1b.) Identification of the lowest priced model number and lowest unit price for that model for each special item number awarded in the contract. This price is the Government price based on a unit of one, exclusive of any quantity/dollar volume, prompt payment, or any other concession affecting price. Those contracts that have unit prices based on the geographic location of the customer, should show the range of the lowest price, and cite the areas to which the prices apply.

Special Item Number 54151S Information Technology Professional Services
Labor Category Title Developer (Level 1) Rate $129.76

1c. If the Contractor is proposing hourly rates, a description of all corresponding commercial job titles, experience, functional responsibility and education for those types of employees or subcontractors who will perform services shall be provided. If hourly rates are not applicable, indicate “Not applicable” for this item. Please see “Labor Category Descriptions”.

2. Maximum order.

3. Minimum order.
$100

4. Geographic coverage (delivery area).
Domestic delivery is delivery within the 48 contiguous states, Alaska, Hawaii, Puerto Rico, Washington, DC, and U.S. Territories. Domestic delivery also includes a port or consolidation point, within the aforementioned areas, for orders received from overseas activities.

5. Point(s) of production (city, county, and State or foreign country).
Clarksville, MD

6. Discount from list prices or statement of net price. 
   **Prices awarded under this contract are net and all discounts deducted, and valid for all areas including worldwide.**

7. Quantity discounts. 
   None

8. Prompt payment terms. 
   **0% net 30 days**

9. Foreign items (list items by country of origin). 
   **Not Applicable**

10a. Time of delivery. (Contractor insert number of days.) 
   **To be determined by Capitis Solutions, Inc. & the ordering agency**

10b. Expedited Delivery. The Contractor will insert the sentence “Items available for expedited delivery are noted in this price list.” under this heading. The Contractor may use a symbol of its choosing to highlight items in its price lists that have expedited delivery. 
   **To be determined by Capitis Solutions, Inc. & the ordering agency**

10c. Overnight and 2-day delivery. The Contractor will indicate whether overnight and 2-day delivery are available. Also, the Contractor will indicate that the schedule customer may contact the Contractor for rates for overnight and 2-day delivery. 
   **Please contact Capitis Solutions, Inc.**

10d. Urgent Requirements. The Contractor will note in its price list the “Urgent Requirements” clause of its contract and advise agencies that they can also contact the Contractor’s representative to effect a faster delivery. 
   **Please contact Capitis Solutions, Inc.**

11. F.O.B. point(s). 
   **Destination**

12a. Ordering address(es).

14. Warranty provision.
Not Applicable

15. Export packing charges, if applicable.
Not Applicable

16. Terms and conditions of rental, maintenance, and repair (if applicable).
Not Applicable

17. Terms and conditions of installation (if applicable).
Not Applicable

18a. Terms and conditions of repair parts indicating date of parts price lists and any
discounts from list prices (if applicable).
Not Applicable

18b. Terms and conditions for any other services (if applicable).
Not Applicable

19. List of service and distribution points (if applicable).
Not Applicable

20. List of participating dealers (if applicable).
Not Applicable

21. Preventive maintenance (if applicable).
Not Applicable

22a. Special attributes such as environmental attributes (e.g., recycled content, energy
efficiency, and/or reduced pollutants).
Not Applicable

22b. If applicable, indicate that Section 508 compliance information is available on
Electronic and Information Technology (EIT) supplies and services and show where full
details can be found (e.g. contractor’s website or other location.) The EIT standards can
be found at: www.Section508.gov/.
Not Applicable

23. Unique Entity Identifier (UEI) number: GAKKSQKE2ZT8
24. Notification regarding registration in the System for Award Management (SAM) database.
Capitis Solutions, Inc. has an active registration on the System for Award Management (SAM) database.
LABOR CATEGORY DESCRIPTIONS

**Project Executive**

**Functional Responsibility:** Project Executive is accountable for program deliverables in terms of completeness, quality and timely completion of those activities across multiple projects which support interim and final program deliverables. Contributes personal content and experience throughout the project. Is expected to attend and participate in client meetings to provide and present project updates and address any issues which may arise. Is expected to have a full understanding of all projects associated with the assigned engagement. Typically manages multiple Project Managers. Must be able to demonstrate the ability in managing projects that are similar in scope and complexity to the project requirement.

**Minimum Years of Experience:** Must have 10-15 years of progressive Business Management and improvement experience as well as 8-10 years of project management experience.

**Minimum Years of Education:** Must have a Bachelor’s degree.

**Certifications, if any:** None

**Senior Project Manager**

**Functional Responsibility:** Responsible for managing a specific stream of work, including managing deliverables and client expectations for that stream. Works closely with the Project Executive to assure work streams are coordinated into the final client deliverables ensuring timely completion and quality of those deliverables. Will participate in the preparation and presentation of project progress and issues which may arise for their specific project stream. Works closely with the appropriate Consultants and Senior Consultants to ensure the management of those activities which support the timely and quality completion for both interim and final deliverables. Must be able to demonstrate the ability in managing projects similar in scope and complexity to the project requirement. Also must be able to demonstrate ability to identify and deliver project goals on time while meeting client expectations.

