1b. Identification of the lowest priced model number and lowest unit price for that model for each special item number awarded in the contract. This price is the Government price based on a unit of one, exclusive of any quantity/dollar volume, prompt payment, or any other concession affecting price. Those contracts that have unit prices based on the geographic location of the customer, should show the range of the lowest price, and cite the areas to which the prices apply.

23. Unique Entity Identifier (UEI) number: U6LZYFKE2GD6

24. Notification regarding registration in System for Award Management (SAM) database.: Contractor registered and active in SAM
1. **SCOPE**
   a. The prices, terms and conditions stated under Special Item Number **54151S** Information Technology Professional Services apply exclusively to IT Professional Services within the scope of this Information Technology Schedule.
   b. The Contractor shall provide services at the Contractor’s facility and/or at the ordering activity location, as agreed to by the Contractor and the ordering activity.

   a. Performance incentives may be agreed upon between the Contractor and the ordering activity on individual fixed price orders or Blanket Purchase Agreements under this contract.
   b. The ordering activity must establish a maximum performance incentive price for these services and/or total solutions on individual orders or Blanket Purchase Agreements.
   c. Incentives should be designed to relate results achieved by the contractor to specified targets. To the maximum extent practicable, ordering activities shall consider establishing incentives where performance is critical to the ordering activity’s mission and incentives are likely to motivate the contractor. Incentives shall be based on objectively measurable tasks.

3. **ORDER**
   a. Agencies may use written orders, EDI orders, blanket purchase agreements, individual purchase orders, or task orders for ordering services under this contract. Blanket Purchase Agreements shall not extend beyond the end of the contract period; all services and delivery shall be made and the contract terms and conditions shall continue in effect until the completion of the order. Orders for tasks which extend beyond the fiscal year for which funds are available shall include FAR 52.232-19 (Deviation – May 2003) Availability of Funds for the Next Fiscal Year. The purchase order shall specify the availability of funds and the period for which funds are available.
   b. All task orders are subject to the terms and conditions of the contract. In the event of conflict between a task order and the contract, the contract will take precedence.

4. **PERFORMANCE OF SERVICES**
   a. The Contractor shall commence performance of services on the date agreed to by the Contractor and the ordering activity.
   b. The Contractor agrees to render services only during normal working hours, unless otherwise agreed to by the Contractor and the ordering activity.
   c. The ordering activity should include the criteria for satisfactory completion for each task in the Statement of Work or Delivery Order. Services shall be completed in a good and workmanlike manner.
   d. Any Contractor travel required in the performance of IT Services must comply with the Federal Travel Regulation or Joint Travel Regulations, as applicable, in effect on the date(s) the travel is performed. Established Federal Government per diem rates will apply to all Contractor travel. Contractors cannot use GSA city pair contracts.

5. **STOP-WORK ORDER (FAR 52.242-15) (AUG 1989)**
   a. The Contracting Officer may, at any time, by written order to the Contractor, require the Contractor to stop all, or any part, of the work called for by this contract for a period of 90 days after the order is delivered to the Contractor, and for any further period to which the parties may agree. The order shall be specifically identified as a stop-work order issued under this clause. Upon receipt of the order, the Contractor shall immediately comply with its terms and take all reasonable steps to minimize the incurrence of costs allocable to the work covered by the order during the period of work stoppage. Within a period of 90 days after a stop-work is delivered to the
Contractor, or within any extension of that period to which the parties shall have agreed, the Contracting Officer shall either-
(1) Cancel the stop-work order; or
(2) Terminate the work covered by the order as provided in the Default, or the Termination for Convenience of the Government, clause of this contract.

(b) If a stop-work order issued under this clause is canceled or the period of the order or any extension thereof expires, the Contractor shall resume work. The Contracting Officer shall make an equitable adjustment in the delivery schedule or contract price, or both, and the contract shall be modified, in writing, accordingly, if-
(1) The stop-work order results in an increase in the time required for, or in the Contractor's cost properly allocable to, the performance of any part of this contract; and
(2) The Contractor asserts its right to the adjustment within 30 days after the end of the period of work stoppage; provided, that, if the Contracting Officer decides the facts justify the action, the Contracting Officer may receive and act upon the claim submitted at any time before final payment under this contract.

(c) If a stop-work order is not canceled and the work covered by the order is terminated for the convenience of the Government, the Contracting Officer shall allow reasonable costs resulting from the stop-work order in arriving at the termination settlement.

(d) If a stop-work order is not canceled and the work covered by the order is terminated for default, the Contracting Officer shall allow, by equitable adjustment or otherwise, reasonable costs resulting from the stop-work order.

6. INSPECTION OF SERVICES

7. RESPONSIBILITIES OF THE CONTRACTOR
The Contractor shall comply with all laws, ordinances, and regulations (Federal, State, City, or otherwise) covering work of this character. If the end product of a task order is software, then FAR 52.227-14 (Dec 2007) Rights in Data – General, may apply.

8. RESPONSIBILITIES OF THE ORDERING ACTIVITY
Subject to security regulations, the ordering activity shall permit Contractor access to all facilities necessary to perform the requisite IT Professional Services.

9. INDEPENDENT CONTRACTOR
All IT Professional Services performed by the Contractor under the terms of this contract shall be as an independent Contractor, and not as an agent or employee of the ordering activity.

