GDCA Service Descriptions and Pricing

SIN: 541690 Technical Consulting Services

Service Title: Sustainment Options Report (SOR)

Service Title Description
The SOR involves the investigating the sustainment options available to support the Client with production and repairs for discontinued or hard to build embedded products. The report provides a requirements summary and the solutions available.

Education and Experience:
GDCA Engineers working under this service have a minimum of (5) years’ experience and a minimum education of a bachelor’s degree.

GSA Price: $5,000.00

SIN: 541330ENG Engineering Services

Service Title: New Source of Supply (NSOS)

Service Description
The New Source of Supply (NSOS) is an innovative alternative solution to reverse engineering and other obsolescence forced sustainment solutions (upgrades, technology refreshes, last time buys, etc.). NSOS provides long-term customer support for the production and repair of embedded electronics, and the process is broken down into the following Milestones:

1.) Technology, Licensing, and Transfer – Secures the Intellectual Property required to build a NSOS. To legally enforce constraints on the use and confidentiality of the technical data provided to GDCA, the OEM imposes a non-transferable license on GDCA. The Government will not buy or own any intellectual property or licenses associated with this service.

2.) Test Development and Verification – Non-recurring engineering to audit, transcribe, and resolve gaps in technical data, as well as rebuild the required tooling and test equipment.

3.) First Article Prototype and Acceptance – Producing the first article prototypes that are needed by the client to verify form-fit-function equivalency.

Education and Experience:
GDCA Engineers working under this service have a minimum of (5) years’ experience and a minimum education of a bachelor’s degree.

GSA Price: $262,600.00
