1b. Identification of the lowest priced model number and lowest unit price for each special item number awarded in the contract. This price is the Government price based on a unit of one, exclusive of any quantity/dollar volume, prompt payment, or any other concession affecting price. Those contracts that have unit prices based on the geographic location of the customer, should show the range of the lowest price, and cite the areas to which the prices apply. Not Applicable

1c. If the Contractor is proposing hourly rates a description of all corresponding commercial job titles, experience, functional responsibility and education for those types of employees or subcontractors who will perform services shall be provided. See Price List Below

2. Maximum Order: SInS 541519PIV & 541611 ($1,000,000.00); SIN 54151S ($500,000.00); SIN OLM ($250,000.00)

3. Minimum Order: $100.00

4. Geographic Coverage (delivery Area): Domestic Only

5. Point(s) of production (city, county, and state or foreign country): Same as company address

6. Discount from list prices or statement of net price: Government net prices (discounts already deducted)

7. Quantity discounts: For SINs 541611: 1% over $500,000; For SIN 54151S and 541519PIV: 1% for orders over $250,000

8. Prompt payment terms: Net 30 days. Information for Ordering Offices: Prompt payment terms cannot be negotiated out of the contractual agreement in exchange for other concessions.

9. Foreign items (list items by country of origin): None

10a. Time of Delivery (Contractor insert number of days): Specified on the Task Order

10b. Expedited Delivery. The Contractor will insert the sentence “Items available for expedited delivery are noted in this price list.” under this heading. The Contractor may use a symbol of its choosing to highlight items in its price list that have expedited delivery: Contact Contractor

10c. Overnight and 2-day delivery. The Contractor will indicate whether overnight and 2-day delivery are available. Also, the Contractor will indicate that the schedule customer may contact the Contractor for rates for overnight and 2-day delivery: Contact Contractor
10d. Urgent Requirements. The Contractor will note in its price list the “Urgent Requirements” clause of its contract and advise agencies that they can also contact the Contractor’s representative to effect a faster delivery: **Contact Contractor**

11. F.O.B Points(s): **Destination**

12a. Ordering Address(es): **Same as company address**

12b. Ordering procedures: For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPAs) are found in Federal Acquisition Regulation (FAR) 8.405-3.

13. Payment address(es): **Same as company address**

14. Warranty provision: **Standard Commercial Warranty**

15. Export Packing Charges (if applicable): **N/A**

16. Terms and conditions of rental, maintenance, and repair (if applicable): **N/A**

17. Terms and conditions of installation (if applicable): **N/A**

18a. Terms and conditions of repair parts indicating date of parts price lists and any discounts from list prices (if applicable): **N/A**

18b. Terms and conditions for any other services (if applicable): **N/A**

19. List of service and distribution points (if applicable): **N/A**

20. List of participating dealers (if applicable): **N/A**

21. Preventive maintenance (if applicable): **N/A**

22a. Environmental attributes, e.g., recycled content, energy efficiency, and/or reduced pollutants: **N/A**

22b. If applicable, indicate that Section 508 compliance information is available on Electronic and Information Technology (EIT) supplies and services and show where full details can be found (e.g. contactor’s website or other location.) The EIT standards can be found at: [www.Section508.gov/](http://www.Section508.gov/). **N/A**

23. Unique Entity Identifier (UEI) number: **UXFFMM4BN553**

24. Notification regarding registration in System for Award Management (SAM) database: **Registered**
The rates shown below include the Industrial Funding Fee (IFF) of 0.75%.

**LABOR CATEGORY DESCRIPTIONS**

**Program Manager**

Functional Responsibilities: Serves as lead interface with the clients’ COR and other client program management personnel. Responsible for the overall task performance and supervision of program and project management contract personnel assigned. Plans and develops methods and procedures for implementing processes, programs and procedures. Supports the procurement, design, build, test, implementation, security authorization, management, operation, and maintenance of complex enterprise systems.Directs and coordinates program activities, and exercises direction over personnel responsible for delivering specific functions or phases of a program. Organizes resources to support multiple projects, develops and reviews project status, and manages contract personnel costs.

