Contractor's Administration Source:
Philip A. Oakley, President
philoak@i3ics.com
Business Size:
Small Business
Service Disabled Veteran Owned Business

Unique in the industry, i3 ICS is a Small Veteran-Owned Business (SVOB) specializing in analytical integration – the process of synchronizing new or emerging technologies into the analytical process to maximize impact and streamline operations.

i3 ICS is a value-added integrator of information technology (IT) products and solutions with an expert focus on storage and advanced data management.

We integrate these products for government, non-governmental agencies, and commercial organizations. These technology-based companies rely on i3 ICS's knowledge and understanding to fashion both the technical and practical solutions to the customer's requirements. This approach allows commercial technologists to focus on product development,... while i3 ICS focuses on the integration process.

Since our inception, i3 ICS has focused on providing both custom and commercial-off-the-shelf (COTS) solutions to the most complex challenges facing government agencies.

CUSTOMER INFORMATION:

1a. TABLE OF AWARDED SPECIAL ITEM NUMBERS (SINs)

SIN	DESCRIPTION
511210	Software Licenses
54151	Software Maintenance Services
54151S	Information Technology Professional Services
33411	Purchasing of new electronic equipment

1b. LOWEST PRICED MODEL NUMBER AND PRICE FOR EACH SIN:

SIN	Part Number	Price
511210	BT-EC1-1	\$47.85
54151	BT-ICT	\$167.51
33411	EP T	\$10.77

1c. HOURLY RATES:

Labor Category	Unit of Issue	GSA Price
Senior Product Integrator (OnSite)	Hourly	\$174.21
Systems Architect (OnSite)	Hourly	\$188.56
Senior Systems Engineer (OnSite)	Hourly	\$130.18

54151	FCMG-T-OS	Fulcrum Training – On-Site	On-site training for 1 day for your team of up to 20 attendees. A Fulcrum Implementation Engineer will conduct a 2 part training program covering platform usage, app design, mobile data collection, team deployment, user/security management, data import/export, and data QA/QC	Each	\$9,837.54
54151	FCMG-T-V	Fulcrum Training – Virtual	Webinar-based 4 hour training session for your team of up to 20 attendees. A Fulcrum Implementation Engineer will conduct an overview program covering app design, user/security management, data import/export, and data QA/QC	Each	\$3,689.08
54151	FCMG-II40	Fulcrum Integration & Implementation Services – 10 hr	Dedicated services from a Fulcrum Integrations Engineer for initial account deployment, app development, workflow design, integration with existing business systems, and reporting needs	Each	\$3,074.24
511210	BT-EC1-5	EncryptOne-per user/year 5-year term	EncryptOne-per user/year 5-year term	per user	\$143.57
511210	BT-EC1-1	Tuitio-per user/year	Tuitio-per user/year	per user	\$47.85
54151	EO-T-AM	EncryptOne & Tuitio annual maintenance	EncryptOne & Tuitio annual maintenance	of license	\$0.15
511210	BT-DP-SL	Fiber-based Monitoring Systems	<p>Fiber-based Monitoring Systems. The technology involves advanced laser-based monitoring systems, including hardware/software that detects changes in the structural integrity of infrastructure. Applications include, but are not limited to: intrusion detection, board security, facility security, pipeline safety, mine safety issues, monitoring the structural integrity of highway systems. The system is comprised of: The Erebus integrator, Pulse Generator, PC, Fiber Connector, Single Mode Fiber (10Km), Faraday Mirror, Server Rack and Installation Kit.</p>	Each	\$243,002.52
54151	BT-DP-II40	Fiber-based Monitoring Systems Integration & Implementation - 40hrs	Dedicated services for initial account deployment, workflow design, integration with existing business systems, and reporting needs	Each	\$3,487.96

