Job descriptions SIN 541611

Business Analyst

Provide expertise in business process and system analysis, design, improvement, and implementation efforts and in translating business process needs into technical requirements. Provide expertise in change management and training support. Provide organizational and strategic planning for a wide variety of technical and functional environments. Provide expertise in, but not limited to Configuration Management, Strategic Planning, Knowledge Management, Business Analysis and Technical Analysis.

Minimum Education: Bachelors

Minimum Years of Experience: Two (2) years' experience

Business Analyst, Senior

Assist in applying common best practices for the industry to the customer using a knowledge base to create conceptual business models and to identify relevant issues and considerations in selecting appropriate software application solutions. Assess the operational and functional baseline of an organization and its organizational components and help to define the direction

and strategy for an engagement while ensuring the organizational needs are being addressed. Identify information technology inadequacies and/or deficiencies that affect the functional area's ability to support/meet organizational goals. Participate in account strategy sessions, strategic assessments and design reviews to validate enterprise approach and associated work products.

Minimum Education: Bachelors

Minimum Years of Experience: Four (4) years' experience

Business Process Engineer

Provide facilitation, training, methodology development and evaluation, process reengineering across all phases, identifying best practices, change management, business management techniques, organizational development, activity and data modeling, or information system development methods and practices, and supervision of Business Process Reengineering Specialist. schedules. Familiar with standard concepts, practices, and procedures within a particular field. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of complex tasks.

Minimum Education: Bachelors

Minimum Years of Experience: Five (5) years' experience

EVM Analyst

Develop and implement EVMS processes and tools; Lead project baseline development activities; Provide direct support to the Project Manager (PM) and Control Account Managers (CAM) in fulfilling their weekly and monthly Earned Value Management (EVM) responsibilities; Work with the project team to provide detailed Variance Analyses; Manage the baseline change process; Keep current all required EVMS logs and tracking files; Analyze and validates all EVMS and performance data (weekly / monthly) to generate meaningful metrics to assist the project leadership; Generate graphs and charts used in various presentations as required; Provide EVM training to other members of the project team; Provide cost forecasting based on historic project data as well as input from the project team

Minimum Education: Bachelors

Minimum Years of Experience: Four (4) years' experience

Financial Analyst

Analyze financial data by gathering, monitoring, and producing models to provide guidance in the decision-making process for business investment decisions. Assess financial performance of past, present and future projects in the organizational pipeline. Analyzes financial data by gathering, monitoring, and producing models for decision support. Assists in forecasting of quarterly and annual results through data metrics & analysis.

Minimum Education: Bachelors

Minimum Years of Experience: Two (2) years' experience

Financial SME

Utilize expert knowledge of the federal appropriation budget cycles. Develop project schedule, delivery strategies, content and exercises. Required to operate within established procedures and work independently with the client in developing. Participate and facilitate meetings on subject matter and provide expert advice and recommendations on relevant financial management policy and guidance. Provide guidance through decision-making processes for business investment decisions with the use of subject matter expertise. Assess current, past, and future financial costs related to highly specialized areas of industry.

Minimum Education: Bachelors

Minimum Years of Experience: Five (5) years' experience

Program Manager / Advisor

Responsible for managing all aspects of contract operational support functions involving multiple complex and inter-related project tasks. Provide overall direction of program activities. Manage and maintain contractor interface with the senior levels of the customer's organization. Consult with customer and contractor personnel to formulate and review task plans and deliverables, ensuring conformance with program and project task schedules and costs and contractual obligations and be capable of advising customer in a financial capacity. Establish and maintain technical and financial reports to show progress of projects to management and customers, organize and assign responsibilities to subordinates, oversee the successful completion of all assigned tasks.

Minimum Education: Bachelors

Minimum Years of Experience: Twelve (12) years' experience

Project Manager

Responsible for the coordination and completion of projects. Oversees all aspects of projects. Sets deadlines, assigns responsibilities, and monitors and summarizes progress of project. Prepares reports for upper management regarding status of project. Familiar with a variety of the field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of tasks. Leads and directs the work of others. A wide degree of creativity and latitude is expected. Typically reports to a manager or head of a unit/department.

Minimum Education: Bachelors

Minimum Years of Experience: Seven (7) years' experience

Project Scheduler

Manages the planning and establishment of performance schedules, monitors and tracks performance progress, reviews factors which affect performance schedules. Familiar with standard concepts, practices, and procedures within a particular business field. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of complex tasks. A certain degree of creativity and latitude is required. Typically reports to a unit/department head.

Minimum Education: Bachelors

Minimum Years of Experience: Two (2) years' experience

Training Specialist

Conducts research necessary to develop and revise training courses curriculums and prepares appropriate training materials. Develops all instructor materials that may include course outline, background material, and training aids. Develops all student materials that may include course workbooks, manuals, completion certificates, and course critique forms. Serves as an instructor.

