Service Contract Labor Standards: The Service Contract Labor Standards (SCLS), also referred to as Service Contract Act (SCA) is applicable to this contract as it applies to the entire Multiple Award Schedule (MAS) and all services provided. While no specific labor categories/services have been identified as being subject to SCLS/SCA due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CFR 541.300), this contract still maintains the provisions and protections for SCLS/SCA eligible labor categories. If and/or when the contractor adds SCLS/SCA labor categories/employees to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCA matrix identifying the GSA labor category titles, the occupational code, SCLS/SCA labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.

**Labor Category Descriptions**

**Program Manager III**
**Education:** Bachelor’s degree  
**Experience:** 15 years of experience  
**Functional Responsibilities:** The Program Manager shall be responsible for the successful cost, schedule, and performance of the contract. Serves as the main point of contact for the Contracting Officer (CO), the Contracting Officer's Representative (COR), the Government Program Manager, and the Contractor's senior management. Directly contributes to program efforts in several areas, including cost management/avoidance, schedule estimation and tracking, contract performance management, risk management, requirements analysis, and quality assurance activities. Ensures proper performance of tasks necessary to ensure the most efficient and effective execution of the contract. The PM shall utilize expert communication skills needed to direct the skilled technical resources and report on the technical progress, issues, and problem areas, as well as write and review technical documents.

**Acquisition Professional I**
**Education:** Bachelor’s degree  
**Experience:** 5 years of experience in DOD or IC acquisition management, program management, and/or contract management is required  
**Functional Responsibilities:** Provide acquisition support on functions of program management. Assist program managers in developing program documentation, creating program schedules, tracking program status, evaluating operational and technical alternatives, performing risk assessment and managing integrated product teams.

**Acquisition Professional II**
**Education:** Bachelor’s degree  
**Experience:** 8 years of experience in DOD or IC acquisition management, program management, and/or contract management is required  
**Functional Responsibilities:** Provide acquisition support on functions of program management. Assist program managers in developing program documentation, creating program schedules, tracking program status, evaluating operational and technical alternatives, performing risk assessment and managing integrated product teams. Provide expertise on the myriad of factors that influence cost, schedule, performance, and risk. Advise in the interpretation and tailoring of acquisition regulations/memorandums, and ensure affordable, supportable and effective systems are delivered to the customer.

**Acquisition Professional III**
Education: Bachelor’s degree
Experience: 12 years of experience in DOD or IC acquisition management, program
management, and/or contract management is required

**Functional Responsibilities:** Provide acquisition support on functions of program management. Assist program managers in developing program documentation, creating program schedules, tracking program status, evaluating operational and technical alternatives, performing risk assessment and managing integrated product teams. Provide expertise on the myriad of factors that influence cost, schedule, performance, and risk. Advise in the interpretation and tailoring of acquisition regulations/memorandums, and ensure affordable, supportable and effective systems are delivered to the customer. Provides assistance in analyzing and developing improved policies, plans, methods, procedures, and systems of acquisition management programs.

**Technical Writer II**
**Education:** Bachelor’s degree
**Experience:** 6 years of experience in writing, editing and managing technical documentation

**Functional Responsibilities:** Responsible for the preparation, review, revision, and maintenance of technical documents including software and systems engineering, system operations, testing, and user documentation. Writes and edits technical documentation for all of the project's hardware and software to include installation, configuration and how-to documentation. Creates code documentation for software; produces implementation guides and end-user guides for capabilities; provides field, data definition, and data flow documentation and formats technical publications from pamphlets, technical drawings, and consultations with technical personnel and other available resources.

**Database Management Specialist II**
**Education:** Bachelor’s degree
**Experience:** 7 years of experience

**Functional Responsibilities:** Responsible for maintaining and updating repositories of documentation generated by multiple participants in complex, multi-project acquisition programs. Design, maintain, and enhance the taxonomy by which this material is organized. Ensure that this material is readily accessible to PMO members, responding quickly and effectively to requests for information and making data accessible to programmers and end users.

**Space Planner I**
**Education:** Associate’s degree
**Experience:** 3 years of experience

**Functional Responsibilities:** Assist in strategic planning support for all emerging requirements, assist in developing strategies to optimize the use of limited space resources, modernizing space management processes by using technology to assist with developing solutions.