Minimum Education: Bachelor’s Degree

Minimum Experience: 10 years

**Senior Technical Writer / Editor**

Functional Responsibilities: Works with SMEs and stakeholders to collect and organize information for preparation of user manuals, training materials, design documents, installation guides, proposals, and reports. Applies understanding of related discipline(s) to edit functional descriptions, system specifications, user manuals, special reports, and any other customer deliverables and documents.

Minimum Education: Bachelor’s Degree

Minimum Experience: 7 years

**Senior Business Subject Matter Expert**

Functional Responsibilities: Provide consulting to agency heads, directors, and senior managers on quality improvement, capital planning, business process reengineering, and strategic implementation. Responsible for the overall task performance and supervision of consulting and project management contract personnel assigned. Directs and coordinates program activities, and exercises direction over personnel responsible for delivering specific functions or phases of program. Supports and participates in the conceptualization and development of policy, methodologies, models, techniques and strategies. Works independently or leads a team in designing and developing new solutions or major enhancements.
May lead or support strategic planning, information planning, business studies, and analysis. Develop high level project plans.

Minimum Education: Bachelor’s Degree
Minimum Experience: 10 years

**Configuration Management Specialist**

Functional Responsibilities: Identifies and assists in developing and implementing configuration management systems. Provides development and/or revision of a plan and process for implementing and managing system changes.

Minimum Education: Bachelor’s Degree
Minimum Experience: 10 years

**Systems Engineer-III**

Functional Description: Serves as SME on highly complex projects involving technology and business process improvement. Produces and/or reviews policy and/or technical documentation reflecting detailed subject matter knowledge. Provides direction for problem definition, analysis, requirements development, and implementation for complex systems and solutions in the subject matter area. Makes recommendations and advises on enterprise-wide program and system improvements, optimization, and/or maintenance efforts.

Minimum Experience: Minimum 12 years’ experience in two or more of the following disciplines: Systems architecture, IT Security, Networking, Project/Program Management, System Lifecycle Management or Software Development Methodologies.

Minimum Education: Bachelor's degree or higher relating to the area of expertise and one or more of the following certifications: CISSP, MCSE, PMP, CCNA, CCNP

**Sr. Engineer-II**

Functional Description: Performs the planning, development and implementation of hardware, operating system and application software products. Develops and writes technical specifications, and user guides. Provides technical leadership and direction on the implementation of complex enterprise systems and solutions. Serves as the technical expert to support business process improvement practices and methodologies, activity and data modeling, transaction flow analysis, internal control and risk analysis, and performance measurement techniques.

Minimum Experience: Minimum 10 years’ experience in systems or software engineering, and demonstrated capability in managing complex information systems development, testing, and implementation.

Minimum Education/Certifications: Bachelor’s degree or higher in Computer Science, Information Systems, Engineering or other related discipline and one or more of the following certifications: CISSP, MCSE, PMP, CCNA, CCNP

**Test Engineer-II (Functional Tester)**

Functional Description: Provides testing and evaluation expertise to validate the proper implementation of new requirements involving complex hardware and software systems. Must be capable of developing and executing IT software tests and evaluating results to ensure compliance with applicable regulations and user requirements. Must be able to prepare test scripts and all required test documentation. Reviews test results and evaluates for conformance to design. Directs and participates in all phases of User Acceptance, Regression and Integration testing.

Minimum Experience: Minimum 5-7 years’ experience developing automated and manual test scripts and analyzing and reporting results against defined requirements. At least 3 years’ experience in software development/testing.

Minimum Education: Bachelor's degree or 10 years’ experience in related discipline
Sr. Business Subject Matter Expert

Functional Description: Provide consulting to agency heads, directors, and senior managers on quality improvement, capital planning, architecture, business process reengineering, and strategic implementation of information technology techniques. Responsible for the overall task performance and supervision of technical and project management contract personnel assigned. Directs and coordinates program activities, and exercises direction over personnel responsible for delivering specific functions or phases of program. Supports and participates in the conceptualization and development of technology policy, methodologies, models, techniques and strategies. Works independently or leads a development or engineering team in designing and developing new solutions or major enhancements to existing complex IT systems/solutions. May lead or support enterprise wide strategic system planning, information planning, business studies, and analysis. Manages the purchase, installation, and support of hardware/software. Develop high level network diagrams, database schemas interface diagrams and project plans.

