1b. Identification of the lowest priced model number and lowest unit price for that model for each special item number awarded in the contract. This price is the Government price based on a unit of one, exclusive of any quantity/dollar volume, prompt payment, or any other concession affecting price. Those contracts that have unit prices based on the geographic location of the customer, should show the range of the lowest price, and cite the areas to which the prices apply. Not Applicable.

1c. If the Contractor is proposing hourly rates a description of all corresponding commercial job titles, experience, functional responsibility and education for those types of employees or subcontractors who will perform services shall be provided. If hourly rates are not applicable, indicate “Not applicable” for this item. See attached pricelist.

2. Maximum Order: $1,000,000 (SIN54151S/54151HEAL/611420), $500,000 (SIN541611), $250,000 (SIN339113PA)

3. Minimum Order: $100.00

4. Geographic Coverage (delivery Area): Worldwide

5. Point(s) of production (city, county, and state or foreign country): Same as company address.

6. Discount from list prices or statement of net price: Government net prices (discounts already deducted).

7. Quantity discounts: .5% over $350,000

8. Prompt payment terms: Net 30 days. Information for Ordering Offices: Prompt payment terms cannot be negotiated out of the contractual agreement in exchange for other concessions.

9. Foreign items (list items by country of origin): None

10a. Time of Delivery (Contractor insert number of days): Specified on the Task Order.

10b. Expedited Delivery: Contact Contractor.
10c. Overnight and 2-day delivery: Contact Contractor.

10d. Urgent Requirements: Contact Contractor.

11. F.O.B Points(s): Destination.

12a. Ordering Address(es): Same as Contractor.

12b. Ordering procedures: For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPA’s), are found in Federal Acquisition Regulation (FAR) 8.405-3.

13. Payment address(es): Same as company address.

14. Warranty provision: Contractor’s standard commercial warranty.

15. Export Packing Charges (if applicable): N/A

16. Terms and conditions of rental, maintenance, and repair (if applicable): N/A

17. Terms and conditions of installation (if applicable): N/A

18a. Terms and conditions of repair parts indicating date of parts price lists and any discounts from list prices (if applicable): N/A

18b. Terms and conditions for any other services (if applicable): N/A

19. List of service and distribution points (if applicable): N/A

20. List of participating dealers (if applicable): N/A

21. Preventive maintenance (if applicable): N/A

22a. Environmental attributes, e.g., recycled content, energy efficiency, and/or reduced pollutants: N/A

22b. If applicable, indicate that Section 508 compliance information is available on Electronic and Information Technology (EIT) supplies and services and show where full details can be found (e.g. contractor’s website or other location.) The EIT standards can be found at: www.Section508.gov/. N/A

23. Unique Entity Identification (UEIN) number: SN5KHDCRNDM5

24. Notification regarding registration in System for Award Management (SAM) database: Registered

Final Pricing: The rates shown below include the Industrial Funding Fee (IFF) of 0.75%.

LCAT/Service Descriptions
Substitutions and Equivalency Tables
Premier Enterprise Solutions, LLC recognizes that successful performance depends on having personnel with the right skills and experience. These skills are acquired through a proper mix of education and professional experience. Therefore, we have incorporated substitution allowances between equivalent education and experience in order to provide the quality of services required by the customer.

Educational Equivalence:
The following educational equivalence applies, unless stated otherwise explicitly:
Bachelor’s Degree is considered equivalent to an Associate’s Degree + two (2) years relevant experience or 4 years of relevant experience.

Information Technology Professional Consulting Services
Business Process Analyst II
Functional Responsibility: Requires specialized subject matter expertise in Business Process Management (BPM) systems and related system software. Knowledge is applied to research and evaluation significant impact or consequence involving the development of new policies, processes, procedures, and services. Supports senior analysts and programmers in gathering and managing system requirements, documenting functional and non-functional requirements, and executing functional testing.
Minimum Education: Bachelor’s Degree
Minimum Experience: Two years of relevant experience.

