Add awarded labor category descriptions

**Architectural Inspector**

*Minimum Experience*
Minimum of 5 years of experience with understanding of systems common in commercial construction.

*Functional Responsibility*
Works under supervision of superintendent, project manager or construction executive. Performs inspection activities and associated reporting and documentation. Checks compliance with specifications, plans, codes and contract documents. Coordinates with installers to resolve deficiencies. Supports the project team in communication, logistics and safety matters.

*Minimum Education*
Bachelor's degree from an accredited college or university.

**Civil Engineer**

*Minimum Experience*
Minimum of 8 years of experience with recognized leadership experience.

*Functional Responsibility*
Provides supervision, advisory or inspection services in project coordination and management at any stage of construction projects. Serves as a liaison among planners, designers, contractors and clients to facilitate resolution of design or installation issues. Provides constructability and deliverable reviews, pricing/cost reviews and technical oversight. Assists management team in ensuring compliance with standards, contract and program requirements.

*Minimum Education*
Bachelor's degree from an accredited college or university. Master's degree and/or registration are encouraged. Training, certification(s) or license(s) from nationally accredited organizations are highly desired.
Commissioning Agent

Minimum Experience
Minimum of 8 years of experience with recognized leadership experience.

Functional Responsibility
Develops as designers, contractors, owner/operator, testing agencies) in the commissioning process. Reviews and confirms acceptability of operations and maintenance documentation for accuracy and completeness. Recommends corrective actions for underperforming or noncompliant systems or materials. Oversees contractor training for owner/operators. Prepares commissioning reports.

Minimum Education
Bachelor's degree from an accredited college or university. Master's degree and/or registration are encouraged. Training, certification(s) or license(s) from nationally accredited organizations are highly desired.

Concrete Masonry Inspector

Minimum Experience
Minimum of 5 years of experience with understanding of systems common in commercial construction.

Functional Responsibility
Works under supervision of superintendent, project manager or construction executive. Performs inspection activities and associated reporting and documentation. Checks compliance with specifications, plans, codes and contract documents. Coordinates with installers to resolve deficiencies. Supports the project team in communication, logistics and safety matters.

Minimum Education
Bachelor's degree from an accredited college or university. Must possess relevant certifications according to project requirements.

Construction Executive

Minimum Experience
Minimum of 15 years of experience with recognized leadership experience.

Functional Responsibility
Provides overall management and accomplishment of construction management activities. Plans and coordinates all primary and support activities to ensure all goals and objectives are met with control of project schedule and budget. Performs management responsibilities to fulfill development to closeout activities for multiple complex projects. Serves as a primary customer contact and a liaison between the client and contractors for contracting, management, and technical issues.

Minimum Education
Bachelor's degree from an accredited college or university. Master's degree is encouraged. Training, certification(s) or license(s) from nationally accredited organizations are highly desired.
Construction Planner / Scheduler 1

Minimum Experience
Minimum of 3 years of experience.

Functional Responsibility
Supports project team in a project controls environment, employing applications common in construction management (i.e. MS Project, Primavera Project Planner, contract management applications, and MS Office.) Uses project management tools to manage tasks, resources, changes, budget, and schedule. Assists the project team in controlling project schedule, resources, scope and funds on projects. Performs a supporting role in developing project schedules and analyzing contractor schedules for delay, acceleration, and compatibility with program.

Minimum Education
Bachelor's degree from an accredited college or university. Training, certification(s) or license(s) from nationally accredited organizations are highly desired.

Construction Planner / Scheduler 2

Minimum Experience
Minimum of 5 years of experience with recognized leadership experience.

Functional Responsibility
Applies advanced architecture/engineering/construction project management principles (CPM scheduling, risk management, quality control, and contract administration) in a project controls environment. Employs systems applications common in construction management including MS Project, Primavera Project Planner, contract management applications, and MS Office. Serves as a resource in the implementation and use of project management tools to manage tasks, resources, changes, budget, and schedule. Performs a leading role in developing master program schedules and analyzing contractor schedules for delay, acceleration, and compatibility with program.

Minimum Education
Bachelor's degree from an accredited college or university. Training, certification(s) or license(s) from nationally accredited organizations are highly desired.

Construction Planner / Scheduler 3

Minimum Experience
Minimum of 8 years of experience with recognized leadership experience.

