On-line access to contract ordering information, terms and conditions, up-to-date pricing, and the option to create an electronic delivery order are available through GSA Advantage!, a menu-driven database system. The INTERNET address for GSA Advantage! is: GSAAdvantage.gov.

**MULTIPLE AWARD SCHEDULE**

**LARGE CATEGORY: INFORMATION TECHNOLOGY**

**SUBCATEGORY: IT SERVICES**

**SIN 54151HEAL**  
Health Information Technology Services

Includes a wide range of Health IT services to include connected health, electronic health records, health information exchanges, health analytics, personal health information management, innovative Health IT solutions, health informatics, emerging Health IT research, and other Health IT services.

NOTE: Subject to Cooperative Purchasing

FSC/PSC Code: D399

**SIN 54151S**  
Information Technology Professional Services

IT Professional Services and/or labor categories for database planning and design; systems analysis, integration, and design; programming, conversion and implementation support; network services, data/records management, and testing.

The Contractor shall not resell IT Professional Services, except that IT professional services may only be resold in direct support of products that are authorized to be sold via the schedule contract, e.g. SIN 54151 - Software Maintenance Services that supports SIN 511210 - Software Licenses. (This does not include SINs within the IT Services Subcategory).

NOTE: Subject to Cooperative Purchasing

FSC/PSC Code: D399

**LARGE CATEGORY: MISCELLANEOUS**

**SUBCATEGORY: COMPLIMENTARY SINs**

**SIN ANCILLARY**  
Ancillary Supplies and Services

Ancillary supplies and/or services are support supplies and/or services which are not within the scope of any other SIN on this schedule. These supplies and/or services are necessary to compliment a contractor's offerings to provide a solution to a customer requirement. This SIN may be used for orders and blanket purchase agreements that involve work or a project that is solely associated with the supplies and/or services purchased under this schedule.

NOTE: When used in conjunction with a Cooperative Purchasing eligible SIN, this SIN is Cooperative Purchasing Eligible.

FSC/PSC Code: 0000
SIN OLM  Order-Level Materials (OLM)

OLMs are supplies and/or services acquired in direct support of an individual task or delivery order placed against a Schedule contract or BPA. OLM pricing is not established at the Schedule contract or BPA level, but at the order level. Since OLMs are identified and acquired at the order level, the ordering contracting officer (OCO) is responsible for making a fair and reasonable price determination for all OLMs.

OLMs are procured under a special ordering procedure that simplifies the process for acquiring supplies and services necessary to support individual task or delivery orders placed against a Schedule contract or BPA. Using this new procedure, ancillary supplies and services not known at the time of the Schedule award may be included and priced at the order level.

OLM SIN-Level Requirements/Ordering Instructions:

OLMs are:
- Purchased under the authority of the FSS Program
- Unknown until an order is placed
- Defined and priced at the ordering activity level in accordance with GSAR clause 552.238-115 Special Ordering

Procedures for the Acquisition of Order-Level Materials. (Price analysis for OLMs is not conducted when awarding the FSS contract or FSS BPA; therefore, GSAR 538.270 and 538.271 do not apply to OLMs)
- Only authorized for use in direct support of another awarded SIN.
- Only authorized for inclusion at the order level under a Time-and-Materials (T&M) or Labor-Hour (LH) Contract Line Item Number (CLIN)
- Subject to a Not To Exceed (NTE) ceiling price

OLMs are not:
- "Open Market Items"
- Items awarded under ancillary supplies/services or other direct cost (ODC) SINs (these items are defined, priced, and awarded at the FSS contract level)

OLM Pricing:
- Prices for items provided under the Order-Level Materials SIN must be inclusive of the Industrial Funding Fee (IFF).
- The value of OLMs in a task or delivery order, or the cumulative value of OLMs in orders against a FSS BPA awarded under an FSS contract, cannot exceed 33.33%.

NOTE: When used in conjunction with a Cooperative Purchasing eligible SIN, this SIN is Cooperative Purchasing Eligible.