Business Process Analyst III
Functional Responsibility: Requires specialized subject matter expertise in Business Process Management (BPM) systems and related system software. Knowledge is applied to research and evaluation significant impact or consequence involving highly specialized and technical areas impacting recommendations and development of new policies, processes, procedures, and services. Serves as a trusted advisor to the customer in gathering and prioritizing system requirements as well as implementation tasks.
Minimum Education: Bachelor’s Degree
Minimum Experience: Four years of relevant experience.
Financial Analyst II
**Functional Responsibility:** Manage a large task order or a group of task orders under a project. Assist the Program Manager in working with the Government Contracting Officer, the contract-level Contracting Officer’s Representative, the task order-level government management personnel and customer agency representatives.
**Minimum Education:** Bachelor’s Degree
**Minimum Experience:** Four years of relevant experience.

Project Manager I
**Functional Responsibility:** Directs the planning and management of single or multiple projects and retains overall responsibility for the performance including the cost, schedule, deliverables, and contract compliance. Responsible for overall success of the project(s) and ensures goals and standards are successfully implemented. Serves as liaison to government and outside representatives and coordinates activities of support personnel.
**Minimum Education:** Bachelor’s degree.
**Minimum Experience:** Two years of relevant experience.

Project Manager II
**Functional Responsibility:** Broad breadth of experience and capabilities, and ability to work proficiently and competently on a wide range of work. Demonstrated ability to perform technical tasks such as calculations, layouts, data evaluations, and design or technical report preparation. Demonstrated ability to successfully manage projects including supervision and oversight of project teams working on specific project elements.
**Minimum Education:** Bachelor’s degree.
**Minimum Experience:** Four years of relevant experience.

Security Specialist I
**Functional Responsibility:** Provide general Information Assurance support including assistance in the Certification and Accreditation Process. Develop C&A test activities and develop, maintain and administer security tests and evaluations (ST&E’s). Develop and performs technical vulnerability tests. Conduct penetration tests.
**Minimum Education:** Bachelor’s Degree
**Minimum Experience:** Two years of relevant experience.

Software Developer I
**Functional Responsibility:** Code and document simple applications and modules based on component design in the user interface, business logic and/or data access layers of the system. Work with senior developers to develop artifacts that meet the quality standards established for the project. Unit test the work after development and integrate with other components in the system. Troubleshoot, fix bugs and improve the functionality of existing software to help clients prepare for future releases. Adhere to the Standard Expectations for Software Engineering Positions.
**Minimum Education:** Bachelor’s Degree
**Minimum Experience:** Two years of relevant experience.
Software Developer II

**Functional Responsibility:** Code and document moderately complex and/or complex modules based on component design in the user interface, business logic and/or data access layers of the system. Own and develop artifacts in the Fabrication phase of the project. Develop artifacts that meet the quality standards established for the project. Unit test the work after development and integrate with other components in the system. Troubleshoot, fix bugs and improve the functionality of existing software to help clients prepare for future releases. Adhere to the Standard Expectations for Software Engineering Positions.

**Minimum Education:** Bachelor’s Degree

**Minimum Experience:** Four years of relevant experience.

Systems Analyst III

**Functional Responsibility:** Consult with managers to determine the role of the IT system in an organization. Research emerging technologies to decide if installing them can increase the organization’s efficiency and effectiveness. Prepare an analysis of costs and benefits so that management can decide if information systems and computing infrastructure upgrades are financially worthwhile. Devise ways to add new functionality to existing computer systems. Design and develop new systems by choosing and configuring hardware and software. Oversee the installation and configuration of new systems to customize them for the organization. Conduct testing to ensure that the systems work as expected.

**Minimum Education:** Bachelor’s Degree

**Minimum Experience:** Four years of directly related experience.

Systems Engineer I

**Functional Responsibility:** Defines and executes systems engineering activities within a project. These activities may consist of systems planning, information security planning, performance management, capacity planning, testing and validation, risk assessment, benchmarking, information engineering, and development and staffing of a systems engineering plan. Integrate systems, network and help desk tools into an integrated IT solution.