Functional Responsibility
Applies advanced architecture/engineering/construction project management principles (CPM scheduling, risk management, quality control, and contract administration) in a project controls environment. Employs systems applications common in construction management including MS Project, Primavera Project Planner, contract management applications, and MS Office. Serves as a resource in the implementation and use of project management tools to manage tasks, resources, changes, budget, and schedule. Performs a leading role in developing master program schedules and analyzing contractor schedules for delay, acceleration, and compatibility with program.
Minimum Education
Bachelor's degree from an accredited college or university. Training, certification(s) or license(s) from nationally accredited organizations are highly desired.

Chief Construction Planner / Scheduler

Minimum Experience
Minimum of 12 years of experience with recognized leadership experience.

Functional Responsibility
Oversees and acts as the subject matter expert for construction planning. Manages Construction Planners/Schedule 1, 2 and 3. Applies advanced architecture/engineering/construction project management principles (CPM scheduling, risk management, quality control, and contract administration) in a project controls environment. Employs systems applications common in construction management including MS Project, Primavera Project Planner, contract management applications, and MS Office. Serves as a resource in the implementation and use of project management tools to manage tasks, resources, changes, budget, and schedule. Performs a leading role in developing master program schedules and analyzing contractor schedules for delay, acceleration, and compatibility with program.

Minimum Education
Bachelor's degree from an accredited college or university. Training, certification(s) or license(s) from nationally accredited organizations are highly desired.

Cost Engineer

Minimum Experience
Minimum of 5 years of experience with recognized leadership experience.

Functional Responsibility
Performs cost estimating for construction projects. Prepares quantity surveys and conceptual estimates from design documents. Provides value engineering recommendations to project team. Analyzes costs proposed by others and provides recommendations accordingly.

Minimum Education
Bachelor's degree from an accredited college or university. Training, certification(s) or license(s) from nationally accredited organizations are highly desired.

Cost Manager I

Minimum Experience
Minimum of 3 years of experience with recognized leadership experience.

Functional Responsibility
Ensures that costs for the company’s products and services are allocated according to caprote procedures and in compliance financial accounting standards. Oversees the cost control systems, manages the cost accounting staff and assists in completing projects. Ensures that project and department milestones are met. Extensive knowledge of department processes.
Minimum Education
Bachelor's degree from an accredited college or university. Training, certification(s) or license(s) from nationally accredited organizations are highly desired.

Cost Manager II

Minimum Experience
Minimum of 5 years of experience with recognized leadership experience.

Functional Responsibility
Ensures that costs for the company’s products and services are allocated according to corporate procedures and in compliance financial accounting standards. Prepares cost accounting reports for presentation to management. Oversees the cost control systems, manages the cost accounting staff and assists in completing projects. Ensures that project and department milestones are met. Extensive knowledge of department processes.

Minimum Education
Bachelor's degree from an accredited college or university. Training, certification(s) or license(s) from nationally accredited organizations are highly desired.

Cost Manager III

Minimum Experience
Minimum of 7 years of experience with recognized leadership experience.

Functional Responsibility
Ensures that costs for the company’s products and services are allocated according to corporate procedures and in compliance financial accounting standards. Oversees the cost control systems, manages and interprets cost audits. Prepares cost accounting reports for presentation to management. Oversees the cost control systems, manages the cost accounting staff and assists in completing projects. Ensures that project and department milestones are met. Extensive knowledge of department processes.

Minimum Education
Bachelor's degree from an accredited college or university. Training, certification(s) or license(s) from nationally accredited organizations are highly desired.

Cultural Resources/Historic Preservationist

Minimum Experience
Minimum of 6 years of experience with recognized leadership experience.

Functional Responsibility
Responsible for supporting planning efforts related to complex projects. Manages historic preservation issues and public approval strategies. Coordinates legal, land use, economic and civic issues related to cultural or historic resources. Collaborates with experts in design, construction, real estate, financial management and other disciplines to address project issues and facilitate approvals from authorities.
Minimum Education
Bachelor's degree from an accredited college or university. Training, certification(s) or license(s) from nationally accredited organizations are highly desired.

**Electrical Engineer**

Minimum Experience
Minimum of 8 years of experience with recognized leadership experience.