NOTE: Subject to Cooperative Purchasing

SPECIAL ITEM NUMBER 54151HEAL
HEALTH INFORMATION TECHNOLOGY SERVICES

Commercial Job Title: Functional Analyst

Minimum/General Experience: 8 years

Functional Responsibility: Performs tasks of analysis for informational technology (IT) related to health care of user needs to determine functional and cross-functional requirements. Must have experience managing business transformation or IT transition with an understanding of the role and function of IT policy is preferred. Performs functional allocations to identify required tasks and their interrelationships for the planning, designing, building, deploying, and maintaining electronic health record storage environments. Identifies resources required for each task. Works closely with the customer to develop the strategies, solutions and plans for the “As Is” to “To Be” transition of an IT enterprise network system taking into account the customer’s work environment and constraints.

Minimum Education: BA/BS Degree

Commercial Job Title: Technical Editor

Minimum/General Experience: 4 years

Functional Responsibility: Performs tasks such as writing and editing complex health care related technical materials for networking and IT systems, such as reports, regulations, articles, newsletters, magazines, news releases, training materials, brochures, interpretive handbooks, pamphlets, guidebooks, scholarly works, reference works, speeches, or scripts. Tasks may include editing, or reviewing training materials for a course, user guidebook, briefing packages, workbooks, or study reports.

Minimum Education: BA/BS Degree

SPECIAL ITEM NUMBER 54151S
INFORMATION TECHNOLOGY PROFESSIONAL SERVICES

Commercial Job Title: Database Architect

Minimum/General Experience: 4 years

Functional Responsibility: Performs tasks which structure the information technology (IT) enterprise systems in terms of its governance structure, business processes, and business information technology systems; align strategic goals and objectives with decisions regarding products and services, partners and suppliers, organization, capabilities, and key business and IT initiatives. Tasks may include developing an IT architecture strategy based on a situational awareness of various business scenarios and motivations; applying a structured IT architecture approach and methodology for capturing the key views of the enterprise; requirements analysis; integration; interoperability; interconnectivity; structured analysis; design methodologies; design/design analysis, use of design tools and other design techniques; automation principles; test program set development, data base structuring, modeling techniques, testability, configuration management/product data management; integrated product team or multi-discipline team; test planning/testing; and, logical and physical function, operation, and technical architecture of large and complex systems. Proficiency in hardware/software interfaces and integration is required for relevant systems engineering assignments. Must have a working knowledge of what commercial- off the shelf (COTS) hardware/software will fit the intended need.

Minimum Education: BA/BS Degree
Commercial Job Title: Junior Data Analyst

Minimum/General Experience: 3 years

Functional Responsibility: Performs tasks in supporting managers, engineers, or technicians in the duties associated with accomplishing work assigned in information technology (IT), database management and telecommunications which may include obtaining data through advanced computerized models; extrapolating data patterns through advanced algorithms; developing simple graphs and charts to explain how the mathematical information will influence the specific project.

Minimum Education: BA/BS Degree

Commercial Job Title: Senior Data Analyst

Minimum/General Experience: 3 years

Functional Responsibility: Performs tasks in supporting managers, engineers, or technicians in the duties associated with accomplishing work assigned in information technology (IT), database management and telecommunications which may include obtaining data through advanced computerized models; extrapolating data patterns through advanced algorithms; developing simple graphs and charts to explain how the mathematical information will influence the specific project.

Minimum Education: BA/BS Degree

Commercial Job Title: Database Management Specialist - Junior

Minimum/General Experience: 3 years

Functional Responsibility: Performs tasks which ensure strategic and coordinated data systems management of information management (IT) systems for accuracy and integrity of data, and reporting of data to internal and external stakeholders. IT professional that is involved in all aspects of a business data flow. Tasks may include ensuring timely and accurate monthly, quarterly and annual reports on IT systems and as required; establishing, maintaining, and updating databases and records for recurring internal reports; recommending and implementing new operating methods to improve data flow, collection, editing, processing and distribution; and ensuring data integrity of high level data analysis.