**Space Planner II**
**Education:** Associate’s degree
**Experience:** 5 years of experience

**Functional Responsibilities:** Assist in strategic planning support for all emerging requirements, assist in developing strategies to optimize the use of limited space resources, modernizing space management processes by using technology to assist with developing solutions. Assist in
maximizing the use of resources through effective business processes, improving customer relationships, and in providing space based on informed decisions.

**Space Planner III**
**Education:** Bachelor’s degree  
**Experience:** 5 years of experience  
**Functional Responsibilities:** Assist in strategic planning support for all emerging requirements, assist in developing strategies to optimize the use of limited space resources, modernizing space management processes by using technology to assist with developing solutions. Assist in maximizing the use of resources through effective business processes, improving customer relationships, and in providing space based on informed decisions. Assist in defining metrics and managing a multi-million-dollar design and construction program, ensuring state-of-the-art facilities are delivered on time and within budget.

**Facilities Office Engineer III**
**Education:** Bachelor’s degree  
**Experience:** 10 years of experience working in close collaboration with engineers and construction coordinators in managing facilities construction or major repair by replacement projects.  
**Functional Responsibilities:** Assists Government facilities project managers in planning and coordinating preparation of project documentation, such as engineering drawings, production specifications, and schedules, and contract modifications, to ensure government contract requirements are met. Assists Government facilities project managers in reviewing contracts to determine documentation required for each phase of construction projects, apply knowledge of engineering, construction, and manufacturing processes. Assists Government facilities project managers in scheduling due dates for drawings, specifications, technical manuals, as-builds, and other documents. Assists Government facilities project managers reviewing and verifying project documentation for completeness, format, and compliance with contract requirements. Confers with Government facilities project managers, engineers, managers, and others to discuss project, prepare documents, or establish schedules.

**Scheduler II**
**Education:** Bachelor’s degree  
**Experience:** 8 years of experience  
**Functional Responsibilities:** Responsible for designing, developing, and maintaining detailed resource-loaded schedules for implementation, developmental and operational systems. Works with developmental and operational teams to develop detailed schedules and assists in keeping these schedules current. Uses or recommends automated tools such as MS Project, Primavera or program mandated software. Develops and or modifies project schedules and or the integration of multiple project schedules into an overall Master Program Schedule.

**Senior Logistics Manager**
**Education:** Master’s degree  
**Experience:** 10 years of experience  
**Functional Responsibilities:** Facilitate the supply chain at every step of the procurement
process. Provide for storage and delivery of materials. Arrange transportation and shipment of materials to different locations throughout the world in a timely manner. Working knowledge of DD Form1149 process for agency Cargo Shipping Services and Agency Stock System. Track shipments worldwide and interface with sites to establish Arrival on Site (AOS) notification.

**Program Analyst**

**Education:** Bachelor’s degree  
**Experience:** 8 years of experience  
**Functional Responsibilities:** Develop, analyze, and update metrics to assess operational performance and effectiveness. Incorporate metrics into strategic assessment process. Maintain a repository of MOPs and MOEs metric results. Continuously monitor and track the facility work orders and maintenance budget within the host organizations tracking system and remediate any issues to keep projects on schedule. Evaluate an operation against MOPs and MOEs to determine progress relative to the mission objectives and end states.

**Senior Program Analyst**

**Education:** Master’s degree  
**Experience:** 10 years of experience  
**Functional Responsibilities:** Develop, analyze, and update metrics to assess operational performance and effectiveness. Incorporate metrics into strategic assessment process. Maintain a repository of MOPs and MOEs metric results. Continuously monitor and track the facility work orders and maintenance budget within the host organizations tracking system and remediate any issues to keep projects on schedule. Evaluate an operation against MOPs and MOEs to determine progress relative to the mission objectives and end states. Assist in the management of the CMF program, including maintaining the plan and schedule, and change management activities. Determine and track Schedule Performance Index (SPI), Cost Performance Index (CPI) and develop schedule and cost performance analysis. Provide collection, analysis, interpretation, presentation, and organization of statistical analysis data.

