</table>

1b. Identification of the lowest priced model number and lowest unit price for that model for each special item
number awarded in the contract. This price is the Government price based on a unit of one, exclusive of any
quantity/dollar volume, prompt payment, or any other concession affecting price. Those contracts that have
unit prices based on the geographic location of the customer, should show the range of the lowest price, and
cite the areas to which the prices apply. N/A

1c. If the Contractor is proposing hourly rates, a description of all corresponding commercial job titles,
experience, functional responsibility and education for those types of employees or subcontractors who will
perform services shall be provided. If hourly rates are not applicable, indicate “Not applicable” for this
item. See pricing for Special Item Number 54151S
2. Maximum order: $500,000
3. Minimum order: $100
5. Point(s) of production (city, county, and State or foreign country): Same as company address
6. Discount from list prices or statement of net price: Prices listed are net (discounts already deducted)
7. Volume discounts:
   1.0 % - 500K - 1.5M of annualized revenue
   1.5% - 1.5M - 2.5M of annualized revenue
   2.5% - 2.5M - 5M of annualized revenue
   3% - over 5M of annualized revenue
8. Prompt payment terms: None – Net 30 days
9a. Notification that Government purchase cards are accepted at or below the micro-purchase threshold.
9b. Notification that Government purchase cards are accepted or not accepted above the micro-purchase threshold.
10. Foreign items (list items by country of origin): Not Applicable
11a. Time of delivery: As Negotiated
11b. Expedited Delivery: Contact Contractor
11c. Overnight and 2-day delivery. The Contractor will indicate whether overnight and 2-day delivery are available. Also, the Contractor will indicate that the schedule customer may contact the Contractor for rates for overnight and 2-day delivery: Contact Contractor
11d. Urgent Requirements. The Contractor will note in its price list the “Urgent Requirements” clause of its contract and advise agencies that they can also contact the Contractor’s representative to effect a faster delivery: Contact Contractor
12. F.O.B. point: Destination
13a. Ordering address: Same as contractor
13b. Ordering procedures: For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPA’s) are found in Federal Acquisition Regulation (FAR) 8.405-3.
14. Payment address: Same as company address
15. Warranty provision: Contractor’s standard commercial warranty
16. Export packing charges, if applicable: Not Applicable
17. Terms and conditions of Government purchase card acceptance (any thresholds above the micro-purchase level): Contact Contractor
18. Terms and conditions of rental, maintenance, and repair (if applicable): Not Applicable
19. Terms and conditions of installation (if applicable): Not Applicable

20. Terms and conditions of repair parts indicating date of parts price lists and any discounts from list prices (if applicable): Not Applicable

20a. Terms and conditions for any other services (if applicable): Not Applicable

21. List of service and distribution points (if applicable): Not Applicable

22. List of participating dealers (if applicable): Not Applicable

23. Preventive maintenance (if applicable): Not Applicable

24a. Special attributes such as environmental attributes (e.g., recycled content, energy efficiency, and/or reduced pollutants): Not Applicable

24b. If applicable, indicate that Section 508 compliance information is available on Electronic and Information Technology (EIT) supplies and services and show where full details can be found (e.g. contractor’s website or other location.) The EIT standards can be found at: www.section508.gov/.

25. Unique Entity Identifier (UEI): EFTXZBTE36E8

26. Notification regarding registration in the System for Award Management. CAGE Code: 3DLB4
1. **SCOPE**
   a. The prices, terms and conditions stated under Special Item Number 54151S Information Technology Professional Services apply exclusively to IT Professional Services within the scope of this Information Technology Schedule.
   b. The Contractor shall provide services at the Contractor’s facility and/or at the ordering activity location, as agreed to by the Contractor and the ordering activity.

2. **PERFORMANCE INCENTIVES 1-FSS-60 Performance Incentives (April 2000)**
   a. Performance incentives may be agreed upon between the Contractor and the ordering activity on individual fixed price orders or Blanket Purchase Agreements under this contract.
   b. The ordering activity must establish a maximum performance incentive price for these services and/or total solutions on individual orders or Blanket Purchase Agreements.
   c. Incentives should be designed to relate results achieved by the contractor to specified targets. To the maximum extent practicable, ordering activities shall consider establishing incentives where performance is critical to the ordering activity’s mission and incentives are likely to motivate the contractor. Incentives shall be based on objectively measurable tasks.

