) database: Contractor registered and active in SAM.
Final Pricing:

The rates shown below include the Industrial Funding Fee (IFF) of 0.75%

Labor Category Descriptions – SINs 541330ENG, 541420 & 541715

Substitution Methodology:
- A High School Diploma + 2 years of experience equals an Associate’s Degree
- A High School Diploma + 4 years of experience equals a Bachelor’s Degree
- An Associate’s Degree + 2 years of experience equals a Bachelor’s Degree
- A Bachelor’s Degree + 4 years of experience equals a Master’s Degree

POSITION: Engineer/Scientist I
Job Description: Implements engineering principles, techniques and processes. Decides appropriate tests to evaluate, debug and check systems. Documents the result of complex analysis and design tasks. May design moderately complex systems; assists in developing standards and techniques. Plans and performs engineering research, design development and other assignments in conformance with design, engineering and customer specifications.
Education and Experience Requirements: Bachelor's Degree and 2 years of direct experience.

POSITION: Engineer/Scientist II
Job Description: Implements engineering principles, techniques and processes. Decides appropriate tests to evaluate, debug and check systems. Documents the result of complex analysis and design tasks. May design moderately complex systems; assists in developing standards and techniques. Plans and performs engineering research, design development and other assignments in conformance with design, engineering and customer specifications.
Education and Experience Requirements: Bachelor's Degree and 5 years of direct experience.

POSITION: Engineer/Scientist III
Job Description: Implements engineering principles, techniques and processes. Decides appropriate tests to evaluate, debug and check systems. Documents the result of complex analysis and design tasks. May design moderately complex systems; assists in developing standards and techniques. Plans and performs engineering research, design development and other assignments in conformance with design, engineering and customer specifications. May act in a lead role of a project team.
Education and Experience Requirements: Bachelor's Degree and 10 years of direct experience.

POSITION: Project Manager
Job Description: Responsible for the day-to-day tactical duties for a basic program. Accountable to oversee results of multi-functional project teams. Responsible for the administrative/operational leadership of a project within the program guidelines set by the Program Manager and customer. Monitors project to ensure work scope, schedule, and budget are well defined and maintained. Provides the coordination between resource managers/supervisors and ensures all necessary reviews and approvals are received. May conduct performance/project analyses during phase-down to benefit future/other projects/missions/programs.
Education and Experience Requirements: Bachelor's Degree and 5 years’ experience

POSITION: Program Manager I
Job Description: Must be capable of planning, coordinating, and directing the activities of administrative, program, and technical personnel. Must have a thorough understanding and experience in the complete life-cycle management of military systems. Must have knowledge and experience with Department of Defense (DOD)/Army plans, policies, standards, and methods aimed at the acquisition and support of military systems. Must be capable of managing and controlling schedules and cost to provide
on time, within budget, performance of all aspects of the contractual effort. Must be capable of providing direction for operations and ensuring compliance with all management policies, plans, and procedures. Must be capable of providing recommendations for resolution of technical problems.

**Education and Experience Requirements:** Bachelor's Degree and 5 years’ experience

**POSITION: Program Manager II**

**Job Description:** Provides planning, coordinating, and directing to activities of administrative, program, and technical personnel. Must have a thorough understanding and experience in the complete life-cycle management of military systems. Can manage and control schedules and cost to provide on time, within budget, performance of all aspects of the contractual effort. Can provide direction for operations and ensuring compliance with all management policies, plans, and procedures. Can provide recommendations for resolution of technical problems.

**Education and Experience Requirements:** Bachelor's Degree and 10 years’ experience

**POSITION: Logistician II**

**Job Description:** Assists with design, analysis, implementation, and modification of logistics systems and processes. Prepares technical documentation and reports. Prepares briefings and presentations as required. Maintains records. Coordinates logistics activities.

**Education and Experience Requirements:** Associate’s Degree and 2 years of relevant experience.

**POSITION: Logistician III**

**Job Description:** Analyzes and coordinates the logistical functions. Responsible for lifecycle of a product. Determines overall support requirements. Directs and coordinates program activities. Determines logistic support sequence and time phasing.

