ABOUT US

Since 1997, we have been supplying and installing a variety of window films with different purposes, such as heat, fading, and glare reduction, blast mitigation, anti-intrusion, vision control, and customized aesthetic enhancement. To ensure outstanding quality, we have partnered with major window film providers. In addition, we have crew members in your area who take on projects of all sizes and are motivated to leave a positive impression on you...get the job done right, on-time, and within budget

Should you have any questions on the process, application, or need specification assistance, we're available to provide you with expert guidance right from the very start. Our installation teams have the required clearances and possess more than a decade of experience. We agree with our customers that our installers are the best in the business.

HOW WE STARTED

After working in the Window Film industry for more than 17 years, founder Walt Goode merged talents with Joanne Goode in 2014 to form Film Works Window Film. Joanne, spent 18 years in Corporate Real Estate Project Management and brings a unique client based perspective to each project. Our mission is to provide our clients, vendors and installation teams the best service and work experience possible.

OUR COMPETITIVE EDGE

Our team always assists clients and design teams in choosing the ideal window film. We take pride in the fact that we can produce exceptional results on every project we take on, saving our clients' money and time. Also, we are known for customer service excellence and a speedy turnaround time.

The Fact is that many fringe companies offer window film products and services as an added or additional service. Film Works Window Film, LLC specializes in this area...only! Our expertise in the window film market is un-matched and as such, you can be assured that the products chosen for your specific application are designed to perform as you expect, with the installation of new product and removal of existing product meeting the exact standards set by the manufacturer.

MEETING YOUR NEEDS

Whether your need for window film is to complete interior design specifications, address heating and cooling issues, or provide blast mitigation, our products meet those needs. There are many choices of product types, thicknesses, decorative options that our team can assist you with.

WARRANTY

Film Works Window Film, LLC warrants our services for 12 months following the service and our product are warranted by the manufacture for up to 15 years depending on the product type and manufacturer.

PRODUCT OFFERING

At Film Works Window Film, we place an equal amount of importance on the functionality, security, and aesthetic elements of our products. Our world-class window films have solar control properties, provide a sufficient amount of security, and can improve the appearance of your commercial facility.

DECORATIVE

There are many stylish trends in the window film industry, including intricate graphics and printed patterns, colored films, as well as other translucent and opaque designs. As companies continue to consolidate or expand their operations, one of the prevalent methods of renovating existing and newly leased space is applying a standard or customized decorative film to the interior glass. We can easily alter the interior aesthetics of your property while giving you the liberty to remove them effortlessly if you decide to move out.

If you are an architect, designer or specifier, you will enjoy choosing from a wide range of options. With the advent of digital printing, the increase of sophisticated plotter systems, and the ability to print designs directly onto glass, the possibilities are virtually endless.

SOLAR CONTROL

Applying window film coating to the exterior glass of your building is one of the easiest, most cost-effective, and least intrusive ways to reduce your energy consumption. You'll also enjoy an excellent return on investment, generally within two to five years, depending on the building orientation and the type of film that is applied. In fact, our window films are more economical compared to replacing your windows or installing a computerized energy conservation system. Best of all, this method is eco-friendly because you won't have to dispose of existing window systems. Apart from energy and cost savings, coated glass provides a myriad of other benefits. Our solar control products:

- Enhance the aesthetics of your building by creating a uniform exterior appearance
- Extend the lifespan of cooling systems through reduced workload
- Extend the lifespan of interior furnishings, wallpaper, carpets, and artwork because of less sun damage
- Improve the safety rating of the glass through our coating's shard disbursement feature
- Increase the comfort level of occupants through glare and temperature control (reduction of hot and cold spots throughout the building)
- Reduce the maintenance costs of servicing the cooling systems

SAFETY AND SECURITY

Our window films provide ample protection against both natural and man-made disasters. In the event of a hurricane or an explosion, the film coating will effectively minimize the amount of flying glass shards. This is important given that most injuries that occur during these situations result from flying glass. Also, applying security film with solar/vision control has several benefits, such as protecting building occupants and potentially reducing insurance premiums.