10. ORGANIZATIONAL CONFLICTS OF INTEREST
a. Definitions.
“Contractor” means the person, firm, unincorporated association, joint venture, partnership, or corporation that is a party to this contract.
“Contractor and its affiliates” and “Contractor or its affiliates” refers to the Contractor, its chief executives, directors, officers, subsidiaries, affiliates, subcontractors at any tier, and consultants and any joint venture involving the Contractor, any entity into or with which the Contractor subsequently merges or affiliates, or any other successor or assignee of the Contractor.
An “Organizational conflict of interest” exists when the nature of the work to be performed under a proposed ordering activity contract, without some restriction on ordering activities by the Contractor and its affiliates, may either (i) result in an unfair competitive advantage to the Contractor or its affiliates or (ii) impair the Contractor’s or its affiliates’ objectivity in performing contract work.
b. To avoid an organizational or financial conflict of interest and to avoid prejudicing the best interests of the ordering activity, ordering activities may place restrictions on the Contractors, its affiliates, chief executives, directors, subsidiaries and subcontractors at any tier when placing orders against schedule contracts. Such restrictions shall be consistent with FAR 9.505 and shall be designed to avoid, neutralize, or mitigate organizational conflicts of interest that might otherwise exist in situations related to individual orders placed against the schedule contract. Examples of situations, which may require restrictions, are provided at FAR 9.508.

11. INVOICES
The Contractor, upon completion of the work ordered, shall submit invoices for ITProfessional services. Progress payments may be authorized by the ordering activity on individual orders if appropriate. Progress payments shall be based upon completion of defined milestones or interim products. Invoices shall be submitted monthly for recurring services performed during the preceding month.

12. PAYMENTS
For firm-fixed price orders the ordering activity shall pay the Contractor, upon submission of proper invoices or vouchers, the prices stipulated in this contract for service rendered and accepted. Progress payments shall be made only when authorized by the order. For time-and-materials orders, the Payments under Time-and-Materials and Labor-Hour Contracts at FAR 52.212-4 (MAR 2009) (ALTERNATE I – OCT 2008) (DEVIAITON I – FEB 2007) applies to time-and-materials orders placed under this contract. For labor-hour orders, the Payment under Time-and-Materials and Labor-Hour Contracts at FAR 52.212-4 (MAR 2009) (ALTERNATE I – OCT 2008) (DEVIAITON I – FEB 2007) applies to labor-hour orders placed under this contract. 52.216-31(Feb 2007) Time-and-Materials/Labor-Hour Proposal Requirements—Commercial Item Acquisition As prescribed in 16.601(e)(3), insert the following provision:
(a) The Government contemplates award of a Time-and-Materials or Labor-Hour type of contract resulting from this solicitation.
(b) The offeror must specify fixed hourly rates in its offer that include wages, overhead, general and administrative expenses, and profit. The offeror must specify whether the fixed hourly rate for each labor category applies to labor performed by—
   (1) The offeror;
   (2) Subcontractors; and/or
   (3) Divisions, subsidiaries, or affiliates of the offeror under a common control.

13. RESUMES
Resumes shall be provided to the GSA Contracting Officer or the user ordering activity upon request.

14. INCIDENTAL SUPPORT COSTS
Incidental support costs are available outside the scope of this contract. The costs will be negotiated separately with the ordering activity in accordance with the guidelines set forth in the FAR.

15. APPROVAL OF SUBCONTRACTS
The ordering activity may require that the Contractor receive, from the ordering activity's Contracting Officer, written consent before placing any subcontract for furnishing any of the work called for in a task order.
16. DESCRIPTION OF IT PROFESSIONAL SERVICES AND PRICING

Commercial Job Title: Program Manager

Minimum/General Experience: Min. of Eight (8) years of intensive and progressive IT experience in IT projects including, but not limited to, project management, documentation preparation, system design, evaluation of alternative implementations, development of integration plans, testing of components and systems, installation of non-complex systems, maintenance and repair of non-complex systems, and training on installed non-complex systems.

Functional Responsibility:
Serves as manager on one or more Task Orders (depending on complexity), and is authorized to interface with Government COTR regarding technical task order issues. Is responsible for assigning work schedules, reviewing and resolving work discrepancies, and supervising Task Order team members to ensure the timely completion of all Task Order deliverables.

Minimum Education: BS/BA or equivalent experience. MS = 1 yr., PhD = 3 yrs

Commercial Job Title: Sr. Programmer / Analyst

Minimum/General Experience: Min. of Five (5) years of experience. Experience includes computer program systems definition, design and development.

Functional Responsibility: Performs programming / analyst services. Develops and converts specifications into a sequence of detailed instructions to solve problems. Draws program flow charts, and implements code. Tests and corrects programs. Modifies programs to increase operating efficiency or to respond to changes in work processes; maintains records to document program development and revisions.

Minimum Education: BS/BA or equivalent experience. MS = 1 yr., PhD = 3 yrs.

Commercial Job Title: Programmer / Analyst

Minimum/General Experience: Minimum of 2 years of experience. Experience includes computer program systems definition, design and development.

Functional Responsibility:
Performs programming / analyst services. Develops specifications. Converts specifications into detailed instructions. Draws program flow charts. Tests and corrects programs and prepares instructions for operators who control the computer during runs. Modifies programs and maintains records to document program development and revisions.

Minimum Education: BS/BA or equivalent experience. MS = 1 yr., PhD = 3 yrs.

Commercial Job Title: LAN/WAN Engineer

Minimum/General Experience: Minimum of three (3) years of progressive experience in personal computer (PC) software installation, upgrade, and repair.

Functional Responsibility:
Conducts Local Area Network (LAN) and Wide Area Network (WAN) hardware and software design and installation. Hardware and software components shall include LAN/WAN workstation, server, or other components related to the LAN/WAN system. Experience includes cable, workstation components installation,
configuration, network software, testing system components, tracing and repairing outages, diagnostics, and minor hardware repair.

