CUSTOMER INFORMATION

1a. Table of awarded special item number(s) with appropriate cross-reference to item descriptions and awarded price(s):

SIN	Description
33411	Purchasing of New Electronic Equipment
811212	Maintenance of Equipment, Repair Services and/or Repair/Spare Parts
511210	Software Publishers
54151	Software Maintenance Services
541370GEO	Earth Observation Solutions
54151HACS	Highly Adaptive Cybersecurity Services (HACS)
611420	Information Technology Training
54151S	Information Technology Professional Services
ANCILLARY	Ancillary Supplies and Services
OLM	Order-Level Materials (OLMs)

1b. Identification of the lowest priced model number and lowest unit price for that model for each special item number awarded in the contract. This price is the Government price based on a unit of one, exclusive of any quantity/dollar volume, prompt payment, or any other concession affecting price. Those contracts that have unit prices based on the geographic location of the customer, should show the range of the lowest price, and cite the areas to which the prices apply. **See product pricing.

1c. If the Contractor is proposing hourly rates, a description of all corresponding commercial job titles, experience, functional responsibility and education for those types of employees or subcontractors who will perform services shall be provided. If hourly rates are not applicable, indicate "Not applicable" for this item.
Labor Category Descriptions - Please see Pages 44 thru 47 and 53 thru 55.

2. Maximum order:

- Special Item Number 33411 - \$500,000
- Special Item Number 811212 - \$500,000
- Special Item Number 511210 - \$500,000
- Special Item Number 54151 - \$500,000
- Special Item Number 541370GEO - \$1,000,000
- Special Item Number 54151HACS - \$500,000
- Special Item Number 611420 - \$250,000
- Special Item Number 54151S - \$500,000
- Special Item Number ANCILLARY - \$250,000
- Special Item Number OLM - \$250,000

*Ordering activities may request a price reduction at any time before placing an order, establishing a BPA, or in conjunction with the annual BPA review. However, the ordering activity shall seek a price reduction when the order or BPA exceeds the simplified acquisition threshold. Schedule contractors are not required to pass on to all schedule users a price reduction extended only to an individual ordering activity for a specific order or BPA.

3. Minimum order: \$100.00

4. Geographic coverage (delivery area): Worldwide

5. Point(s) of production (city, county, and State or foreign country):

Hexagon US Federal, Inc.
301 Cochran Road
Huntsville, AL 35824-1109
Tel: 256-799-6996

6. Discount from list prices or statement of net price: GSA Net Prices are shown on the attached GSA Price List. Negotiated discount has been deducted.

**Hexagon offers a free HXGN Conference Pass with every \$50,000 in Sales for both Term Software and Software Maintenance as a product (SIN 511210).*

7. Quantity discounts:

Quantity discounts may be applicable on an individual order basis.
Volume discounts may be applicable on an individual order basis.

8. Prompt payment terms; Note: Prompt payment terms must be followed by the statement "Information for Ordering Offices: Prompt payment terms cannot be negotiated out of the contractual agreement in exchange for other concessions.": 1% - 15 days from receipt of invoice for new Federal Government orders. The prompt payment discount is not extended to state and local governments using the schedule under the cooperative purchasing program, nor is it extended to US Government Prime Contractor orders received under a letter of authorization (LOA).

9a. Notification that Government purchase cards are accepted at or below the micro-purchase threshold: Government Purchase Cards are accepted at or below the micro-purchase threshold for any dollar value above the minimum order.

9b. Notification whether Government purchase cards are accepted or not accepted above the micro-purchase threshold: Government Purchase Cards are accepted for any dollar value above the micro-purchase level.

10. Foreign items: None

11a. Time of delivery:

SIN	Standard Delivery Time
33411	30 days ARO
811212	30 days ARO
511210	30 days ARO
54151	As negotiated at the TO Level
541370GEO	15 days ARO
54151HACS	As negotiated at the TO Level
611420	As negotiated at the TO Level
54151S	As negotiated at the TO Level
ANCILLARY	As negotiated at the TO Level
OLM	As negotiated at the TO Level

11b. Expedited Delivery: Please contact the Contractor for availability and rates.

11c. Overnight and 2-day delivery: Please contact the Contractor for availability and rates.

11d. Urgent Requirements: Please contact the Contractor for availability and rates.

12. F.O.B. point(s): Destination to the 48 contiguous states, Alaska, Hawaii, Puerto Rico, Washington, DC, and U.S. Territories and Origin for Products under SIN 541370GEO.

13a. Ordering address:

EDI Orders: Quiana T. Patterson
Hexagon US Federal, Inc, (478) 322-3258
301 Cochran Road
Huntsville, AL 35824-1109

FAX Orders: Mark for Attention: GSA Order Administrator
FAX: (256) 799-6926

Mail Orders: Federal Customer Care Center
Mark for Attention: GSA Order Administrator
301 Cochran Road
Huntsville, AL 35824-1109

13b. Ordering procedures: For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPA's) are found in Federal Acquisition Regulation (FAR) 8.405-3.

14. Payment address:

Hexagon US Federal, Inc.
PO Box 824738
Philadelphia, PA 19182-4738

15. Warranty provision:

SIN	Warranty
33411	90 days - parts exchange only
811212	30 days
511210	30 days/ Media Defect 1 year as marked
54151	N/A - negotiated at TO level acceptance terms
541370GEO	15 days
54151HACS	N/A - negotiated at TO level acceptance terms
611420	N/A - negotiated at TO level acceptance terms
54151S	N/A - negotiated at TO level acceptance terms
ANCILLARY	N/A - negotiated at TO level acceptance terms

16. Export packing charges, if applicable: Export packing is available at additional cost outside the scope of this contract.

17. Terms and conditions of Government purchase card acceptance (any thresholds above the micro-purchase level): Hexagon US Federal, Inc has a credit card limit of \$50,000.

18. Terms and conditions of rental, maintenance, and repair (if applicable): See pages 13-17 for terms for maintenance and repair.

19. Terms and conditions of installation (if applicable): See page 10 for installation terms.

20. Terms and conditions of repair parts indicating date of parts price lists and any discounts from list prices (if applicable): Not Applicable

20a. Terms and conditions for any other services (if applicable): Not Applicable

21. List of service and distribution points (if applicable): Not Applicable

22. List of participating dealers (if applicable): Not Applicable

23. Preventive maintenance (if applicable): Not Applicable

24a. Special attributes such as environmental attributes (e.g., recycled content, energy efficiency, and/or reduced pollutants): Not Applicable

24b. If applicable, indicate that Section 508 compliance information is available on Electronic and Information Technology (EIT) supplies and services and show where full details can be found (e.g. contractor's website or other location.) The EIT standards can be found at: www.Section508.gov/: Not Applicable

25. Data Universal Number System (DUNS) number: 963395368

26. Notification regarding registration in Central Contractor Registration (CCR) Database: Hexagon US Federal, Inc is registered in SAM. CAGE Code: 63CL1.