**Minimum Education:** Bachelor’s Degree

**Minimum Experience:** Four years of relevant experience.

Systems Engineer II

**Functional Responsibility:** Defines and executes systems engineering activities within a project. These activities may consist of systems planning, information security planning, performance management, capacity planning, testing and validation, risk assessment, benchmarking, information engineering, and development and staffing of a systems engineering plan. Integrate systems, network and help desk tools into an integrated IT solution. Provide hard/software tool selection analysis and recommendation. Provide technical direction to IT support staff. Design and implement security systems and redundant backups.

**Minimum Education:** Bachelor’s Degree

**Minimum Experience:** Six years of directly related experience.
Health Information Technology Professional Consulting Services

Health IT Business Process Analyst II

**Functional Responsibility:** Requires specialized subject matter expertise in Business Process Management (BPM) systems and related health IT system software. Knowledge is applied to research and evaluation significant impact or consequence involving the development of new Health IT policies, processes, procedures, and services. Supports senior analysts and programmers in gathering and managing system requirements, documenting functional and non-functional requirements, and executing functional testing.

**Minimum Education:** Bachelor’s Degree

**Minimum Experience:** Four years of relevant experience.

Health IT Project Manager I

Functional Responsibility: Directs the planning and management of single or multiple Health IT projects and retains overall responsibility for the performance including the cost, schedule, deliverables, and contract compliance. Responsible for overall success of the Health IT project(s) and ensures goals and standards are successfully implemented. Serves as liaison to government and outside representatives and coordinates activities of support personnel.

**Minimum Education:** Bachelor’s degree.

**Minimum Experience:** Two years of relevant experience.

Health IT Project Manager II

**Functional Responsibility:** Broad breadth of experience and capabilities, and ability to work proficiently and competently on a wide range of Health IT work. Demonstrated ability to perform technical tasks such as calculations, layouts, data evaluations, and design or technical report preparation. Demonstrated ability to successfully manage Health IT projects including supervision and oversight of project teams working on specific project elements.

**Minimum Education:** Bachelor’s degree.

**Minimum Experience:** Four years of relevant experience.

Health IT Security Specialist I

**Functional Responsibility:** Provide general Information Assurance support including assistance in the Certification and Accreditation Process for all Health IT related projects. Develop C&A test activities and develop, maintain and administer security tests and evaluations (ST&E’s). Develop and performs technical vulnerability tests. Conduct penetration tests.

**Minimum Education:** Bachelor’s Degree

**Minimum Experience:** Two years of relevant experience.

Health IT Software Developer I

**Functional Responsibility:** Code and document simple Health IT applications and modules based on component design in the user interface, business logic and/or data access layers of all Health IT systems. Work with senior developers to develop artifacts that meet the quality standards established for the project. Unit test the work after development and integrate with other components in the system. Troubleshoot, fix bugs and improve the functionality of existing software to help clients prepare for future releases. Adhere to the Standard Expectations for Software Engineering Positions.

**Minimum Education:** Bachelor’s Degree

**Minimum Experience:** Two years of relevant experience.
**Health IT Software Developer II**

**Functional Responsibility:** Code and document moderately complex and/or complex modules based on component design in the user interface, business logic and/or data access layers of all Health IT systems. Own and develop artifacts in the Fabrication phase of the project. Develop artifacts that meet the quality standards established for the project. Unit test the work after development and integrate with other components in the system. Troubleshoot, fix bugs and improve the functionality of existing Health IT software to help clients prepare for future releases. Adhere to the Standard Expectations for Software Engineering Positions.

