See Price List

2. MAXIMUM ORDER PER SIN

<table>
<thead>
<tr>
<th>SIN</th>
<th>MAXIMUM ORDER</th>
</tr>
</thead>
<tbody>
<tr>
<td>54151S</td>
<td>$500,000 per SIN/Order</td>
</tr>
</tbody>
</table>

This maximum order threshold is a dollar amount at which it is suggested that the ordering agency request higher discounts from the contractor before issuing the order. The contractor may: (1) Offer a new lower price, (2) Offer the lowest price available under the contract, or (3) Decline the order within five (5) days. In accordance with the Maximum Order provisions contained in the Schedule, a delivery order may be placed against the Schedule contract even though it exceeds the maximum order threshold.

3. MINIMUM ORDER LIMITATION

$100

4. GEOGRAPHIC COVERAGE (DELIVERY AREA)

Domestic and overseas delivery.

5. POINT OF PRODUCTION

United States

6. BASIC DISCOUNT

Prices shown are NET Prices; Basic Discounts have been deducted.

7. QUANTITY DISCOUNT

None

8. PROMPT PAYMENT TERMS

Net 30

9a. GOVERNMENT PURCHASE CARDS ARE ACCEPTED UP TO THE MICRO-PURCHASED THRESHOLD.

9b. GOVERNMENT PURCHASE CARDS MAY BE ACCEPTED ABOVE THE MICRO-PURCHASE THRESHOLD.

# LABOR CATEGORY DESCRIPTIONS

<table>
<thead>
<tr>
<th>Labor Category</th>
<th>Description</th>
<th>Minimum Education</th>
<th>Minimum Experience</th>
</tr>
</thead>
</table>
| **Sr. Software Engineer** | As a JarWare Sr. Software Engineer, you must be a self-motivated individual with a desire to get things done. The candidate must have the ability to figure things out with minimal guidance. Experience working on teams within a very Agile environment is a solid plus.  

We are looking for a Sr. Software Engineer who has experience with J2EE technology, Spring, SpringBoot, Spring Security, Junit, CentOS, Tomcat, Apache, REST API. Hands-on experience working with AWS, Git, Jmeter, Selenium, and container technology like Docker. The candidate will also need to have database (Oracle, MySQL, DynamoDB) skills. Experience with front end technologies like Angular/React/JavaScript/Typescript. Finally, the candidate should also have very good debugging skills in terms of tracking down issues.  

This highly technical and hands-on position requires the candidate to work in a team and individual work setting, contributing to all aspects of system integration including needs analysis, design, testing, implementation, and validation. | Bachelor of Science in Computer Science | 5 |
| Solutions Architect II | As a JarWare Solutions Architect II, you must provide technology thought leadership and hands on expertise for large enterprise solutions. This position has an opportunity to shape solutions’ roadmap and help transform them. The candidate must have a passion for applying technology to deliver tangible business results and an ability to differentiate hype from real, practical solutions. The candidate will focus on supporting business development activities including proposals, customer meetings, speaking engagements, and presentations. The candidate should enjoy mentoring other team members and collaborating with other Senior leaders in the company. The candidate will work with other leaders in the company to help establish technology practice areas focused on improving current engagements. Collaborate with Senior Executives, Program/Project Managers, and Technical Leads on technology roadmaps. Design key architectural components of enterprise solutions for current engagements and proposals. Lead transformation initiatives such as cloud-native solutions, DevOps, advanced analytics, intelligent automation, and microservices architecture. | Bachelor of Science in Computer Science | 6 |
**Solutions Architect III**

As a JarWare Solutions Architect III, you must provide technology thought leadership and hands on expertise for large enterprise solutions. This position has an opportunity to shape solutions' roadmap and help transform them. The candidate must have a passion for applying technology to deliver tangible business results and an ability to differentiate hype from real, practical solutions. The candidate will focus on supporting business development activities including proposals, customer meetings, speaking engagements, and presentations. The candidate should enjoy mentoring other team members and collaborating with other Senior leaders in the company. installation, and configuration. Desktop and Server support through our ticketing system. Maintain highest level of client satisfaction. Compliance with all reasonable directions and orders of the Employer.

**Enterprise Architect III**

As a JarWare Enterprise Architect III, you will be responsible for validating and reviewing current system processes, data flow diagrams, and system interface diagrams; and establishing target state systems processes and work flows for enterprise systems development.

The ideal candidate must possess extensive background conducting current state and target state enterprise architecture (EA) development and support. Proven experience developing strategic system architecture plans. Experienced in facilitating and supporting technical and management presentations involving use of data from a variety of sources supported by the EA Office. Supported Enterprise Architecture toolset organizing, integrating, and analyzing key elements of the organization’s EA

Solid understanding of information processing fundamentals and best practices. Superior analytical, conceptual and troubleshooting abilities. Experienced in conducting industry best practices in research, analysis, and recommendations to determine and enable strategic business outcomes. Excellent written and verbal communication skills. Experience conducting technology, trends, standards and products research. Solid track record in functioning successfully in high pressure environments. Experience as a Program/Project Manager or Team Lead.

| Bachelor of Science in Computer Science | 6 |
| **Sr. Consultant** | As a JarWare Sr. Consultant, the candidate will be creative, detail-oriented, always focused. Shall have a minimum of five (5) years of experience in the Information Technology field focusing on development projects, DevSecOps and application development, of which three (3) years shall be in development & design deploying enterprise applications on AWS. Shall possess expertise in large scale, high performance enterprise big data application development on complex heterogeneous environments in AWS. | Bachelor of Science in Computer Science | 5 |
| **Subject Matter Expert III** | As a JarWare Subject Matter Expert III, you will have technical expertise, and work with the program and technical leadership to manage the technical aspects of a large software development program for our next generation of satellite communications software management and optimization systems. You will be responsible and accountable for receiving business needs and requirements from the customer, defining system requirements and scoping the design, managing the development of the software, provide technical expertise and work toward successful deliveries to the customer.  
Define system requirements and specifications. Provide technical leadership and advise on designs for application solutions, including design reviews, planning, development and resolving technical issues. Analyze requirements and provide solutions that meet the required capabilities. Design software solutions that scale to larger user populations and satellite resources. Write design documentation, both at high-level and low-level. Interact and lead design discussions directly with customers to receive feedback on proposed designs. Provide inputs for planning and schedule management. Work closely with the Program Manager, Chief Engineer & Architect, and team lead(s) to successfully scope, manage and execute the program. | Bachelor of Science in Computer Science | 10 |