3. **ORDER**
   a. Agencies may use written orders, EDI orders, blanket purchase agreements, individual purchase orders, or task orders for ordering services under this contract. Blanket Purchase Agreements shall not extend beyond the end of the contract period; all services and delivery shall be made, and the contract terms and conditions shall continue in effect until the completion of the order. Orders for tasks which extend beyond the fiscal year for which funds are available shall include FAR 52.232-19 (Deviation – May 2003) Availability of Funds for the Next Fiscal Year. The purchase order shall specify the availability of funds and the period for which funds are available.
   b. All task orders are subject to the terms and conditions of the contract. In the event of conflict between a task order and the contract, the contract will take precedence.

4. **PERFORMANCE OF SERVICES**
   a. The Contractor shall commence performance of services on the date agreed to by the Contractor and the ordering activity.
   b. The Contractor agrees to render services only during normal working hours, unless otherwise agreed to by the Contractor and the ordering activity.
   c. The ordering activity should include the criteria for satisfactory completion for each task in the Statement of Work or Delivery Order. Services shall be completed in a good and workmanlike manner.
   d. Any Contractor travel required in the performance of IT Services must comply with the Federal Travel Regulation or Joint Travel Regulations, as applicable, in effect on the date(s) the travel is performed. Established Federal Government per diem rates will apply to all Contractor travel. Contractors cannot use GSA city pair contracts.

5. **STOP-WORK ORDER (FAR 52.242-15) (AUG 1989)**
   a. The Contracting Officer may, at any time, by written order to the Contractor, require the Contractor to stop all, or any part, of the work called for by this contract for a period of 90 days after the order is delivered to the Contractor, and for any further period to which the parties may agree. The order shall be specifically identified as a stop-work order issued under this clause. Upon receipt of the order, the Contractor shall immediately comply with its terms and take all reasonable steps to minimize the incurrence of costs allocable to the work covered by the order during the period of work stoppage. Within a period of 90 days after a stop-work is delivered to the Contractor, or
within any extension of that period to which the parties shall have agreed, the Contracting Officer shall either-

(1) Cancel the stop-work order; or
(2) Terminate the work covered by the order as provided in the Default, or the Termination for Convenience of the Government, clause of this contract.

b. If a stop-work order issued under this clause is canceled or the period of the order or any extension thereof expires, the Contractor shall resume work. The Contracting Officer shall make an equitable adjustment in the delivery schedule or contract price, or both, and the contract shall be modified, in writing, accordingly, if-

(1) The stop-work order results in an increase in the time required for, or in the Contractor's cost properly allocable to, the performance of any part of this contract; and
(2) The Contractor asserts its right to the adjustment within 30 days after the end of the period of work stoppage; provided, that, if the Contracting Officer decides the facts justify the action, the Contracting Officer may receive and act upon the claim submitted at any time before final payment under this contract.

c. If a stop-work order is not canceled and the work covered by the order is terminated for the convenience of the Government, the Contracting Officer shall allow reasonable costs resulting from the stop-work order in arriving at the termination settlement.

d. If a stop-work order is not canceled and the work covered by the order is terminated for default, the Contracting Officer shall allow, by equitable adjustment or otherwise, reasonable costs resulting from the stop-work order.

6. INSPECTION OF SERVICES

7. RESPONSIBILITIES OF THE CONTRACTOR
The Contractor shall comply with all laws, ordinances, and regulations (Federal, State, City, or otherwise) covering work of this character. If the end product of a task order is software, then FAR 52.227-14 (Dec 2007) Rights in Data – General, may apply.

8. RESPONSIBILITIES OF THE ORDERING ACTIVITY
Subject to security regulations, the ordering activity shall permit Contractor access to all facilities necessary to perform the requisite IT Professional Services.

9. INDEPENDENT CONTRACTOR
All IT Professional Services performed by the Contractor under the terms of this contract shall be as an independent Contractor, and not as an agent or employee of the ordering activity.