Terms and Conditions for all IT Contractors

1) **Organizational Conflicts of Interest**

a) Definitions.

"Contractor" means the person, firm, unincorporated association, joint venture, partnership, or corporation that is a party to this contract.

"Contractor and its affiliates" and "Contractor or its affiliates" refers to the Contractor, its chief executives, directors, officers, subsidiaries, affiliates, subcontractors at any tier, and consultants and any joint venture involving the Contractor, any entity into or with which the Contractor subsequently merges or affiliates, or any other successor or assignee of the Contractor.

An "Organizational conflict of interest" exists when the nature of the work to be performed under a proposed ordering activity contract, without some restriction on ordering activities by the Contractor and its affiliates, may either (i) result in an unfair competitive advantage to the Contractor or its affiliates or (ii) impair the Contractor's or its affiliates' objectivity in performing contract work.

- b) To avoid an organizational or financial conflict of interest and to avoid prejudicing the best interests of the ordering activity, ordering activities may place restrictions on the Contractors, its affiliates, chief executives, directors, subsidiaries and subcontractors at any tier when placing orders against schedule contracts. Such restrictions shall be consistent with FAR 9.505 and shall be designed to avoid, neutralize, or mitigate organizational conflicts of interest that might otherwise exist in situations related to individual orders placed against the schedule contract. Examples of situations, which may require restrictions, are provided at FAR 9.508

2) **Services Performed**

- a) All services performed by the Contractor under the terms of this contract shall be as an independent Contractor, and not as an agent or employee of the ordering activity.

- b) The Contractor shall commence performance of services on the date agreed to by the Contractor and the ordering activity.

- c) The Contractor agrees to render services only during normal working hours, unless otherwise agreed to by the Contractor and the ordering activity.

- 3) **Travel.** Any Contractor travel required in the performance of services must comply with the Pub. L. 99-234 and FAR Part 31.205-46, as applicable, in effect on the date(s) the travel is performed. Established Federal Government per diem rates will apply to all Contractor travel.

4) **Warranty**

- a) Unless otherwise specified in this contract, the Contractor's standard commercial warranty as stated in the contract's commercial pricelist will apply to this contract.

- b) The Contractor's commercial guarantee/warranty shall be included in the Commercial Supplier Agreement to include Enterprise User License Agreements or Terms of Service (TOS) agreements, if applicable.

- c) Except as otherwise provided by an express or implied warranty, the Contractor will not be liable to the ordering activity for consequential damages resulting from any defect or deficiencies in accepted items.

Regulation Number	Regulation Title/Comments
52.222-46	EVALUATION OF COMPENSATION FOR PROFESSIONAL EMPLOYEES (FEB 1993)

TERMS AND CONDITIONS APPLICABLE TO F02. IT Hardware Subcategory

INSTALLATION AND TECHNICAL SERVICES

When the equipment provided under this contract is not normally self-installable, the Contractor's technical personnel shall be available to the ordering activity, at the ordering activity's location, to install the equipment and to train ordering activity personnel in the use and maintenance of the equipment. The charges, if any, for such services are listed below, or in the price schedule: *Installation services are available in the price schedule under Labor pricing.*

INFORMATION TECHNOLOGY CATEGORY
HARDWARE SUBCATEGORY
SIN 811212 Hardware Maintenance Order Terms

1) Service Areas

- a) The maintenance and/or repair service rates per the contract are applicable to any ordering activity locations within a 50-mile radius of the Contractor/Original Equipment Manufacturer (OEM) service points. If any additional charge is to apply because of the greater distance from the Contractor/OEM service locations, the mileage rate or other distance factor shall be negotiated at the Task Order level.
- b) When maintenance and/or repair services cannot be performed at the ordering activity installation site, the repair services will be performed at the Contractor's plant(s) listed below:

Hexagon US Federal, Inc Attn: Repair Depot		
290 Dunlop Blvd., Suite J		
Address		
Huntsville	AL	35824
City	State	Zip Code

2) Loss or Damage

When the Contractor moves equipment to its/OEM location for repairs, the Contractor shall be responsible for any damage or loss, from the time the equipment is removed from the ordering activity installation, until the equipment is returned to such installation.

3) Scope

- a) The Contractor shall provide maintenance for all equipment listed herein, as requested by the ordering activity during the contract term. Repair service and repair parts/spare parts shall apply exclusively to the equipment types/models within the scope of the Information Technology Category.
- b) Equipment placed under maintenance service shall be in good operating condition.
 - i) In order to determine that the equipment is in good operating condition, the equipment shall be subject to inspection by the Contractor, without charge to the ordering activity.
 - ii) Costs of any repairs performed for the purpose of placing the equipment in good operating condition shall be borne by the Contractor, if the equipment was under the Contractor/OEM guarantee/warranty or maintenance responsibility prior to the effective date of the maintenance order.

- iii) If the equipment was not under the Contractor/OEM responsibility, the costs necessary to place the equipment in proper operating condition are to be borne by the ordering activity, in accordance with the provisions of the contract.

4) Responsibilities

- a) For equipment not covered by a maintenance contract or warranty, repair service personnel shall complete repairs as soon as possible after notification by the ordering activity that service is required. Within the service areas, this repair service should normally be done within 4 hours after notification.
- b) If the Ordering Activity task or delivery order specifies a factory authorized/certified service personnel then the Contractor is obligated to provide such a factory authorized/certified service personnel for the equipment to be repaired or serviced, unless otherwise agreed to in advance between the Ordering Activity and the Contractor.

5) Maintenance Rate Provisions

- a) The Contractor shall bear all costs of maintenance, including labor, parts, and such other expenses as are necessary to keep the equipment in good operating condition, provided that the required repairs are not occasioned by fault or negligence of the ordering activity.
 - i. Regular Hours: The basic monthly rate for each make and model of equipment shall entitle the ordering activity to maintenance service during a mutually agreed upon nine (9) hour principal period of maintenance, Monday through Friday, exclusive of holidays observed at the ordering activity location.
 - ii. After Hours: When the ordering activity requires that repair service be performed outside the Regular Hours defined above, except Sundays and Holidays observed at the ordering activity location, the After-Hours repair service rates listed herein shall apply. The Regular Hours rates defined above shall apply when repair service is requested during Regular Hours but performed After Hours at the convenience of the Contractor. Periods of less than one hour will be prorated to the nearest quarter hour.
 - iii. Travel and Transportation: If any charge is to apply, over and above the regular maintenance rates, due to the distance between the ordering activity location and the Contractor/OEM's service area, the charge will be negotiated at the Task Order level.