54151	BT-DesignCS	Design and engineering for custom systems	Systems design and engineering for custom systems to incorporate Fiber based monitoring system technology for site specific applications.	Each	\$358.94
54151	BT-DesignITApp	Systems design for IT applications	System integration design, engineering and tech support to develop EcryptOne and Tuitio software for various applications of IT security. Bravatek provides completed integration services for “on-line” and “offline” applications, POS terminals, and all IT services. Bravatek offers various bank services product bundles, shared banking infrastructure, modern OS based POS devices, multi-purpose solid solutions and scalable IT services.	Each	\$263.22
511210	BT-EC1-5	EcryptOne-per user/year 5-year term	EcryptOne-per user/year 5-year term	Each	\$143.57
511210	BT-EC1-1	Tuitio-per user/year	Tuitio-per user/year	Each	\$47.85
54151	EO-T-AM	EcryptOne & Tuitio annual maintenance	EcryptOne & Tuitio annual maintenance	Each	15.11%
511210	BT-DP-SL	DarkPulse Erebus	DarkPulse Technologies is an advanced, Fiber-based Monitoring Systems. The technology involves advanced laser-based monitoring systems, including hardware/software that detects changes in the structural integrity of infrastructure. Applications include, but are not limited to: intrusion detection, board security, facility security, pipeline safety, mine safety issues, monitoring the structural integrity of highway systems. The system is comprised of: The Erebus integator, Pulse Generator, PC, Fiber Connector, Single Mode Fiber (10Km), Faraday Mirror, Server Rack and Installation Kit.	Each	\$243,002.52
54151	BT-DP-II40	DarkPulse Integration & Implementation - 40hrs	Dedicated services for initial account deployment, workflow design, integration with existing business systems, and reporting needs	Each	\$3,487.96
54151	BT-DesignCS	Design and engineering for custom systems	Systems design and engineering for custom systems to incorporate Erebus technology for site specific applications.	Each	\$358.94
54151	BT-DesignITApp	Design For IT applications	System integration design, engineering and tech support to develop EcryptOne and Tuitio software for various applications of IT security. Bravatek provides completed integration services for “on-line” and “offline” applications, POS terminals, and all IT services. Bravatek offers various bank services product bundles, shared banking infrastructure, modern OS based POS devices, multi-purpose solid solutions and scalable IT services.	Each	\$263.22
54151	Social Risk Investigation	Social Risk Investigation	ENODO’s most basic analysis that is designed to demonstrate the trending (current) topics and their associated sentiment in a particular geogrpahic location, organization, or program. Produced in 3-5 days	Each	\$11,696.73
54151	Social Risk Analysis	Social Risk Analysis	Builds upon the Social Risk Investigation to uncover key (enduring) topics, define the information environment (how people	Each	\$23,394.46

			communicate), uncover key influencers and networks, highlight differences among demographic groups, and quantify a person or organization’s penetration, saturation, and share of the voice. Begins to answer the “why” behind what Social Risk factors will impact government programming. Produced in 7-10 days.		
54151	Social Risk Action Plan	Social Risk Action Plan	Expands upon the Social Risk Analysis to (1) develop a quantified baseline of key and trending topics and findings & recommendations to inform a social risk mitigation strategy, and (2) conduct an information audit to uncover how, why, and when people communicate (e.g. open source media platforms). The content aligns with the identities of the demographic groups that a campaign is engaging. Produced in less than 45 days.	Each	\$140,365.74
511210	Social Risk Mitigation Platform - 3 months	Social Risk Mitigation Platform - 3 months	3 months of Customized Data Analytics: We transform data into meaningful, actionable information through multi-layered assessments with key findings and recommendations used to inform strategic communication and engagement activities. We customize each technology platform to the specific information, language, and social environments as well as the client’s needs. We use best-in-class Natural Language Processing and Machine Learning tools to quantitatively measure text-based narratives, perceptions, and sentiments. Combined with our population-centric methodology and analytical tools (e.g., Topic Modeling, Sentiment Analysis, Demographic Analysis, Social Network Analysis, and Narrative Analysis), each unique technology platform enables clients to make sense of digital information from online news outlets, social media, and proprietary datasets. Clients are provide several deliverables including weekly reports, Ask ENODOs, and Emergency Alerts.	Each	\$432,458.44
511210	Social Risk Mitigation Platform - 6 months	Social Risk Mitigation Platform - 6 months	6 months of Customized Data Analytics: We transform data into meaningful, actionable information through multi-layered assessments with key findings and recommendations used to inform strategic communication and engagement activities. We customize each technology platform to the specific information, language, and social environments as well as the client’s needs. We use best-in-class Natural Language Processing and Machine Learning tools to quantitatively measure text-based narratives, perceptions, and sentiments. Combined with our population-centric methodology and analytical tools (e.g., Topic Modeling, Sentiment Analysis, Demographic	Each	\$663,058.94