10. ORGANIZATIONAL CONFLICTS OF INTEREST
a. Definitions.
“Contractor” means the person, firm, unincorporated association, joint venture, partnership, or corporation that is a party to this contract.
“Contractor and its affiliates” and “Contractor or its affiliates” refers to the Contractor, its chief executives, directors, officers, subsidiaries, affiliates, subcontractors at any tier, and consultants and any joint venture involving the Contractor, any entity into or with which the Contractor subsequently merges or affiliates, or any other successor or assignee of the Contractor.
An “Organizational conflict of interest” exists when the nature of the work to be performed under a proposed ordering activity contract, without some restriction on ordering activities by the Contractor and its affiliates, may either (i) result in an unfair competitive advantage to the Contractor or its affiliates or (ii) impair the Contractor’s or its affiliates’ objectivity in performing contract work.
b. To avoid an organizational or financial conflict of interest and to avoid prejudicing the best interests of the ordering activity, ordering activities may place restrictions on the Contractors, its affiliates, chief executives, directors, subsidiaries and subcontractors at any tier when placing orders against schedule contracts. Such restrictions shall be consistent with FAR 9.505 and shall be designed to avoid, neutralize, or mitigate organizational conflicts of interest that might otherwise exist in situations related to individual orders placed against the schedule contract. Examples of situations, which may require restrictions, are provided at FAR 9.508.

11. INVOICES
The Contractor, upon completion of the work ordered, shall submit invoices for IT Professional services. Progress payments may be authorized by the ordering activity on individual orders if appropriate. Progress payments shall be based upon completion of defined milestones or interim products. Invoices shall be submitted monthly for recurring services performed during the preceding month.

12. PAYMENTS
For firm-fixed price orders the ordering activity shall pay the Contractor, upon submission of proper invoices or vouchers, the prices stipulated in this contract for service rendered and accepted. Progress payments shall be made only when authorized by the order. For time-and-materials orders, the Payments under Time-and-Materials and Labor-Hour Contracts at FAR 52.212-4 (MAR 2009) (ALTERNATE I – OCT 2008) (DEVIATION I – FEB 2007) applies to time-and-materials orders placed under this contract. For labor-hour orders, the Payment under Time-and-Materials and Labor-Hour Contracts at FAR 52.212-4 (MAR 2009) (ALTERNATE I – OCT 2008) (DEVIATION I – FEB 2007) applies to labor-hour orders placed under this contract. 52.216-31(Feb 2007) Time-and-Materials/Labor-Hour Proposal Requirements—Commercial Item Acquisition As prescribed in 16.601(e)(3), insert the following provision:

a. The Government contemplates award of a Time-and-Materials or Labor-Hour type of contract resulting from this solicitation.

b. The offeror must specify fixed hourly rates in its offer that include wages, overhead, general and administrative expenses, and profit. The offeror must specify whether the fixed hourly rate for each labor category applies to labor performed by—
   (1) The offeror;
   (2) Subcontractors; and/or
   (3) Divisions, subsidiaries, or affiliates of the offeror under a common control.

13. RESUMES
Resumes shall be provided to the GSA Contracting Officer or the user ordering activity upon request.

14. INCIDENTAL SUPPORT COSTS
Incidental support costs are available outside the scope of this contract. The costs will be negotiated separately with the ordering activity in accordance with the guidelines set forth in the FAR.

15. APPROVAL OF SUBCONTRACTS
The ordering activity may require that the Contractor receive, from the ordering activity's Contracting Officer, written consent before placing any subcontract for furnishing any of the work called for in a task order.

16. DESCRIPTION OF IT PROFESSIONAL SERVICES AND PRICING
See Labor Category descriptions included herein.
• Bachelor’s Acceptable Substitutes Includes:
  o A.A. and 2 years additional work experience in the specified field in the delivery/task order.
  o No degree and 4 years additional work experience in the specified field in the delivery/task order.

• Master’s Acceptable Substitute Includes:
  o Bachelor’s Degree and 2 years additional work experience in the specified field in the delivery/task order.
  o A.A. and 4 years additional work experience in the specified field in the delivery/task order.
  o No Degree and 6 years additional work experience in the specified field in the delivery/task order.

