The customer's require epoxy flooring when an existing epoxy floor is worn out. Epoxy flooring can be used to coat existing ceramic tile. It is also used in lieu of Luxury Vinyl Tile (LVT), VCT and Sheet Vinyl to create a seamless installation. The service will be offered when the end-user desires a non-porous surface and is an excellent choice for commercial kitchens, laboratories, warehouses, classrooms, shop floors, restrooms, clean rooms, garages, airplane hangars, showrooms, and more when performance, ease of maintenance, and beauty is desired. Epoxy is applied to a properly prepared surface. Epoxy comes in variety of colors. It is liquid applied to at least a 2mm thickness. It becomes a seamless installation.

<tr>
<td><strong>Negative Air Machine</strong></td>
<td>A negative air machine uses ducting to remove contaminated air from a sealed containment area. The filtered air is exhausted outside of the containment. This creates negative air pressure (a slight vacuum effect) inside the containment relative to surrounding areas. A negative air machine application helps limit the spread of contaminants to other areas inside the structure. For example, this would be used for Asbestos Abatement, mold decontamination, etc.</td>
