<th>SIN Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>541370GIS</td>
<td>541370GISRC</td>
<td>Geographic Information Systems (GIS) Services</td>
</tr>
</tbody>
</table>

1b. Identification of the lowest priced model number and lowest unit price for that model for each special item number awarded in the contract. This price is the Government price based on a unit of one, exclusive of any quantity/dollar volume, prompt payment, or any other concession affecting price. Those contracts that have unit prices based on the geographic location of the customer, should show the range of the lowest price, and cite the areas to which the prices apply. See Page 4

1c. If the Contractor is proposing hourly rates, a description of all corresponding commercial job titles, experience, functional responsibility and education for those types of employees or subcontractors who will perform services shall be provided. If hourly rates are not applicable, indicate “Not applicable” for this item. See Page 4

2. Maximum order: $1,000,000

</tr>
</thead>
<tbody>
<tr>
<td>GIS Senior Consultant</td>
<td>Demonstrates thorough knowledge of GIS industry. Functions as a senior technical leader. Provides direction, oversight and review of engineering design performed by the project team. Performs independent planning, reviews the work of others, prepares construction documents and successfully deliver projects to completion. Maintains collaborative inter-departmental and cross functional working relationship with other members of the project team. Provides oversight to less experienced staff. Has extensive knowledge and experience with technically complex projects. Has knowledge of codes and standards applicable to GIS design of projects. Demonstrates comprehensive knowledge of the planning and zoning process. Performs final QA/QC review of projects prior to delivery to client.</td>
<td>Bachelor's Degree</td>
<td>10</td>
<td>Certified Geographic Information Systems Professional</td>
</tr>
<tr>
<td>GIS Project Manager</td>
<td>Responsible for overall management of GIS projects including design, communications, personnel management, budget, schedule, quality control and client communication/relationship. Supervises a team of developers and technicians and provides team with resources and technical guidance necessary for efficient, timely and technical facilities project execution. A GIS project manager may include delegating responsibilities, communicating with staff, technical consulting with clients, allocating resources and tracking logistics of GIS projects, as well as working directly with a GIS. GIS project managers have a knowledge of geography, as well as the software employed for their projects.</td>
<td>Bachelor's Degree</td>
<td>4</td>
<td>None</td>
</tr>
<tr>
<td>GIS Developer</td>
<td>GIS developers typically work as part of a team of software developers to develop GIS applications and tools and maintain software programs to support the needs of the company and/or clients. Additional tasks may include analyzing land and aerial imagery or using databases to create specialized maps. Developers may also help clients interpret data, identify trends, and highlight patterns. GIS developers provide technical support on GIS programs. They maintain and troubleshoot existing systems, as well as upgrading</td>
<td>Bachelor's Degree</td>
<td>2</td>
<td>None</td>
</tr>
<tr>
<td>Job Title: GIS Technician</td>
<td>Duties: Geographic information systems technicians build, change, or add data to GIS databases by inputting, scanning, or downloading geometric information. GIS technicians make cartographic and/or thematic maps to visually communicate an area or topic. They may analyze the information in GIS databases and generate charts, maps, graphs, or tables to display inquiry results. GIS technicians can be responsible for making sure databases are error-free and current. Using geographic information, technicians also create computer models and visual representations of land-development plans. GIS technicians may also be required to convert maps to digital format or rescale maps to coincide with new information. GIS technicians assist other users of GIS technology by explaining how to utilize, modify, or create systems information and hardware. GIS technicians may oversee addressing problems with equipment or programming as well as issuing advice on how to improve the system or its usability.</td>
<td>Education: Bachelor’s Degree</td>
<td>Minimum Experience: 2</td>
<td>Security Clearance: None</td>
</tr>

**Service Contract Labor Standards:** The Service Contract Labor Standards (SCLS), formerly known as the Service Contract Act (SCA), is applicable to this contract as it applies to the entire Multiple Award Schedule (MAS) and all services provided. While no specific labor categories have been identified as being subject to SCLS/SCA due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CRF 541.300), this contract still maintains the provisions and protections for SCLS/SCA eligible labor categories. If and/or when the contractor adds SCLS/SCA labor categories to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCLS/SCA matrix identifying the GSA labor category titles, the occupational code, SCLS/SCA labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.
