On-line access to contract ordering information, terms and conditions, up-to-date pricing, and the option to create an electronic delivery order are available through GSA Advantage!®, a menu-driven database system. The INTERNET address GSA Advantage!® is: GSAAdvantage.gov.

Multiple Award Schedule

**FSC Group:** Information Technology Services  
**FSC Class:** D399

**Contract Number:** 47QTCA18D00HM  
**Current Period:** 8/8/2018 through 8/7/2023

**Price list current as of Modification:** PA-008 effective 01/04/2022  
Prices Shown Herein are Net (discount deducted)

**Contractor:** Optimoz, Inc  
11300 Rockville Pike Ste. 803 Rockville MD 20852  
Phone: (301) 917-9116  
Fax: (240) 465-0373  
E-mail: GovCon@optimoz.com

**Point of Contact:** Kalpesh Patel  
Phone: (443) 386-8350  
E-mail: kalpesh@optimoz.com

**Business Size:** Small Disadvantaged Minority-Owned

For more information on ordering from Federal Supply Schedules go to the GSA Schedules page at GSA.gov.

<td>$500,000.00</td>
</tr>
</tbody>
</table>

3. **Minimum order:** $100.00

4. **Geographic coverage (delivery area):** Worldwide

5. **Points of production:** Same as Contractor Address

6. **Discount from list prices:** Government Net Prices (discounts already deducted.)

7. **Quantity discounts:** None

8. **Prompt payment terms:** Information for Ordering Offices: Prompt payment terms cannot be negotiated out of the contractual agreement in exchange for other concessions. Net 30 Days.

9. **Foreign Items:** None

10a. **Time of Delivery:** Contact Contractor or To Be Determined at the Task Order level

10b. **Expedited Delivery:** Contact Contractor or To Be Determined at the Task Order level

10c. **Overnight and 2-day delivery:** Contact Contractor or To Be Determined at the Task Order level

10d. **Urgent Requirements:** Contact Contractor or To Be Determined at the Task Order level

11. **F.O.B. Points:** Destination

12a. **Ordering Address:** 11300 Rockville Pike, Ste 803, MD 20852
12b. **Ordering procedures**: For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPA’s), are found in Federal Acquisition Regulation (FAR) 8.405-3.

13. **Payment address**: 11300 Rockville Pike, Ste 803, MD 20852

14. **Warranty provision**: Standard commercial warranty terms & conditions.

15. **Export Packing Charges**: Not Applicable

16. **Terms and conditions of rental, maintenance, and repair**: Not Applicable

17. **Terms and conditions of installation**: Not Applicable

18a. **Terms and conditions of repair parts indicating date of parts price lists and any discounts from list prices**: Not Applicable

18b. **Terms and conditions for any other services**: Not Applicable

19. **List of service and distribution points**: Not Applicable

20. **List of participating dealers**: Not Applicable

21. **Preventive maintenance**: Not Applicable

22a. **Special Attributes such as environmental attributes, e.g., recycled content, energy efficiency, and/or reduced pollutants**: Not Applicable

22b. **Section 508 compliance information is available on Electronic and Information Technology (EIT) supplies and services standards can be found at**: [www.Section508.gov/](http://www.Section508.gov/) (As Applicable)

23. **Unique Entity Identifier (UEI) Number**: FB7AZGLR4N57

24. **Notification Regarding Registration in System for Award Management (SAM) Database**: Contractor has an Active Registration in the SAM database.

Labor Category Descriptions

SIN 54151S Labor Category Descriptions

**Application Engineer I**

Researches, collects, and reports information on the ability and capacity of company technology products and software systems. Aids in the design, development, and maintenance of applications and systems, and redesign of existing systems to fulfill the needs of customers. Provides systems functionality and capability analysis. Familiar with standard concepts, practices, and procedures within the technology field. Relies on experience and judgment to plan and accomplish goals.

Works under general supervision; typically reports to a supervisor or manager. A certain degree of creativity and latitude is required.