	Yes	No
Indicate if there will be an additional charge for travel and transportation.		X

- b) Quantity Discounts from listed maintenance service rates for multiple equipment owned and/or leased by an ordering activity shall be provided below.

Quantity Range	Discounts
Units	N/A
Units	N/A
Units	N/A

HARDWARE SUBCATEGORY
SIN 811212 Hardware Repair Service Order Terms

1) Service Areas

- a) The maintenance and/or repair service rates per the contract are applicable to any ordering activity locations within a 50-mile radius of the Contractor/Original Equipment Manufacturer (OEM) service points. If any additional charge is to apply because of the greater distance from the Contractor/OEM service locations, the mileage rate or other distance factor shall be negotiated at the Task Order level.
- b) When maintenance and/or repair services cannot be performed at the ordering activity installation site, the repair services will be performed at the Contractor's plant(s) listed below:

Hexagon US Federal, Inc Attn: Repair Depot		
290 Dunlop Blvd., Suite J		
Address		
Huntsville	AL	35824
City	State	Zip Code

2) Loss or Damage

When the Contractor moves equipment to its/OEM location for repairs, the Contractor shall be responsible for any damage or loss, from the time the equipment is removed from the ordering activity installation, until the equipment is returned to such installation.

3) Scope

- a) The Contractor shall provide maintenance for all equipment listed herein, as requested by the ordering activity during the contract term. Repair service and repair parts/spare parts shall apply exclusively to the equipment types/models within the scope of the Information Technology Category.
- b) Equipment placed under maintenance and/or service shall be in good operating condition.
 - i) In order to determine that the equipment is in good operating condition, the equipment shall be subject to inspection by the Contractor, without charge to the ordering activity.
 - ii) Costs of any repairs performed for the purpose of placing the equipment in good operating condition shall be borne by the Contractor, if the equipment was under the Contractor/OEM guarantee/warranty or maintenance responsibility prior to the effective date of the maintenance order.
 - iii) If the equipment was not under the Contractor/OEM responsibility, the costs necessary to place the equipment in proper operating condition are to be borne by the ordering activity, in accordance with the provisions of the contract.

4) Responsibilities

- a) For equipment not covered by a maintenance contract or warranty, repair service personnel shall complete repairs as soon as possible after notification by the ordering activity that service is required. Within the service areas, this repair service should normally be done within 4 hours after notification.
- b) If the Ordering Activity task or delivery order specifies a factory authorized/certified service personnel then the Contractor is obligated to provide such a factory authorized/certified service personnel for the equipment to be repaired or serviced, unless otherwise agreed to in advance between the Ordering Activity and the Contractor.

5) Repair Service Rate Provisions

- a) Charges for repair service will include the labor charge, computed at the rates set forth below, for the time during which repairmen are actually engaged in work, and, when applicable, the charge for travel or transportation.
- b) Multiple Machines: When repairs are ordered by the ordering activity on two or more machines located in one or more buildings within walking distance of each other, the charges will be computed from the time the repairman commences work on the first machine, until the work is completed on the last machine. The time required to go from one machine to another, or from one building to another, will be considered actual work performance, and chargeable to the ordering activity, provided the time consumed in going between machines (or buildings) is reasonable.
- c) At the Contractor/OEM's Facility
 - i) When equipment is returned to the Contractor/OEM's Facility for adjustments or repairs which are not covered by the guarantee/warranty provision, the cost of transportation, packing, etc. from the ordering activity location to the Contractor's plant, and return to the ordering activity location, shall be borne by the ordering activity.
 - ii) The ordering activity should not return defective equipment to the Contractor/OEM for adjustments and repairs or replacement without prior consultation and instruction.
- d) At the Ordering Activity Location (Within Established Service Areas)
 - i) When equipment is repaired at the ordering activity location, and repair service rates are established for service areas or zones, the listed rates are applicable to any ordering activity location within such service areas or zones. No extra charge, time, or expense will be allowed for travel or transportation of repairmen or machines to or from the ordering activity office; such overhead is included in the repair service rates.
- e) At the Ordering Activity Location (Outside Established Service Areas)
 - i) If repairs are to be made at the ordering activity location, and the location is outside the service area terms defined in the GSA Price list. Rates negotiated at the task order will apply.
 - ii) When the overall travel charge computed at the above mileage rate is unreasonable (considering the time required for travel, actual and necessary transportation costs, and the allowable ordering activity per diem rate for each night the repairman is required to remain overnight at the ordering activity location), the ordering activity shall have the option of reimbursing the Contractor for actual costs, provided that the actual costs are reasonable and allowable. The Contractor shall furnish the ordering

activity with a report of travel performed and related expenses incurred. The report shall include departure and arrival dates, times, and the applicable mode of travel.

- f) Labor Rates
- i) Regular Hours: Contract rates shall entitle the ordering activity to repair service during the period 8:00 a.m. to 5:00 p.m., Monday through Friday, exclusive of holidays observed at the ordering activity location. There shall be no additional charge for repair service, which was requested during regular hours, but performed at the convenience of the Contractor outside the regular hours.
 - ii) After Hours: When the ordering activity requires that repair service be performed outside the Regular Hours defined above, except Sundays and Holidays observed at the ordering activity location, the After-Hours repair service rates listed herein shall apply. The Regular Hours rates defined above shall apply when repair service is requested during Regular Hours but performed After Hours at the convenience of the Contractor. Periods of less than one hour will be prorated to the nearest quarter hour.
 - iii) Sundays and Holidays: When the ordering activity requires that repair service be performed on Sundays and Holidays observed at the ordering activity location, the Sundays and Holidays repair service rates shall apply. When repair service is requested to be performed during Regular Hours and/or After Hours, but is performed at the convenience of the Contractor on Sundays or Holidays observed at the ordering activity location, the Regular Hours and/or After Hours repair service rates, as applicable, shall apply. Periods of less than one hour will be prorated to the nearest quarter hour.

Repair Service Rates

	Minimum Charge * - Regular Hours	Hourly Rate - After Hours	Hourly Rate - Sunday and Holidays
Contractor/OEM Facility	N/A	N/A	N/A
Ordering Activity Location (Within Established Service Areas)	N/A	N/A	N/A
Ordering Activity Location (Outside Established Service Areas)	N/A	N/A	N/A

*MINIMUM CHARGES INCLUDE FULL N/A HOURS ON THE JOB

- 4) Repair Parts/Spare Parts Rate Provision
- a) All parts, furnished as spares or as repair parts in connection with the repair of equipment, unless otherwise indicated in the GSA Price list shall be new, standard parts manufactured by the OEM.
 - b) All parts shall be furnished at the prices indicated in the Contractor's commercial pricelist dated November 8, 2019, at a discount of 8% from such listed prices.
 - c) REPAIR SERVICE
 - i) All repair work will be guaranteed/warranted for a period of 90 days.
 - d) REPAIR PARTS/SPARE PARTS
 - i) All parts furnished either as spares or repairs parts will be guaranteed/warranted for a period 90 days.