**Minimum Education**: BS/BA or equivalent experience. MS = 1 yr., PhD = 3 yrs.

**Commercial Job Title**: LAN/WAN Technician

**Minimum/General Experience**: Minimum of four (4) years of progressive technical experience in Local Area Network (LAN) and Wide Area Network (WAN) hardware and software installation, maintenance and support.

**Functional Responsibility**: Performs direct technical work on projects. Works under general supervision and installs, operates, configures, troubleshoots, tests, and repairs information system resources.

**Minimum Education**: High School Diploma

**Commercial Job Title**: Technician

**Minimum/General Experience**: 1 year of experience in personal computer (PC) software installation, upgrade, and repair.

**Functional Responsibility**: Works under direct supervision to install, configure, test and troubleshoot computer systems.

**Minimum Education**: High School Diploma

**Commercial Job Title**: Program Management Lead

**Minimum/General Experience**: Min. of four (4) years of intensive and progressive IT experience in leading IT projects including, but not limited to, project scope, functional analysis, needs assessments, project development, project implementation and training on installed systems.

**Functional Responsibility**: Serves as project management lead manager on one or more Task Orders (depending on complexity), and is authorized to interface with Government COTR regarding technical task order issues. Is responsible for leading project work, promoting team involvement, following team tasks, and implementing tasks to ensure the timely completion of all Task Order deliverables.

**Minimum Education**: BS/BA or equivalent experience. MS = 1 yr., PHD = 3 yrs.

**Commercial Job Title**: Quality Assurance

**Minimum/General Experience**: Minimum of 2 years of experience in implementing quality assurance for IT development.

**Functional Responsibility**: Performs end to end quality assurance planning, analysis and testing of IT systems. Develops functional and technical requirements, draws flow charts, develops test plans, develops documentation and provides training. Tests and assists in correcting computer systems as needed.

**Minimum Education**: BS/BA or equivalent experience. MS = 1 yr., PHD = 3 yrs. **Commercial Job Title**: Sr. Computer Programmer / Analyst
**Commercial Job Title:** Developer

**Minimum/General Experience:** Minimum of 3 years of experience. Experience includes IT systems development, integration and engineering.

**Functional Responsibility:**
Performs systems development, integration and engineering services. Develops systems and integration plans. Draws system flow charts, and implements system. Tests and corrects IT systems. Modifies systems to increase operating efficiency or to respond to changes in work processes; maintains records to document system development and revisions.

**Minimum Education:** BS/BA or equivalent experience. MS = 1 yr., PHD = 3 yrs.

---

**Commercial Job Title:** Database Administrator

**Minimum/General Experience:** Minimum of 2 years of experience. Experience includes database design, administration and data output generation.

**Functional Responsibility:**

**Minimum Education:** BS/BA or equivalent experience. MS = 1 yr., PHD = 3 yrs.

---

**Commercial Job Title:** Sr. Database Developer

**Minimum/General Experience:** Minimum of 5 years of experience. Experience includes database systems definition, design and development.

**Functional Responsibility:**
Performs database development services. Develops and converts specifications into a sequence of detailed instructions to solve problems. Draws program flow charts, and implements database. Tests and corrects databases. Modifies database to increase operating efficiency or to respond to changes in work processes; maintains records to document database development and revisions.

**Minimum Education:** BS/BA or equivalent experience. MS = 1 yr., PHD = 3 yrs.

---

**Commercial Job Title:** Intermediate Systems Analyst

**Minimum/General Experience:** Minimum of 3 years of experience. Experience includes systems definition, design and development.

**Functional Responsibility:**
Performs systems analyst services for IT development and integration. Works closely with client and technical team to develop and convert specifications into a sequence of detailed instructions to solve problems. Draws program flow charts, and implements systems. Tests and assists in correcting programs. Modifies systems to increase operating efficiency or to respond to changes in work processes; maintains records to document systems development and revisions.

**Minimum Education:** BS/BA or equivalent experience. MS = 1 yr., PHD = 3 yrs.
**Commercial Job Title:** Sr. Database Analyst

**Minimum/General Experience:** Minimum of 4 years of experience. Experience includes systems database definition implementation.

**Functional Responsibility:**
Performs database analyst services for IT development and integration. Identifies customer needs for database systems. Develops and converts specifications into a sequence of detailed instructions to solve problems. Draws program flow charts, and assists to implement database. Tests and corrects database. Modifies database to increase operating efficiency or to respond to changes in work processes; maintains records to document database development and revisions.

**Minimum Education:** BS/BA or equivalent experience. MS = 1 yr., PHD = 3 yrs.

"The Service Contract Labor Standards, formerly the Service Contract Act (SCA), apply to this contract and it includes SCLS applicable labor categories. Labor categories and fixed price services marked with a (**) in this pricelist are based on the U.S. Department of Labor Wage Determination Number(s) identified in the SCLS/SCA matrix. The prices awarded are in line with the geographic scope of the contract (i.e., nationwide)."
LABOR CATEGORY DESCRIPTIONS
PROFESSIONAL ENGINEERING SERVICES

ANALYST CLASSIFICATION

Analyst I, II

**Minimum/General Experience:** Entry level to 3 years.

**Functional Responsibility:** Works under close supervision. Performs assignments designed to develop professional scientific work knowledge and abilities. Receives specific and detailed instructions as to required tasks and results expected. Work is checked during progress and is reviewed for accuracy upon completion. Performs a variety of routine tasks that are planned to provide experience and familiarization with the engineering staff, methods, practices, and programs of the company.