**Minimum Education/Experience:** Bachelor’s Degree and two (2) years of experience.

**Application Engineer II**

Researches, collects, and reports information on the ability and capacity of company technology products and software systems. Aids in the design, development, and maintenance of applications and systems, and redesign of existing systems to fulfill the needs of customers. Provides systems functionality and capability analysis. Familiar with standard concepts, practices, and procedures within the technology field. Relies on experience and judgment to plan and accomplish goals. Works under general supervision; typically reports to a supervisor or manager. A certain degree of creativity and latitude is required.

**Minimum Education/Experience:** Bachelor’s Degree and four (4) years of experience.

**Application Engineer III**

Researches, collects, and reports information on the ability and capacity of company technology products and software systems. Aids in the design, development, and maintenance of applications and systems, and redesign of existing systems to fulfill the needs of customers. Provides systems functionality and capability analysis. Familiar with standard concepts, practices, and procedures within the technology field. Relies on experience and judgment to plan and accomplish goals. A certain degree of creativity and latitude is required.

**Minimum Education/Experience:** Bachelor’s Degree and six (6) years of experience.

**Application Engineer IV**

Researches, collects, and reports information on the ability and capacity of company technology products and software systems. Aids in the design, development, and maintenance of applications and systems, and redesign of existing systems to fulfill the needs of customers. Provides systems functionality and capability analysis. Familiar with standard concepts, practices, and procedures within the technology field. A certain degree of creativity and latitude is required.

**Minimum Education/Experience:** Bachelor’s Degree and eight (8) years of experience.
Enterprise Architect

Designs and develops complex business solutions using a variety of computer technologies. Independently performs a variety of system design and engineering tasks which are broad in nature and are concerned with design and implementation of major enterprise systems development and integration, including supporting personnel, hardware, software, and support facilities and/or equipment. Considered a Subject Matter Expert (SME) in one or more specific areas of computer system design and networking. A certain degree of creativity and latitude is required.

Minimum Education/Experience: Bachelor’s Degree and eight (8) years of experience.

Project Manager III

Responsible for managing medium-sized IT projects. Prepares implementation plan, coordinates activities, monitors milestones, and provides progress reports. Under specific supervision of the program manager, will perform program analysis and control functions. Must be capable of creation and management of project information related to contractual requirements and cost (profit and loss reporting) for submittal to the program manager for review and approval. Must have a rudimentary understanding of accounting, management, and contract principles. Must be computer literate and be able to use computer aids such as spreadsheets, automated accounting systems, word processing, and graphics systems. A certain degree of creativity and latitude is required.

Minimum Education/Experience: Bachelor’s Degree and eight (8) years of experience.

Quality Assurance I

Responsible for development of project quality assurance plans and the implementation of procedures that conform to the requirements of the contract. Responsible for verifying that each functional component of the project follows a defined process that conforms with contractual requirements. Reports findings to project staff, line management, and the customer, as appropriate. Provides an assessment of how the project's development process is being implemented relative to the defined process and recommends methods to optimize the organization's process. Works under general supervision; typically reports to a supervisor or manager. A certain degree of creativity and latitude is required.

Minimum Education/Experience: Bachelor’s and three (3) years of experience.

Quality Assurance II

Responsible for development of project quality assurance plans and the implementation of procedures that conform to the requirements of the contract. Responsible for verifying that each functional component of the project follows a defined process that conforms with contractual requirements. Reports findings to project staff, line management, and the customer, as appropriate. Provides an assessment of how the project's development process is being implemented relative to the defined process and recommends methods to optimize the organization's process. Works under general supervision; typically reports to a supervisor or manager. A certain degree of creativity and latitude is required.
**Minimum Education/Experience:** Bachelor’s and five (5) years of experience.

**Quality Assurance III**

Responsible for development of project quality assurance plans and the implementation of procedures that conform to the requirements of the contract. Responsible for verifying that each functional component of the project follows a defined process that conforms with contractual requirements. Reports findings to project staff, line management, and the customer, as appropriate. Provides an assessment of how the project's development process is being implemented relative to the defined process and recommends methods to optimize the organization's process. A certain degree of creativity and latitude is required.

**Minimum Education/Experience:** Bachelor’s and seven (7) years of experience.

**Software Engineer/Analyst I**

Provides functional and empirical analysis related to the design, development, and implementation of software operating systems, including but not limited to, utility software development software, and diagnostic software. Participates in the development of test strategies, devices, and systems. Works under general supervision; typically reports to the engineering lead. A certain degree of creativity and latitude is required.

