SSPC would charge the customer at the < 50 per student rate for each class assuming each class will have < 50 students. At the end of the year, if for instance customer puts 210 students through the program, SSPC will then create a credit for the customer, since the per student rate would be 12% less. The credit could then be used towards your membership renewal, putting students into other training courses or to use towards other SSPC products and or services. The total number of students must come from one unique location. For example, if Norfolk Naval Shipyard put 51 students into a class, they would receive a 3% discount. Puget Sound Naval Shipyard (since they are a different location) could not put students towards Norfolk Naval Shipyard 51 students. This applies to onsite courses in the below list only.

This information applies to the pricing chart found on pages 4, 5, and 6.