**Minimum Education:** Bachelor’s degree

Staff Analyst II, III

**Minimum/General Experience:** Three to ten years of experience.

**Functional Responsibility:** Independently evaluates, selects, and applies standard scientific techniques, procedures, and criteria, using judgment in making minor adaptations and modifications. Assignments have clear and specified objectives and require the investigation of a limited number of variables. Performance at this level requires developmental experience in a professional scientific position and generally, graduate level science education. Receives instructions on specific assignment objectives, complex features, and possible solutions. Assistance is furnished on unusual problems and work is reviewed for application of sound professional judgment. Performs work which usually involves conventional types of plans, investigations, or equipment with relatively few complex features for which there are precedents. Assignments usually include one or more of the following: process design and development, preparation of specifications, process study, research investigations, report preparation, and other activities of limited scope requiring knowledge of principles and techniques commonly employed in the specific narrow area of assignments. May supervise or coordinate the work of drafters, technicians, and others who assist in specific assignments.

**Minimum Education:** Bachelor’s degree

Project Analyst I, II

**Minimum/General Experience:** Ten or more years of experience.

**Functional Responsibility:** As a fully competent scientist in all conventional aspects of the subject matter of the functional area of the assignments, plans and conducts work requiring judgment in the independent evaluation, selection, and substantial adaptation and modification of standard techniques, procedures, and criteria. Devises new approaches to problems encountered. Requires sufficient professional scientific experience to assure competence as a fully trained worker; and for positions primarily of a research nature, completion of all requirements for a doctoral degree in science may be required. Independently performs most assignments with instructions as to the general results expected. Receives technical guidance on unusual or complex problems and supervisory approval on proposed plans for projects. Plans, schedules, conducts, or coordinates detailed phases of the scientific work in a part of a major project or in a total project of moderate scope. Performs work which involves conventional scientific practices but may include a variety of complex features such as unsuitability of standard approaches or difficult coordination requirements. Work requires a broad knowledge of precedents in
the specialty area and a good knowledge of principles and practices of related specialties. May supervise engineers, analysts, or technicians on assigned work.

**Minimum Education:** Bachelor’s degree

---

### ENGINEER CLASSIFICATION

#### Engineer I, II

**Minimum/General Experience:** Entry level to 3 years of experience in engineering.

**Functional Responsibility:** Works under close supervision. Performs assignments designed to develop professional engineering work knowledge and abilities. Receives specific and detailed instructions as to required tasks and results expected. Work is checked during progress and is reviewed for accuracy upon completion. Performs a variety of routine tasks that are planned to provide experience and familiarization with the engineering staff, methods, practices, and programs of the company.

**Minimum Education:** Bachelor’s degree in Engineering

#### Staff Engineer II, III

**Minimum/General Experience:** Three to ten years of experience in engineering.

**Functional Responsibility:** Independently evaluates, selects, and applies standard engineering techniques, procedures, and criteria, using judgment in making minor adaptations and modifications. Assignments have clear and specified objectives and require the investigation of a limited number of variables. Performance at this level requires developmental experience in a professional engineering position and generally, graduate level engineering education. Receives instructions on specific assignment objectives, complex features, and possible solutions. Assistance is furnished on unusual problems and work is reviewed for application of sound professional judgment. Performs work which usually involves conventional types of plans, investigations, or equipment with relatively few complex features for which there are precedents. Assignments usually include one or more of the following: Equipment design and development, test of materials, preparation of specifications, process study, research investigations, report preparation, and other activities of limited scope requiring knowledge of principles and techniques commonly employed in the specific narrow area of assignments. May supervise or coordinate the work of drafters, technicians, and others who assist in specific assignments.

**Minimum Education:** Bachelor’s degree in Engineering

#### Project Engineer I, II

**Minimum/General Experience:** Ten or more years of experience in engineering.

**Functional Responsibility:** As a fully competent engineer in all conventional aspects of the subject matter of the functional area of the assignments, plans and conducts work requiring judgment in the independent evaluation, selection, and substantial adaptation and modification of standard techniques, procedures, and criteria. Devises new approaches to problems encountered. Requires sufficient professional engineering experience to assure competence as a fully trained worker; and for positions primarily of a research nature, completion of all requirements for a doctoral degree in engineering may be required. Independently performs most assignments with instructions as to the general results expected. Receives technical guidance on unusual or complex problems and supervisory approval on proposed plans for projects. Plans, schedules, conducts, or coordinates detailed phases of the engineering work in a part of a major project or in a total project of moderate scope. Performs work which involves conventional engineering practices but may include a variety of complex features such as unsuitability of standard approaches or difficult coordination requirements. Work requires a broad
knowledge of precedents in the specialty area and a good knowledge of principles and practices of related specialties. May supervise engineers, analysts, or technicians on assigned work.

**Minimum Education:** Bachelor’s degree in Engineering

---

### Resident Research Engineer/Staff Scientist I, III

**Minimum/General Experience:** Twenty years of experience with Bachelor’s degree, ten years of experience with a Master’s degree, five years of experience with a Ph.D. in engineering.