			Analysis, Social Network Analysis, and Narrative Analysis), each unique technology platform enables clients to make sense of digital information from online news outlets, social media, and proprietary datasets. Clients are provide several deliverables including weekly reports, Ask ENODOs, and Emergency Alerts.		
511210	Social Risk Mitigation Platform - 12 months	Social Risk Mitigation Platform - 12 months	12 months of Customized Data Analytics: We transform data into meaningful, actionable information through multi-layered assessments with key findings and recommendations used to information strategic communication and engagement activities. We customize each technology platform to the specific information, language, and social environments as well as the client's needs. We use best-in-class Natural Language Processing and Machine Learning tools to quantitatively measure text-based narratives, perceptions, and sentiments. Combined with our population-centric methodology and analytical tools (e.g., Topic Modeling, Sentiment Analysis, Demographic Analysis, Social Network Analysis, and Narrative Analysis), each unique technology platform enables clients to make sense of digital information from online news outlets, social media, and proprietary datasets. Clients are provide several deliverables including weekly reports, Ask ENODOs, and Emergency Alerts.	Each	\$1,066,508.82
54151	Social Risk Seminar	Social Risk Seminar	An immersive two-hour seminar to pinpoint, forecast, and mitigate the impacts of Social Risk on an organization's business model, using contemporary scenarios. Provides context for a Social Risk Investigation on the organization.	Each	\$28,073.55
54151	APJ-50-PILOT	Apptio® Jumpstart Pilot: All Components Up to \$50M in IT Spend	Apptio® Jumpstart Pilot: All Components Up to \$50M in IT Spend	Each	\$425,012.59
511210	F-218-1-ES101	Data Acquisition Module	Foundation Software Module for Social and Conversation Data Input Subsystem - information management of multiple data entry points, 1 pre-configured feed	Per Month	\$537,105.21
511210	F-218-2-ES201	Process Module	Foundation Data Processing Subsystem Software - trend analysis, topic analysis, sentiment analysis and demographics analysis, AI and ML services, Communication ManagementF	Per Month	\$537,105.21
511210	F-218-3-ES301	Control Center Module	Operator and Admin Dashboard Command Center Software - Single operator, single admin, reporting, analytics engine, and search management	Per Month	\$404,572.76
511210	M-818-1-LU101	Data Acquisition Feed Module	Data input source, 40,000 records	Per Month	\$27,901.57

511210	END - SLM 3	Social Listening Module - 3 Months	3 months of customized Social Listening Module: ENODO collaborates with the client to identify terms, topics, hashtags, and accounts to initiate data collection and setup the technical platform. The platform automatically collects data on these and other information sources using a combination of publicly available APIs. Facebook, Twitter, and Instagram are the most likely to contain the best information, however, ENODO will integrate other data sources as needed. The platform is completed in less than ten days. Once the platform is setup, the Social Listening Module monitors the trending topics in the designated geographic area or on the program of interest. Weighs the trending topics based on the percentage of total conversations over social media platforms and measures their associated public sentiment (e.g., positive, negative, and neutral). New topics are introduced as older topics' share of the conversations decreases below the threshold of most discussed topics. Weekly results are delivered via a dashboard after the platform is setup.	each	\$12,165.24
511210	END - SLM 6	Social Listening Module - 6 Months	6 months of customized Social Listening Module: ENODO collaborates with the client to identify terms, topics, hashtags, and accounts to initiate data collection and setup the technical platform. The platform automatically collects data on these and other information sources using a combination of publicly available APIs. Facebook, Twitter, and Instagram are the most likely to contain the best information, however, ENODO will integrate other data sources as needed. The platform is completed in less than ten days. Once the platform is setup, the Social Listening Module monitors the trending topics in the designated geographic area or on the	each	\$17,779.35