**Minimum Education:** Bachelor’s Degree  
**Minimum Experience:** Four years of relevant experience.

**Health IT Systems Analyst III**

**Functional Responsibility:** Consult with managers to determine the role of the Health IT system in an organization. Research emerging technologies to decide if installing them can increase the organization’s efficiency and effectiveness. Prepare an analysis of costs and benefits so that management can decide if Health information systems and computing infrastructure upgrades are financially worthwhile. Devise ways to add new functionality to existing computer systems. Design and develop new systems by choosing and configuring hardware and software. Oversee the installation and configuration of new Health IT systems to customize them for the organization. Conduct testing to ensure that the systems work as expected.

**Minimum Education:** Bachelor’s Degree  
**Minimum Experience:** Four years of directly related experience.

**Health IT Systems Engineer I**

**Functional Responsibility:** Defines and executes systems engineering activities within a project. These activities may consist of Health IT systems planning, information security planning, performance management, capacity planning, testing and validation, risk assessment, benchmarking, information engineering, and development and staffing of a systems engineering plan. Integrate systems, network and help desk tools into an integrated Health IT solution.

**Minimum Education:** Bachelor’s Degree

**Health IT Systems Engineer II**

**Functional Responsibility:** Defines and executes systems engineering activities within a project. These activities may consist of Health IT systems planning, information security planning, performance management, capacity planning, testing and validation, risk assessment, benchmarking, information engineering, and development and staffing of a systems engineering plan. Integrate systems, network and help desk tools into an integrated Health IT solution. Provide hard/software tool selection analysis and recommendation. Provide technical direction to IT support staff. Design and implement security systems and redundant backups.

**Minimum Education:** Bachelor’s Degree  
**Minimum Experience:** Six years of directly related experience.
Management and Financial Consulting, Acquisition and Grants Management Support, and Business Program and Project Management Services

Analyst II

**Functional Responsibility:** Possesses and applies analytical, data gathering, and problem-solving skills necessary for quickly developing recommendations based on the quantitative and qualitative evidence moderately complex programmatic, technological, or program management systems or processes. Facilitates project execution and various forms of oral and written communication of findings.

**Minimum Education:** Bachelor’s degree.

**Minimum Experience:** Four years of relevant experience.

Analyst III

**Functional Responsibility:** Possesses and applies analytical, data gathering, and problem-solving skills necessary for quickly developing recommendations based on the quantitative and qualitative evidence moderately complex programmatic, technological, or program management systems or processes. Facilitates project execution and various forms of oral and written communication of findings at all levels of a given organization.

**Minimum Education:** Bachelor’s degree.

**Minimum Experience:** Six years of relevant experience.

Consultant

**Functional Responsibility:** Expert possessing demonstrated knowledge and experience in the development of innovative and creative recommendations and solutions to address complex management and organizational problems across a wide variety of client environments and settings. Conversant in and adept at deploying primary management and organizational tools and techniques to address organizational deficit and maximize organizational productivity and profitability. Adept at maintaining highly effective working relationships with organizational client representatives.

**Minimum Education:** Bachelor’s degree.

**Minimum Experience:** Four years of relevant experience.

Program Manager I

**Functional Responsibility:** Oversees all program and project operations. Develop processes and methodologies to achieve program goals. Ensures program deliverables maintain quality standards and project requirements. Monitor and maintain budget, schedule and expenses. Review project proposal or plan to determine time frame, procedures for accomplishing, and allotment of available resources to various phases of project; reports findings to leadership. Coordinate activities required to ensure the program is within scope, on schedule, and within budget.

**Minimum Education:** Bachelor’s degree.

**Minimum Experience:** Four years of relevant experience.

Program Manager II

**Functional Responsibility:** Oversees all program operations and develop processes and methodologies to achieve program goals. Ensures program deliverables maintain quality standards and project requirements. Monitor and maintain budget, schedule and expenses. Review project proposal or plan to determine time frame, procedures for accomplishing, and allotment of available resources to various phases of project; reports findings to leadership. Coordinate activities required to ensure the program is within scope, on schedule, and within budget. Ability to perform enterprise, organizational or agency-
wide program management.

Minimum Education: Bachelor’s degree.
Minimum Experience: Six years of relevant experience.