TERMS AND CONDITIONS APPLICABLE TO F04. IT Software Subcategory

Technical Support

Without additional charge to the ordering activity, a hot line technical support number is available at **(800) 633-7248** for the purpose of providing user assistance and guidance in the implementation of the software. The technical support number is available **7:00 am to 7:00 pm CST**.

- i. At the task or delivery order level, provide a telephone number **(800) 633-7248** and hours of operation **7:00 am to 7:00 pm CST** for technical support hotline; indicate applicable time zone for the hours of operation—i.e., Eastern time, Central, Mountain or Pacific time.

Descriptions and Equipment Compatibility

The Contractor shall include, in the schedule pricelist, a complete description of each software product and a list of equipment on which the software can be used. Also, included shall be a brief, introductory explanation of the modules and documentation which are offered.

Right-to-Copy Pricing: Licensee may make one copy of Software to be used solely for archival, backup, or disaster recover purposes; provided that Licensee may not operate that copy of the Software at the same time as the original Software is being operated.

Utilization Limitations

- a) Software acquisition is limited to commercial computer software defined in FAR Part 2.101.
- b) When acquired by the ordering activity, commercial computer software and related documentation shall be subject to the following:
 - i. Title to and ownership of the software and documentation shall remain with the Contractor, unless otherwise specified.
 - ii. Software licenses are by site and by ordering activity. An ordering activity is defined as a cabinet level or independent ordering activity. The software may be used by any subdivision of the ordering activity (service, bureau, division, command, etc.) that has access to the site the software is placed at, even if the subdivision did not participate in the acquisition of the software. Further, the software may be used on a sharing basis where multiple agencies have joint projects that can be satisfied by the use of the software placed at one ordering activity's site. This would allow other agencies access to one ordering activity's database. For ordering activity public domain databases, user agencies and third parties may use the computer program to enter, retrieve, analyze and present data. The user ordering activity will take appropriate action by instruction, agreement, or otherwise, to protect the Contractor's proprietary property with any third parties that are permitted access to the computer programs and documentation in connection with the user ordering activity's permitted use of the computer programs and documentation. For purposes of this section, all such permitted third parties shall be deemed agents of the user ordering activity.
 - iii. Except as provided above, the ordering activity shall not provide or otherwise make available the software or documentation, or any portion thereof, in any form, to any third party without the prior written approval of the Contractor. Third parties do not include prime Contractors, subcontractors and agents of the ordering activity who have the ordering activity's permission to use the licensed software and documentation at the facility, and who have agreed to use the licensed software and documentation only in accordance with these restrictions. This provision does not limit the right of the ordering activity to use software, documentation, or information therein, which the ordering activity may already have or obtains without restrictions.
 - iv. The ordering activity shall have the right to use the software and documentation with the run-time computing environment (e.g. operating system, virtual machine, mobile operating system, processor etc.) to be specifically identified for which it is acquired at any other facility/user device to which that time computing environment may be transferred, or in cases of Disaster

Recovery, the ordering activity has the right to transfer the software to another site/user device if the ordering activity site for which it is acquired is deemed to be unsafe for ordering activity personnel; to use the software and documentation with a backup time computing environment when the primary is inoperative; to copy computer programs for safekeeping (archives) or backup purposes; to transfer a copy of the software to another site/user for purposes of benchmarking new hardware and/or software; and to modify the software and documentation or combine it with other software, provided that the unmodified portions shall remain subject to these restrictions.

- v. "Commercial Computer Software" may be marked with the Contractor's standard commercial restricted rights legend, but the schedule contract and schedule pricelist, including this clause, "Utilization Limitations" are the only governing terms and conditions, and shall take precedence and supersede any different or additional terms and conditions included in the standard commercial legend.
- vi. Licensee Data belongs exclusively to Licensee, regardless of where the Data may reside at any moment in time including, but not limited to Licensor hardware, networks or other infrastructure and facilities where Data may reside, transit through or be stored from time to time. Licensor makes no claim to a right of ownership in Licensee Data. Licensor agrees to keep the Licensee Data Confidential as that term is defined in the relevant FAR and DFARS provisions pertaining to Confidential Information and Confidentiality. Licensor is not permitted to use Licensee's data for a purpose that is not explicitly granted in writing by Licensee. Upon Licensee request, for any reason whatsoever, Licensor must promptly return all Licensee Data in Licensor's possession in a format as may be designated at the time of request by Licensee.
- vii. Licensee may create or hire others (including Licensor) to create modifications, customizations or other enhancements to the Software which might be classified as "Derivative Works" of the software. Unless otherwise negotiated and mutually agreed upon at the order level, the intellectual property (IP) rights to the Derivative Works shall be owned by the owner of the underlying intellectual property. The Derivative Work[s] shall be made available to the Licensee through a royalty free, perpetual worldwide, no charge license to the Licensee.

Specific Instructions for SIN 511210 - Software Licenses

- Hexagon US Federal, Inc is offering SIN 54151 Software Maintenance Services in conjunction with SIN 511210 - Software Licenses.
- Offerors are encouraged to identify within their software items any component interfaces that support open standard interoperability. An item's interface may be identified as interoperable on the basis of participation in a Government agency-sponsored program or in an independent organization program. Interfaces may be identified by reference to an interface registered in the component registry located at <http://www.core.gov>.

Conversion from Term License to Perpetual License

- i. When standard commercial practice offers conversions of term licenses to perpetual licenses, and an ordering activity requests such a conversion, the contractor shall provide the total amount of conversion credits available for the subject software within ten (10) calendar days after placing the order.
- ii. When conversion credits are provided, they shall continue to accrue from one contract period to the next, provided the software has been continually licensed without interruption.
- iii. The term license for each software product shall be discontinued on the day immediately preceding the effective date of conversion from a term license to a perpetual license.
- iv. When conversion from term licenses to perpetual licenses is offered, the price the ordering activity shall pay will be the perpetual license price that prevailed at the time such software was initially ordered under a term license, or the perpetual license price prevailing at the time of conversion from a term license to a perpetual license, whichever is the less, minus an amount equal to a

percentage of all term license payments during the period that the software was under a term license within the ordering activity.