**Project Manager**

Minimum/General Experience: 8 years experience, of which at least 5 years must be specialized as a Project Manager. Specialized experience includes: complete co-ordinate project development from inception to deployment, demonstrated ability to provide guidance and direction in the tasks similar to the sample tasks provided in the statement of work, proven expertise in the management and control of funds and resources, demonstrated capability in managing multi-task contracts of this type and complexity. General experience includes increasing responsibilities in information systems design and management

Functional Responsibility: Provides technical direction for the complete systems development effort. May serve as a technical authority for a design area. As a staff specialist or consultant, resolves unique and unyielding systems problems using new technology. Can complete tasks within estimated time frames and budget constraints. Schedules and assigns duties to Project Managers. Interacts with government management personnel.

Education: 4 year degree in Computer Science or a related field

**Sr Project Manager**

Minimum/General Experience: 10 years experience, of which at least six years must be specialized as a Project Manager. Specialized experience includes: complete co-ordinate project development from inception to deployment, demonstrated ability to provide guidance and direction in the tasks similar to the sample tasks provided in the statement of work, proven expertise in the management and control of funds and resources, demonstrated capability in managing multi-task contracts of this type and complexity. General experience includes increasing responsibilities in information systems design and management
Functional Responsibility: Provides technical direction for the complete systems development effort. May serve as a technical authority for a design area. As a staff specialist or consultant, resolves unique and unyielding systems problems using new technology. Can complete tasks within estimated time frames and budget constraints. Schedules and assigns duties to Project Managers. Interacts with government management personnel.

Education: 4 year degree in Computer Science or a related field

Sr. Program Manager

Minimum/General Experience: Ten years experience, of which at least seven years must be supervisory experience. Must have the ability to manage and ensure the successful completion of multiple technical tasks in assigned program(s). Must have the ability to recruit, hire, manage, supervise, train, schedule, coordinate, and evaluate staff as assigned.

Functional Responsibility: Serves as the contractor’s contract manager, and shall be the contractor’s authorized interface with the Government Contracting Officer (CO), the Contracting Officer’s Representative (COR), government management personnel and customer agency representatives. Responsible for formulating and enforcing work standards, assigning contractor schedules, reviewing work discrepancies, supervising contractor personnel and communicating policies, purposes, and goals of the organization to subordinates. Shall be responsible for the overall contract performance and shall not serve in any other capacity. Ability to manage and ensure the successful completion multiple technical tasks in assigned program(s).

Education: 4 year degree in Computer Science or a related field

Systems Engineer

Minimum/General Experience: Three years experience of which at least one year must be specialized. Specialized experience includes: analytically solving workflows, organization, and/or planning problems. General experience includes increasing responsibilities in systems engineering.

Functional Responsibility: Designs software tools and subsystems to support software reuse and domain analysis. Interprets software requirements and design specifications to code, and integrates and tests software components.

Education: 4 year degree in Computer Science or a related field

Sr Software Engineer

Minimum/General Experience: 6 years directly related experience in software engineering, including the
design, coding, testing, and documentation of computer programs. Also requires knowledge of the fundamental concepts, practices and procedures used in software engineering and applications and systems development.

Functional Responsibility: Participates in the design, development, analysis, and implementation of software operating systems and software application programs; works under general supervision; performs software operating systems and application engineering, including full life cycle design and development; works from specifications to develop and modify operating systems and software applications; participates in the design, coding, testing, debugging, and documentation of programs; participates in the definition of limited design specifications and parameters; assists engineers or analysts with the hardware/software integration of the application or utility into software operating systems; analyzes system architecture requirements; performs requirements acquisition and definition and data analysis.

Education: 4 year degree in Computer Science or a related field

Software Architect

Minimum/General Experience: 8 or more years directly related experience in the design, writing, and testing of computer programs or database development, with four or more years experience in software operating systems architecture. Also requires expert knowledge of the principles, practices, and procedures used in all phases of full life cycle applications and systems development, engineering, programming, and analysis at a highly technical level.

Functional Responsibility: Establishes state-of-the-art techniques for designing, developing, modifying and troubleshooting highly complex software operating systems and applications architectures; defines complex design specifications and parameters; identifies and directs resolution of complex hardware/software interface issues; is recognized as a subject matter expert in all areas of software engineering, including emerging technologies; directs the development of systems specifications and technical documentation; may serve as project lead, either working independently in a technical role in field of specialization, or providing work leadership with management or supervisory responsibility for the group; responsible for task cost, schedule and level of effort estimates; reports project progress directly to senior management; performs business development services; may provide expertise to multiple projects and tasks; may supervise and direct the work of assigned staff.