			program of interest. Weighs the trending topics based on the percentage of total conversations over social media platforms and measures their associated public sentiment (e.g., positive, negative, and neutral). New topics are introduced as older topics' share of the conversations decreases below the threshold of most discussed topics. Weekly results are delivered via a dashboard after the platform is setup.		
511210	END - SLM 12	Social Listening Module - 12 Months	12 months of customized Social Listening Module: ENODO collaborates with the client to identify terms, topics, hashtags, and accounts to initiate data collection and setup the technical platform. The platform automatically collects data on these and other information sources using a combination of publicly available APIs. Facebook, Twitter, and Instagram are the most likely to contain the best information, however, ENODO will integrate other data sources as needed. The platform is completed in less than ten days. Once the platform is setup, the Social Listening Module monitors the trending topics in the designated geographic area or on the program of interest. Weighs the trending topics based on the percentage of total conversations over social media platforms and measures their associated public sentiment (e.g., positive, negative, and neutral). 54151	BT-ICT	Bravatek ICT	<p>Bravatek Information and communications technology (ICT) is an extensional term for information technology (IT) that stresses the role of unified communications and the integration of telecommunications and computers, as well as necessary enterprise software (EcryptOne and Tuitio), middleware, storage, and audiovisual systems, that enable users to access, store, transmit, and manipulate information.</p> <p>The term ICT is also used to refer to the convergence of audiovisual and telephone networks with computer networks through a single cabling, Wi-Fi or link system. There are large economic incentives (huge cost savings due to the elimination of the telephone network) to merge the telephone network and Wi-Fi with the computer network system using a single unified system of cabling, signal distribution, wireless technology and management.</p> <p>ICT is a broad subject and the concepts are evolving. It covers any product that will store, retrieve, manipulate, transmit, or receive information electronically in a digital form (e.g., including but not limited to, personal computers, security systems, sensors, detection systems, email, or robots).</p>	hour	\$167.51

			System		
33411	SPHIES-MONITOR-10	SPHIES MONITOR (QTYs of 1-10)	The Stealth MONITOR option provides power distribution managers and operators with near real-time energy storage system status and performance data with a cloud-based storage solution. The Stealth MONITOR option integrates with any SPHIES and provides a gateway for data flow between the SPHIES, the cloud-based storage solution and the customer's dashboard. Over-the-air firmware updates provide managers the ability to change energy storage system and power parameters on select systems or their entire distributed network without a maintenance call. Managers and operators have access to the system's status, including Stealth LiTHIUM state-of-charge and voltages, load information, solar collection data and on-site generator operational information. Additionally, managers can request email/text alerts for system issues such as low state-of-charge, voltage or generator fuel status. Stealth MONITOR is "Born" Secure. The Stealth MONITOR option requires an annual subscription.	EA	\$8,518.89
33411	SPHIES-MONITOR-25	SPHIES MONITOR (QTYs of 11-25)	The Stealth MONITOR option provides power distribution managers and operators with near real-time energy storage system status and performance data with a cloud-based storage solution. The Stealth MONITOR option integrates with any SPHIES and provides a gateway for data flow between the SPHIES, the cloud-based storage solution and the customer's dashboard. Over-the-air firmware updates provide managers the ability to change energy storage system and power parameters on select systems or their entire distributed network without a maintenance call. Job Title	Detailed Position Description and functional responsibilities	Min Years of Experience	Min Education Level
Senior Product Integrator	The Senior Product integrator performs systems integration of COTS and GOTS software and hardware to provide Program capabilities to the government customer. This position requires a Bachelors Degree in Electrical Engineering, Computer Science, or Information Systems and experience with system architecture design and familiarity with System requirements definition processes. He/she must also possess experience in hands-on systems integration, installation, testing, accreditation, troubleshooting, repair, and replacement of systems and software.	15	Bachelor's Degree
Systems Architect	Ten or more years of technical experience performing requirements analysis for, and system design of, enterprise-wide or large scale computer systems. Requires in-depth understanding of structured analysis and complex architecture design concepts/methods. Possesses knowledge of the state-of-the-art in open system standards (e.g. OSI, ISO, OSE, TAFIM), design methodologies and tools such as entity relationship/data flow diagrams and IDEF1x, object oriented principles, and systems engineering practices. Functional Responsibility: Evaluates problems of work flows, organization, and planning and develops enterprise-wide or large-scale computer system solutions. Designs architecture to include the software, hardware, and communications to support the total requirements as well as provides for present and future cross-functional requirements and interfaces. Ensures these systems are compatible and in compliance with standards for open systems architectures as they apply to the implementation and specification of the information management solution of the application platform, across the application program interface, and the external environment/software applications. May provide daily supervision and direction to support staff. Minimum Education: Bachelor's degree or equivalent in Computer Science, Engineering, or related field (Master's Degree preferred)	10	Bachelor's Degree
Senior Systems Engineer	The Senior Engineer oversees technical staff and reviews and approves all change requests impacting operational capability and/or technical architecture. He/she provides daily technical guidance to Field Service Representatives in the areas of systems integration, data flow, and logical and technical architecture; consolidates status reports and provides to PM; ensures timely installation and compliance with architectural plans and deploys, as needed, to support FSRs and/or to represent the System Architect at review boards and meetings. The Senior Engineer facilitates systems testing and accreditation, information flow between PM, System Architect and Chief Technology Officer of the supported Command. He/she also ensures timely data flow from theater to the supported command, and oversees data archiving of FMV, UAV, Imagery, Geospatial, NTM, and other data as directed. Minimum 10 years experience in Systems Engineering, including 8 in supervisory positions. Bachelor's Degree in Information Systems or similar field required. Master's Degree preferred in Engineering or Computer science field.	10	Bachelor's Degree