**Functional Responsibility:** Applies intensive and diversified knowledge of engineering principles and practices in broad areas of assignments and related fields. Makes decisions independently on engineering problems and methods, and represents the organization in conferences to resolve important questions and to plan and coordinate work. Requires the use of advanced techniques and the modification and extension of theories, precepts, and practices of the field and related sciences and disciplines. The knowledge and expertise required for this level of work usually result from progressive experience as a Project Engineer, and usually requires a doctoral degree in engineering. Supervision and guidance relate largely to overall objectives, critical issues, new concepts, and policy matters. Consults with supervisor concerning unusual problems and developments. One or more of the following: (1) In a supervisory capacity, plans, develops, coordinates, and directs important engineering projects or a number of small projects with many complex features. A substantial portion of the work supervised is comparable to that described for a Project Engineer. (2) As individual researcher or worker, carries out complex or novel assignments requiring the development of new or improved techniques and procedures. Work is expected to result in the development of new or refined equipment, materials, processes, products, and/or scientific methods. Assesses the feasibility and soundness of proposed engineering evaluation tests or equipment when necessary data are insufficient or confirmation by testing is advisable. Usually performs as a staff advisor and consultant as to a technical specialty or a program function. Supervises, coordinates, and reviews the work of a small staff of engineers and technicians; estimates personnel needs and schedules and assigns work to meet completion date. Or, as a Staff Scientist, may be assisted on projects by other engineers, analysts, or technicians.

**Minimum Education:** Bachelor’s degree in Engineering

---

### Resident Consultant/Senior Staff Scientist I, II, III

**Minimum/General Experience:** Ten years of experience with a Ph.D., fifteen years of experience with a Master’s degree in engineering.

**Functional Responsibility:** Has full technical responsibility for interpreting, organizing, executing, and coordinating assignments. Plans and develops engineering projects concerned with unique or controversial problems which have an important effect on major company programs. This involves exploration of subject area, definition of scope and selection of problems for investigation, and development of novel concepts and approaches. Maintains liaison with individuals and units within or outside the organization with responsibility for acting independently on technical matters pertaining to the field. Work at this level usually requires extensive progressive experience including experience as a Resident Research Engineer or Staff Scientist. Supervision received is essentially administrative, with assignments given in terms of broad, general objectives and limits. One or more of the following: (1) In a supervisory capacity, plans, develops, coordinates, and directs large and important projects or a project of major scope and importance. Extent of responsibilities generally requires a few (three to five) subordinate supervisors or team leaders that may include a Staff Scientist or Resident Research Engineer. (2) As individual researcher or worker, (a) conceives, plans, and conducts research in problem areas of considerable scope and complexity, or (b) serves as the technical specialist for the organization (division or company) in the application of advanced theories, concepts, principles, and processes for an assigned area of responsibility (i.e., subject matter, function, type of facility or equipment, or product). Keeps abreast of new scientific methods and developments affecting the organization for the purpose of recommending changes in emphasis of programs or new programs warranted by such developments. Plans, organizes, and supervises the work of a staff of engineers and technicians. Evaluates progress of the staff and results obtained, and
recommends major changes to achieve overall objectives. Or, as individual researcher, may be assisted on individual projects by other engineers, analysts, or technicians.

**Minimum Education:** Master’s degree in Engineering

---

**Principal Consultant I, II**

**Minimum/General Experience:** Fifteen years experience in engineering.

**Functional Responsibility:** Makes decisions and recommendations that are recognized as authoritative and have a far-reaching impact on extensive engineering and related activities of the company. Negotiates critical and controversial issues with top level engineers and officers of other organizations and companies. Individuals at this level demonstrate a high degree of creativity, foresight, and mature judgment in planning, organizing, and guiding extensive engineering programs and activities of outstanding novelty and importance. May receive general administrative direction. One or both of the following: (1) In a supervisory capacity, is responsible for (a) an important segment of a very extensive and highly diversified engineering program of a company, or (b) the entire engineering program of a company is responsible for deciding the kind and extent of engineering and related programs needed to accomplish the objectives of the company, for choosing the scientific approaches, for planning and organizing facilities and programs, and for interpreting results. (2) As individual researcher and consultant, formulates and guides the attack on problems of exceptional difficulty and marked importance to the company or industry. Problems are characterized by their lack of scientific precedents and source material, or lack of success of prior research and analysis so that their solution would represent an advance of great significance and importance. Performs advisory and consulting work for the company as a recognized authority for broad program areas or in an intensely specialized area of considerable novelty and importance. Supervises several subordinate supervisors or team leaders, some of whose positions are Resident Consultants or Principal Consultants. As an individual researcher and consultant, may be assisted on individual projects by other engineers, analysts, or technicians.

**Minimum Education:** Ph.D. in Engineering

---

**ENGINEERING TECHNICIAN CLASSIFICATION**

This job classification covers all employees who meet one or more of the following criteria:

1. Provide technical support for engineers, analysts, and scientists in such areas as research, design, development, and testing.
2. Operate and maintain computer, electrical, electronic, or hydraulic and mechanical equipment.
3. Have practical backgrounds in science or engineering and have basic knowledge in these fields as demonstrated by the completion of a degreed program of study at either a vocational technology school, a technical science school, or some similar technology school or by equivalent training and experience. May also have a basic knowledge of mathematics or computer science.

This classification specifically excludes draftspersons or CAD technicians/operators. Maintenance workers or workers who perform routine tasks requiring no special technical training are also excluded. This classification comprises six categories and employees that may be nonexempt or exempt from the Fair Labor Standards Act, depending on their job functions. A description of the six categories is given below.

---

**Engineering Technician I**

**Minimum/General Experience:** Entry level position for personnel having little or no experience in research, development, design, and instrumentation.
**Functional Responsibility:** Work is closely supervised in process and checked at conclusion by an engineer, analyst, scientist or a more experienced technician. Performs simple routine tasks of an uncomplicated nature following documented procedures or detailed verbal instructions. Conscientiously completes assigned tasks.