Minimum Education: BA/BS Degree

Commercial Job Title: Database Management Specialist - Senior

Minimum/General Experience: 8 years

Functional Responsibility: Performs tasks which ensure strategic and coordinated data systems management of information management (IT) systems for accuracy and integrity of data, and reporting of data to internal and external stakeholders. IT professional that is involved in all aspects of a business data flow. Minimum Education: BA/BS Degree
Commercial Job Title: Data Modeler

Minimum/General Experience: 4 years

Functional Responsibility: Performs tasks which include providing technical IT expertise for the production of detailed database designs and design documentation, assist with the development and architecture of an enterprise data warehouse. Performs ad hoc analysis, insight generation and data migrations between IT systems. Tasks also include data models and data flow diagrams; evaluating and configuring database products to match user requirements with system capabilities; determining file organization, indexing methods and security procedures for system databases; planning and coordinating conversion and migration of exiting (or legacy) databases.

Minimum Education: BA/BS Degree

Commercial Job Title: Information Management Specialist

Minimum/General Experience: 4 years

Functional Responsibility: Performs tasks which support program, project and organizational work through the design and control of information technology (IT) systems that input, delete, retrieve, manipulate, and correct information in databases or automated/electronic systems. Tasks may include designing and producing reports via a wide variety of information management research tools, systems, and processes.

Minimum Education: BA/BS Degree

Commercial Job Title: Information Technology Specialist

Minimum/General Experience: 4 years

Functional Responsibility: Performs tasks related to leading, administering, developing, delivering, and supporting information technology (IT) systems and services, including data storage, information assurance, software applications, networking, and systems and services used in the automated acquisition, storage, manipulation, management, movement, control, display, switching, interchange, transmission, assurance, or reception of information. Tasks may include evaluating, recommending, designing, and developing IT solutions to compile, evaluate, analyze, control, secure, and disseminate timely, relevant, objective, and accurate data and information to stakeholders, including, not limited to, web-based designs, data governance, operational systems, document storage, applications, models, and assessment of existing legacy systems. Tasks may also include maintain and troubleshoot of business PC network and servers; maintain and troubleshoot SQL based ERP systems; create SQL reports using SQL Reporting services; develop applications to provide notification via reports or events to predefined business conditions; develop and maintain applications to integrate with ERP system SQL databases and to manage and update ecommerce and informational websites. Assist marketing with website improvements.

Minimum Education: BA/BS Degree
**Commercial Job Title:** Instructional System Designer

**Minimum/General Experience:** 8 years

**Functional Responsibility:** Performs tasks related to planning, coordination, and development components of instructional design based for information technology (IT) systems on the findings of occupational analysis; determining the learning objectives and task learning relationships, clustering learning events, organizing course content, and developing instruction design plans; and analyzing learning problems, selecting teaching strategies using appropriate models, and developing course plans using this information. Tasks may include identifying integration of IT systems for training needs, presenting recommendations, and delivering learning solutions to address performance gaps; leveraging instructional design and performance improvement processes to analyze, design, develop, implement, and evaluate instructional materials and performance improvement programs; working with key stakeholders and subject matter experts to design and develop training interventions that incorporate best practices in behavioral and cognitive sciences to effectively address business and performance objectives.

**Minimum Education:** BA/BS Degree

---

**Commercial Job Title:** Program Analyst – Level I

**Minimum/General Experience:** 1 year

**Functional Responsibility:** Performs tasks requiring program planning, audits, and evaluations related to large scale information technology (IT) programs. Tasks may include supporting IT program analysis, strategic planning, integrated master scheduling, event planning, Specific tasks may also include: develops functional/nonfunctional IT system requirements using documented business requirements; assesses and develops recommendations for process improvements and technology solutions for agencies. Conducts in-depth analysis of IT systems, operations, and procedures through interviews with user representatives and the review of existing policy and procedure documents. Captures, consolidates, and communicates information from the IT Subject Matter Experts (SMEs) and vendors to the rest of the team regarding health care IT systems. Translates client IT requirements into highly specific functional/nonfunctional requirements documents. Responsible for the high-level design and integration of software development by effectively partnering with business users, project managers and application developers. Identifies opportunities for increasing business/technical process efficiencies through the application of IT.