Functional Responsibility
Provides supervision, advisory or inspection services in project coordination and management at any stage of construction projects. Serves as a liaison among planners, designers, contractors and clients to facilitate resolution of design or installation issues. Provides constructability and deliverable reviews, pricing/cost reviews and technical oversight. Assists management team in ensuring compliance with standards, contract and program requirements.

Minimum Education
Bachelor's degree from an accredited college or university. Master's degree and/or registration are encouraged. Training, certification(s) or license(s) from nationally accredited organizations are highly desired.

**Electrical Inspector**

Minimum Experience
Minimum of 5 years of experience with understanding of systems common in commercial construction.

Functional Responsibility
Works under supervision of superintendent, project manager or construction executive. Performs inspection activities and associated reporting and documentation. Checks compliance with specifications, plans, codes and contract documents. Coordinates with installers to resolve deficiencies. Supports the project team in communication, logistics and safety matters.

Minimum Education
Bachelor's degree from an accredited college or university. Must possess relevant certifications according to project requirements.

**Elevator Engineer**

Minimum Experience
Minimum of 8 years of experience with recognized leadership experience.

Functional Responsibility
Provides supervision, advisory or inspection services in project coordination and management at any stage of construction projects. Serves as a liaison among planners, designers, contractors and clients to facilitate resolution of design or installation issues. Provides constructability and deliverable reviews, pricing/cost reviews and technical oversight. Assists management team in ensuring compliance with standards, contract and program requirements.
Minimum Education
Bachelor's degree from an accredited college or university. Master's degree and/or registration are encouraged. Training, certification(s) or license(s) from nationally accredited organizations are highly desired.

Environmental Engineer

Minimum Experience
Minimum of 8 years of experience with recognized leadership experience.

Functional Responsibility
Provides management, supervision, advisory or inspection services in project coordination and management at any stage of project. Serves as a liaison among planners, designers, contractors and government officials to manage projects, implement studies, or facilitate resolution of design or environmental issues. Provides deliverable reviews, pricing/cost reviews and technical oversight. Assists management team in ensuring compliance with standards, contract and program requirements.

Minimum Education
Bachelor's degree from an accredited college or university. Master's degree and/or registration are encouraged. Training, certification(s) or license(s) from nationally accredited organizations are highly desired.

Financial/Budget Control Officer

Minimum Experience
Minimum of 7 years of experience with recognized leadership experience.

Functional Responsibility
Participates in a project team providing financial management services for construction management projects. Performs planning, budgeting, funds monitoring and financial status reporting. Applies specialized knowledge of administrative and contractual practices in the industry to ensure adherence to procedures for processing invoices and contract modifications. Leads financial/business analysts in construction-related financial tasks. Prepares payment and contract modification approval documentation. Analyzes budgets, cost estimates and proposals for accuracy and strategic implications. Provides support and coordination for key project processes such as planning, procurement, acceptance and contract close-out. Responsible for financial and administrative coordination of contracts, including invoice review and processing, budget tracking and reporting, and communicating procedures.

Minimum Education
Bachelor's degree in a related field from an accredited college or university. Training, certification(s) or license(s) from nationally accredited organizations are highly desired.

Geotechnical Engineer

Minimum Experience
Minimum of 8 years of experience with recognized leadership experience.
Functional Responsibility
Provides supervision, advisory or inspection services in project coordination and management at any stage of construction projects. Serves as a liaison among planners, designers, contractors and clients to facilitate resolution of design or installation issues. Provides constructability and deliverable reviews, pricing/cost reviews and technical oversight. Assists management team in ensuring compliance with standards, contract and program requirements.

Minimum Education
Bachelor's degree from an accredited college or university. Master's degree and/or registration are encouraged. Training, certification(s) or license(s) from nationally accredited organizations are highly desired.

Geotechnical Inspector

Minimum Experience
Minimum of 5 years of experience with understanding of systems common in commercial construction.

Functional Responsibility
Works under supervision of superintendent, project manager or construction executive. Performs inspection activities and associated reporting and documentation. Checks compliance with specifications, plans, codes and contract documents. Coordinates with installers to resolve deficiencies. Supports the project team in communication, logistics and safety matters.

Minimum Education
Bachelor's degree from an accredited college or university. Must possess relevant certifications according to project requirements.

Mechanical Engineer

Minimum Experience
Minimum of 8 years of experience with recognized leadership experience.