**Minimum Education/Experience:** Requires Bachelor’s degree in computer science, information systems, engineering, business, or other related scientific or technical discipline. Two (2) years of technical analysis experience.

**Software Engineer/Analyst II**

Provides functional and empirical analysis related to the design, development, and implementation of software operating systems, including but not limited to, utility software development software, and diagnostic software. Participates in the development of test strategies, devices, and systems. With minimal supervision, performs technical assignments as directed. Provides assistance and guidance to associates and support staff as directed. Report progress and problems to senior engineering personnel.

**Minimum Education/Experience:** Bachelor’s and four (4) years of experience.

**Subject Matter Expert I**

Responsible for having a basic technical understanding in single or multiple technical disciplines. Provides expert guidance and insight into specific technologies. May serve as facilitator for Integrated Product Team (IPT) meetings. Works under general supervision. Familiar with a specific field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of tasks. A moderate degree of creativity and latitude is expected. Typically reports to program management.

**Minimum Education/Experience:** Required Bachelor’s degree and eight (8) years of experience with at least six (6) years of experience in specific area of expertise. Experience with strategic IT planning.
Subject Matter Expert II

Has advanced understanding of area of expertise. Advises team members of implication of approaches during solution development. Serves as facilitator for Integrated Product Team meetings. Works under general supervision. Familiar with a specific field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of tasks. A wide degree of creativity and latitude is expected. A certain degree of creativity and latitude is required.

Minimum Education/Experience: Bachelor's and ten (10) years of experience.

Subject Matter Expert III

Has advanced technical understanding in single or multiple technical disciplines. Advises team members of implication of approaches during solution development. Will serve as facilitator for Integrated Product Team meetings. Works under general supervision. Familiar with a specific field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of tasks. A wide degree of creativity and latitude is expected. Typically reports to program management.

Minimum Education/Experience: Requires a Master’s degree and at least twelve (12) years of experience.

Subject Matter Expert IV

Has advanced understanding of area of expertise. Advises team members of implication of approaches during solution development. Serves as facilitator for Integrated Product Team meetings. Works under general supervision. Familiar with a specific field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of tasks. A wide degree of creativity and latitude is expected. A certain degree of creativity and latitude is required.

Minimum Education/Experience: Master’s and fifteen (15) years of experience.

DevSecOps Engineer I

Researches, collects, and reports information on the ability and capacity of company technology products and software systems. Aids in the design, development, and maintenance of applications and systems, and redesign of existing systems to fulfill the needs of customers. Provides systems functionality and capability analysis. Familiar with standard concepts, practices, and procedures within the technology field. Relies on experience and judgment to plan and accomplish goals. Performs cloud architecture design, development, security set-up, operations, and cloud infrastructure related work. Works under general supervision; typically reports to a supervisor or manager. A certain degree of creativity and latitude is required.

Minimum Education/Experience: Bachelor’s Degree and two (2) years of experience.

DevSecOps Engineer II

Researches, collects, and reports information on the ability and capacity of company technology products and software systems. Aids in the design, development, and maintenance of applications and systems, and
redesign of existing systems to fulfill the needs of customers. Provides systems functionality and capability analysis. Familiar with standard concepts, practices, and procedures within the technology field. Relies on experience and judgment to plan and accomplish goals. Performs cloud architecture design, development, security set-up, operations, and cloud infrastructure related work. Works under general supervision; typically reports to a supervisor or manager. A certain degree of creativity and latitude is required.

**Minimum Education/Experience:** Bachelor’s Degree and four (4) years of experience.

**DevSecOps Engineer III**

Researches, collects, and reports information on the ability and capacity of company technology products and software systems. Aids in the design, development, and maintenance of applications and systems, and redesign of existing systems to fulfill the needs of customers. Provides systems functionality and capability analysis. Familiar with standard concepts, practices, and procedures within the technology field. Relies on experience and judgment to plan and accomplish goals. Performs cloud architecture design, development, security set-up, operations, and cloud infrastructure related work. A certain degree of creativity and latitude is required.