Term License Cessation

- i. After a software product has been on a continuous term license for a period of 240 months, a fully paid-up, non-exclusive, perpetual license for the software product shall automatically accrue to the ordering activity. The period of continuous term license for automatic accrual of a fully paid-up perpetual license does not have to be achieved during a particular fiscal year; it is a written Contractor commitment which continues to be available for software that is initially ordered under this contract, until a fully paid-up perpetual license accrues to the ordering activity. However, should the term license of the software be discontinued before the specified period of the continuous term license has been satisfied, the perpetual license accrual shall be forfeited. Contractors who do not commercially offer conversions of term licenses to perpetual licenses shall indicate that their term licenses are not eligible for conversion at any time.
- ii. Each separately priced software product shall be individually enumerated, if different accrual periods apply for the purpose of perpetual license attainment.
- iii. The Contractor agrees to provide updates and software maintenance services for the software after a perpetual license has accrued, at the prices and terms of SIN 54151 – Software Maintenance Services, if the licensee elects to order such services. Title to the software shall remain with the Contractor.

Utilization Limitations for Perpetual Licenses

- i. Software Asset Identification Tags (SWID) (Option 1 Perpetual License)
 1. Option 1 is applicable when the Offeror agrees to include the International Organization for Standardization/International Electrotechnical Commission 19770-2 (ISO/IEC 19770- 2:2015) standard identification tag (SWID Tag) as an embedded element in the software. An ISO/IEC 19970-2 tag is a discoverable identification element in software that provides licensees enhanced asset visibility. Enhance visibility supports both the goals of better software asset management and license compliance. Offerors may use the National Institute of Standards and Technology (NIST) document “NISTIR 8060: Guidelines for Creation of Interoperable Software Identification (SWID) Tags,” December 2015 to determine if they are in compliance with the ISO/IEC 19770-2 standard.
 2. Section 837 of The Federal Information Technology Acquisition Reform Act (FITARA) of 2014, requires GSA to seek agreements with software vendors that enhance government- wide acquisition, shared use, and dissemination of software, as well as compliance with end user license agreements. The Megabyte Act of 2016 requires agencies to inventory software assets and to make informed decisions prior to new software acquisitions. In June of 2016, the Office of Management and Budget issued guidance on software asset management requiring each CFO Act (Public Law 101-576 – 11/15/1990) agency to begin software inventory management (M-16-12). To support these requirements, Offerors may elect to include the terms of Option 1 and/or Option 2, which support software asset management and government-wide reallocation or transferability of perpetually licensed software.
- ii. Reallocation of Perpetual Software (Option 2 Perpetual License)
 1. The purpose of SIN 511210 OPTION 2 is to allow ordering activities to transfer software assets for a pre-negotiated charge to other ordering activities.

2. When an ordering activity becomes aware that a reusable software asset may be available for transfer, it shall contact the Contractor, identify the software license or licenses in question, and request that these licenses be reallocated or otherwise made available to the new ordering activity.
3. Contractors shall release the original ordering activity from all future obligations under the original license agreement and shall present the new ordering activity with an equivalent license agreement. When the new ordering activity agrees to the license terms, henceforth any subsequent infringement or breach of licensing obligations by the new ordering activity shall be a matter exclusively between the new ordering activity and the Contractor.
4. The original ordering activity shall de-install, and/or make unusable all of the software assets that are to be transferred. It shall have no continuing right to use the software and any usage shall be considered a breach of the Contractor's intellectual property and a matter of dispute between the original ordering activity/original license grantee and the licensor.
5. As a matter of convenience, once the original licenses are deactivated, di-installed, or made otherwise unusable by the original ordering activity or license grantee, the Contractor may elect to issue new licenses to the new ordering activity to replace the old licenses. When new licenses are not issued, the Contractor shall provide technical advice on how best to achieve the functional transfer of the software assets.
6. Software assets that are eligible for transfer that have lapsed Software Maintenance Services (SIN 54151) may require a maintenance reinstatement fee, chargeable to the new ordering activity or license grantee. When such a fee is paid, the new ordering activity shall receive all the rights and benefits of Software Maintenance Services.
7. When software assets are eligible for transfer and are fully covered under pre-paid Software Maintenance Services (SIN 54151), the new ordering activity shall not be required to pay maintenance for those license assets prior to the natural termination of the paid for maintenance period. The rights associated with paid for current Software Maintenance Services shall automatically transfer with the software licenses without fee. When the maintenance period expires, the new ordering activity or license grantee shall have the option to renew maintenance.
8. The administrative fee to support the transfer of licenses, exclusive of any new incremental licensing or maintenance costs shall be TBD percentage (%) of the original license fee. The fee shall be paid only at the time of transfer. In applying the transfer fee, the Software Contractor shall provide transactional data that supports the original costs of the licenses.

Software Conversions

Full monetary credit will be allowed to the ordering activity when conversion from one version of the software to another is made as a result of a change in operating system, or from one computer system to another. Under a perpetual license, the purchase price of the new software shall be reduced by the amount that was paid to purchase the earlier version. Under a term license, if conversion credits had accrued while the earlier version was under a term license, those credits shall carry forward and remain available as conversion credits which may be applied towards the perpetual license price of the new version.

GEO.P.ERDX3529	PRO600 CART	PRO600 CART provides a cost-effective 3D (stereo) vector digitizing and editing capability within the Bentley Microstation, BentleyMap, and BentleyMap Enterprise CAD & GIS products. No IMAGINE Photogrammetry licenses are required to configure a stereo vector collection seat with PRO600 CART since PRO600 CART delivers the stereo interface (formerly LPS Stereo was needed) and a BLK file editing utility to connect the BLK file with external image data (IMAGINE Photogrammetry was formerly used for this task). PRO600 CART also provides cartographic presentation tools including line patterning, polygon hatching, contour annotation and manuscript grid placement.	Each	\$ 5,353.15
GEO.P.ERDX3530	PRO600 DTM	PRO600 DTM is part of the LPS family of photogrammetry products providing a cost-effective 3D (stereo) DTM digitizing and editing capability within the Bentley Microstation, BentleyMap, and	Each	\$ 2,989.42

		BentleyMap Enterprise CAD & GIS products. PRO600 DTM provides a variety of tools that can be combined to create productive workflows for terrain modeling applications. Terrain models can be generated by direct measurement. Existing models may be edited and refined using the vector features as input. PRO600 DTM operates on all terrain file formats supported by LPS.		
GEO.P.GSPX5092	IMAGINE SAR Feature	"IMAGINE SAR Feature provides radar processing that is state-of-the-art in both radar signal processing and computer multi-core, mixed CPU-GPU computation. The result is near real-time noise suppression (Despeckle), Image Annealing, Target Detection, Change Detection and template-based Feature Extraction.	Each	\$ 4,032.24

TERMS AND CONDITIONS APPLICABLE TO F05. IT Solutions Subcategory

Specific Instructions for SIN 541370GEO - Earth Observation Solutions

- a) Offerings shall comply with cited Department of Defense (DoD) standards, Intelligence Community (IC) standards, Open Geospatial Consortium (OGC) standards (<http://www.opengeospatial.org/standards>), and other standards such as <https://nationalmap.gov/standards> as specified by the ordering activity.
- b) Information Assurance/Security Requirements
 - i. Offerors shall meet information assurance and security requirements in accordance with the ordering activity requirements.
 - ii. Offerors shall be capable of meeting at least the minimum-security requirements assigned against a low-impact information system.