**Education and Experience Requirements:** Bachelor’s Degree and 6 years’ of relevant experience.

**POSITION: Program/System Analyst I**

**Job Description:** Prepares system and program specifications and documentation that includes designing report formats, record layouts, screen layouts and algorithms. Implements modifications to existing systems. Documents program and system logic. Defines and designs data capture forms, data conversion procedures, data validation/correction steps, and database definition tables. Analyses and evaluates design concepts to determine if support requirements have been met. Study the supportability of a supportability of alternative concepts. Determines logistics schedules. Anticipates issues and identifies contingency requirements and solutions.

**Education and Experience Requirements:** Bachelor’s Degree with 2 years of experience

**POSITION: Program/System Analyst II**

**Job Description:** Prepares system and program specifications and documentation that includes designing report formats, record layouts, screen layouts and algorithms. Implements modifications to existing systems. Documents program and system logic. Defines and designs data capture forms, data conversion procedures, data validation/correction steps, and database definition tables. Analyses and evaluates design concepts to determine if support requirements have been met. Study the supportability of alternative concepts. Determines logistics schedules. Anticipates issues and identifies contingency requirements and solutions.

**Education and Experience Requirements:** Bachelor’s Degree with 4 years of experience

**POSITION: Program/System Analyst III**

**Job Description:** Prepares system and program specifications and documentation that includes designing report formats, record layouts, screen layouts and algorithms. Implements modifications to existing systems. Documents program and system logic. Defines and designs data capture forms, data
conversion procedures, data validation/correction steps, and database definition tables. Analyses and evaluates design concepts to determine if support requirements have been met. Study the supportability of alternative concepts. Determines logistics schedules. Anticipates issues and identifies contingency requirements and solutions.

**Education and Experience Requirements:** Bachelor’s Degree with 6 years of experience

**POSITION:** Program/System Analyst IV  
**Job Description:** Supervises a team of program/system analysts and logisticians. Prepares system and program specifications and documentation that includes designing report formats, record layouts, screen layouts and algorithms. Implements modifications to existing systems. Documents program and system logic. Defines and designs data capture forms, data conversion procedures, data validation/correction steps, and database definition tables. Analyses and evaluates design concepts to determine if support requirements have been met. Study the supportability of alternative concepts. Determines logistics schedules. Anticipates issues and identifies contingency requirements and solutions.

**Education and Experience Requirements:** Bachelor’s Degree with 8 years of experience

**POSITION:** SME  
**Job Description:** The Subject Matter Expert is that individual who exhibits the highest level of expertise in performing a specialized job, task, or skill within the organization. This individual must have achieved a high-level of experience and recognition by professional societies in his or her field. Must have performed at senior levels in areas of expertise and be well renowned in his or her professional community. Possess the ability to solve complex problems in an efficient and unique manner. Individual possesses a one-of-a-kind, unique expertise not readily available.

**Education and Experience Requirements:** Bachelor’s Degree and 8 years of direct relevant experience

**POSITION:** Content Developer  
**Job Description:** Provides technical guidance to other staff members as well as oversees several concurrent projects involving highly complex systems analysis, design and advanced programming of major significance. Provides expert technical assistance and direction to professional personnel involved in the development, maintenance and enhancement of Enterprise wide Internet/Intranet, and database applications systems. Coordinates output, and ensures the technical adequacy of the end product in achieving specified goals and performance standards. Evaluates application systems for effectiveness in design. Recommends measures of a procedural or technical nature to correct or resolve deficiencies. Develops technical papers describing many aspects of technology, including descriptive and guidance material specifications, alternative solutions and analysis.

**Education and Experience Requirements:** Bachelor’s Degree and 5 years of experience

**POSITION:** Senior Content Developer

**Education and Experience Requirements:** Bachelor’s Degree and 8 years of experience
POSITION: **Logistics Technician**
Assists with design, analysis, implementation, and modification of logistics systems and processes. Prepares technical documentation and reports. Prepares briefings and presentations as required. Maintains records. Coordinates logistics activities.