**Minimum Education/Experience:** Bachelor’s Degree and six (6) years of experience.

**DevSecOps Engineer IV**

Researches, collects, and reports information on the ability and capacity of company technology products and software systems. Aids in the design, development, and maintenance of applications and systems, and redesign of existing systems to fulfill the needs of customers. Provides systems functionality and capability analysis. Familiar with standard concepts, practices, and procedures within the technology field. Performs cloud architecture design, development, security set-up, operations, and cloud infrastructure related work. A certain degree of creativity and latitude is required.

**Minimum Education/Experience:** Bachelor’s Degree and eight (8) years of experience.

**SIN 518210C Labor Category Descriptions**

**Cloud SME IV**

Provides the highest level of cloud computing domain expertise to large scale and complex projects. Expert in providing consultation and strategic guidance to help shape IT strategy and direction for large, complex IT ecosystems.

- Provides technical leadership for technology development and IT operations teams
- Provides intensive analysis of applications and technology platforms to identify the roadblocks for migrating to and modernizing in cloud.
- Works with stakeholders and end-users to identify key application priorities and application components to migrate to cloud.
- Provides strategies for cloud infrastructure automation, monitoring and alerting leveraging on cloud elasticity.
• Focuses on the improvement of Continuous Integration/Continuous Delivery, DevSecOps processes and Cloud Application Life Cycle Management (CALM).
• Provides expertise in container platforms such as Docker, Kubernetes, OpenShift
• Provides expertise in microservices and API architecture.
• Possess strong OS administration skill for the Operating Systems such as Linux, Unix, Windows.
• Prioritizes work based on enterprise need, ability to deliver, and cost.
• Ensures high-quality, on-time delivery of new functionality.
• Provides subject matter expertise in Infrastructure as a Service, Platform as a Service and Software as a Service offerings

Minimum Education: Bachelor’s Degree

Minimum Experience: 8 years

Cloud Solutions Architect IV
Expert in one or more cloud services and comfortable discussing solutions with clients. Interfacing with customers to determine technical requirements, feasibility, and expectations.

• Strategizes with clients to develop solutions based on a variety of criteria including a clear description of services, functionality, scalability, futureproofing, and cost.
• Designs and communicates compelling solutions that urge prospects to take the desired action.
• Designs Cloud-based solutions using cloud services leveraging on well architected framework.
• Implements cloud computing solutions that address cloud security, compliance and governance.
• Designs and implements multi-tier architecture solutions that are highly available and fault tolerant using cloud services.
• Designs and implements effective cloud computing solutions considering an organization’s structure, communications, and operational business processes, including financial management and cost model implications.
• Manages the process of migrating and transitioning to a cloud environment.
• Provides intensive analysis of applications and technology platforms to identify the roadblocks for migrating to and modernizing in cloud.
• Provides expertise in container platforms such as Docker, Kubernetes, OpenShift.
• Provides expertise in microservices and API architecture.
• Focuses on the improvement of Continuous Integration/Continuous Delivery, DevSecOps processes and Cloud Application Life Cycle Management (CALM).
• Possess strong OS administration skill for the Operating Systems such as Linux, Unix, Windows.
• Possess expertise in programming languages such as C#, Python, Java, Bash or JavaScript with excellent written and verbal communication.

Minimum Education: Bachelor’s Degree

Minimum Experience: 8 years
Cloud Solutions Architect III

Expert in one or more cloud services and comfortable discussing solutions with clients. Interfacing with customers to determine technical requirements, feasibility, and expectations.

- Strategizes with clients to develop solutions based on a variety of criteria including a clear description of services, functionality, scalability, futureproofing, and cost.
- Designs and communicates compelling solutions that urge prospects to take the desired action.
- Designs Cloud-based solutions using cloud services leveraging on well architected framework.
- Implements cloud computing solutions that address cloud security, compliance and governance.
- Designs and implements multi-tier architecture solutions that are highly available and fault tolerant using cloud services.
- Designs and implements effective cloud computing solutions considering an organization's structure, communications, and operational business processes, including financial management and cost model implications.
- Manages the process of migrating and transitioning to a cloud environment.
- Provides intensive analysis of applications and technology platforms to identify the roadblocks for migrating to and modernizing in cloud.
- Provides expertise in container platforms such as Docker, Kubernetes, OpenShift.
- Provides expertise in microservices and API architecture.
- Focuses on the improvement of Continuous Integration/Continuous Delivery, DevSecOps processes and Cloud Application Life Cycle Management (CALM).
- Possess strong OS administration skill for the Operating Systems such as Linux, Unix, Windows.
- Possess expertise in programming languages such as C#, Python, Java, Bash or JavaScript with excellent written and verbal communication.