Education: 4 year degree in Computer Science or a related field

Sr Software Architect

Minimum/General Experience: Ten or more years directly related experience in the design, writing, and testing of computer programs or database development, with four or more years experience in software operating systems architecture. Also requires expert knowledge of the principles, practices, and procedures used in all phases of full life cycle applications and systems development, engineering,
programming, and analysis at a highly technical level.

Functional Responsibility: Establishes state-of-the-art techniques for designing, developing, modifying and troubleshooting highly complex software operating systems and applications architectures; defines complex design specifications and parameters; identifies and directs resolution of complex hardware/software interface issues; is recognized as a subject matter expert in all areas of software engineering, including emerging technologies; directs the development of systems specifications and technical documentation; may serve as project lead, either working independently in a technical role in field of specialization, or providing work leadership with management or supervisory responsibility for the group; responsible for task cost, schedule and level of effort estimates; reports project progress directly to senior management; performs business development services; may provide expertise to multiple projects and tasks; may supervise and direct the work of assigned staff.

Education: 4 year degree in Computer Science or a related field

Information Security Specialist

Minimum/General Experience: 7 years experience, of which at least eight must be information security/Information Assurance (IA) experience. Must have experience in security administration, evaluation of security/Information Assurance product capabilities, assessment and policy development. Must have a solid understanding of federal information security/assurance policies, standards and regulations.

Functional Responsibility:
Gathers and organizes technical information about an organization’s mission goals and needs, IT infrastructure, and existing security/IA products. Assists in developing security/IA policies, procedures, and standards. Responsibilities will include working with the customer to minimize risks and assess and secure networks. Evaluates and recommends security products for various platforms and initiatives. May act as a project leader and provide technical leadership and guidance.

Education: 4 year degree in Computer Science or a related field

Sr Information Security Specialist

Minimum/General Experience: Ten years experience, of which at least eight must be information security/Information Assurance (IA) experience. Must have experience in security administration, evaluation of security/Information Assurance product capabilities, assessment and policy development. Must have a solid understanding of federal information security/assurance policies, standards and regulations.

Functional Responsibility: Gathers and organizes technical information about an organization’s mission goals and needs, IT infrastructure, and existing security/IA products. Assists in developing security/IA policies, procedures, and standards. Responsibilities will include working with the customer to
minimize risks and assess and secure networks. Evaluates and recommends security products for various platforms and initiatives. May act as a project leader and provide technical leadership and guidance.

Education: 4 year degree in Computer Science or a related field

**Sr Database Developer**

Minimum/General Experience: 6 years directly related experience in the design, maintenance, and coding of databases. Also requires knowledge of the principles, methods, and techniques used in all phases of database development, coding, and design, including business analysis, event modeling, logical and physical database design, data access analysis and design, DBMS optimization, archive and recovery strategy, load strategy design and implementation, security, and change management

Functional Responsibility: Designs, maintains, enhances, and codes relational databases; analyzes and determines information needs and elements, data relationships and attributes, data flow and storage requirements, and data output and reporting capabilities; develops data modeling and participates in data acquisition and access analysis and design, and archive, recovery, and load strategy design and implementation; coordinates new data development ensuring consistency and integration with existing data warehouse structure; reviews requests for data and data usage, researches data sources for new and better data feeds; participates in continuous improvement efforts in enhancing performance and providing increased functionality; designs data structures to accommodate database production, storage, maintenance, and accessibility; develops screens and queries; tests designed applications; performs upgrades and maintenance of hardware and software; provides technical support and guidance to users.

Education: 4 year degree in Computer Science or a related field

**Programmer/Analyst**

Minimum/General Experience: Three years experience in computer programming. Depending on the job assignment, knowledge of or certification in specific applications or processes may be required in the following areas: Web technologies, design technologies, specific programming languages, authoring languages and systems, and Modeling and Simulation (M&S) technologies, processes, and tools.

Functional Responsibility: Generates new code and corrects, converts, and/or modifies existing code to meet documented standards; designs new and/or redesigns and maintains existing software products; identifies client needs and requirements based on evaluation of client documentation and interviews; performs data and technical analysis; performs a variety of testing procedures on assigned products, analyzes test results, and corrects problems; prepares test scripts and descriptions and examines to locate necessary modifications.