**Minimum Education:** BA/BS Degree

---

**Commercial Job Title:** Program Analyst – Level II

**Minimum/General Experience:** 5 years

**Functional Responsibility:** Performs tasks requiring program planning, audits, and evaluations related to large scale information technology (IT) programs. Tasks may include supporting IT program analysis, strategic planning, integrated master scheduling, event planning, Specific tasks may also include: develops functional/nonfunctional IT system requirements using documented business requirements; assesses and develops recommendations for process improvements and technology solutions for agencies. Conducts in-depth analysis of IT systems, operations, and procedures through interviews with user representatives and the review of existing policy and procedure documents. Captures, consolidates, and communicates information from the IT Subject Matter Experts (SMEs) and vendors to the rest of the team regarding health
care IT systems. Translates client IT requirements into highly specific functional/nonfunctional requirements documents. Responsible for the high-level design and integration of software development by effectively partnering with business users, project managers and application developers. Identifies opportunities for increasing business/technical process efficiencies through the application of IT.

**Minimum Education:** BA/BS Degree

**Commercial Job Title:** Program Analyst – Level III

**Minimum/General Experience:** 8 years

**Functional Responsibility:** Performs tasks requiring program planning, audits, and evaluations related to large scale information technology (IT) programs. Tasks may include supporting IT program analysis, strategic planning, integrated master scheduling, event planning. Specific tasks may also include: develops functional/nonfunctional IT system requirements using documented business requirements; assesses and develops recommendations for process improvements and technology solutions for agencies. **Minimum Education:** BA/BS Degree
Commercial Job Title: Program Manager

Minimum/General Experience: 8 years

Functional Responsibility: Performs tasks requiring management of a large-scale information technology programs, encompassing multiple projects, with a total lifecycle budget and complexity comparable to the task order at hand. Personnel have experience working with senior levels of Government and industry leadership in various aspects information technology (IT) in engineering, technical, or organizational management. Recognized as a professional advisor on evolving advancements in IT and its intrinsic application. Conversant in applicable engineering, technical, or management sub-discipline as it relates to system, equipment, or program employment strategies. Must be experienced as a facilitator of administrative matters associated with IT program and IT project development and proficient in directing resources. Tasks may include planning, initiating, managing, executing, and closing out small and largescale programs in support of an agency’s mission.

Minimum Education: Master’s Degree

Commercial Job Title: Programmer - Junior

Minimum/General Experience: 3 years

Functional Responsibility: Performs tasks related to developing and modifying web based applications, client-server applications and/or OS scripts for process automation, using skill and knowledge of application development in a Relational Database Management System or Structured Query Language (SQL); implementing and integrating commercial off-the-shelf (COTS) software into existing architecture; planning, documenting, coding, modifying, testing and implementing computer programs; documenting test conditions, creating test data, testing programs, and analyzing results; performing analysis of program and production problems; and using a Systems Development Methodology. Tasks may include analyzing and designing new or existing system enhancements; working closely with the user to define requirements; writing program specifications; researching the use of new technologies; working on multiple project requests; applying programming and analysis skills with a detailed knowledge of the application; coordinating system testing and assisting users with acceptance testing; assisting in the development and maintenance of data and process models; and assisting in the development of work plans and project organization.

Minimum Education: BA/BS Degree

Commercial Job Title: Programmer - Senior

Minimum/General Experience: 8 years

Functional Responsibility: Performs tasks related to developing and modifying web based applications, client-server applications and/or OS scripts for process automation, using skill and knowledge of application development in a Relational Database Management System or Structured Query Language (SQL); implementing and integrating commercial off-the-shelf (COTS) software into existing architecture; planning, documenting, coding, modifying, testing and implementing computer programs; documenting test conditions, creating test data, testing programs, and analyzing results; performing analysis of program and production problems; and using a Systems Development Methodology. Tasks may include analyzing and designing new or existing system enhancements; working closely with the user to define requirements; writing program specifications; researching the use of new technologies; working on multiple project requests; applying programming and analysis skills with a detailed knowledge of the application; coordinating system testing and assisting users with acceptance testing; assisting in the development and maintenance of data and process models; and assisting in the development of work plans and project organization.