Minimum Education: Bachelor’s Degree

Minimum Experience: 5 years of experience

Cloud Solutions Architect II

Expert in one or more cloud services and comfortable discussing solutions with clients. Interfacing with customers to determine technical requirements, feasibility, and expectations.

- Strategizes with clients to develop solutions based on a variety of criteria including a clear description of services, functionality, scalability, futureproofing, and cost.
- Designs and communicates compelling solutions that urge prospects to take the desired action.

**Minimum Education**: Bachelor’s Degree

**Minimum Experience**: 4 years

**Cloud Solutions Architect I**

Expert in one or more cloud services and comfortable working in a team environment to develop and discuss solutions.

• Possess good understanding and hands on knowledge of cloud services
• Designs Cloud-based solutions using cloud services leveraging on well architected framework.
• Implements cloud computing solutions that address cloud security, compliance and governance.
• Designs and implements multi-tier architecture solutions that are highly available and fault tolerant using cloud services.
• Designs and implements effective cloud computing solutions considering an organization's structure, communications, and operational business processes, including financial management and cost model implications.
• Provides expertise in setting up Continuous Integration/Continuous Delivery, DevSecOps processes.
• Provides expertise in container platforms such as Docker, Kubernetes, OpenShift.
• Provides expertise in microservices and API architecture.
• Possess strong OS administration skill for the Operating Systems such as Linux, Unix, Windows.
• Possess expertise in programming languages such as C#, Python, Java, Bash or JavaScript with excellent written and verbal communication.

**Minimum Education**: Bachelor’s Degree

**Minimum Experience**: 3 years

**Cloud Database Administrator II**

Expert in cloud database administration with proficiency in emerging and cloud-native relational and non-relational databases with good understanding of other cloud computing services.

• Possess strong knowledge in
  • one or more of the databases such as Oracle, PostgreSQL, MySQL, MS SQL Server, MongoDB, DynamoDB, Cassandra
network topologies, operating systems such as Linux, Unix and Windows

CI/CD and DevOps processes

Shell Scripting

Setting up ETL processes

- Provides technical expertise for database design, development, implementation, information storage and retrieval
- Provides database administration including access management
- Monitors and troubleshoots site performance, reliability, and availability issues
- Stay abreast of best practices and procedures regarding the distributed systems
- Develops and maintains disaster recovery procedures
- Advises on, and engage in, developing the security posture of the cloud environment

Minimum Education: Bachelor’s Degree

Minimum Experience: 4 years

Cloud Database Administrator I

Expert in cloud database administration with proficiency in emerging and cloud-native relational and non-relational databases with good understanding of other cloud computing services.

- Possess strong knowledge in
  - one or more of the databases such as Oracle, PostgreSQL, MySQL, MS SQL Server, MongoDB, DynamoDB, Cassandra
  - network topologies
  - operating systems such as Linux, Unix and Windows
  - CI/CD and DevOps processes
  - Shell Scripting
  - Setting up ETL processes
- Provides technical expertise for database design, development, implementation, information storage and retrieval
- Provides database administration including access management
- Monitors and troubleshoots site performance, reliability, and availability issues
- Stay abreast of best practices and procedures regarding the distributed systems
- Develops and maintains disaster recovery procedures
- Advises on, and engage in, developing the security posture of the cloud environment

Minimum Education: Bachelor’s Degree

Minimum Experience: 3 years

Cloud Developer II

Expert in application development leveraging on the cloud infrastructure and Infrastructure As Code practices with good knowledge of cloud services.
• Designs and builds highly available applications
• Designs and develops API services/consumers (microservices) leveraging on technologies such as REST and GraphQL
• Possess expertise in one or more programming languages such as Java, Python, C, C++, NodeJS, Ruby, PHP, Solidity
• Designs and develops application test automation and integrates it into CI pipeline
• Possess expertise in DevOps tools such as Jenkins, Ansible, Chef, Terraform, Git
• Designs and builds CI/CD pipelines and integrate the processes with cloud services leveraging in Infrastructure As Code
• Conducts code review via merge/pull requests and offer recommendations to other developers
• Performs the implementation, operational support, and optimization of the cloud infrastructure
• Creates documentation to provide architectural overview of the system
• Troubleshoots any issues with the application and/or cloud infrastructure

Minimum Education: Bachelor’s Degree
Minimum Experience: 4 years

Cloud Developer I

Expert in application development leveraging on the cloud infrastructure and Infrastructure As Code practices with good knowledge of cloud services.

