GSA Job Description for Maintenance and Installation Services

Job Title: Installation Technician

Minimum/General Experience: At least two years of experience as a Technician or Installer in the AV industry, the Television Broadcast industry, Alarm/Security industry, or a related technical field.

- Ability to read/interpret schematics, and drawings.
- Proficient computer skills with practical experience using Microsoft Word, Excel, and other common office products.
- Ability to organize and manage multiple priorities with strict deadlines.
- Trustworthy and dependable.
- Team player.
- Self-starter, self-motivated.
- Excellent organizational skills and the desire to work for a professional company.
- Must be able to lift objects up to 50 pounds and work within varied conditions some of which may be small or confined.
- Flexibility to work some overtime or travel as necessary.
- Takes pride in his work and wants to develop a career in the commercial AV industry.

Functional Responsibility: The Installation Technicians has a strong technical background and good customer skills; is hard working, computer proficient, maintains a clean driving record and is a real team player. Has on the job and additional formal training and is a professional customer-focused individual with pride in his workmanship.

Duties and Responsibilities:

- Installs optical fiber, Cat 5e, Cat 6, and other types of low voltage cabling.
- Responsible for terminating various types of cable connections including, but not limited to, RJ45, DB9, FIBER, and COAX.
- Installs all types of audio visual and technology devices, including cameras, microphones, speakers, projectors, TV's/Monitors, etc.
- Utilizes rack fabrication skills on assigned projects.
- Uses computers and computer systems to install AV programs, set up functions, or configure devices (IP addresses, EDID settings, audio adjustments, etc.) as needed.
- Performs firmware updates for system components as needed
- Performs physical integration, testing, and commissioning of AV components and systems as needed
- Coordinates with company project managers the client's scope of work details including cable pull sheets, audio video and control wiring schematics and closeout documentation.
- Works as part of a crew, or work individually with minimum supervision, to complete assigned tasks.
- Develops familiarity and proficiency with building codes, electrical codes, construction techniques and cabling
- Organizes, plan, and prioritize work.
- May require climbing ladders and working on man lifts to install equipment.
- Makes sure all company owned tools are secured, locked-up and safe at the end of each work day.

- Works within specified deadlines and provides daily field updates.

Minimum Education:

- High School Diploma or equivalent required. A formal education in electronics or related field from a trade school or the US military is preferred.

Other Qualifications:

- Current ES-7J or ES-3J Journeyman license.
- Qualified/Experienced Broadcast engineer/technician
- Audio DSP platform certification(s) a plus (Examples: Crestron, Extron, ClearOne, Polycom).
- Video processing platform certification(s) and ability a plus (Examples: Extron, Crestron).
- Control system platform certification(s) a plus (Examples: AMX, Crestron, Extron).
- InfoComm CTS certification a plus.

Job Title: [Audio-Visual Programmer](#)

Minimum/General Experience: Three years of experience programming in the commercial AV industry

- Must be able to pass Government background checks for security access
- Experience configuring DSP platforms
- Familiar with audio transport platforms such as: Dante
- Experience programming video transport platforms such as: Crestron, and Extron, etc.
- Experience configuring and troubleshooting IP systems
- Creative problem solver with sound judgment and high degree of integrity
- Must have clear and professional communication skills (written and oral) both internally and externally
- Ability to balance multiple tasks with changing priorities
- Valid driver's license
- Able to lift up to 50 lbs.

Functional Responsibility: The Audio-Visual Programmer requires knowledge of the commercial audio-visual market and the ability to program and document system software. He provides system program design, program generation, software documentation creation, software loading, system integration and testing. The Audio-Visual Programmer is hard working, self-motivated, and a real team player.

Duties and Responsibilities:

- Participates in project meetings with system designer and other stakeholders
- Generates preliminary software design
- Creates programming labor cost estimates and scope of work narrative for proposals
- Participates in design, and brainstorming meetings as needed to define the scope of work, interpret project specifications and drawings, determine programming requirements, system testing and develop bill of materials to include appropriate amount of job-related labor to generate programs
- Coordinates with security experts to program systems for secure environments
- Generates and manages programming documentation

- Provides system configuration and programming files
- Configures devices as needed
- Creates and adjusts DSP files for Extron, Biamp, Clear-One and QSC audio processors as needed
- Commissions systems as needed
- Assists with end-user training as needed
- Acts as programming subject matter expert for after-project support
- Keeps up with market and technological trends
- Supports company training initiatives
- Participates in training and professional development activities as prescribed by management
- Travels locally within the selling / installation geography serviced by the company
- Other duties as assigned

Minimum Education: Bachelor's degree or equivalent experience

Other Qualifications:

- Self-starter, energetic, with ability to think outside the box. Fast learner, self-directed, trustworthy with confidential information. Strong time management skills
- Experience reviewing bid documents for purposes of evaluating and preparing comprehensive programming descriptions
- Knowledge of industry standards and best practices
- Familiarity with audio-visual programming in secure environments
- Experience programming VTC platforms such as: Cisco, Polycom
- Control System programming certifications such as Crestron, and Extron
- DSP programming certifications such as BiAmp, Extron, ClearOne, QSC