Technical Support

Without additional charge to the ordering activity, a hot line technical support number is available at **(800) 633-7248** for the purpose of providing user assistance and guidance in the implementation of the software. The technical support number is available **7:00 am to 7:00 pm CST**.

- i. At the task or delivery order level, provide a telephone number **(800) 633-7248** and hours of operation **7:00 am to 7:00 pm CST** for technical support hotline; indicate applicable time zone for the hours of operation—i.e., Eastern time, Central, Mountain or Pacific time.

***SIN 541370GEO EARTH OBSERVATION SOLUTIONS (EOS)
JOB TITLE DESCRIPTIONS***

Hexagon offers commercial technical services at various level to provide customers the kinds of services required, including appropriate years of experience and education. Technical services may cover a broad range of services in support of our software and hardware solutions, including but not limited to Earth Observation Solutions (EOS), GIS and/or geospatial applications, security, safety and infrastructure solutions, as well as services relating to the lifecycle management of various systems, including maintenance, configuration, logistics and facility management.

Experience and/or education substitutions are applicable to all labor categories as follows:

- Two years of experience is equivalent to an Associate’s degree
- Four years of experience is equivalent to a Bachelor’s degree
- Master’s degree is equivalent to three years of experience (beyond a Bachelor’s degree)
- Doctorate is equivalent of five years of additional experience (beyond a Bachelor’s degree)

The Hexagon descriptions below outline the technical staff that we utilize to deliver a wide range of services in support of our software and hardware products. Hexagon reserves the right to categorize non-technical staff required to support customer requirements within the education and experience levels below, exclusive of technical descriptions.

EOS Technical Services Level 6 TCIGS-TM600

Works as program director or project advisor providing project vision, strategic consulting and program management activities for Earth Observation Solutions (EOS) projects. Applies market and/or domain expertise using extensive expertise to ensure the successful completion of a program or a highly complex problem. Services activities may include defining program requirements, strategic planning, review and oversight of requirements, application and database design, system integration consulting or product design. Works, when needed, to manage the Intergraph and/or development and delivery of large and complex Earth Observation Solutions (EOS) deliverables directly to a client, or in support of a major program. May work as an advisor to management and customers on advanced technical research and applications.

Education/Experience: High School Diploma or GED. Minimum 15 years of Earth Observation Solutions (EOS) experience within the scope of the contract.

EOS Technical Services Level 5 EOS TCIGS-TM502

Works as project manager, or an advisor, providing strategic technical services and project management activities for Earth Observation Solutions (EOS) projects. Will use applicable technical expertise to ensure the successful completion of the project. Activities may include strategic planning, design and delivery of workshops and seminars, requirements definition, application and database design and system integration consulting. Management activities may include defining project requirements and objectives, establishing budgets and schedules, allocating staff and other resources, and managing and overseeing subcontractors. May also work to design comprehensive work plans by employing standard system methodologies, define project deliverables, milestones, and schedules.

Educational/Experience: Requires a Bachelor degree and ten years of Earth Observation Solutions (EOS) experience within the scope of the contract.

EOS Technical Services Level 4 EOS TCIGS-TM403

Provides day-to-day consulting and management of Earth Observation Solutions (EOS) projects under the guidance of senior management. Provides consulting services and design and management support to a variety of Earth Observation Solutions (EOS) projects, including development, database work, configuration management, advanced analytical technical support related to systems maintenance, or system integration. May conduct detailed requirements interviews, document application requirements, analyze and/or assess networks, develop and/or design databases, quality programs, or provide management oversight of these activities. May research new technologies and procedures to enhance production and works to ensure contractual reporting and progress is delivered in accordance to requirements.

Educational/ Experience: Requires a Bachelor degree and ten years of Earth Observation Solutions (EOS) experience within the scope of the contract.

EOS Technical Services Level 3 EOS TCIGS-TM304

Supports the design of technical project specifications for the implementation of technical Earth Observation Solutions (EOS) projects and/or carries out complex assignments requiring the development of new techniques and procedures for Earth Observation Solutions (EOS). Applies knowledge of hardware and/or software engineering principles and practices in the area of system integration. Plans, executes, and controls work tasking by applying comprehensive knowledge of a particular fields of programming or software specialization to the solutions of Earth Observation Solutions (EOS) assignments. Work may involve designing and writing compilers, assemblers, user interfaces, databases, graphics tools, network communications and/or application software. May write or design test plans for certifying software and may test new or revised software. May provide custom training to customer and provide solutions to customer application problems.

Educational/ Experience: Requires a Bachelor degree and seven years of Earth Observation Solutions (EOS) experience within the scope of the contract.

EOS Technical Services Level 2 EOS TCIGS-TM205

Provides technical assistance or consulting services to customer in the resolution of Earth Observation Solutions (EOS) system problems. May design and/or install hardware and software patches, diagnose problems related to same, troubleshoot hardware/firmware problems to the component level, or assist with interfacing equipment and software to company products. May provide direction and guidance to customers during the definition and implementation of company products that requires an in-depth understanding of company products and their operation that may include the design of hardware products. May work collaboratively to develop solutions to customer Earth Observation Solutions (EOS) problems, that could include software coding and writing software documentation. Work may involve analyzing changes to design to determine the effect on the end product design and function, coordinating with customers and subcontractors to determine a process for change reporting, or other configuration management procedures.

Educational/ Experience: Requires a Bachelor degree and three years of Earth Observation Solutions (EOS) experience within the scope of the contract.

EOS Technical Services Level 2 EOS TCIGS-TM206

Work collaboratively with software designers to perform software coding, write software documentation according to design specifications developed by senior technical staff. Normally experienced in the coding of software, the creation of databases, and in software development associated with the Hexagon COTS product offerings. May perform tasks related to logistics, configuration control, quality control, security, compliance testing, hardware subsystems, installation and maintenance of company products, hardware software compatibility, and/or system integration activities. Earth Observation Solutions (EOS) assignments will normally require good judgement and the full use and application of Earth Observation Solutions (EOS) standard practices and procedures in analyzing situations or data from which answers can be readily obtained and applying knowledge to the solution of problems of moderate Earth Observation Solutions (EOS) scope.

