Contractor's Administration Source:
John Berardi

Business Size:
Small Business

Since its inception in 1989 in a garage in Venice, CA, Wildfire has been focused on creating innovative products designed to produce the brightest, most powerful UV effects possible.

We even created the **FLAME™** Formula for generating the “Wildfire Effect.”

- “**F**” is for “fixture.” Wildfire produces the most powerful, most durable, and most controllable black lights on the planet.
- “**L**” is for “length”, or the distance between the fixture and the fluorescing material. The closer the fixture, the brighter the effect.
- “**A**” is for “ambient lighting.” The darker the room, the more powerful the effect.
- “**M**” is for “materials.” Wildfire produces creative materials such as paints and dyes which are super-saturated with UV sensitive pigment, making them the most powerful on the market.
- “**E**” is for the kind of “effect” you choose to create. The signature black light effects include Visible Fluorescent Imagines, Invisible Images, Dual Images, Day-Night Transitions, and 3D Images. (See Gallery for examples of each.)

We're not only on the cutting edge of UV fixtures and creative materials, but in UV printing, as well. Our Clearmeleon® UV Printing allows for the first time ever, completely invisible photorealistic images. It's the first 4-color invisible printing process!

Wildfire is committed to continually pushing the envelope in developing affordable yet professional-quality solutions for creating spectacular black light visual effects.
