With our headquarters located in Charlotte, NC, Bergman Brothers Environmental Staffing is centrally located to serve the needs of our client-partners throughout the United States.

Our rescue squad is professionally trained, certified and, as a federal government vendor, we have workers that have all necessary clearances to access any job site, anywhere.

We recruit aggressively and has developed a large database of qualified responders thus enhancing our ability to find the perfect match of candidates to anticipate the fluctuating and special needs of our client partners regardless of the circumstances. We do not just work in the disaster recovery industry; we are involved in it as we attend a wide variety of applicable conferences and are always working with the various states to expedite the licensing process.

We pride itself on getting the details and specifics of the situation to provide just the right rescue squad members regardless of the certifications and/or credentials needed. Our goal is to develop long-term relationships with our client partners to provide a level of service that far exceeds any expectations.

Job Title: Hazmat Technician

Job Description:

Hazmat Technician is an acronym that, according to the Occupational Safety & Health Administration (OSHA), stands for Hazardous Waste Operations and Emergency Response. Jobs for a HAZWOPER often require an extensive time commitment and reasonable physical fitness.

- Clean-up Operations involving hazardous substances - that are conducted at uncontrolled hazardous waste sites.
- Corrective actions involving clean-up operations at sites covered by the Resource Conservation and Recovery Act of 1976.
- Voluntary clean-up operations at sites recognized by federal, state, local, or other governmental body as uncontrolled hazardous waste sites.
- Operations involving hazardous wastes that are conducted at treatment, storage, and disposal facilities.
- Emergency response operations for releases of, or substantial threats of releases of, hazardous substances regardless of the location of the hazard.

Minimum Education: High School

Minimum Years' Experience: 1 year

Job Title: Demolition Technician

Job Description:

Tears down anything from high-rise apartment buildings to bridges or factories. Structures are demolished by hand or with wrecking equipment. Wrecking a structure is basically the reverse of building a structure. First laborers "gut" the building. "Gutting" means stripping the inside of anything of value, such as pipes, radiators, and light fixtures. Then starting at the top of the building, crane operators, also called ball-and-chain operators, knock the building down. Front-end machine operators pick up debris and dump it into trucks to be hauled away. Compressor or air-gun operators break up concrete. Smaller brick or wooden structures may be demolished by hand laborers using wrecking bars, sledgehammers, axes, and shovels. Brick buildings are usually taken apart by hand, because brick is valuable. Demolition companies may sell any materials they salvage.

Minimum Education: High School

Minimum Years' Experience: 1 year

Job Title: Lead Abatement Technician

Job Description:

- Record numbers of containers stored at disposal sites, specifying amounts or types of equipment or waste disposed.
- Drive trucks or other heavy equipment to convey contaminated waste to designated sea or ground locations.
- Construct scaffolding or build containment areas prior to beginning abatement or decontamination work.
- Remove asbestos or lead from surfaces, using hand or power tools such as scrapers, vacuums, or high-pressure sprayers.
- Identify asbestos, lead, or other hazardous materials to be removed, using monitoring devices.
- Organize or track the locations of hazardous items in landfills.
- Operate cranes to move or load baskets, casks, or canisters.
- Upload baskets of irradiated elements onto machines that insert fuel elements into canisters and secure lids.
- Manipulate handgrips of mechanical arms to place irradiated fuel elements into baskets.
- Mix or pour concrete into forms to encase waste material for disposal.
- Pull tram cars along underwater tracks, and position cars to receive irradiated fuel elements; then pull loaded cars to mechanisms that automatically unload elements onto underwater tables.
