Education Development Center, Inc.

Overview

For more than five decades, EDC has pioneered strategies that bridge the worlds of research, policy, and business practice. From EDC’s earliest years, we have fulfilled the distinctive roles of catalyst, experimenter, and developer and have proven to be an effective instrument for organizational improvement and renewal. EDC’s award-winning programs and products, developed in collaboration with partners around the globe, consistently advance development for individuals of all ages and institutions of all types.

Approach

Today EDC manages more than 350 projects in 35 countries. Projects at EDC address critical challenges around the world in education, health, technology and human rights. We are committed to providing consulting and education that builds knowledge and skills, engages learners as active problem solvers, and makes possible a deeper understanding of the world.

Five key principles guide all of EDC’s management consulting services:

*Bridging research and practice.* EDC manages efforts that join the latest scientific research with the knowledge and experience of local administrators and practitioners who best understand the particular needs of their organization, agency, or program.

*Using data for decision-making.* EDC recognizes that any consultation must begin with a thorough understanding of the assets and needs of the organization, agency, or program involved. Staff has developed a wide array of tools and processes to gather and analyze data, including surveys, staff performance measures, outcomes indicators, and program audits.

*Designing comprehensive solutions.* EDC understands that most problems and challenges are highly complex and systemic. Effective consultation must take into account the local context; the assets and needs of the organization, agency, or program; and the human, financial, and other resources available to address the problem.

*Collaboration.* EDC has a track record of collaboration, working in partnership with client agencies, organizations, and individuals. This means building a shared vision, establishing trusting relationships, listening to and respecting other points of view, and valuing consensual decision-making.

*A focus on high performance work and continuous improvement.* All of EDC’s consulting work focuses on results. We work with clients to set goals and objectives, establish performance benchmarks, and monitor progress over time. We encourage clients to develop internal structures and processes that support continuous improvement, which means ongoing cycles of planning, action, and analysis.
Capabilities

EDC’s capabilities include:

- Project planning, design, delivery
- Technology research and application
- Training and technical assistance
- Curriculum and materials development
- Research and evaluation
- Publication and distribution
- Online learning
- Professional development
- Public policy development
- Media outreach and social marketing
- Institutional development

Whether our work takes the form of consultation to schools, professional development for teachers, or new program development and implementation to improve the learning process, we conduct rigorous testing of our improvement programs and serve as evaluators on a wide range of initiatives developed by other organizations. We also help educators develop their own research skills and strengthen their ability to base their instructional decisions on data and analysis.

EDC is a leader in providing effective processes and skills to groups of people to allow them to effectively utilize computer and information technology. We provide support and guidance to allow individuals to effectively use technology to more efficiently perform research, work functions, and community building. Expanding access to technology means helping people design and shape various technological capabilities to meet their needs and pursue their own interests.

We work with our clients to improve business practices and program management, while addressing issues of resources and system structure. EDC provides guidance on technology integration, based on the extensive research and evaluation we have conducted on such programs. We also develop innovative plans for the use of technology to enhance the student and teacher learning process.

EDC has more than five decades of experience in providing expert advice and consulting and organizational support to schools, health care agencies, social service organizations, and other entities. In addition to work at the local level, EDC has provided management consulting and organizational support to numerous federal and state agencies, along with foreign governments and international organizations.
Services and Products

EDC is an international non-profit organization building bridges between research, policy, and practice. Our award-winning programs and products, developed in collaboration with partners around the globe, consistently advance learning and development for individuals of all ages.

Since 1958, EDC has worked on the frontiers of applied research and development contributing to policy formation and knowledge about learning, teaching, and community building. EDC creates fresh approaches to learning by combining our extensive knowledge base with openness to testing different ways of solving problems.

The section below contains a summary description of EDC’s relevant corporate experience by SIN area. These are examples only and are not meant to exclude or limit any management, organizational and business improvement services offered under this Federal Supply Schedule.

Management and Financial Consulting, Acquisition and Grants Management Support, and Business Program and Project Management Services

EDC provides expertise in program development, organizational evaluation, continuous process improvement, counseling and mentoring, standards and curriculum development, and information technology skills development and integration. We also provide consulting services focused on delivering expert advice, guidance and counseling in support of organizational and educational improvement and leadership efforts.

Our services include performing studies, program audits and evaluations, providing on-site consulting assistance, and individual and group support activities. Focus areas also include professional development, standards alignment, research and evaluation, and policy development.

EDC consults with schools, districts, municipalities, corporations, foundations, and federal organizations on ways to make the most of their educational and public health programs. We produce policy briefings for government leaders, organize conferences and technology demonstrations, conduct formative research on pilot projects, and help technology developers determine additional teaching and learning needs that their educational processes could address.

EDC also provides customized training to diverse audiences on the development of public/private partnerships, systems and program design, assessment and benchmarking, standards development, fund-raising, and staff development. Planned in collaboration with our clients, EDC’s training is customized to specific needs and interests to assist our clients in achieving their business visions and goals. We specialize in training that focuses on the use of technology to enhance learning, creativity, and productivity. Our training is learner-centered, standards/outcomes-based and action-oriented, focusing on real world scenarios and experiences. All training is designed to meet specific needs related to organizational enhancement and improving the educational process.
A core feature of all of our training is to build the capacity of our clients to implement and sustain improvement efforts. Substantive areas of focus include team building, teacher leadership models, teacher leader support strategies, mentoring approaches, strategic planning and accountability, curriculum instruction and assessment, and benchmarking.

**Professional and Management Development Training**

EDC offers off-the-shelf and customized off-the-shelf training to meet specific customer requirements related to organizational and business improvement services. Our EdTech Leaders Online (ETLO) program, established in January of 2000, provides effective online professional development for educators to improve online teaching skills and to streamline the process of incorporating online resources into their daily business practices.

EDC also has a long history of housing national and regional training and technical assistance centers. We currently offer numerous training and technical assistance services, in which we design and conduct a wide range of training events each year, ranging from half-day workshops and day-long training events to week-long institutes. Many of the training products and services are aimed at catalyzing long-lasting, institutional changes that address pressing issues in education, mental health and economic opportunity.