**Minimum Education:** Secondary education and some engineering technology education may be required.

---

**Engineering Technician IV**

**Minimum/General Experience:** Ten to fifteen year's of experience in research, development, design, and instrumentation.

**Functional Responsibility:** Generally supervises other technicians performing routine work and checks work upon completion. For advanced assignments, initial instructions and advice from supervisor or engineer are given; however, work is performed independently and checked only on completion by an engineer, analyst, scientist, or a more experienced technician. Performs technical assignments that are not completely standardized or prescribed in addition to supervising other personnel engaged in performance of routine assignments. Troubleshoot problems encountered within their specialty and develop solutions or corrective actions based on sound judgment. Develop procedures that enhance production and quality and design minor specialty or test components. Assist in the design of major specialty or test components. Interface with vendors and clients for procurement of materials required in technical activities. May be responsible for the direction of others on a long-term basis. Custodians of specialized equipment and delicate instruments that require periodic maintenance, repair, and/or calibration. Development of technical design drawings and specifications of materials and equipment. Interface with vendors or clients.

**Minimum Education:** Completion of a degree in an engineering technology-related field and some education through job-related short courses, academic courses, or other related training may be required.

---

**Engineering Technician V**

**Minimum/General Experience:** Fifteen to twenty years of experience in research, development, design, and instrumentation.

**Functional Responsibility:** Little or no supervision required for most assignments. Work may be checked at completion only. Performs technical assignments that are nonroutine and of substantial variety. May plan assignments and generally supervises personnel for the completion of assignments. Conducts tests or performs assignments that require selection, adaptation, or modification of existing equipment and procedures. Assists in and reviews the design of major specialty or test components. Frequent contact with vendors, clients, and other professionals such as scientists, engineers, and analysts. Generally responsible for the direction of others on a long-term basis. Custodians of specialized equipment and delicate instruments which require periodic maintenance, repair, and/or calibration. Development and review of technical design drawings and specifications. Interface with professionals on a routine basis.

**Minimum Education:** Completion of a degree in an engineering technology-related field is normally required and, in addition, a 4-year degree in engineering or engineering technology may be required.
ENVIRONMENTAL PROFESSIONAL SERVICES

ANALYST CLASSIFICATION

Analyst I, II

Minimum/General Experience: Entry level to 3 years.

Functional Responsibility: Works under close supervision. Performs assignments designed to develop professional scientific work knowledge and abilities. Receives specific and detailed instructions as to required tasks and results expected. Work is checked during progress and is reviewed for accuracy upon completion. Performs a variety of routine tasks that are planned to provide experience and familiarization with the engineering staff, methods, practices, and programs of the company.

Minimum Education: Bachelor’s degree

Staff Analyst I, II

Minimum/General Experience: Three to ten years of experience.

Functional Responsibility: Independently evaluates, selects, and applies standard scientific techniques, procedures, and criteria, using judgment in making minor adaptations and modifications. Assignments have clear and specified objectives and require the investigation of a limited number of variables. Performance at this level requires developmental experience in a professional scientific position and generally, graduate level science education. Receives instructions on specific assignment objectives, complex features, and possible solutions. Assistance is furnished on unusual problems and work is reviewed for application of sound professional judgment. Performs work which usually involves conventional types of plans, investigations, or equipment with relatively few complex features for which there are precedents. Assignments usually include one or more of the following: process design and development, preparation of specifications, process study, research investigations, report preparation, and other activities of limited scope requiring knowledge of principles and techniques commonly employed in the specific narrow area of assignments. May supervise or coordinate the work of drafters, technicians, and others who assist in specific assignments.

Minimum Education: Bachelor’s degree

Project Analyst I, II

Minimum/General Experience: Ten or more years of experience.

Functional Responsibility: As a fully competent scientist in all conventional aspects of the subject matter of the functional area of the assignments, plans and conducts work requiring judgment in the independent evaluation, selection, and substantial adaptation and modification of standard techniques, procedures, and criteria. Devises new approaches to problems encountered. Requires sufficient professional scientific experience to assure competence as a fully trained worker; and for positions primarily of a research nature, completion of all requirements for a doctoral degree in science may be required. Independently performs most assignments with instructions as to the general results expected. Receives technical guidance on unusual or complex problems and supervisory approval on proposed plans for projects. Plans, schedules, conducts, or coordinates detailed phases of the scientific work in a part of a major project or in a total project of moderate scope. Performs work which involves conventional scientific practices but may include a variety of complex features such as unsuitability of standard approaches or difficult coordination requirements. Work requires a broad knowledge of precedents in the specialty area and a good knowledge of principles and practices of related specialties. May supervise engineers, analysts, or technicians on assigned work.

Minimum Education: Bachelor’s degree
GIS Analyst II

Minimum/General Experience: Two to five years of experience in GIS or Geology

Functional Responsibility: GIS analyst provides support to a wide range of clients in the public and private sector. Expertise in the complete system development lifecycle from conceptualization through requirements definition, design, development, testing implementation, maintenance, and user training as it applies to Geographic Information Systems (GIS) related technology and data in support of business needs. Develops and edits geographic datasets. Develops, edits, and prepares maps. Develops and integrates geo-databases, geo-processing models, tables, forms, charts and reports. Develops custom geo-processing models and conducts spatial analysis and interprets results. Provides metadata documentation on datasets. Coordinates staff and task management and manages small to mid-size GIS projects.

Minimum Education: Bachelor’s degree in Geographic Information Systems (GIS), Engineering, Geology, or Computer Science, Information Technology or related degree. Long-term GIS-specific experience can be substituted for education requirement.