**Education and Experience Requirements:** Associate’s Degree, and 1 year of relevant experience.

POSITION: **Senior Logistics Technician**
**Job Description:** Analyzes and coordinates the logistical functions. Responsible for lifecycle of a product. Determines overall support requirements. Directs and coordinates program activities. Determines logistic support sequence and time phasing.

**Education and Experience Requirements:** Bachelor’s Degree 6 years of relevant experience.

POSITION: **Engineer**
**Job Description:** Implements engineering principles, techniques and processes. Decides appropriate tests to evaluate, debug and check systems. Documents the result of complex analysis and design tasks. May design moderately complex systems; assists in developing standards and techniques.

**Education and Experience Requirements:** Bachelor's Degree and 4 years of relevant experience.

POSITION: **Senior Engineer**
**Job Description:** Implements engineering principles, techniques and processes. Decides appropriate tests to evaluate, debug and check systems. Documents the result of complex analysis and design tasks. May design moderately complex systems; assists in developing standards and techniques. May act in a lead role of a project team.

**Education and Experience Requirements:** Bachelor's Degree and 5 years of relevant experience.

POSITION: **Field Technician**
**Job Description:** Provide service and customer support during field visits. On site installation, repair, maintenance and testing. Diagnosing errors and technical problems and determine solutions. Following company procedures and protocols. Produce detailed service reports. Document processes.

**Education and Experience Requirements:** Associate’s Degree and 2 years of direct relevant experience.

POSITION: **Senior Field Technician**
**Job Description:** Provide service and customer support during field visits. Manage on site installation, repair, maintenance and testing. Diagnosing errors and technical problems and determine solutions. Following company procedures and protocols. Produce detailed service reports. Document processes.

**Education and Experience Requirements:** Bachelor’s Degree with 5 years of direct relevant experience.

POSITION: **Office Clerk**
**Job Description:** Performs general project administration and support activities for the program to facilitate the efficient operation of the program. Maintain files and records and keep them updated. Sort incoming mail and prepare outgoing mail. Answering phones and directing calls. Take meeting minutes. Assist in office organization procedures.

**Education and Experience Requirements:** High School Diploma with 1 year of experience.

POSITION: **Office Manager**
**Job Description:** Manages the administrative team. Collects and organizes information for preparation of customer deliverables. Prepares management plans, reports, and presentations to customer and executive management. Assess products and procedures for compliance with government standards.
Education and Experience Requirements: Bachelor’s Degree with 6 years of experience

POSITION: Architect/Engineer
Job Description: Implements engineering principles, techniques and processes. Decides appropriate tests to evaluate, debug and check systems. Documents the result of complex analysis and design tasks. May design moderately complex systems; assists in developing standards and techniques. Plans and performs engineering research, design development and other assignments in conformance with design, engineering and customer specifications.
Education and Experience Requirements: Bachelor's Degree and 2 years of direct experience.

POSITION: Senior Architect/Engineer
Job Description: Implements engineering principles, techniques and processes. Decides appropriate tests to evaluate, debug and check systems. Documents the result of complex analysis and design tasks. May design moderately complex systems; assists in developing standards and techniques. Plans and performs engineering research, design development and other assignments in conformance with design, engineering and customer specifications. May act in a lead role of a project team.
Education and Experience Requirements: Bachelor's Degree and 10 years of experience.

POSITION: Technical Writer
Job Description: Plans, manages and coordinates documentation of all aspects of the system engineering life cycle for projects. Writes, edits and rewrites material of a technical nature. Prepares manuals, user guides, and other technical documentation for presentations. Possesses excellent writing skills. Must be knowledgeable of ADP operations and be able to verbally communicate effectively.
Education and Experience Requirements: Bachelor’s Degree and 8 years of general experience

POSITION: Senior Technical Writer
Job Description: Plans, manages and coordinates documentation of all aspects of the system engineering life cycle for projects. Writes, edits and rewrites material of a technical nature. Prepares manuals, user guides, and other technical documentation for presentations. Possesses excellent writing skills, is knowledgeable of ADP operations and be able to verbally communicate effectively.
Education and Experience Requirements: Bachelor’s Degree and 8 years of general experience