Educational/ Experience: Requires a Bachelor degree and three years of Earth Observation Solutions (EOS) experience within the scope of the contract.

EOS Technical Services Level 1 EOS TCIGS-TM107

Provides technical support in the creation of Earth Observation Solutions (EOS) products and solutions. Areas of work may include performing hard copy to digital data conversion tasks, data migration, translation activities, implementation of production tools and work flows in accordance with approved Earth Observation Solutions (EOS) project plans and design parameters, installation at customer site, troubleshooting, and interfacing products. Technical support will vary depending on specific Earth Observation Solutions (EOS) project tasking, but individual is normally responsible for work tasks or assignments in the form of objectives and target dates for completion.

Educational/ Experience: Requires an Associate's degree and two years of Earth Observation Solutions (EOS) experience within the scope of the contract.

EOS Technical Services Level 1 EOS TCIGS-TM108

Provide or assist in providing technical Earth Observation Solutions (EOS) support to Hexagon products and solutions, including writing compiler or basic software execution coding, supporting source documents, data coding, data conversion, data migration, editing, and/or testing. May assist in developing plans for Earth Observation Solutions (EOS) logistics, quality, security, and testing. Works with others to support Earth

Observation Solutions (EOS) customer requirements.

Education/Experience: High School Diploma or GED. Minimum 1 year of Earth Observation Solutions (EOS) experience within the scope of the contract.

EOS Technical Services Level 1 EOS TCIGS-TM109

Under general supervision will provide basic reviews, analysis, and support to Hexagon offered Earth Observation Solutions (EOS) products and solutions, including security declassification work, logistics, maintenance practices, provisioning, property management, and software products. Expected to demonstrate knowledge of COTS solutions and function within a team.

Education/Experience: High School Diploma or GED. Minimum 1 year of Earth Observation Solutions (EOS) experience within the scope of the contract.

EOS Services Level 1 EOS TCIGS-TM110

Under close supervision, provide basic reviews, analysis, and support to Hexagon offered Earth Observation Solutions (EOS) products and solutions, including security declassification, logistics, maintenance practices, provisioning, property management, and COTS software products. Under supervision will prepare documents, review coding and data, test products and solutions. This category may include interns.

Education/Experience: High School Diploma or GED. Minimum 0 years of Earth Observation Solutions (EOS) experience within the scope of the contract.

EOS Services Level 1 EOS TCIGS-TM111

Under direct supervision, provide basic reviews, analysis, and support to Hexagon offered Earth Observation Solutions (EOS) products and solutions, including security declassification, logistics, maintenance practices, provisioning, property management, and COTS software products. Under supervision will prepare documents, review coding and data, test products and solutions. This category may include interns.

Education/Experience: High School Diploma or GED. Minimum 0 years of Earth Observation Solutions (EOS) experience within the scope of the contract.

TERMS AND CONDITIONS APPLICABLE TO F06. IT Training Subcategory

Specific Instructions for SIN 611420 - Computer Training

Cancellation and Rescheduling

- i. The ordering activity will notify the Contractor at least seventy-two (72) hours before the scheduled training date, if a student will be unable to attend. The Contractor will then permit the ordering activity to either cancel the order or reschedule the training at no additional charge. In the event the training class is rescheduled, the ordering activity will modify its original training order to specify the time and date of the rescheduled training class.
- ii. In the event the ordering activity fails to cancel or reschedule a training course within the time frame specified above, the ordering activity will be liable for the contracted dollar amount of the training course. The Contractor agrees to permit the ordering activity to reschedule a student who fails to attend a training class within ninety (90) days from the original course date, at no additional charge.
- iii. The ordering activity reserves the right to substitute one student for another up to the first day of class.
- iv. In the event the Contractor is unable to conduct training on the date agreed to by the Contractor and the ordering activity, the Contractor must notify the ordering activity at least seventy-two (72) hours before the scheduled training date.

Follow-Up Support

The Contractor agrees to provide each student with unlimited telephone support or online support for a period of one (1) year from the completion of the training course. During this period, the student may contact the Contractor's instructors for refresher assistance and answers to related course curriculum questions.

Format and Content of Training

- i. Offerors shall provide written materials (i.e., manuals, handbooks, texts, etc.) normally provided with course offerings, printed and copied two-sided on paper containing 30% postconsumer materials (fiber). Such documentation will become the property of the student upon completion of the training class.
- ii. If applicable, for hands-on training courses, there must be a one-to-one assignment of IT equipment to students.
- iii. Offerors shall provide each student with a Certificate of Training at the completion of each training course.
- iv. Offerors shall provide the following information for each training course offered:
 - a) course title,
 - b) a brief description of the course content, to include the course format (e.g., lecture, discussion, hands-on training);
 - c) length of the course;
 - d) mandatory and desirable prerequisites for student enrollment;
 - e) minimum and maximum number of students per class;
 - f) locations where the course is offered;
 - g) class schedules; and

- h) price (per student, per class (if applicable)).
- v. For courses conducted at the ordering activity’s location, instructor travel charges (if applicable), including mileage and daily living expenses (e.g., per diem charges) are governed by Pub. L. 99-234 and FAR Part 31.205-46, and are reimbursable by the ordering activity on orders placed under the Multiple Award Schedule, as applicable, in effect on the date(s) the travel is performed. The Industrial Funding Fee does NOT apply to travel and per diem charges.
- vi. For Online Training Courses, a copy of all training material must be available for electronic download by the students.

“No Charge” Training - Not Applicable

Hexagon reserves the right to categorize non-technical staff required to support customer requirements within the education and experience levels below, exclusive of technical descriptions.

Technical Services Level 6 TCIGS-TM600

Works as program director or project advisor providing project vision, strategic consulting and program management activities for Information Technology projects. Applies market and/or domain expertise using extensive expertise to ensure the successful completion of a program or a highly complex problem. Services activities may include defining program requirements, strategic planning, review and oversight of requirements, application and database design, system integration consulting or product design. Works, when needed, to manage the Intergraph and/or development and delivery of large and complex deliverables directly to a client, or in support of a major program. May work as an advisor to management and customers on advanced technical research and applications.

Education/Experience: High School Diploma or GED. Minimum 15 years of experience.

Technical Services TCIGS-TM502

Works as project manager, or an advisor, providing strategic technical services and project management activities for Information Technology projects. Will use applicable technical expertise to ensure the successful completion of the project. Activities may include strategic planning, design and delivery of workshops and seminars, requirements definition, application and database design and system integration consulting. Management activities may include defining project requirements and objectives, establishing budgets and schedules, allocating staff and other resources, and managing and overseeing subcontractors. May also work to design comprehensive work plans by employing standard system methodologies, define project deliverables, milestones, and schedules.