ENGINEER CLASSIFICATION

Engineer I, II

Minimum/General Experience: Entry level to 3 years of experience in engineering.

Functional Responsibility: Works under close supervision. Performs assignments designed to develop professional engineering work knowledge and abilities. Receives specific and detailed instructions as to required tasks and results expected. Work is checked during progress and is reviewed for accuracy upon completion. Performs a variety of routine tasks that are planned to provide experience and familiarization with the engineering staff, methods, practices, and programs of the company.

Minimum Education: Bachelor’s degree in Engineering

Staff Engineer I, II

Minimum/General Experience: Three to ten years of experience in engineering.

Functional Responsibility: Independently evaluates, selects, and applies standard engineering techniques, procedures, and criteria, using judgment in making minor adaptations and modifications. Assignments have clear and specified objectives and require the investigation of a limited number of variables. Performance at this level requires developmental experience in a professional engineering position and generally, graduate level engineering education. Receives instructions on specific assignment objectives, complex features, and possible solutions. Assistance is furnished on unusual problems and work is reviewed for application of sound professional judgment. Performs work which usually involves conventional types of plans, investigations, or equipment with relatively few complex features for which there are precedents. Assignments usually include one or more of the following: Equipment design and development, test of materials, preparation of specifications, process study, research investigations, report preparation, and other activities of limited scope requiring knowledge of principles and techniques commonly employed in the specific narrow area of assignments. May supervise or coordinate the work of drafters, technicians, and others who assist in specific assignments.

Minimum Education: Bachelor’s degree in Engineering
**Staff Engineer III**

**Minimum/General Experience:** Three or more years of experience in engineering.

**Functional Responsibility:** Independently evaluates, selects, and applies standard engineering techniques, procedures, and criteria, using judgment in making minor adaptations and modifications. Assignments have clear and specified objectives and require the investigation of a limited number of variables. Performance at this level requires developmental experience in a professional engineering position and generally, graduate level engineering education. Receives instructions on specific assignment objectives, complex features and possible solutions. Assistance is furnished on unusual problems and work is reviewed for application of sound professional judgment. Performs work which usually involves conventional types of plans, investigations, or equipment with relatively few complex features for which there are precedents. Assignments usually include one or more of the following: Equipment design and development, test of materials, preparation of specifications, process study, research investigations, report preparation and other activities of limited scope requiring knowledge of principles and techniques commonly employed in the specific narrow area of assignments. May supervise or coordinate the work of drafters, technicians, and others who assist in specific assignments.

**Minimum Education:** Bachelor's degree in Engineering

---

**Project Engineer I, II**

**Minimum/General Experience:** Ten or more years of experience in engineering.

**Functional Responsibility:** As a fully competent engineer in all conventional aspects of the subject matter of the functional area of the assignments, plans and conducts work requiring judgment in the independent evaluation, selection, and substantial adaptation and modification of standard techniques, procedures, and criteria. Devises new approaches to problems encountered. Requires sufficient professional engineering experience to assure competence as a fully trained worker; and for positions primarily of a research nature, completion of all requirements for a doctoral degree in engineering may be required. Independently performs most assignments with instructions as to the general results expected. Receives technical guidance on unusual or complex problems and supervisory approval on proposed plans for projects. Plans, schedules, conducts, or coordinates detailed phases of the engineering work in a part of a major project or in a total project of moderate scope. (2) As individual researcher or worker, carries out complex or novel assignments requiring the development of new or improved techniques and procedures. Work is expected to result in the development of new or refined equipment, materials, processes, products, and/or scientific methods. Assesses the feasibility and soundness of proposed engineering evaluation tests or equipment when necessary data are insufficient or confirmation by testing is advisable. Usually performs as a staff advisor and consultant as to a technical specialty or a program function. Supervises, coordinates, and reviews the work of a small staff of engineers and technicians; estimates personnel needs and schedules and assigns work to meet completion date. Or, as a Staff Scientist, may be assisted on projects by other engineers, analysts, or technicians.

**Minimum Education:** Bachelor’s degree in Engineering
ENGINEERING TECHNICIAN CLASSIFICATION

This job classification covers all employees who meet one or more of the following criteria:
1. Provide technical support for engineers, analysts, and scientists in such areas as field work, installation of instruments, monitoring stations, and data gathering.
2. Operate and maintain computer, electrical, electronic, or hydraulic and mechanical equipment.
3. Have practical backgrounds in science or engineering and have basic knowledge in these fields as demonstrated by the completion of a degreed program of study at either a vocational technology school, a technical science school, or some similar technology school or by equivalent training and experience. May also have a basic knowledge of mathematics or computer science.

This classification specifically excludes draftspersons or CAD technicians/operators. Maintenance workers or workers who perform routine tasks requiring no special technical training are also excluded. This classification comprises six categories and employees that may be nonexempt or exempt from the Fair Labor Standards Act, depending on their job functions. A description of the six categories is given below.