Functional Responsibility
Provides supervision, advisory or inspection services in project coordination and management at any stage of construction projects. Serves as a liaison among planners, designers, contractors and clients to facilitate resolution of design or installation issues. Provides constructability and deliverable reviews, pricing/cost reviews and technical oversight. Assists management team in ensuring compliance with standards, contract and program requirements.

Minimum Education
Bachelor's degree from an accredited college or university. Master's degree and/or registration are encouraged. Training, certification(s) or license(s) from nationally accredited organizations are highly desired.

Mechanical Inspector

Minimum Experience
Minimum of 5 years of experience with understanding of systems common in commercial construction.
Functional Responsibility
Works under supervision of superintendent, project manager or construction executive. Performs inspection activities and associated reporting and documentation. Checks compliance with specifications, plans, codes and contract documents. Coordinates with installers to resolve deficiencies. Supports the project team in communication, logistics and safety matters.

Minimum Education
Bachelor's degree from an accredited college or university. Must possess relevant certifications according to project requirements.

Move Coordinator

Minimum Experience
Requires 1 year of experience.

Functional Responsibility
Provides support in project coordination and management at any stage of relocation or construction projects. Serves as a liaison among planners, designers, contractors and clients to facilitate project activities.

Minimum Education
Bachelor's degree from an accredited college or university. Training, certification(s) or license(s) from nationally accredited organizations are highly desired.

Noise/Acoustical Engineer

Minimum Experience
Minimum of 8 years of experience with recognized leadership experience.

Functional Responsibility
Provides supervision, advisory or inspection services in project coordination and management at any stage of construction projects. Serves as a liaison among planners, designers, contractors and clients to facilitate resolution of design or installation issues. Provides constructability and deliverable reviews, pricing/cost reviews and technical oversight. Assists management team in ensuring compliance with standards, contract and program requirements.

Minimum Education
Bachelor's degree from an accredited college or university. Master's degree and/or registration are encouraged. Training, certification(s) or license(s) from nationally accredited organizations are highly desired.

Document Controller I

Minimum Experience
Minimum of 2 years of experience.

Functional Responsibility
Performs office administrative duties including, but not limited to the following: planning meetings;
distributing correspondence; ordering office supplies and equipment; managing employee personnel files. Must have excellent written and verbal communication skills. Performs special industry specific functions such as: Maintaining detailed electronic and hard-copy file systems for project specific documents; utilizing electronic collaboration applications; following special procedures related to sensitive project items such as security, contract and financial documents; preparing correspondence and logs.

**Minimum Education**

Project Engineer / Architect 1

Minimum Experience
Minimum of 2 years of experience with recognized leadership experience.

Functional Responsibility
Provides leadership and supervision in project coordination and management at any stage of construction projects. Serves as a liaison among planners, designers, contractors and clients to facilitate resolution of design issues. Provides or oversees constructability reviews, pricing/cost reviews and technical and management oversight. Performs a leading role for the management team in controlling schedule, resources, and project funds, while ensuring compliance with standards and contract/program requirements.

Minimum Education
Bachelor's degree from an accredited college or university. Training, certification(s) or license(s) from nationally accredited organizations are highly desired.

Project Engineer / Architect 2

Minimum Experience
Minimum of 5 years of experience with recognized leadership experience.

Functional Responsibility
Provides leadership and supervision in project coordination and management at any stage of construction projects. Serves as a liaison among planners, designers, contractors and clients to facilitate resolution of design issues. Provides or oversees constructability reviews, pricing/cost reviews and technical and management oversight. Performs a leading role for the management team in controlling schedule, resources, and project funds, while ensuring compliance with standards and contract/program requirements.

Minimum Education
Bachelor's degree from an accredited college or university. Training, certification(s) or license(s) from nationally accredited organizations are highly desired.

Project Engineer / Architect 3

Minimum Experience
Minimum of 8 years of experience with recognized leadership experience.

Functional Responsibility
Provides leadership and supervision in project coordination and management at any stage of construction projects. Serves as a liaison among planners, designers, contractors and clients to facilitate resolution of design issues. Provides or oversees constructability reviews, pricing/cost reviews and technical and management oversight. Performs a leading role for the management team in controlling schedule, resources, and project funds, while ensuring compliance with standards and contract/program requirements.

