1b. Lowest Priced Model Number and price for each SIN

Page: 9-11

1c. Hourly Rates (Services Only):

Page: 9-11

2. MAXIMUM ORDER*: $500,000 per order NAIC 54151S

NOTE TO ORDERING ACTIVITIES: If the best value selection places your order over the Maximum Order identified in this catalog/pricelist, you have an opportunity to obtain a better schedule contract price. Before placing your order, contact the aforementioned contactor for a better price. The contractor may (1) offer a new price for this requirement. (2) offer the lowest price available under this contract or (3) decline the order. A delivery order that exceeds the maximum order may be placed under the schedule contract in accordance with FAR 8.404.

3. MINIMUM ORDER: $100.00

5. POINT(S) OF PRODUCTION: USA

6. DISCOUNT FROM LIST PRICES: SIN 51451S 10%

7. QUANTITY DISCOUNT(S): None

8. PROMPT PAYMENT TERMS: Net 30

9. FOREIGN ITEMS: None

10a. TIME OF DELIVERY: 30 Days after receipt of order

10b. EXPEDITED DELIVERY: N/A

10c. OVERNIGHT AND 2-DAY DELIVERY: N/A

10d. URGENT REQUIREMENTS: Agencies can contact the Contractor's representative to effect a faster delivery.

Customers are encouraged to contact the contractor for the purpose of requesting accelerated delivery.

11. FOB POINT: Destination

12a. ORDERING ADDRESS:
12b. ORDERING PROCEDURES: Ordering activities shall use the ordering procedures described in Federal Acquisition Regulation 8.405-3 when placing an order or establishing a BPA for supplies or services. The ordering procedures, information on Blanket Purchase Agreements (BPA’s) and a sample BPA can be found at the GSA/FSS Schedule Homepage (fss.gsa.gov/schedules).

13. PAYMENT ADDRESS:
DanSources Technical Services, Inc.
1010 Rockville Pike, Suite 405
Rockville, MD 20852

14. WARRANTY PROVISION: N/A

15. EXPORT PACKING CHARGES: Not Applicable

16. TERMS AND CONDITIONS OF RENTAL, MAINTENANCE, AND REPAIR (IF APPLICABLE): N/A

17. TERMS AND CONDITIONS OF INSTALLATION (IF APPLICABLE): N/A

24. NOTIFICATION REGARDING REGISTRATION IN CENTRAL CONTRACTOR REGISTRATION (CCR) DATABASE: Registration active.
Consultant

Minimum/General Experience: Minimum of twenty years experience is required, of which ten years must be specialized. Specialized experience required includes: complete engineering project development from inception to deployment, demonstrated ability to provide guidance and direction in multiple tasks across several functional areas and including the use of different technologies. Proven expertise in the management and control of funds and resources, demonstrated capability in managing complex multi-task contracts. General experience required includes: increasing responsibilities in information systems design and management. Alternate Experience Requirements: A Master’s degree (in the fields described below) requires nine years specialized experience and thirteen years of general experience. A Ph.D. (in the fields described below) requires eight years specialized experience and twelve years of general experience. A minimum of a Bachelor’s degree (in the fields described below) is required for this category.

Functional Responsibility: Responsible for the effective management of funds and personnel, and is accountable for the quality and timely delivery of contractual items. Operates within client guidance, contractual limitations, and Company business and policy directives. Serves as focal point of contact with client on program activities. Ensures that all required resources including manpower, production standards, computer time, and facilities are available for program implementation. Manages program consisting of multiple projects including project identification, design, development and delivery. Confers with project manager to provide technical advice and to assist with problem resolution. Participates in contract negotiations.

Minimum Education: Bachelor’s Degree in Computer Science, Information Systems, Engineering, Business, or other related scientific or technical discipline.

Resumes shall be provided to the user Agency upon request.

Program Manager

Minimum/General Experience: Minimum of fifteen years experience is required, of which six years must be specialized. Specialized experience required includes: complete engineering project development from inception to deployment, demonstrated ability to provide guidance and direction in multiple tasks across several functional areas and including the use of different technologies. Proven expertise in the management and control of funds and resources, demonstrated capability in managing complex multi-task contracts. General experience required includes: increasing responsibilities in information systems design and management. Alternate Experience Requirements: A Master’s degree (in the fields described below) requires five years specialized experience and eight years of general experience. A Ph.D. (in the fields described below) requires four years specialized experience and seven years of general experience. A minimum of a Bachelor’s degree (in the fields described below) is required for this category.