POSITION: Analyst
Job Description: Assists in the design and conduct of complex IT management studies involving one or more of the activities reverent to the ordering agencies IT community. Schedules work to meet completion dates, estimates personnel needs, reviews project progress and makes changes in methodologies where necessary. Prepares presentations to management and other officials and prepares written reports and analyses as required; designs, reviews, and evaluates management and administrative automated systems.
Education and Experience Requirements: Bachelor’s Degree and 3 years of experience

POSITION: Senior Analyst
Job Description: Provides functional and technical expertise in recommending solutions for complex enterprise business problems. Defines information needs, develops business and data architectures, and provides input for technical architectures in the form of business requirements. Documents business process flows, identifies functional requirements, prepares project documentation, develops performance requirements, and supports organizational planning activities. Possesses expert domain knowledge of functional areas. May apply industry best practices to develop recommendations for vendor selection,
implementation strategy, and cost benefit analysis. Conduct program planning, audits, and evaluations. Conducts studies, analyses, scenarios, and reports relating to an agency's mission-oriented business programs or initiatives, such as defense studies, tabletop exercises or scenario simulations, educational studies, regulatory or policy studies, health care studies, economic studies, and preparedness studies. May lead or facilitate group discussions and briefings. Conducts customized business training as needed to successfully perform/complete a consulting engagement. Provides policy and regulation development assistance.

**Education and Experience Requirements:** Bachelor’s Degree and 8 years of experience

**POSITION: Administrative Assistant**

**Job Description:** Assists management in project/task cost containment and cost management activities. Assists management in technical administration, contract administration and facility operation activities. Supervises subordinate administrative and support staff.

**Education and Experience Requirements:** Associate’s Degree and 4 years of experience

**POSITION: Graphics Technician**

**Job Description:** Responsible for planning, laying out, and executing illustrations in black and white or color, and illustrating technical or scientific materials in one or more of the commonly used art media, and using COTS computer tools applicable to support the requirements. Designs, develops, and delivers comprehensive integrated graphics to meet customer requirements; Plans presentations that typically include illustrations, photographs, video, animation, and/or text.

**Education and Experience Requirements:** Bachelor’s Degree with 2 years of related experience

**POSITION: Senior Graphics Technician**

**Job Description:** Responsible for planning, laying out, and executing illustrations in black and white or color, and illustrating technical or scientific materials in one or more of the commonly used art media, and using COTS computer tools applicable to support the requirements. Designs, develops, and delivers comprehensive integrated graphics to meet customer requirements; Plans presentations that typically include illustrations, photographs, video, animation, and/or text.

**Education and Experience Requirements:** Bachelor’s Degree and 4 years of related experience

**POSITION: CAD Operator**

**Job Description:** Perform draft, create, and edit surveys, site plans, and various other types of drawings.

**Education and Experience Requirements:** High School Diploma and 3 years of experience

**POSITION: Process Engineer**

**Job Description:** Create, set specifications, develop, implement and monitor equipment or processes as part of the system. Help design innovative processes, modify, and/or optimize equipment or processes that are already in place.

**Education and Experience Requirements:** Bachelor’s Degree and 3 years’ of related experience.

**POSITION: Senior Process Engineer**

**Job Description:** Create, set specifications, develop, implement and monitor equipment or processes that are part of the specified system. Design innovative processes, modify, and/or optimize equipment or processes that are already in place.

**Education and Experience Requirements:** Bachelor’s Degree and 7 years’ of related experience.

**POSITION: Systems Engineer**

**Job Description:** Be able to perform one or more of the following: Must be knowledgeable in implementing systems engineering in a phased approach of requirements analysis through testing. Must
be knowledgeable in performing system requirements analysis. Must be able to present systems engineering analyses for user approval at formal reviews. Must be capable of performing configuration management, software integration, and interpretation of software test results. Must be knowledgeable in life-cycle support, including maintenance, administration, and management. Must be able to provide solutions to identified engineering problem reports.