**Minimum Years of Experience:** Must have six to ten years of contracting experience as well as 4-8 years of project management experience.

**Minimum Years of Education:** Must have a Bachelor’s degree.

**Certifications, if any:** None

**Lead Architect**

**Functional Responsibility:** Oversee team of architects and their efforts to assess and document current and target state high level existing processes and functional needs across the enterprise. Work with the customers and other enterprise architects to formulate policies and plans that support the enterprise goals, implement efficient end to end processes and leverage use of existing IT assets. Align strategic goals and objectives with key business and IT initiatives. Work to develop an integrated view of the enterprise using a repeatable approach, cohesive framework, industry standard techniques and best practices.
Minimum Years of Experience: Must have 9-12 years of related experience in their specific area with experience leading teams on projects with similar scope and complexity.

Minimum Years of Education: Must have a Bachelor’s degree in Computer Science, Information Systems or related field. Post graduate degree desired.

Certifications, if any: None

**Database Architect**

**Functional Responsibility:** Database Architect is responsible for developing logical and physical data models using modeling tools such as Erwin or equivalent. Responsible for creating DDLs and DMLs and managing incremental changes for agile development using tools such as liquid base and google flyway scripts. Create and manage PL/SQL objects like packages, stored procedures, functions, and related database objects in a CM managed environment based upon defined requirements. Will participate in full DB development life cycle. Responsible for performance tuning of the database schemas and queries. Perform database administration including database installation, configuration and automation in on premise and cloud native environments. Work as part of the agile development teams and help the scrum team with database related activities assigned for the sprint.

**Minimum Years of Experience:** Must have 8 or more years of progressive experience with an emphasis in database design, administration, and development.

**Minimum Years of Education:** Must have a Bachelor’s degree in Computer Science, Information Systems or related field is desired.

**Certifications, if any:** Professional certification is desired.

**DevOps Architect**

**Functional Responsibility:** Architecting, developing and automating the deployment and configuration of services using infrastructure as a service providers (e.g., Amazon Web Services, Microsoft Azure, Google Compute Engine, RackSpace/OpenStack) or on premise data centers. Configuring and managing Linux-based servers to serve dynamic websites and/or backend computation systems. Architecture, design and debug cluster-based computing architectures. Use scripting or basic programming skills to solve problems and create automation scripts. Architecture, design and install and manage open source and/or COTS monitoring tools. Architect, design, install and manage configuration management tools (e.g., Puppet, Chef, Ansible, Salt, Jenkins, Team City, GIT, Artifactory and Nexus). Architect and implement continuous integration and deployment, and continuous monitoring for custom software. Architect and design containerization solution using technologies (LXC, Docker and Rocket).

**Minimum Years of Experience:** Must have 10 or more years of progressive experience with an emphasis in automation architecture, distributed computing, continuous integration and continuous deployment architecture and implementation.

**Minimum Years of Education:** Must have Bachelor degree in Computer Science, Information Systems or related field and professional certification(s) is desired.

**Certifications, if any:** Professional certification is desired.

**DevOps Engineer**
**Functional Responsibility:** Developing and automating the deployment and configuration of services using infrastructure as a service providers (e.g., Amazon Web Services, Microsoft Azure, Google Compute Engine, RackSpace/OpenStack) or on premise data centers. Configuring and managing Linux-based servers to serve dynamic websites and/or backend computation systems. Use scripting or basic programming skills to solve problems and create automation scripts. Automate the installation and manage open source and/or COTS monitoring tools. Automate, install and manage configuration management tools (e.g., Puppet, Chef, Ansible, Salt, Jenkins, Team City, GIT, Artifactory and Nexus). Automate continuous integration and deployment, and continuous monitoring for custom software. Automate containerization solution using technologies (LXC, Docker and Rocket).

**Minimum Years of Experience:** Must have 5 or more years of progressive experience with an emphasis in automation, continuous integration and continuous deployment solution implementation.

**Minimum Years of Education:** Must have a Bachelor’s degree in Computer Science, Information Systems or related field and professional certification(s) is desired.

**Certifications, if any:** Professional certification is desired.

---

**Security Architect**

**Functional Responsibility:** Defines information security architecture, and implements industry standards based security controls. Designs and implements solutions for data at rest and data in motion encryption. Designs and implements user repositories and access privileges using LDAP directories and Identity and Access Management solutions. Designs security controls for cloud solutions in AWS, Azure, Rackspace etc. Implements continuous monitoring solutions using cloud monitoring tools and log monitoring tools such as Cloud Watch, Cloud Trail and Splunk. May prepare technical documentation including requirements documents, design documentation, design reviews and test reports. May work alone or with other information security engineers, information assurance engineers, technical engineers, networking engineers, software engineers, computer system analysts, and program administration personnel. May estimate information security, or information assurance, costs and schedule.