Education: 4 year degree in Computer Science or a related field

**SR Programmer/Analyst**
Minimum/General Experience: Five years experience in computer programming. Depending on the job assignment, knowledge of or certification in specific applications or processes may be required in the following areas: Web technologies, design technologies, specific programming languages, authoring languages and systems, and Modeling and Simulation (M&S) technologies, processes, and tools.

Functional Responsibility: Participates in all phases of software development, including system design, analysis, architecture, and engineering; programs, designs, analyzes, codes, implements, and tests software applications, modules, and databases in various languages, including those associated with scientific, technical, or engineering problems; performs process analyses in order to recommend improvements; performs system, network, and/or database administration, analysis, design, implementation, and testing; analyzes and documents client needs and requirements; provides technical support including providing technical solutions and training; writes, modifies, and maintains software documentation and specifications.

Education: 4 year degree in Computer Science or a related field

SR Web Developer

Minimum/General Experience: Eight years experience, of which at least two years must include technical leadership experience and at least four years experience in software development, installation, and modification in an online environment.

Functional Responsibility: Designs and develops well-integrated and cost-effective solutions for internal and external Webs; works closely with client project managers and technical leaders to understand customers’ business objectives and systems requirements; designs and develops Web infrastructures; designs and implements an intranet strategy for authorization of users to access controlled components; designs relational databases to perform well logically and physically for decision support; coordinates enhancements and maintenance of Web systems and sites; provides recommendations for server operating systems, hardware requirements and encryption standards for communications to and from secure servers; provides technical advice and expertise to Webmasters and Web developers in the installation, acceptance testing, and evaluation of newly released and beta software; may serve as a functional/technical team or task lead.

Education: 4 year degree in Computer Science or a related field

Systems Analyst
Minimum/General Experience: Three years of computer experience in assignments of a technical nature working under close supervision and direction. Must have at least one year experience in analyzing applications on large-scale on mid-tier computers (or LAN-based).

Functional Responsibility: Develops requirements for information systems form a project's inception to conclusion. Develops required specifications for simple to moderately complex systems. Assists senior computer systems analyst in preparing input and test data for the proposed system.

Education: 4 year degree in Computer Science or a related field

**SR Systems Analyst**

Minimum/General Experience: Eight years of computer experience in assignments of a technical nature working under close supervision and direction. Must have at least one year experience in analyzing applications on large-scale on mid-tier computers (or LAN-based).

Functional Responsibility: Analyzes and evaluates user needs and identifies resources required for each task to determine functional requirements; conceptualizes, develops, and implements complex systems designed to meet client requirements; defines systems objectives and prepares system design specifications to meet requirements; designs, develops, implements, and tests new systems or modifies existing systems that meet the user’s needs; codes applications and tests to software requirements; writes or updates software specifications; analyzes procedures and systems to refine their formulation and convert to programmable formats; analyzes data requirements to determine data source and destinations; coordinates with client to define problem, determine data availability, report requirements, and resolve system design problems; creates logical data models based on functional requirements; performs quality review of specifications for internal and external delivery; troubleshoots and provides technical support and solutions to users; develops analytical tools for use in the design and redesign of programs as assigned; may serve as a technical team or task lead.

Education: 4 year degree in Computer Science or a related field

**Network Engineer**

Minimum/General Experience: 5 years related network design/administration experience. Also requires knowledge of the principles, methods, and techniques used in network administration and engineering plus knowledge of and ability to use relevant hardware, software and other equipment. Certification in specific applications may be required, depending on job assignment.
Functional Responsibility: Analyzes local and wide area network systems, including planning, designing, evaluating, selecting, and upgrading operating systems and protocol suites and configuring communication media with concentrators, bridges, and other devices; resolves interoperability problems to obtain operations across all platforms including email, file transfer, multimedia, teleconferencing, and the like; configures systems to user requirements; supports the acquisition of hardware and software as well as subcontractor services as needed; performs various tests and documents results; administers and maintains local and wide area networks; provides technical support and troubleshooting to users; plans network layout design; may administer network security.