Functional Responsibility: Responsible for the effective management of funds and personnel, and is accountable for the quality and timely delivery of contractual items. Operates within client guidance, contractual limitations, and Company business and policy directives. Serves as focal point of contact with client on program activities. Ensures that all required resources including manpower, production standards, computer time, and facilities are available for program implementation. Manages program consisting of multiple projects including project identification, design, development and delivery. Confers with project manager to provide technical advice and to assist with problem resolution. Participates in contract negotiations.

Minimum Education: Bachelor’s Degree in Computer Science, Information Systems, Engineering, Business, or other related scientific or technical discipline.

Resumes shall be provided to the user Agency upon request.
**Project Manager**  
*Minimum/General Experience:* Minimum of six years experience is required, of which four years must be specialized. Specialized experience required includes: complete engineering project development from inception to deployment; proven expertise in the management and control of funds and resources, demonstrated capability in managing multi-task contracts. General experience required includes: increasing responsibilities in information systems design and management.  

**Alternate Experience Requirements:** A *Master’s degree* (in the fields described below) requires three years specialized experience and four years of general experience. A *Ph.D.* (in the fields described below) requires two years specialized experience and three years of general experience. An *Associate’s degree* (in the fields described below) requires five years specialized experience and nine years of general experience. A degree is not required with eight years of specialized experience and ten years of general experience.  

**Functional Responsibility:** Leads the project or multiple tasks and retains overall responsibility for performance including cost, schedule, deliverables and contractual compliance. Provides the interface to the customer and other project leaders. May work under a Program Manager for multiple projects. Identifies, acquires, and utilizes company resources to achieve project technical objectives. Establishes priorities, task assignment and completion. Ensures quality and productivity standards are maintained while meeting project/client deadlines and budget constraints. Serves as the client liaison on all project matters. Performs a quality assurance role and ensures timely delivery of all specified deliverables. Identifies all task responsibilities and reports any changes or suggestions accordingly to a senior Project Manager or Program Manager. Supervises the training of new personnel under the project to assure compliance with government regulations, codes, and Company policy and procedures. Participates in contract negotiations.  

**Minimum Education:** Bachelor’s degree in Computer Science, Information Systems, Engineering, Business, or other related scientific or technical discipline.  

Resumes shall be provided to the user Agency upon request.  

**Senior Software Engineer**  
*Minimum/General Experience:* Fifteen years of experience. Provides expertise in the analysis, design, integration, and installation of complex scientific and information technology software and systems. Analyzes and designs software products, systems, networks, and develops technical solutions to customer’s requirements. Interacts extensively with customers and user organization. Responsible for the technical accuracy and satisfactory completion of all requirements.  

**Functional Responsibility:** Solves major software/ technical problems, resolves operating problems, designs, codes, tests, and maintains systems and programs to include associated equipment and networks. Provides technical direction to other staff members working on a specific project.  

**Minimum Education:** Appropriate and relevant college degree or equivalent training and experience.  

Resumes shall be provided to the user Agency upon request.  

**Software Engineer**  
*Minimum/General Experience:* Two or more years of experience. Designs, codes, tests, and maintains systems, software, and related documentation for computers, networks, and associated equipment. Provides consultation and services on technical issues, defines and selects the most appropriate concepts and approaches, and resolves system and hardware problems.  

**Functional Responsibility:** Performs systems or applications programming tasks of a moderately complex nature which require design and advanced programming techniques.  

**Minimum Education:** Appropriate and relevant college degree or equivalent training and experience.
Resumes shall be provided to the user Agency upon request.

**SYSTEMS ENGINEER**

**Minimum/General Experience:** The Systems Engineer shall have 10 years of technical experience in electronic communications and networking. The System Engineer shall solve unique problems encountered during the operations and maintenance of the network, the Network Management Systems (NMS), and all ancillary equipment and software.