<p>Senior System Administrator</p>	<p>The Senior Systems Administrator tests, studies and analyzes complex systems requirements in CONUS for integration and implementation in theater or operational environments. Designs software tools and subsystems to support software reuse and domain analyses and manages their implementation. Individual manages software development and administrative support using formal specifications, data flow diagrams, and other accepted techniques in support of development in the Lab for in theater integration. BS in Computer Science and 10 plus years of system administrator experience the Intelligence Community.</p>	<p>10</p>	<p>Bachelor's Degree</p>
<p>Senior Software Engineer/Manager</p>	<p>Schedules and allocates work, provides advice, guidance and training to the team. Determines and recommends personnel actions for the department. Responsible for software development, project planning, execution and performance. Master's degree and 8+ years directly related work experience in the specialized area of responsibility to include formal assignment in a managerial capacity.</p>	<p>8</p>	<p>Master's Degree</p>
<p>Senior Intelligence Analyst</p>	<p>Duties include, but are not limited to, the following: Increasing Levels of Skill, Knowledge, Experience, Education, Expertise and Responsibilities for performing analysis, establishing requirements, recommending necessary changes for specialized intelligence operations, facilities, computing systems and infrastructure. Must be able to interact with senior members of the Intelligence community and possess the analytical skills to lead an intelligence effort. This individual will perform analysis and assessments to support intelligence operations. Bachelor's Degree in Intelligence related field and 10 plus years of experience supporting National intelligence Agencies.</p>	<p>10</p>	<p>Bachelor's Degree</p>
<p>Intelligence Analyst</p>	<p>Duties include, but are not limited to, the following: Increasing Levels of Skill, Knowledge, Experience, Education, Expertise and Responsibilities for performing analysis, establishing requirements, recommending necessary changes for specialized intelligence operations, facilities, computing systems and infrastructure. Must be able to interact with members of the Intelligence community and possess the analytical skills to support an intelligence effort. This individual will perform analysis and assessments to support intelligence operations. Associates Degree in Intelligence related field and or 5 plus years of experience supporting National Intelligence Agencies.</p>	<p>5</p>	<p>Associate's Degree</p>
<p>Logistics/Acquisition Specialist</p>	<p>Duties include, but are not limited to, the following: Increasing Levels of Skill, Knowledge, Experience, Education, Expertise and Responsibility for infrastructure and systems Identification, Logistics Acquisitions Consulting, identifications of requirements for business operations, construction, and renovation or upgrade including material and requirements for computing systems, facility improvement and upgrades. Fair and equitable price consulting. Requirements for logistic and scheduling management for product deliveries, installations, and project completions. Supports operational changes, realignments, facility closures, and system moves. 5 plus years of logistics experience or government related logistics training required</p>	<p>5</p>	<p>Trade School</p>