Minimum Education
Bachelor's degree from an accredited college or university. Training, certification(s) or license(s) from nationally accredited organizations are highly desired.

Project Manager 1

Minimum Experience
Minimum of 5 years of experience with recognized leadership experience.

Functional Responsibility
Implements and uses project management tools to manage tasks, resources, changes, budget, and schedule. Coordinates planning, scoping, design, construction, environmental considerations and direction of a project. Coordinates activities at the senior level and oversees all aspects of projects. Serves as a primary customer contact and a liaison between the client and contractors for contracting, management, and technical issues. Provides direction, guidance and assistance to engineers, consultants, and contractors. Develops construction project standards; approves schedules; supervises personnel; reviews deliverables; ensures quality; reviews scopes of work; communicates purpose; oversees project goals and objectives.

Minimum Education
Bachelor's degree from an accredited college or university. Training, certification(s) or license(s) from nationally accredited organizations are highly desired.

Project Manager 2

Minimum Experience
Minimum of 8 years of experience with recognized leadership experience.

**Relocation Manager**

*Minimum Experience*
Minimum of 12 years of experience with recognized leadership experience.

*Functional Responsibility*
Provides leadership, project coordination and management in relocation projects. Serves as a liaison among planners, designers, contractors and clients to facilitate resolution of design issues. Provides constructability reviews, pricing/cost reviews and technical and management oversight. Assists management team in ensuring compliance with standards and contract/program requirements.

*Minimum Education*
Bachelor's degree from an accredited college or university. Training, certification(s) or license(s) from nationally accredited organizations are highly desired.

**Safety/OSHA/Environmental Hygienist Inspector**

*Minimum Experience*
Minimum of 8 years of experience with understanding of systems common in commercial construction.

*Functional Responsibility*
Works under supervision of superintendent, project manager or construction executive. Performs inspection activities and associated reporting and documentation. Checks compliance with specifications, plans, codes and contract documents. Coordinates with installers to resolve deficiencies. Supports the project team in communication, logistics and safety matters.
Minimum Education
Bachelor's degree from an accredited college or university. Associate's degree plus 3 years' experience can be substituted for bachelor's degree. Must possess relevant certifications according to project requirements.

Risk Management Consultant I

Minimum Experience
Minimum of 2 years of experience with understanding of systems common in commercial construction.

Functional Responsibility
Responsible for acting as a resource in use of change management procedures, with a focus on maintaining reference materials and ensuring new employees are trained in their proper roles. Facilitates change requests, approvals, and the scheduled releases into the production systems along with risk assessments. Represents the configuration, efficiency, and effectiveness of the change management process tool. Provides daily support for the change management policy, process, procedures, and tools, including training to users when necessary.

Minimum Education
Bachelor's degree from an accredited college or university.

Risk Management Consultant II

Minimum Experience
Minimum of 4 years of experience with understanding of systems common in commercial construction.

Functional Responsibility
Responsible for acting as a resource in use of change management procedures, with a focus on maintaining reference materials and ensuring new employees are trained in their proper roles. Facilitates change requests, approvals, and the scheduled releases into the production systems along with risk assessments. Represents the configuration, efficiency, and effectiveness of the change management process tool. Provides daily support for the change management policy, process, procedures, and tools, including training to users when necessary.

Minimum Education
Bachelor's degree from an accredited college or university.

Risk Management Consultant III

Minimum Experience
Minimum of 6 years of experience with understanding of systems common in commercial construction.

Functional Responsibility
Responsible for acting as a resource in use of change management procedures, with a focus on maintaining reference materials and ensuring new employees are trained in their proper roles. Facilitates change requests, approvals, and the scheduled releases into the production systems along with risk assessments. Represents the configuration, efficiency, and effectiveness of the change management process tool. Provides daily support for the change management policy, process, procedures, and tools, including training to users when necessary.

**Minimum Education**
Bachelor's degree from an accredited college or university.

**Senior Risk Management Consultant I**

*Minimum Experience*
Minimum of 8 years of experience with understanding of systems common in commercial construction.