**Functional Responsibility:** The individual holding this position is capable of working with minimum guidance and supervision. The individual can provide technical supervision to one or more professional technical personnel on an assigned project. Individual can participate at all levels in systems analysis and design definition. Additionally, the Systems Engineer shall be capable of performing the following functions: Network Modeling. The Systems Engineer shall be able to model the network using network modeling tools. The modeling shall show impacts on network cost, services, capabilities, and availability as changes in the network configuration are planned and executed. This includes contingency restorations plans and exercise scenarios. Future Requirements. The Systems Engineer shall incorporate all new connections and services into the network, as they are required by the government. This includes modeling, preparing implementation plans, coordinating installations, and test planning. The Systems Engineer shall also prepare all documents required to change or add the services and/or the changes or additions to the network. The Systems Engineer’s proposed changes shall not affect the network performance and service availability requirements. Performance and Trends Analysis. The Systems Engineer shall retrieve information from the NMS on outages, failures, fault isolation steps (duration and who performed each step), and maintenance data. The Systems Engineer shall use this information to determine network performance, individual circuit availability rates and to perform trend analysis. Utilization Analysis. The Systems Engineer shall retrieve information from the NMS to determine utilization of the network. The Systems Engineer shall use the utilization information to recommend changes in the network to maintain network efficiency, performance and service availability. Utilization analysis programs and products shall be made available, by the System Engineer, through the NMS workstations for the NMO’s use without restriction.

**Minimum Education:** BS or BA Degree or equivalent systems experience.

Resumes shall be provided to the user Agency upon request.

**Systems Administrator**

**Minimum/General Experience:** Ten years of experience providing systems administration support, similar to that described under functional responsibility, and having knowledge and understanding of applicable technical concepts and practices.

**Functional Responsibility:** Serves as systems administrator for computer center and/or network and data communications systems. Provides hardware and software troubleshooting for the Local Area or Wide Area Networks. Assists in preparing written evaluation and recommendations regarding the implementation of client-server/network systems. Responsible for providing suggestions in design and implementation of quality metric disciplines for operation of the management information systems. Provides technical services in the installation of computing facilities, including installation planning and site preparation. Participates in the analysis, evaluation and testing of software/hardware problems with all findings and recommendations being submitted to the appropriate management officials. Provides troubleshooting services for intra-system communications. Monitors multiple systems. Provides technical services regarding the operation and management of electronic mail capability. Serves as the office automation technical advisor, making recommendations on the type and amount of automation equipment needed. Schedules or provides training in the use of automation equipment for the office. Maintains inventory of all computer system and/or data systems equipment and supplies. Submits
recommendations for supplies, equipment and furniture as well as the repair and/or replacement of defective computer/telecommunications equipment.

Minimum Education: Associate’s Degree, or a related Technical Certificate from a Technical School or recognized Vocational Program. In lieu of education an additional two years of experience is required. Resumes shall be provided to the user Agency upon request.

SharePoint Developer $90.68
Minimum/General Experience: 10 years experience. Analyzes and designs software products, systems, networks, and develops technical solutions to customer’s requirements.

Functional Responsibility: Assists with the analysis of information requirements. Aids in the evaluation of problems with workflow, organization, and planning and helps develop appropriate corrective action.

Minimum Education: Masters or Bachelors Degree in Computer Science, Engineering, or Information Technology Business, or other related scientific or technical discipline.

Resumes shall be provided to the user Agency upon request.

Objects Software Developer $99.60
Minimum/General Experience: Ten years of experience providing computer software applications development and maintenance support, similar to that described under functional responsibility, and having knowledge and understanding of applicable technical concepts and practices.

Functional Responsibility: Participates in the analysis of functional business/technical applications and design specifications for functional activities. Assists in the development of block diagram and logic flow charts. Translates detailed design into computer application software. Tests, debugs, and refines the computer software to produce the required product. Helps to prepare required documentation, including both program-level and user-level documentation. Enhances software to reduce operating time or improve efficiency.

Minimum Education: Masters or Bachelor’s Degree in a related engineering, computer science, physical science, or technical field.

Resumes shall be provided to the user Agency upon request.