**Education and Experience Requirements:** Bachelor’s Degree and 3 years of relevant experience.

**POSITION:** Senior Systems Engineer  
**Job Description:** Be able to perform one or more of the following: Must be knowledgeable in implementing systems engineering in a phased approach of requirements analysis through testing. **Education and Experience Requirements:** Bachelor's Degree and 7 years of experience

**POSITION:** Electrical Engineer  
**Job Description:** Support the electrical design development of products. Design, test, document, and troubleshoot products. Develop documentation, flowcharts, and diagrams to support problem analysis.

**Education and Experience Requirements:** Bachelor’s Degree and 4 years of direct experience.

**POSITION:** Senior Electrical Engineer  
**Job Description:** Support the electrical design development of products. Design, test, document, and troubleshoot products. Develop documentation, flowcharts, and diagrams to support problem analysis.

**Education and Experience Requirements:** Bachelor’s Degree and 8 years of direct experience.
POSITION: **Senior Scientist**  
**Job Description:** Performs the functions of a technical expert in the relevant scientific field in support of major programs or system development. Applies scientific expertise in defining and resolving system issues, performing analysis, and developing plans and requirements in the subject-matter area for complex systems. Coordinates and manages the preparation of analysis, evaluations, and recommendations for proper implementation of programs and systems.  
**Education and Experience Requirements:** Bachelor’s Degree and 7 years of experience

POSITION: **Project Coordinator**  
**Job Description:** Responsible for maintaining and monitoring project plans, project schedules, work hours, and budgets. Organizes, attends, and participates in meetings. Prepares necessary presentation material for meetings. Provides development of project strategies, ensuring project deadlines are met, and assess project risks and issues.  
**Education and Experience Requirements:** Bachelor’s Degree and 3 years’ experience in a related field.

POSITION: **Field Lead**  
**Job Description:** Performs as team leader. Operates, troubleshoots, evaluates, installs, repairs, tests, and performs maintenance on systems and equipment. Reads and interprets blueprints, drawings, diagrams, schematics, or other technical data. Performs training in the operation and maintenance of systems and equipment.  
**Education and Experience Requirements:** Associates Degree and 8 years of project related experience.

POSITION: **Principal Technical Specialist**  
**Job Description:** Provides expert services and leadership in specialized technical areas. Provides support to any phase of System Life Cycle Support as task requirements dictate. Provides advice and assistance in state-of-the-art hardware, software, and telecommunications solutions involving hardware of various capacities, multiple operating environments, database management systems, specialized software, data communications facilities, and protocols including Value Added Networks, fourth generation technologies, and complex software tools or packages. Provides expertise for analyses and studies, enhances or implements system software solutions. Provides expertise for test and acceptance phases. May be required to act as technical supervisor to other project personnel who must prepare or modify software to implement the recommended technical solution. Coordinates with management and technical personnel to ensure that technical problems have been properly defined and that the recommended solution is implemented.  
**Education and Experience Requirements:** Master’s Degree and 7 years of general experience

POSITION: **Senior Principal Technical Specialist**  
**Job Description:** Provides expert services and leadership in specialized technical areas. Applies this leadership to any phase of System Life Cycle Support as task requirements dictate. Provides expert advice and assistance in state-of-the-art hardware, software, and telecommunications solutions involving hardware of various capacities, multiple operating environments, database management systems, specialized software, data communications facilities, and protocols including Value Added Networks, fourth generation technologies, and complex software tools or packages. modify software to implement the recommended technical solution. Coordinates with management and technical personnel to ensure that technical problems have been properly defined and that the recommended solution is implemented.

**Education and Experience Requirements:** Master’s Degree and 10 years of general experience

**Labor Category Descriptions – SIN 54151S**

**Substitution Methodology:**
- A High School Diploma + 2 years of experience equals an Associate’s Degree
- A High School Diploma + 4 years of experience equals a Bachelor’s Degree
- An Associate’s Degree + 2 years of experience equals a Bachelor’s Degree
- A Bachelor’s Degree + 4 years of experience equals a Master’s Degree

**POSITION: Computer Programmer**
**Job Description:** Write code using appropriate technologies. Creates user test documentation and perform necessary tests. Create and maintain technical documentation. Participate in code review sessions. Maintain inventory of software to include any software used for development.