*Functional Responsibility*
Manages and analyzes risk on complex projects. Responsible for acting as a resource in use of change management procedures, with a focus on maintaining reference materials and ensuring new employees are trained in their proper roles. Facilitates change requests, approvals, and the scheduled releases into the production systems along with risk assessments. Represents the configuration, efficiency, and effectiveness of the change management process tool. Provides daily support for the change management policy, process, procedures, and tools, including training to users when necessary.

**Minimum Education**
Bachelor's degree from an accredited college or university.

**Senior Risk Management Consultant II**

*Minimum Experience*
Minimum of 12 years of experience with understanding of systems common in commercial construction.

Represents the configuration, efficiency, and effectiveness of the change management process tool. Provides daily support for the change management policy, process, procedures, and tools, including training to users when necessary.

**Minimum Education**
Bachelor's degree from an accredited college or university.
Senior Risk Management Consultant III

Minimum Experience
Minimum of 15 years of experience with understanding of systems common in commercial construction.

Functional Responsibility
Manages and analyzes risk on complex projects. Responsible for acting as a resource in use of change management procedures, with a focus on maintaining reference materials and ensuring new employees are trained in their proper roles. Facilitates change requests, approvals, and the scheduled releases into the production systems along with risk assessments. Represents the configuration, efficiency, and effectiveness of the change management process tool. Provides daily support for the change management policy, process, procedures, and tools, including training to users when necessary.

Minimum Education
Bachelor's degree from an accredited college or university.

Senior Project Claims Analyst

Minimum Experience
Minimum of 12 years of experience with understanding of systems common in commercial construction.

Functional Responsibility
Responsible for planning, analyzing and evaluating the effectiveness of programs and related claims. These positions utilize a high degree of qualitative and include establishing study methods and techniques and analyzing and evaluating the effectiveness of complex program operations. Quantitative analytical skills in analyzing, evaluating, and improving program effectiveness. The major duties of this position include establishing study methods and techniques and analyzing and evaluating the effectiveness of complex program operations.

Minimum Education
Bachelor's degree from an accredited college or university.

Specifications Writer

Minimum Experience
Minimum of 5 years of experience with recognized leadership experience.

Functional Responsibility
Communicates technical information related to construction management projects. Researches and drafts procedures, guidance, reports, and contract provisions related to construction management project lifecycle. Demonstrates excellent writing and oral presentation skills and a sound understanding of administrative and contractual practices in the industry. Participates in strategic planning, contract document reviews and administrative processes. Supports proper adherence to procedures for processing invoices and contract modifications. Prepares payment and contract modification documentation for approval. Analyzes correspondence, cost estimates
and proposals for accuracy and strategic implications. Provides administrative guidance, support and coordination for key project processes such as planning, risk assessment, procurement, acceptance and contract close-out. Provides liaison and communication services between client and contractors relative to issue resolution, auditable materials, and general project management.

Minimum Education
Bachelor's degree from an accredited college or university. Training, certification(s) or license(s) from nationally accredited organizations are highly desired.

**Structural Engineer**

Minimum Experience
Minimum of 8 years of experience with recognized leadership experience.

Functional Responsibility
Provides supervision, advisory or inspection services in project coordination and management at any stage of construction projects. Serves as a liaison among planners, designers, contractors and clients to facilitate resolution of design or installation issues. Provides constructability and deliverable reviews, pricing/cost reviews and technical oversight. Assists management team in ensuring compliance with standards, contract and program requirements.

Minimum Education
Bachelor's degree from an accredited college or university. Master's degree and/or registration are encouraged. Training, certification(s) or license(s) from nationally accredited organizations are highly desired.

**Structural Inspector**

Minimum Experience
Minimum of 5 years of experience with understanding of systems common in commercial construction.

Functional Responsibility
Works under supervision of superintendent, project manager or construction executive. Performs inspection activities and associated reporting and documentation. Checks compliance with specifications, plans, codes and contract documents. Coordinates with installers to resolve deficiencies. Supports the project team in communication, logistics and safety matters.

Minimum Education
Bachelor's degree from an accredited college or university. Must possess relevant certifications according to project requirements.

**Value Engineering Consultant**

Minimum Experience
Minimum of 5 years of experience with recognized leadership experience.

Functional Responsibility
Performs cost estimating for construction projects. Prepares quantity surveys and conceptual estimates from design documents. Assists project team with value engineering efforts. Analyzes costs proposed by others and provides recommendations accordingly.