Education: 4 year degree in Computer Science or a related field

**Network Administrator**

Minimum/General Experience: 3 years experience. Also requires knowledge of the principles, methods, and techniques used in network troubleshooting and support as well as knowledge of operating systems and applications and network management. Must have working knowledge of current technologies and products for Web services and security.

Functional Responsibility: Supports, installs, maintains, troubleshoots, and coordinates the usage of local and wide area networks (LAN and WAN), electronic mail, telecommunications, and PC based systems and related software; evaluates hardware and software, including peripheral, output, and telecommunications equipment; sets up and administers security procedures; troubleshoots problems; recommends and implements LAN policies and procedures and ensures adherence to security procedures; trains users on LAN operations and procedures.

Education: 2 year degree in Computer Science or a related field

**Technical Writer**

Minimum/General Experience: Three years experience, of which at least one must be specialized. Specialized experience includes: demonstrated experience in editing documents, including technical documents. Must demonstrate the ability to work independently or under only general direction.

Functional Responsibility: Assist in collection and organizing information required for preparation of user manuals, training materials, installation guides, proposals, and reports. Edit functional descriptions, system specifications, user manuals, special reports, or any other customer deliverables and documents. Assists in performing financial and administrative functions.
Education: 4 year degree in Computer Science or a related field

Quality Assurance/ Analyst

Minimum/General Experience: 3 years related experience in quality assurance and/or software engineering. Must also have experience with Independent Validation and Verification and system configuration.

Functional Responsibility: Assists in the review and evaluation of software products and systems to ensure adherence to customer quality standards; develops software/systems testing procedures and conducts tests; analyzes and documents IV&V issues; presents IV&V results; works under general supervision.

Education: 4 year degree in Computer Science or a related field

Database Administrator

Minimum/General Experience: 4 years experience in physical and logical database design and implementation. Experience supporting the database environment and assuring the database instances are optimized. Must have experience in all aspects of performance tuning, backup, recovery, managing tables and indexes

Functional Responsibility: As part of a team responsible for overall integrity of the database environment, from initial design and implementation through on-going support.
Education: 4 year degree in Computer Science or a related field

**Sr Database Administrator**

Minimum/General Experience: 7 years experience in physical and logical database design and implementation. Experience supporting the database environment and assuring the database instances are optimized. Must have experience in all aspects of performance tuning, backup, recovery, managing tables and indexes.

Functional Responsibility: As part of a team responsible for overall integrity of the database environment, from initial design and implementation through on-going support.

Education: 4 year degree in Computer Science or a related field

**Systems Administrator**

Minimum/General Experience: Three years experience supporting the operating systems environment including experience with any of the following operating systems: UNIX, Linux, Sun/OS, Sun Solaris, HP-UX, Windows.

Functional Responsibility: Day to day tactical support of the operating environment infrastructure. Solving any issues with regards to operating system performance or any user identified problems. Assist team with any operating system upgrades, add-ons, etc.

Education: 4 year degree in Computer Science or a related field

**Sr Systems Administrator**
Minimum/General Experience: Seven years experience supporting the operating systems environment including experience with any of the following operating systems: UNIX, Linux, Sun/OS, Sun Solaris, HP-UX, Windows.

Functional Responsibility: Day to day tactical support of the operating environment infrastructure. Solving any issues with regards to operating system performance or any user identified problems. Lead team with any operating system upgrades, add-ons.

Education: 4 year degree in Computer Science or a related field

Middleware Specialist
Minimum/General Experience: 4 years experience supporting a middleware environment including experience with any of the following: WebSphere, Weblogic, Tibco, NetWeaver, IBM Worklight, Kony Fabric

Functional Responsibility:
Day to day tactical support of the middleware infrastructure. Solving any issues with regards to performance or any user identified problems. Assist team with any operating system upgrades, add-ons, etc.

Education: 4 year degree in Computer Science or a related field

NOC Analyst
Minimum/General Experience: Three years experience supporting the operating systems environment including experience with any of the following operating systems: UNIX, Linux, Sun/OS, Sun Solaris, HP-UX, Windows.

