LABOR CATEGORY DESCRIPTIONS FOR SIN 54151S

**Project Manager**
Minimum Education/Certification Level
Bachelor’s degree in a related technical or management discipline.

Minimum Years of Experience
5 Years of relevant project management experience.

Functional Responsibilities
The Project Manager has the overall responsibility for the successful delivery of IT software and services that meet the customer’s requirements set forth in a contract. S/he is responsible for leveraging appropriate resources and tools scaled to need throughout the software and services development lifecycle. The Project Manager acts as the primary technical point of contact with the customer, the company management and technical personnel from project inception through closeout. S/he is responsible for management of task orders and ensuring that the technical solutions and schedules in the task order are implemented in a timely manner by developing and maintaining project schedules, coordinating project status meetings, and managing resources in all phases of software development lifecycle.

**Database Integration Specialist**
Minimum Education/Certification Level
Bachelor’s degree in Computer Science, Information Technology, or a related technical discipline.

Minimum Years of Experience
6 Years of relevant database application development experience.

Functional Responsibilities
The Database Integration Specialist is responsible for designing, re-engineering, & implementing database applications that integrate data from various organizational software systems to develop actionable, decision-enabling data analysis and reporting. S/he designs & develops middleware applications, database & analytical tools to integrate data sets from diverse organizational systems, then analyze & report on relevant business processes performance. S/he designs and develops performance reporting dashboards, & reports using programming and database tools.

**Data Scientist**
Minimum Education/Certification Level
Bachelor’s degree in Computer Science, Information Technology, or a related technical discipline.

Minimum Years of Experience
6 Years of relevant data analysis and architecture experience.

Functional Responsibilities
The Data Scientist analyzes the customer/business group requirements, analyzes existing data and data architecture, works with the customer to close data gaps, develops a system of data mining and analysis algorithms using statistical and data architecture tools, then guides the programming team to develop software solutions that mine and analyze data to meet the customer’s business requirements. S/he is responsible for requirements analysis, system development, and performance modeling. S/he works closely with the programming and system administration teams to develop the software solution specifications, support evaluating make or buy options, and provide inputs throughout the software development life cycle.

**Data Analyst**

**Minimum Education/Certification Level**
Bachelor’s degree in Computer Science, Information Technology, or a related technical discipline.

**Minimum Years of Experience**
2 Years of relevant data and business analysis experience.

**Functional Responsibilities**
The Data Analyst will be responsible for both data analysis and business reporting, working with stakeholders to understand business needs driving requests for analytics and reporting, determining business requirements, understanding role-based needs for business data, creating functional requirements, design, delivery and maintain dashboards and tabular reporting in business intelligence (BI) tools; S/he will design and implement BI reports based on inputs from variety of data sources using BI tools and data analytics best practices.

**Programmer**

**Minimum Education/Certification Level**
Bachelor’s degree in Computer Science, Information Technology, or a related technical discipline. Industry-recognized certifications in relevant programming languages preferred.

**Minimum Years of Experience**
7 Years of programming experience in relevant programming languages and tools.

**Functional Responsibilities**
The Programmer is responsible for writing software code in support of implementing a software solution and its components modules. S/he follows the software development life cycle best practices to ensure that programs are coded in compliance with the scope, business processes and end-user experience requirements defined and approved by the customer. S/he also troubleshoots existing applications and implementing programming solutions to resolve performance and feature issues.
QA Engineer
Minimum Education/Certification Level
Bachelor’s degree in a related technical or management discipline.

Minimum Years of Experience
5 Years of relevant project management experience.

Functional Responsibilities
The QA Engineer is responsible for planning a software testing initiative, preparation of detailed testing procedures, and oversight of testing of a software, including vendor provided and custom-built databases, following the test plan and approved procedures.

QA Tester
Minimum Education/Certification Level
Bachelor’s degree in a related technical discipline.

Minimum Years of Experience
2 Years of relevant software testing experience.

Functional Responsibilities
The Quality Assurance (QA) Tester is responsible for supporting the QA team in planning a software testing initiative, support preparation of detailed testing procedures, and execute testing of a software, including vendor provided and custom-built databases, following the test plan and approved procedures.

System Administrator
Minimum Education/Certification Level
Bachelor’s degree in Computer Science, Information Technology or related discipline.

Minimum Years of Experience
7 Years of relevant system administration experience.

Functional Responsibilities
Minimum/General Experience: Three (3) years of experience with Microsoft Project Server installation, configuration, administration and development.
The System Administrator is responsible for the installation, configuration, administration, and upgrade of the software tool. S/he provides support for development, testing and production environments of the software including providing technical support in resolving software-related user issues and requests. The System Administrator works closely with the client/business group to implement software solutions. S/he is responsible for delivering optimum system performance, design implementations and upgrades, and ensure that the software performs at the required level to meet the client/business group operational needs.

For more information on ordering from Federal Supply Schedules click on the GSA Schedules link at www.gsa.gov
Technical Support Analyst
Minimum Education/Certification Level
Bachelor’s degree in a related technical or management discipline.

Minimum Years of Experience
2 Years of relevant technical support / technical help desk experience.

Functional Responsibilities
The Technical Support Analyst is responsible for help desk tasks including acting as the first contact for the software user group to report issues and requests, support the users in resolving standard issues following documented protocols, prioritize user requests appropriately, and solicit appropriate support technical teams for non-standard, complex, and/or urgent user issues. S/he is responsible supporting technical teams in tracking software performance and analyzing statistical data on software performance to identify areas of improvements and upgrades to ensure the software provides a consistent, high quality, user experience.

SUBSTITUTION POLICY FOR ALL LABOR CATEGORIES

The CARIAN Group reserves the right to make the following substitutions in the education and/or experience requirements of all labor categories:

- One year of relevant experience is the equivalent of one year of college education.
- One year of college education is the equivalent of one year of relevant experience.
- Certification related to the field is equivalent to one year of experience/education.