<p>Strategic Intelligence Information Technologist</p>	<p>Information Technologist: Recognized expert in the field of strategic intelligence and employment and supporting information technology. Ten or more years of technical experience providing internal/external consulting services to management and technical staff in solving complex strategic intelligence analytical issues. Requires competence in field of expertise, such as technology assessment, feasibility studies and cost/benefit analyses, hardware and software evaluation, developing IS standards and methodologies, and business process re-engineering. Possesses extensive knowledge of the state-of-the-art in information technology and systems management and how they fit into the intelligence community programs. Functional Responsibility: Provides advice and guidance regarding the design, development, installation, operation, and maintenance of complex information systems and incorporation into operational intelligence environments. Minimum Education: Master of Science Degree in Strategic Intelligence, Engineering, or intelligence-related field.</p>	<p>15</p>	<p>Master's Degree</p>
<p>Program Manager I</p>	<p>Duties include, but are not limited to, the following: Increasing Levels of Skill, Knowledge, Experience, Education, Expertise and Responsibility for Organizational Program Efficiency & Effectiveness Analysis, Program Development, Business Operations & Information Technology Systems Management and Improvement, Program Implementation, and Management & Supervision of Organizational Facilities, Business Operations, Infrastructure & Emerging Technology Identification, Logistics Acquisitions Consulting, Equipment Support, Financial Resources, Continuity of Operations, Emergency Relocation Sites, Information Technology Systems, and Personnel. Planning, Coordination, and Implementation of Program Operations Changes, Realignment, Facility Closures, and Moves. Bachelor of Science Degree preferred with 1-5 yrs Exp.</p>	<p>1</p>	<p>Bachelor's Degree</p>
<p>Program Manager II</p>	<p>Duties include, but are not limited to, the following: Increasing Levels of Skill, Knowledge, Experience, Education, Expertise and Responsibility for Organizational Program Efficiency & Effectiveness Analysis, Program Development, Business Operations & Information Technology Systems Management and Improvement, Program Implementation, and Management & Supervision of Organizational Facilities, Business Operations, Infrastructure & Emerging Technology Identification, Logistics Acquisitions Consulting, Equipment Support, Financial Resources, Continuity of Operations, Emergency Relocation Sites, Information Technology Systems, and Personnel. Planning, Coordination, and Implementation of Program Operations Changes, Realignment, Facility Closures, and Moves. Bachelor of Science Degree recommended with 6-12yrs Experience preferred.</p>	<p>6</p>	<p>Bachelor's Degree</p>

Program Manager III	Duties include, but are not limited to, the following: Increasing Levels of Skill, Knowledge, Experience, Education, Expertise and Responsibility for Organizational Program Efficiency & Effectiveness Analysis, Program Development, Business Operations & Information Technology Systems Management and Improvement, Program Implementation, and Management & Supervision of Organizational Facilities, Business Operations, Infrastructure & Emerging Technology Identification, Logistics Acquisitions Consulting, Equipment Support, Financial Resources, Continuity of Operations, Emergency Relocation Sites, Information Technology Systems, and Personnel. Planning, Coordination, and Implementation of Program Operations Changes, Realignment, Facility Closures, and Moves. Bachelor of Science Degree required with MS preferred with 12-20 yrs Exp.	12	Bachelor's Degree
Purchasing Manager/Program Administrator	Responsible for overview of RFP process, RFQs, responding to solicitation questions including handling distribution of solicitation documents and other administrative requirements. Maintain all budgets and forecasting for the department while managing the procurement database. The candidate will be responsible for reporting for the department in reference to transportation, inventory management, disposal and storage of all warehouse operations. Bachelor of Science Degree or related experience in purchase management or program administration.	4	2 Years Education