Sr Consultant

Functional Responsibility: Senior level expert possessing demonstrated knowledge and extensive experience in the development of innovative and creative recommendations and solutions to address complex management and organizational problems across a wide variety of client environments and settings. Highly conversant in and adept at deploying primary management and organizational tools and techniques to address organizational deficit and maximize organizational productivity and profitability (e.g., organizational assessment, strategic planning, leadership development, etc.). Readily able to effectively generate and execute detailed consulting project plans and schedules. Adept at engendering and maintaining highly effective working relationships with executive level personnel. Able to track, monitor, and manage other consulting personnel.

Minimum Education: Bachelor’s degree.
Minimum Experience: Six years of relevant experience.

Sr Research Analyst

Functional Responsibility: Gathers information from organization, defines work problems, and designs programs tools, and procedures to resolve problems. Researches, collects and collates data. Assists with compiling data and prepares inputs for larger reports. May provide recommendations for improvements of modifications. Assists with writing specifications manuals and documentation for organizational personnel.

Minimum Education: Bachelor’s degree.
Minimum Experience: Six years of relevant experience.

Premier Training Courses

Course Name: Mobile Device Investigations Series 101
Course Description: This course is designed to teach investigative methodologies and techniques involving mobile devices. It will cover the forensics analysis for mobile devices such as tablets and, cell phones. Students will gain an understanding of cell technologies, learn how to locate and track the histories on mobile devices, gain knowledge of the mobile device file systems, legal issues to be aware of regarding mobile device evidence and the tools required to perform analysis on a mobile device. This course is conducted over five business days and utilizes practical and theoretical teaching techniques.

Prerequisites: None
Location: On/Off Site
Minimum Participants: 1
Maximum Participants: 30

Course Name: Network Investigation Training Series 101
Course Description: This course will provide Students with the information necessary to investigate and mitigate network incidents. Students will gain hands-on experience with basic networking fundamentals, legal issues, and search and seizure. Students will learn how to perform investigations using the basic architecture of a network, anticipate key crimes and understand the appropriate tools needed to perform network discoveries. The course is conducted over five business days and utilizes practical and theoretical teaching techniques.

Prerequisites: Familiarity with computers and networks.
Course Name: Computer Forensics Litigation
Course Description: This course is designed to provide students with the information necessary to gain insight into examining and understanding digital evidence. It will provide insight into handling criminal cases with digital evidence, recent legal precedents affecting evidence presentation and other legal challenges. Students will learn the various techniques and methodologies used by examiners to review and diagnose the underlying technologies. The course will provide basic instructions on the components of computer systems and how they operate. This course is conducted over five days and provides practical exercises and instructor led discussions that will assist in the preparation of criminal cases involving digital forensics.
Prerequisites: None
Location: On/Off Site
Minimum Participants: 1
Maximum Participants: 30

Course Name: Introduction to Mobile Device Examination
Course Description: This course provides practical exercises to teach methodologies and techniques used during investigations involving digital evidence of mobile devices with traditional investigative techniques. Students will gain experience uncovering digital evidence contained in a wide array of mobile phones and devices and learn how to use forensics analysis tools, understand the legal issues and how to generate reports for law enforcement. This course is conducted over five days and provides hands-on experience with mobile devices.
Prerequisites: Familiarity with computers and networks.
Location: On/Off Site
Minimum Participants: 1
Maximum Participants: 30

Course Name: Network Intrusion and Incident Mitigation
Course Description: This course will provide students with the insight and knowledge needed to respond to network intrusions and incidents. Training focuses on how to effectively respond to a network incident including mitigation of the problem, data collection, and how to investigate for a potential crime. Students will learn about basic system components, networking hardware and the types of network topology and connectivity. The training will include a review of tools needed to perform forensics on the information and how network intrusions should be reported. This course is conducted over fifteen days and instructs students on methodologies and techniques used while performing network investigations.
Prerequisites: Network Investigation Training Series 101 or equivalent.
Location: On/Off Site
Minimum Participants: 1
Maximum Participants: 16