Educational/Experience: Requires a Bachelor degree and ten years of experience or the combined equivalent.

Technical Services TCIGS-TM403

Provides day-to-day consulting and management of projects under the guidance of senior management. Provides consulting services and design and management support to a variety of projects, including development, database work, configuration management, advanced analytical technical support related to systems maintenance, or

system integration. May conduct detailed requirements interviews, document application requirements, analyze and/or assess networks, develop and/or design databases, quality programs, or provide management oversight of these activities. May research new technologies and procedures to enhance production and works to ensure contractual reporting and progress is delivered in accordance to requirements.

Educational/Experience: Requires a Bachelor degree and ten years of experience, or the combined equivalent.

Technical Services TCIGS-TM304

Supports the design of technical project specifications for the implementation of technical projects and/or carries out complex assignments requiring the development of new techniques and procedure. Applies knowledge of hardware and/or software engineering principles and practices in the area of system integration. Plans, executes, and controls work tasking by applying comprehensive knowledge of a particular fields of programming or software specialization to the solutions of assignments. Work may involve designing and writing compilers, assemblers, user interfaces, databases, graphics tools, network communications and/or application software. May write or design test plans for certifying software and may test new or revised software. May provide custom training to customer and provide solutions to customer application problems.

Educational/Experience: Requires a Bachelor degree and seven years of experience, or the combined equivalent.

Technical Services TCIGS-TM205

Provides technical assistance or consulting services to customer in the resolution of system problems. May design and/or install hardware and software patches, diagnose problems related to same, troubleshoot hardware/firmware problems to the component level, or assist with interfacing equipment and software to company products. May provide direction and guidance to customers during the definition and implementation of company products that requires an in-depth understanding of company products and their operation that may include the design of hardware products. May work collaboratively to develop solutions to customer problems that could include software coding and writing software documentation. Work may involve analyzing changes to design to determine the effect on the end product design and function, coordinating with customers and subcontractors to determine a process for change reporting, or other configuration management procedures.

Educational/Experience: Requires a Bachelor degree and three years of experience, or the combined equivalent.

Technical Services TCIGS-TM206

Work collaboratively with software designers to perform software coding, write software documentation according to design specifications developed by senior technical staff. Normally experienced in the coding of software, the creation of databases, and in software development associated with the Hexagon COTS product offerings. May perform tasks related to logistics, configuration control, quality control, security, compliance testing, hardware subsystems, installation and maintenance of company products, hardware software compatibility, and/or system integration activities. Assignments will normally require good judgement and the full use and application of standard practices and procedures in analyzing situations or data from which answers can be readily obtained and applying knowledge to the solution of problems of moderate scope.

Educational/Experience: Requires a Bachelor degree and three years of experience, or the combined equivalent.

Technical Services TCIGS-TM107

Provides technical support in the creation of products and solutions. Areas of work may include performing hard copy to digital data conversion tasks, data migration, translation activities, implementation of production tools and workflows in accordance with approved project plans and design parameters, installation at customer site, troubleshooting, and interfacing products. Technical support will vary depending on specific project tasking, but individual is normally responsible for work tasks or assignments in the form of objectives and target dates for completion.

Education/Experience: Requires an Associate's degree and two years of experience, or the combined equivalent.

Technical Services TCIGS-TM108

Provide or assist in providing technical support to Hexagon products and solutions, including writing compiler or basic software execution coding, supporting source documents, data coding, data conversion, data migration, editing, and/or testing. May assist in developing plans for logistics, quality, security, and testing. Works with others to support customer requirements.

Education/Experience: High School Diploma or GED. Minimum 1 year of experience.

Technical Services TCIGS-TM109

Under general supervision will provide basic reviews, analysis, and support to Hexagon offered products and solutions, including security declassification work, logistics, maintenance practices, provisioning, property management, and software products. Expected to demonstrate knowledge of COTS solutions and function within a team.

Education/Experience: High School Diploma or GED. Minimum 1 year of experience.

Technical Services TCIGS-TM110

Under close supervision, provide basic reviews, analysis, and support to Hexagon offered products and solutions, including security declassification, logistics, maintenance practices, provisioning, property management, and COTS software products. Under supervision will prepare documents, review coding and data, test products and solutions. This category may include interns.

Education/Experience: High School Diploma or GED

Technical Services TCIGS-TM111

Under direct supervision, provide basic reviews, analysis, and support to Hexagon offered products and solutions, including security declassification, logistics, maintenance practices, provisioning, property management, and COTS software products. Under supervision will prepare documents, review coding and data, test products and solutions. This category may include interns.

Education/Experience: High School Diploma or GED

SIN ANCILLARY - Ancillary Supplies and Services

The work performed under this SIN shall be associated with existing SIN(s) under the contract. Ancillary supplies and/or services shall not be the primary purpose of the work ordered but be an integral part of the total solution offered. Ancillary supplies and/or services may only be ordered in conjunction with or in support of supplies or services purchased under another SIN(s). Offerors may be required to provide additional information to support a determination that their proposed ancillary supplies and/or services are commercially offered in support of one or more SIN(s).

Service Description	MINIMUM EDUCATION/ CERTIFICATION LEVEL	MINIMUM YEARS OF EXPERIENCE	GSA PRICE
Data Migration - Customer Site - 1 Wk (IGS.S.IGS9052)	High School	1	\$11,964.74
Data Migration - Customer Site - Additional Day (IGS.S.IGS9053)	High School	1	\$2,392.95
Specialized Services (Requirements/Workflow/Server Config) (IGS.S.IGS9054)	High School	1	\$11,964.74
Specialized Services - Customer Site - Additional Day (IGS.S.IGS9055)	High School	1	\$2,392.95
Day Rates (IGS.S.IGS9235) - Hexagon Day Rates are used for the following types of, but not limited to, support services: installation, training, software customization, system integration and implementation, and consulting. Personnel perform services based on customer input and ensure the work is provided according to contract requirements.	High School	1	\$1,531.49

SERVICE CONTRACT LABOR STANDARDS (SCLS)

The Service Contract Labor Standards (SCLS), formerly the Service Contract Act (SCA), is applicable to this contract as it applies to the entire Professional Services Schedule (PSS) Schedule and all services provided. While no specific labor categories have been identified as being subject to SCLS/SCA due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CRF 541.300), this contract still maintains the provisions and protections for SCLS/SCA eligible labor categories. If and / or when the contractor adds SCLS/SCA labor categories / employees to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCLS/SCA matrix identifying the GSA labor category titles, the occupational code, SCA labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.