Minimum Experience: 10+ Years’ experience designing enterprise wide system solutions. Minimum 7 years hands-on experience with one or more of the following: network devices, database solutions, enterprise servers, network protocols. Minimum 10 years’ experience with project/program management

Minimum Education: Advance degree in related discipline

Business Integration Manager-II

Functional Description: Serves as lead interface with the clients’ COR and other client program management personnel. Responsible for the overall task performance and supervision of technical and project management contract personnel assigned. Plans and develops methods and procedures for implementing processes, programs and systems. Supports the procurement, design, build, test, implementation, security authorization, management, operation, and maintenance of complex enterprise systems. Directs and coordinates program activities, and exercises direction over personnel responsible for delivering specific functions or phases of a program. Organizes resources to support multiple projects, develops and reviews project status, and manages contract personnel costs.

Minimum Experience: 10+ years’ experience in related field to include information systems project management from development to deployment with demonstrated ability to provide guidance and direction. Proven experience in the management and control of budgets and resources and demonstrated capability in managing complex programs.

Minimum Education: Bachelor's degree or higher in related field

System Designer/Engineer-III

Functional Description: Responsible for system/application design, coding, testing, debugging and documentation. Has knowledge of all phases of the SDLC process. Responsible for quality assurance review. Manages system/software development and support using formal specifications, data flow diagrams, other accepted design techniques, and Computer Aided Software Engineering (CASE) tools. Translates system/software requirements to system design specifications and code and integrates and tests system/software components. Formulates and defines system build and implementation objectives through research and analysis.

Minimum Experience: 10+ Years’ experience with managing and performing system engineering activities. At least 5 years of recent experience working with programming languages and the designing and implementation of large scale systems.

Minimum Education: Bachelor of Science degree in related discipline

Security Architect-III

Functional Description: Provides thought leadership, technical and policy guidance, and solutions for addressing complex cyber, information and system security problems. Analyzes and defines security requirements at the program and system level. Develops technical solutions including: information operations and analysis related to security intrusion analysis, systems & vulnerabilities, network security and advanced security analytic tools.
Minimum Experience: 10+ years’ experience with information technology and cyber security practices. Minimum 7 years’ experience providing guidance and direction to other security professionals, acts in a consulting and/or advisory capacity. At least 7 years’ experience implementing network and system security controls. Must have at least 5-7 years’ experience with two or more of the following: System Security Assessments, Cyber Policy, Data Security, Intrusion Analysis, Continuous Diagnostics and Monitoring, Vulnerability Management.

Minimum Education: Advanced degree in related field and one of the following certifications: CISSP, CISA, CEH, GIAC

INFOSEC Consultant-II

Functional Description: Gathers and organizes information about an organization's security requirements, goals and needs. Interprets applicable cyber security policy and regulations. Performs vulnerability and risk analyses of computer systems and applications during all phases of the SDLC. Develops artifacts to document current and future program and system security controls. Supports client in the development and implementation of security best practices and policies. Identifies, reports, and resolves security violations.

Minimum Experience: 7+ years’ experience with developing and implementing security policies, procedures and controls. Experience with leading at least one system security assessment. Minimum 7 years’ experience in a consulting and/or advisory capacity.

Minimum Education/Certification: Bachelor’s degree in related field and one of the following certifications: CISSP, CISA, CEH, GIAC

Sr. Technical Writer-II

Functional Description: Works with SMEs and stakeholders to collect and organize information for preparation of user manuals, training materials, design documents, installation guides, proposals, and reports. Applies understanding of related discipline(s) to edit functional descriptions, system specifications, user manuals, special reports, and any other customer deliverables and documents.

Minimum Experience: 7+ years’ experience planning, coordinating, and developing documentation for complex systems and all aspects of the SDLC.

Minimum Education: Bachelor's degree in related field or 7 years’ experience

Service Contract Act: The Service Contract Act (SCA) is applicable to this contract as it applies to the entire Schedule and all services provided. While no specific labor categories have been identified as being subject to SCA due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CRF 541.300), this contract still maintains the provisions and protections for SCA eligible labor categories. If and / or when the contractor adds SCA labor categories / employees to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCA matrix identifying the GSA labor category titles, the occupational code, SCA labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.