**Education and Experience Requirements:** Bachelor’s Degree and 3 years’ experience

**POSITION: Senior Computer Programmer**
**Job Description:** Write code using appropriate technologies. Creates user test documentation and perform necessary tests. Create and maintain technical documentation. Participate in code review sessions. Maintain inventory of software to include any software used for development.

**Education and Experience Requirements:** Bachelor’s Degree and 8 years’ experience

**POSITION: IT System Analyst**
**Job Description:** Perform range of design development, analysis or review tasks independently. Prepare, deliver, submit technical papers & perform engineering studies. Verify/comply with engineering documentation standards/test procedures. Analyze / provide solutions for engineering problems/complex situations.

**Education and Experience Requirements:** Bachelors’ Degree required and 3 years of experience.

**POSITION: Senior IT System Analyst**
**Job Description:** Lead team in development or analysis of large-scale SW projects. Provide technical management and leadership for a given project, contract or job with overall responsibility for cost, schedule, technical and employee performance. Perform evaluations in the development, design and implementation, and maintenance of complex programs or systems. Perform site visits and investigations, and analyze problems associated with directed task.

**Education and Experience Requirements:** Bachelors’ Degree required and 8 years of experience.

**POSITION: Web Design Manager**
**Job Description:** The Web Design Manager provides web design, development, site administration and training support. Manages all aspects of the web design, works closely with other designers on the team in managing the design and layouts. This includes requests for web modifications and maintenance of the design for multiple networks.

**Education and Experience Requirements:** Bachelor’s Degree and 8 years of related experience.

**POSITION: Web Designer**
Job Description: Creates layout and designs for websites. Develops materials (to include graphics, animations, videos, and Web interfaces) for websites, mobile applications, and eLearning products; assesses and implements requirements for websites, mobile applications and eLearning products; makes recommendations regarding software upgrades and use of new innovations; develops and administers back and front services to support Flash, and other HTML5 multimedia content; develops and administers SQL server and other databases to support multi-media and interactive training; creates interactive graphics/animations using available development tools.
Education and Experience Requirements: Bachelor’s Degree and 5 years’ experience

POSITION: Programmer
Job Description: Perform a range of design development, analysis or review tasks under minimal supervision. Act as a lead on less complex tasks and responsible for a portion of a design of a design or section of an analysis or design review. Develop, maintain and produce technical documentation and system/subsystem specifications. Coordinate and work closely with other engineering, logistics, financial, and program management disciplines to define system specifications and requirements.
Education and Experience Requirements: Bachelor’s Degree required and 5 years of experience.

POSITION: Senior Programmer
Job Description: Performs a range of design development, analysis, or review tasks independently. Direct interface with internal/external customers at all levels from quotations to final design & test activities, design, reviews, and technical working group meetings to comply with requirements & specifications. Conduct site visits and experimental investigations and analyze engineering problems, propose solutions and alternatives, and provide recommendations. Coordinate and work closely with other engineering, logistics, financial, & program management disciplines to define system specifications / requirements.
Education and Experience Requirements: Bachelor’s Degree required and 5 years of experience.

POSITION: Application Developer
Job Description: Analyzes user needs to determine requirements and conducts feasibility studies. Identifies resources required for each task. May supervise a small support staff and/or serve as liaison to client staff. Researches developments in field of expertise and applies them to the client environment, including emerging technologies, lessons learned, best practices, and assessment methodologies. Interfaces with client personnel at all organizational levels. Develops white papers and system documentation. Converts functional specifications to technical specifications.
Education and Experience Requirements: Bachelor’s Degree and 5 years of related experience.

POSITION: Network Technician
Job Description: Responsible for the analysis, design, and implementation of physical and virtual networks and the supporting hardware. Installs and maintains existing hardware which includes network routers, switches, cables and other hardware. Troubleshoots diagnoses and resolves hardware and software problems. Installs, upgrades, and configures software, hardware and peripheral components. Performs patching, upgrades, backups and disaster recovery functions in accordance with established procedures.
Education and Experience Requirements: Bachelor’s Degree and 6 years of experience