Functional Responsibility: Perform troubleshooting using tools and utilities to resolve system/network performance and related system/network issues, Record incident details, Alert appropriate on-call staff of incident, Engage vendors on hardware/software issues and escort clients for repair operations and Arrange for external technical support assistance where problems cannot be resolved in-house

Education: 2 year degree in Computer Science or a related field

NOC Manager
Minimum/General Experience: 5 years experience supporting the operating systems environment including experience with any of the following operating systems: UNIX, Linux, Sun/OS, Sun Solaris, HP-UX, Windows. 3 years + in a management role in a NOC.

Functional Responsibility: Manage a NOC team responsible for Monitoring of infrastructure and systems. Perform troubleshooting using tools and utilities to resolve system/network performance and related system/network issues, Record incident details, Alert appropriate on-call staff of incident, Engage vendors on hardware/software issues and escort clients for repair operations and Arrange for external technical support assistance where problems cannot be resolved in-house

Education: 2 year degree in Computer Science or a related field

**DevOps Engineer**

Minimum/General Experience: 7 years experience supporting Linux Application Servers (RHEL, Ubuntu, CentOS) Experience with fluid virtual infrastructures (VMware, AWS, OpenStack) Extensive knowledge of LAMP infrastructures including bash/shell scripting; Solid understanding of networking, storage and sysadmin best practices; Working experience with SVN/GIT alongside Agile development processes.

Functional Responsibility: Contributes to and supports the corporate Enterprise Cloud strategy, standards and best practices associated with all aspects Cloud offerings • Contributes to and supports the corporate adoption of the DevOps methodology and Agile project management • Provides expert level design and engineering support towards the successful delivery of IT’s cloud project portfolio • Contribute towards continual service improvement activities related to the delivery of cloud services • Develop and implement internal systems, processes, and best practices to be used by other teams designed to increase productivity • Participate in deep architectural discussions to ensure solutions are designed for successful deployment, security, cost effectiveness and high availability in the cloud

Education: 4 year degree in Computer Science or a related field

**Sr Data Warehouse/ETL Developer**

Minimum/General Experience: Hands-on data warehouse ETL developer with 7+ years of experience designing and implementing DW/BI solutions. Strong hands-on experience with ETL tools including INFORMATICA POWERCENTER is required. Experience in functional and design documents creation. Experience in with various SDLC methodologies. 4+ years of Informatica ETL, 4+ years of Informatica Administration, 5+ years of Database programming, SQL and UDB/DB2.

Functional Responsibility: eliciting requirements, designing dimensional data models, preparing written design documents, developing extract/transform/load routines using either PL/SQL or Informatica PowerCenter performing intensive data analysis. Testing ETL and reports of others for quality assurance,
and migrating releases into testing and production environments. Work with business and technology teams to analyze requirements, estimate, plan, and design solutions. Develop complex workflows and mappings using Informatica ETL and shell scripts to satisfy the business requirements.

Education: 4 year degree in Computer Science or a related field

**Business Analyst**

Education: 4 year degree in Computer Science or a related field

**Sr Business Analyst**

Education: 4 year degree in Computer Science or a related field
Data Analyst

Minimum/General Experience: 5 + experience. Experience with database queries performing complex join conditions, performance tuning of queries, tables and indexes. Strong knowledge of databases and experience in creating tables, indexes and other database tuning activities on Microsoft SQL Server. Experience or expertise with data analysis and BI reporting. Knowledge on mathematical modeling and statistical analysis.

Functional Responsibilities: Drive drafting data requirements document (DRD) by determining what data is required to fulfill the business requirements and objectives. Assist with review and prioritization of data sourcing initiatives. Review and guide performance of complex data analysis on compliance and transactional system databases. Drive deployment of a BI/data analytics platform within the compliance environment.

Education: 4 year degree in Computer Science or a related field

Business Process Reengineering Analyst

Minimum/General Experience: 7 years’ experience in: identifying all the processes in an organization and prioritizing them in order of redesign urgency, diagnosing and improving business processes and increase efficiency, review of industry compliance policies, procedures and regulatory guidelines, ability to use ITIL concepts and best practices to re-engineer existing ITSM processes. Skills shall include - business processes expertise, analytical thinking, business acumen, excellent written and verbal communication abilities.

Functional Responsibilities: Implement guidelines and provide business process reengineering services in assistance of IT engineering and support services. Leading implementation of ITIL guidelines at the operational level. Business process reengineering (for incident, problem, change, release, and configuration management).