• Designs and builds highly available applications
• Designs and develops API services/consumers (microservices) leveraging on technologies such as REST and GraphQL
• Possess expertise in one or more programming languages such as Java, Python, C, C++, NodeJS, Ruby, PHP, Solidity
• Designs and develops application test automation and integrates it into CI pipeline
• Possess expertise in DevOps tools such as Jenkins, Ansible, Chef, Terraform, Git
• Designs and builds CI/CD pipelines and integrate the processes with cloud services leveraging in Infrastructure As Code
• Conducts code review via merge/pull requests and offer recommendations to other developers
• Performs the implementation, operational support, and optimization of the cloud infrastructure
• Creates documentation to provide architectural overview of the system
• Troubleshoots any issues with the application and/or cloud infrastructure

Minimum Education: Bachelor’s Degree
Minimum Experience: 2 years

Cloud Blockchain Administrator IV

Expert in setting up and administering blockchain in cloud and non-cloud environment with solid knowledge in cloud computing services.
• Architects and builds highly available private blockchain network utilizing blockchain technology such as Ethereum.
• Provides expertise in setting up blockchain network in container environment such as Kubernetes, OpenShift, EKS, GKE.
• Provides strong understanding in blockchain development.
• Provides expertise in Solidity and Ethereum.
• Provides leadership to blockchain development.
• Provides expertise in System administration and cloud infrastructure automation.
• Possess expertise in DevOps tools such as Jenkins, Ansible, Chef, Terraform, Git.
• Designs and develops API services/consumers (microservices) leveraging on technologies such as REST and GraphQL.
• Possess expertise in one or more programming languages such as Java, Python, C, C++, NodeJS, Ruby, PHP.

Minimum Education: Bachelor’s Degree

Minimum Experience: 7 years

Cloud Blockchain Administrator II

Expert in setting up and administering blockchain in cloud and non-cloud environment with solid knowledge in cloud computing services.

• Architects and builds highly available private blockchain network utilizing blockchain technology such as Ethereum.
• Provides expertise in setting up blockchain network in container environment such as Kubernetes, OpenShift, EKS, GKE.
• Provides strong understanding in blockchain development.
• Provides expertise in Solidity and Ethereum.
• Provides leadership to blockchain development.
• Provides expertise in System administration and cloud infrastructure automation.
• Possess expertise in DevOps tools such as Jenkins, Ansible, Chef, Terraform, Git.
• Designs and develops API services/consumers (microservices) leveraging on technologies such as REST and GraphQL.
• Possess expertise in one or more programming languages such as Java, Python, C, C++, NodeJS, Ruby, PHP.

Minimum Education: Bachelor’s Degree

Minimum Experience: 4 years

Cloud Project Manager III

Responsible for managing IT projects with good knowledge of the cloud services. Prepares implementation plan, coordinates activities, monitors milestones, and provides progress reports. Under specific supervision of the program manager, will perform program analysis and control functions.
• Conducts financial and budgetary analysis to define project worth and to ascertain which system best fits user needs and company standards.
• Selects project team members and assigns tasks and responsibilities.
• Provides direction and technical guidance to project team members; communicates job expectations; and plans, monitors, and appraises job results.
• Plans, initiates, coordinates, and enforces systems, policies, and procedures.
• Manages, coordinates, and establishes priorities for complete life-cycle of projects including the planning, design, programming, testing, and implementation of business solutions designed to meet requirements of various departments in the company, such as distribution, finance, and manufacturing.
• Designs project plans, which identify needs and define major tasks and milestones, based on scope, resources, budget, and personnel.
• Determines project needs and acquires resources required for the success of the project.
• Coordinates the development of new systems and/or applications projects, the modification of existing systems or applications, or changes in current methods or techniques.