<table>
<thead>
<tr>
<th>Engineering Technician I</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Minimum/General Experience:</strong> Entry level position.</td>
</tr>
<tr>
<td><strong>Functional Responsibility:</strong> Work is closely supervised in process and checked at conclusion by an engineer, analyst, scientist or a more experienced technician. Performs simple routine tasks of an uncomplicated nature following documented procedures or detailed verbal instructions. Conscientiously completes assigned tasks.</td>
</tr>
<tr>
<td><strong>Minimum Education:</strong> Secondary education and some engineering technology education may be required.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Engineering Technician IV</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Minimum/General Experience:</strong> Ten to fifteen years of experience in field work, instrumentation, and test procedures.</td>
</tr>
<tr>
<td><strong>Functional Responsibility:</strong> Generally supervises other technicians performing routine work and checks work upon completion. For advanced assignments, initial instructions and advice from supervisor or engineer are given; however, work is performed independently and checked only on completion by an engineer, analyst, scientist, or a more experienced technician. Performs technical assignments that are not completely standardized or prescribed in addition to supervising other personnel engaged in performance of routine assignments. Troubleshoot problems encountered within their specialty and develop solutions or corrective actions based on sound judgment. Develop procedures that enhance production and quality and design minor specialty or test components. Assist in the design of major specialty or test components. Interface with vendors and clients for procurement of materials required in technical activities. May be responsible for the direction of others on a long-term basis. Custodians of specialized equipment and delicate instruments that require periodic maintenance, repair, and/or calibration. Development of technical design drawings and specifications of materials and equipment. Interface with vendors or clients.</td>
</tr>
<tr>
<td><strong>Minimum Education:</strong> Completion of a degree in an engineering technology-related field and some education through job-related short courses, academic courses, or other related training may be required.</td>
</tr>
</tbody>
</table>
**Engineering Technician V**

**Minimum/General Experience:** Fifteen to twenty years of experience in field work, instrumentation, and test procedures.

**Functional Responsibility:** Little or no supervision required for most assignments. Work may be checked at completion only. Performs technical assignments that are nonroutine and of substantial variety. May plan assignments and generally supervises personnel for the completion of assignments. Conducts tests or performs assignments that require selection, adaptation, or modification of existing equipment and procedures. Assists in and reviews the design of major specialty or test components. Frequent contact with vendors, clients, and other professionals such as scientists, engineers, and analysts. Generally responsible for the direction of others on a long-term basis. Custodians of specialized equipment and delicate instruments which require periodic maintenance, repair, and/or calibration. Development and review of technical design drawings and specifications. Interface with professionals on a routine basis.

**Minimum Education:** Completion of a degree in an engineering technology-related field is normally required and, in addition, a 4-year degree in engineering or engineering technology may be required.

---

**GIS Technician**

**Minimum/General Experience:** Entry Level to 3 years experience in GIS

**Functional Responsibility:** Primary responsibilities will include assisting in developing geographic database structures, geoprocessing models, tables, forms, charts and reports. Provide metadata documentation on datasets and develop, edit and prepare maps.

**Minimum Education:** Associates degree in GIS.

---

**GEOLOGIST CLASSIFICATION**

**Geologist I, II**

**Minimum/General Experience:** Entry level position.

**Functional Responsibility:** Works under supervision. Works in a learning capacity, receiving on-the-job training. Performs elementary geologic investigations, calculations, and interpretations. Prepares geologic illustrations and reports. Makes written and oral presentations, primarily for internal use.

**Minimum Education:** B.S. or higher degree and little or no prior applicable experience.

---

**Staff Geologist I, II**

**Minimum/General Experience:** Three or more years of applicable experience.

**Functional Responsibility:** Works under general supervision. Works on projects of moderate difficulty, with work being reviewed in some detail. Performs intermediate-level geologic investigations, calculations, and
interpretations required independent study and responsible judgment. Prepares geologic illustrations and reports. Work may include client contact. Makes written and oral presentations. **Minimum Education:** B.S. or higher degree. Is not certified or registered as a Professional Geologist. Should be enrolled as a Candidate for Certification or Geologist-in-Training (or equivalent).

---

**Staff Geologist III**

**Minimum/General Experience:** Three or more years of experience in engineering

**Functional Responsibility:** Works under general supervision. Works on projects of moderate difficulty, with work being reviewed in some detail. Performs intermediate level geologic investigations, calculations and interpretations required independent study and responsible judgment. Prepares geologic illustrations and reports. Work may include client contact. Makes written and oral presentations.

**Minimum Education:** Bachelor’s degree in Engineering or Geology.

---

**Project Geologist I, II, III**

**Minimum/General Experience:** Ten or more years of applicable experience.

**Functional Responsibility:** Works under direction (minimal supervision). Works on more complex projects required independent study and responsible judgment. Work includes client contact. May supervise Junior and Staff Geologists to a limited extent.

**Minimum Education:** B.S. degree or higher degree. May be active in professional affairs. Is qualified to be, and should be, certified or registered as a Professional Geologist.

---

**GIS Developer III**

**Minimum/General Experience:** Three to ten years of experience in GIS or Geology.

**Functional Responsibility:** GIS developer and database analyst provides support to internal customer as well as a range of clients in the public and private sector. Qualified candidate has at least three years of directly applicable experience as a software developer tied to databases using the latest technologies. Expertise in the complete system development lifecycle from conceptualization through requirements definition, design, development, testing implementation, maintenance, and user training as it applies to Geographic Information Systems (GIS) related technology and data in support of business needs. Expertise with GIS software such as ArcGIS, ArcObjects, ArcGIS Server and ARCIMS. Application programming expertise in such GIS programming languages as: C#, .Net, Visual Basic, C++, JAVA, JSP, ASP, XML, GML, and Cold Fusion. Expertise in this category also includes GIS database design, use of ESRI’s SDE, data conversion and management, Internet mapping and remote sensing. Providing GIS services consistent with the ISB Geographic Information Technology policy and standards process, ISB Geographic IT standards for horizontal datum and coordinate system and ISB geographic IT standards for metadata. Proficient use of information engineering tools and methodologies. Completing conceptual, logical and physical data models using.

**Minimum Education:** Bachelor’s Degree in Computer Science or Geography.