**Minimum Education**
Bachelor's degree from an accredited college or university. Training, certification(s) or license(s) from nationally accredited organizations are highly desired.

**Management Consultant I**

**Minimum Experience**
Minimum of 3 years of experience with recognized leadership experience.

**Functional Responsibility**
Designs and implements solutions for smaller projects/engagements or for portions of larger projects. Widely applies theories, concepts and system integration fundamentals. Develops client support plans for complex systems and/or major projects. Must demonstrate understanding to each of the following work areas: program and project management, contract management, accounting, information technology and security, systems engineering, value engineering, and/or process management. Is recognized as an extremely knowledgeable resource in several technical domains.

**Minimum Education**
Requires a bachelor's degree from an accredited college or university in engineering, science, architecture, or construction management.

**Management Consultant II**

**Minimum Experience**
Minimum of 5 years of experience with recognized leadership experience.

**Functional Responsibility**
Designs and implements solutions for smaller projects/engagements or for portions of larger projects. Widely applies theories, concepts and system integration fundamentals. Develops client support plans for complex systems and/or major projects. Must demonstrate understanding to each of the following work areas: program and project management, contract management, accounting, information technology and security, systems engineering, value engineering, and/or process management. Is recognized as an extremely knowledgeable resource in several technical domains.

Requires a bachelor's degree from an accredited college or university in engineering, science, architecture, or construction management.

**Management Consultant III**

**Minimum Experience**
Minimum of 7 years of experience with recognized leadership experience.

**Functional Responsibility**
Designs and implements solutions for smaller projects/engagements or for portions of larger projects. Widely applies theories, concepts and system integration fundamentals. Develops client
support plans for complex systems and/or major projects. Must demonstrate understanding to each of the following work areas: program and project management, contract management, accounting, information technology and security, systems engineering, value engineering, and/or process management. Is recognized as an extremely knowledgeable resource in several technical domains.

**Minimum Education**
Requires a bachelor's degree from an accredited college or university in engineering, science, architecture, or construction management.

**Program Director**

**Minimum Experience**
Minimum of 10 years of experience with recognized leadership experience.

**Functional Responsibility**
Supervises project managers in the execution of their projects. Reviews and maintains responsibility of all aspects of the program including technical, schedule, performance and budget management. Provides program oversight. Ensures resources are available and that tasks are fully staffed with personnel, equipment and other required support. Sells, manages and/or delivers large projects, typically with multi-year contracts, multiple subcontractors and numerous deliverables. Manages the delivery of a large number and broad range of services and projects through the full services life cycle. Works extensively within one or more areas of specialization. Functions as an expert of industry knowledge in two or more market sectors. Evaluates the client's business strategy, objectives and requirements. Using advanced consulting methodologies, translates the client's long-range business plan into a service strategy. Interfaces at the client's senior management levels, up to the CEO/CIO level.

**Minimum Education**
Bachelor's Degree

**Service Contract Labor Standards:** The Service Contract Labor Standards (SCLS), formerly known as the Service Contract Act (SCA), is applicable to this contract as it applies to the entire Multiple Award Schedule (MAS) and all services provided. While no specific labor categories have been identified as being subject to SCLS/SCA due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CRF 541.300), this contract still maintains the provisions and protections for SCLS/SCA eligible labor categories. If and/or when the contractor adds SCLS/SCA labor categories to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCLS/SCA matrix identifying the GSA labor category titles, the occupational code, SCLS/SCA labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.
## Education Substitution Table

Additional education over the minimum required in any labor category may be substituted for required years of experience as follows:

<table>
<thead>
<tr>
<th>Required Education</th>
<th>Actual Education</th>
<th>Credit for Additional Experience</th>
</tr>
</thead>
<tbody>
<tr>
<td>BA/BS</td>
<td>PhD</td>
<td>6</td>
</tr>
<tr>
<td>BA/BS</td>
<td>PhD plus Professional Certification</td>
<td>8</td>
</tr>
<tr>
<td>BA/BS</td>
<td>MA/MS</td>
<td>2</td>
</tr>
<tr>
<td>BA/BS</td>
<td>MA/MS plus Professional Certification</td>
<td>4</td>
</tr>
</tbody>
</table>

## Experience Substitution Table

Additional years of experience over the minimum required in any labor category may be substituted for required education as follows:

<table>
<thead>