Minimum Education: Bachelor’s Degree

Minimum Experience: 6 years

Cloud Security Analyst II

Expert in IT security matters with strong knowledge in cloud computing, networking and database services.

• Analyzes and provides risk mitigation recommendations.
• Prepares, validates and maintains system security plan, risk assessment, contingency plan, and privacy impact assessment.
• Provides expertise in NIST Risk Management Framework and FedRAMP requirements.
• Works with the development and infrastructure experts to develop and maintain security documentation required for Authority to Operate (ATO).
• Ensures compliance with security policies, standards, and operations.
• Manages POA&M to provide remediation and corrective action plans.
• Conducts cybersecurity engineering by generating recommendations, designing, implementing, and transitioning solutions to improve cybersecurity posture, allow for mission assurance, and comply with all Agency policies.
• Maintains a strong understanding of cybersecurity, networking architecture, servers, systems design, virtual hosts, and configuration management and licensing.
• Provides expertise to contribute to the security assessment and compliance activities to maintain accreditation to include mitigation and documentation.
• Analyze and research vulnerabilities to identify risk to provide early warning related to a variety of cyber threats.
• Provides expertise in cloud security strategy, cloud provider ecosystems infrastructure, application and data designs in hybrid, cloud or multi-cloud environments.
• Possess clear understanding of security protocols and standards and have experience with software security architectures.

Minimum Education: Bachelor’s Degree
Minimum Experience: 5 years

Cloud Scrum Master

Works closely with the teams that design, build, and manage infrastructure solutions in cloud to:

- Streamline operations and processes, and further the adoption of Agile best practices.
- Develop processes and capabilities for a Cloud service offering to include various financial functions such as budgeting, auditing, forecasting, reporting and analysis for cloud usage.
- Lead technical and financial analysis to help Business and Product Owners determine the impact of cloud hosting by identifying cost savings design options and usage trends that impact projected spending.
- Maintain current knowledge of relevant optimization techniques, best practices, policies, and procedures to share via documented artifacts or verbally in meetings with leadership, product teams, and infrastructure engineer.
- Guide and coach teams on Agile and Scrum practices and principles to deliver high quality products and services to our customers. Facilitating and supporting all scrum events such as Sprint Planning, Daily Scrum, Sprint Review, and Sprint Retrospective.
- Conduct daily stand-up meeting to report accomplishments, plans for the day, and any roadblocks encountered.

Minimum Education: Bachelor’s Degree

Minimum Experience: 4 years

Cloud Technical Writer

Focuses on creating product and API documentation for internal and external audiences.

- Plans, designs, and builds documentation to support business.
- Works closely with engineering and product management teams to understand product capabilities and document functionality, usage, and limitations.
- Produces high-quality, easily consumable, customer-focused online content, including documentation, knowledge base articles, and tutorials.
- Creates UI and API documentation.
- Participates in software design discussions and reviews.
- Provides estimates for resource and project planning purposes for documentation tasks.

Minimum Education: Bachelor’s Degree

Minimum Experience: 2 years
Allowable Substitutions of Education & Experience

<table>
<thead>
<tr>
<th>Educational Equivalency/Substitution for All Labor Categories</th>
</tr>
</thead>
<tbody>
<tr>
<td>Four (4) years of relevant experience may be substituted for a bachelor’s degree</td>

<tr>
<td>Six (6) years of relevant experience may be substituted for a Master’s degree</td>
</tr>
<tr>
<td>Eight (8) years of relevant experience may be substituted for a PhD</td>
</tr>
</tbody>
</table>

Service Contract Labor Standards: The Service Contract Labor Standards (SCLS), formerly known as the Service Contract Act (SCA), is applicable to this contract as it applies to the entire Multiple Award Schedule (MAS) and all services provided. While no specific labor categories have been identified as being subject to SCLS/SCA due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CFR 541.300), this contract still maintains the provisions and protections for SCLS/SCA eligible labor categories. If and/or when the contractor adds SCLS/SCA labor categories to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCLS/SCA matrix identifying the GSA labor category titles, the occupational code, SCLS/SCA labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.