**Minimum Years of Experience:** Must have 7 or more years of experience.

**Minimum Years of Education:** Must have a Bachelor’s degree in Computer Science, Information Systems or related field. Experience with security architecture design, vulnerability assessments, design and implementation of NIST 800 and/or FISMA controls, white-hat hacking and fundamental computer science concepts desired.

**Certifications, if any:** Professional certification is desired.

---

**Systems Architect-Level 1**

**Functional Responsibility:** Design and develop solutions to network concerns, system administration issues, or complex applications problems. Perform systems integration and management functions. Analyze user requirements, procedures, and problems to automate or improve upon existing systems. Review system capabilities, workflows, and scheduling limitations. Incorporate strategies and engineering tools for introducing new technology into the customer’s infrastructure-related business processes.
**Minimum Years of Experience:** Must have 4 or more years of related System Administration and/or network administration. 2 years of experience working with development teams. Proven experience with advanced system design techniques.

**Minimum Years of Education:** Must have a Bachelor’s degree in a computer science or a related field.

**Certifications, if any:** None

---

**Systems Architect-Level 2**

**Functional Responsibility:** Design and develop solutions to network concerns, system administration issues, or complex applications problems. Perform systems integration and management functions. Analyze user requirements, procedures, and problems to automate or improve upon existing systems. Review system capabilities, workflows, and scheduling limitations. Incorporate strategies and engineering tools for introducing new technology into the customer’s infrastructure-related business processes.

**Minimum Years of Experience:** Must have 8 or more years of related System Administration and/or network administration as well as 4 years of experience working with development teams. Proven experience with advanced system design techniques.

**Minimum Years of Education:** Must have a Bachelor’s degree

**Certifications, if any:** None

---

**Developer Level-1**

**Functional Responsibility:** Application Developer performs high complexity (i.e. system level applications) analysis, design, development and unit testing of software applications from user requirements and design documents. The candidate also resolves defects encountered during various testing cycles. Authoring developer-friendly documentation (e.g., API documentation, deployment operations). Development frontend web applications using CSS, HTML5 and Javascript technologies. Test-driven development. Use of version control systems, specifically Git and GitHub. Quickly researching and learning new programming tools and techniques. Relational and non-relational database systems. Scalable search technology (e.g. ElasticSearch). Handling large data sets and scaling their handling and storage. Using and working with open source solutions and community. Communicating technical concepts to a non-technical audience.

**Minimum Years of Experience:** Must have 4 or more years of IT development experience.

**Minimum Years of Education:** Must have Bachelor’s degree in directly related field.

**Certifications, if any:** None

---

**Developer Level 3**

**Functional Responsibility:** Developer Level 3 performs high complexity (i.e. system level applications) analysis, design, development and unit testing of software applications from user requirements and design documents. The candidate also resolves defects encountered during various testing cycles. Authoring developer-friendly documentation (e.g., API documentation, deployment operations). Development frontend web applications using CSS, HTML5 and JavaScript technologies. Test-driven development. Use of version control systems, specifically Git and GitHub. Quickly researching and learning new programming tools and techniques. Relational and non-relational database systems. Scalable search technology (e.g. ElasticSearch, Solr). Handling large data sets and scaling their handling and storage. Using
and working with open source solutions and community. Communicating technical concepts to a non-technical audience

**Minimum Years of Experience:** Must have 10 or more years of IT development experience.  
**Minimum Years of Education:** Must have a Bachelor’s degree in related field.  
**Certifications, if any:** None

The following details allowable labor category substitutions based on education and experience.

Additional experience may be substituted for a degree provided all experience requirements have been previously met and the additional experience is in a related field. Below are guidelines for determining experience substitutions.

1. Two years of experience above the minimum experience requirements may be substituted for an associate’s degree provided the experience is in a related field.
2. Four years of experience above the minimum experience requirements may be substituted for a bachelor’s degree provided the experience is in a related field.
3. Six years of experience above the minimum experience requirements may be substituted for a master’s degree provided the experience is in a related field.
4. Eight years of experience above the minimum experience requirements may be substituted for a Doctor of Philosophy (Ph.D.) provided the experience is in a related field.

Education may substitute for experience provided all education requirements have been previously met and the degree is in a related field. Below are guidelines for determining education substitutions.

1. An associate’s degree may be substituted for two years of experience provided all education requirements have been previously met and the degree is in a related field.
2. A bachelor’s degree may be substituted for four years of experience provided all education requirements have been previously met and the degree is in a related field. A bachelor’s degree may also take the place of an associate’s degree and two years of experience.
3. A master’s degree may be substituted for six years of experience provided all education requirements have been previously met and the degree is in a related field. A master’s degree may also take the place of a bachelor’s degree and two years of experience, or an associate’s degree and four years of experience.
4. A Ph.D. may be substituted for eight years of experience provided all education requirements have been previously met and the degree is in a related field. A Ph.D may also take the place of an associate’s degree and six years of experience, a bachelor’s degree and four years of experience, or a master’s degree and two years of experience.

For all labor categories, a major certification in the related field may be substituted for the degree requirement.