Minimum Education: BA/BS Degree
Commercial Job Title: Project Manager

Minimum/General Experience: 4 years

Functional Responsibility: Performs tasks requiring management of information technology (IT) projects encompassing multiple tasks with a total lifecycle budget and complexity comparable to the task order at hand. Establish and maintain project management support services, tailoring the IT project management approach to team and project needs. Analyze project management needs and tailor industry best practices in networking and IT to suit the environment; Apply knowledge of federal government planning, programming, and budgeting as well as resource planning and execution processes, to support customer program planning, decision briefings, and progress assessment across multiple projects. Develop guidelines for managing project information and deliverables. Work with cross-functional teams with diverse technical skill sets to support successful IT project completion; re-plan and adjust project course based on realities of team velocity and dynamic business/user needs. Tasks may include formulating and defining system scope and objectives in accordance with the customer technical requirements; compiling and analyzing technical data; advising management and customers on complex system projects and activities; working closely with customers to define communication systems and equipment requirements; providing instruction on and performing and documenting quality assurance reviews.

Minimum Education: BA/BS Degree

Commercial Job Title: Quality Assurance Specialist

Minimum/General Experience: 4 years

Functional Responsibility: Performs tasks related information technology (IT) projects to promote systems and techniques assuring the quality of products and services including the development of plans and programs for achieving and maintaining product and service quality throughout the product/service life cycle; monitoring operations to prevent the production of defects and to verify adherence to quality plans and requirements; and analysis and investigation of adverse quality trends or conditions and initiation of corrective action. Develop and establish health care IT database related standards, procedures, and methodology for the control, security, and integrity of data to protect the system from internal and external tampering or damage. Serve as electronic record and disaster recovery experts Assist in the development of disaster recovery and back-up data plans; negotiate reciprocal agreements with other system users to protect data from natural disaster or equipment failure. Tasks may include employing quality management systems, tools, and techniques to help organizations transform, including, but not limited to ISO 9000/9001, and the Malcolm Baldrige Quality Award criteria for enterprise health IT systems.

Minimum Education: BA/BS Degree

Commercial Job Title: Subject Matter Expert of IT

Minimum/General Experience: 8 years

Functional Responsibility: Performs tasks for specific engineering and technical experience that is directly relevant to the specific work assigned. Engineering expertise at this level must have been achieved from performing in depth and complex IT projects in more than one life-cycle phase, i.e., strategic planning, concept development and requirements analysis, system design, engineering and integration, test and evaluation, and acquisition and life cycle management. Must be knowledgeable in areas such as: requirements analysis; studies/analysis, system/component integration; interoperability; interconnectivity; structured analysis; design methodologies; design/design analysis, use of design tools and other design techniques; automation principles; test program set development, data base structuring, modeling
techniques, testability, requirements analysis, configuration management/product data management; integrated product team or multi-discipline team; test planning/testing; and, operation, and technical architecture of large and complex IT systems. Proficiency in hardware/software interfaces and integration. Must have a working knowledge of networking and IT hardware and software design criteria, determining what commercial-off-the-shelf (COTS) hardware/software will fit the intended need. Must have practical experience in providing extensive interaction with system/equipment users, managers, other engineers, programmers, analysts, logisticians, technicians, and trainers to ensure a complete approach in providing an engineering solution.

**Minimum Education:** BA/BS Degree

**Commercial Job Title:** Systems Analyst – Junior

**Minimum/General Experience:** 3 years

**Functional Responsibility:** Perform networking and IT systems data collection, modeling, analysis, documentation and product generation. Specific technical expertise may include knowledge/experience with Cisco routing and switching; with VMWare Virtualization (design, migration, and implementation); experience supporting LAN/WAN infrastructures; experience with installing, configuring, and troubleshooting TCP/IP-based networks; experience in troubleshooting network connectivity. The ability to take, organize and translate data into information for studies, reports and documentation. Conduct analyses, including defining parameters of requested data output and analysis. Tasks include to collect, compile and assemble data for financial and analytical reports. Provide research support. Assist in preparation of reports, briefings and documentation of deliverables.

**Minimum Education:** BA/BS Degree

**Commercial Job Title:** Systems Analyst - Senior

**Minimum/General Experience:** 8 years