**Senior Requirements Analyst**

**Education:** Master’s degree  
**Experience:** 10 years of experience  
**Functional Responsibilities:** Analyzes user’s requirements, concept of operations documents, and high-level system architectures to develop system requirements specifications. Analyzes system requirements and leads design and development activities. Guides users in formulating requirements, advises alternative approaches, and conducts feasibility studies. Provides technical leadership for the integration of requirements, design, and technology. Incorporates new plans, designs and systems into ongoing operations. Develops technical documentation. Develops system Architecture and system design documentation. Guides system development and implementation planning through assessment or preparation of system engineering management plans and system integration and test plans. Interacts with the Government regarding Systems Engineering technical considerations and for associated problems, issues or conflicts. Ultimate responsibility for the technical integrity of work performed and deliverables associated with the Systems Engineering area of responsibility. Communicates with other program personnel, government overseers, and senior executives.
Acquisition Consultant
Education: Master’s degree
Experience: 10 years of experience
Functional Responsibilities: Provide acquisition support on functions of program management. Assist program managers in developing program documentation, creating program schedules, tracking program status, evaluating operational and technical alternatives, performing risk assessment and managing integrated product teams. Provide expertise on the myriad of factors that influence cost, schedule, performance, and risk. Advise in the interpretation and tailoring of acquisition regulations/memorandums, and ensure affordable, supportable and effective systems are delivered to the customer. Provides assistance in analyzing and developing improved policies, plans, methods, procedures, and systems of acquisition management programs.

Senior Budget Analyst
Education: Master’s degree
Experience: 10 years of experience
Functional Responsibilities: Assist in the creation of the program and budget; justify the resources (manpower and funding) to support strategic plans. Assist in the defense and execution of the appropriated, unexpired resources to support the day-to-day mission activities; perform statistical and graphical analysis on various aspects of resources management such as the rate of execution of funding, fill-rates of authorized positions, workforce skills, size and cost, and success in obtaining appropriations for new program requests. Advise management on the regulatory aspects of resources management to avoid violations such as anti-deficiency and misappropriation of resources.

Cost Estimator
Education: Bachelor’s degree
Experience: 8 years of experience
Functional Responsibilities: Provide cost estimate preparation, rate/cost factor development and economic analyses (EAs). Advise on historical financial data and/or matches funding requests or projected costs of selected line items with past records to determine trends in spending and to forecast annual funding needs. Develop accurate and timely cost and schedule documentations within prescribed timelines. Interprets and assesses the effects of new and revised congressional direction on the organization and its financial management program. Develop program financial management records of the overall financial status of the program. Assist with budget reprogramming actions. Assist with receipt and redirection of funds within the overall system funds directive. Assist with the formulation, development, and, execution of budgets, financial plans, and multi-year programs required to properly fund and meet program resource requirements. Provide technical and program recommendations to higher levels regarding major reprogramming; and accomplishes redirection actions caused by changing political, economic, and mission requirements.
Senior Portfolio Manager
Education: Master’s degree
Experience: 10 years of experience
Functional Responsibilities: Assist in management of the customer Capabilities Branch portfolio. Conduct identification, assessment, and advocacy of current and future operational requirements across various commands. Coordinate with U.S. Government partners, for capabilities research, development, technical assurance, and sharing. Conduct Functional Needs Assessments (FNA) and Functional Area Analyses (FAA) of Concept Plans (CONPLAN) and Operational Plans (OPLAN) to determine the adequacy of Service components and supporting agencies to deliver results. Assist with technical requirements and solutions to meet enterprise measures for the customer and industry partners. Review solutions and development activities across the commercial sector. Provide analysis and reporting of development, acquisition, integration and implementation. Provide input for Program Objective Memorandum (POM) build and assist with its planning. Contribute information including developing, consolidating and managing capability requests, point papers, briefing charts, spreadsheets, memos, and other documents within prescribed timelines for review and analysis. Analyze customer capability funding requirements combined with execution history to develop concise descriptions of impacts and alternatives. Use business analytics to analyze data related to budget, finance, schedule, capabilities, and processes, and recommend solution for improvement to close any identified deficiencies, omissions, gaps and/or inefficiencies. Conduct records and knowledge management activities for customer and portfolio management activities.

Logistics Specialist
Education: Bachelor’s degree
Experience: 8 years of experience
Functional Responsibilities: Facilitate the supply chain at every step of the procurement process. Provide for storage and delivery of materials. Arrange transportation and shipment of materials to different locations throughout the world in a timely manner. Working knowledge of DD Form149 process for agency Cargo Shipping Services and Agency Stock System. Track shipments worldwide and interface with sites to establish Arrival on Site (AOS) notification.