Minimum Education: Bachelors

Minimum Years of Experience: Four (4) years' experience

SIN 54151S Job Descriptions**Application Developer**

Applies basic knowledge of programming techniques. Create test transactions, run tests; find errors confirm programs. Meet specifications as presented by customer. Define errors in customer's application programs and technically revise fix programs via customer approval processes. The Developer will be in charge of the direct with be able to give direct leadership to the support team. Create, develop, and augment software systems or forensic tools. Engage in the Software Development Lifecycle (SDLC) activities for development of systems utilizing agile methodologies. Design, architect, and advance proof of concept prototype solutions in support of various initiatives across engagements. Possess a thorough understanding of attack vectors that may potentially be leveraged to exploit software development. Utilize assortment of attack tools to test software development work for potential vulnerabilities or indicators of risk. Engage in an environment utilizing diverse set of security tools and applications for support of providing custom and tailored software changes as necessary. Conducts formal vulnerability and exploitation tests on web-based applications, enterprise networks, and other types of network based systems.

Minimum Education: Bachelors

Minimum Years of Experience: Two (2) years' experience

Application Developer, Senior

Applies in-depth knowledge of programming techniques. Creates test transactions, run tests; finds errors, confirms programs. Meets specifications as presented by customer. Defines errors in customer's application programs and technically revises/fixes programs via customer approval processes. The developer will oversee and give direct leadership to the support team.

Minimum Education: Bachelors

Minimum Years of Experience: Four (4) years' experience

Business Analyst

Fully understands the current business needs of the client and/or iTech AG in order to identify and reconcile the practical problems. Able to facilitate rapid change and innovation through PM. Must employ a project-based approach to problem-solving and decision-making for business improvement delivery. Problem identification through exploring the existing environments to identify the gaps that impede the business/client to reach the desired results. Problem solving through developing an action plan to solve the problem and exploit open improvement opportunities. Key responsibilities include: research existing business systems, identify improvement opportunities, document business requirements, facilitate deliverables acceptance.

Minimum Education: Bachelors

Minimum Years of Experience: Two (2) years' experience

Business Analyst, Senior

Provides leadership in the development of business requirements in support of the strategic plan; promote the utilization of technical services to resolve business problems and help manage customer expectations. Works closely with the PM to facilitate rapid change and innovation. Develop technical standards and policies to meet the needs of the client; ensure systems analysis procedures and practices are identified and implemented. Write use cases, business rules and other artifacts. Problem solving through developing an action plan to solve the problem and exploit open improvement opportunities. Key responsibilities include: evaluate information gathered from multiple sources, reconcile conflicts, creatively develop new solutions, break down high level information.

Minimum Education: Bachelors

Minimum Years of Experience: Four (4) years' experience

Business Process Engineer

Define, implement, and maintain business processes and procedures to meet business/clients objectives. Analyze and identify opportunities for business process improvements. Develop initiatives for continuous business process improvements. Ensure in compliance with

customer/client and company proposed standards. Work with other process engineers in integration of new and existing business processes. Use best practices to carry out business process analysis, re-engineering, process measurements and change management activities. Work with clients to identify business requirements, processes and risks. Evaluate current business processes and recommend solutions for improvements. Familiarity with programming languages such as SQL. Prioritize and execute projects for ongoing business improvements. Provide technical advice on processing technology, capability, risks, costs.

Minimum Education: Bachelors

Minimum Years of Experience: Five (5) years' experience

Database Architect

Provides advanced technical support in the research, experimentation, business analysis, and use of systems technology including architecture, integration capabilities, and data base management. Collaborate on setting and implementing standards for development, maintenance, and performance of staff for IT activities.

Minimum Education: Bachelors

Minimum Years of Experience: Six (6) years' experience

Database Specialist

Provides database support to all members of the project team. Performs database analysis, conversion loads, reorganizations, verifications, recoveries and general maintenance support. Provides application support during development and testing. Provides production database support. Reviews logical and physical design of existing databases and makes recommendations for modifications to ensure optimum operation efficiency. Monitors the operational databases at production sites for the purpose of identifying problems of database availability, efficiency, validity and security.

Minimum Education: Bachelors

Minimum Years of Experience: Three (3) years' experience

Enterprise Architect

Responsible for designing architecture for an organization on an enterprise level. Defines system and application architecture and provides vision, problem anticipation, and problem-solving ability to organization. Requires a bachelor's degree in area of specialty and 6 years of experience in the field or in a related area. Familiar with a variety of the field's concepts, practices, and procedures. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of tasks. Leads and directs the work of others. A wide degree of creativity and latitude is expected. Typically reports to top management.

Minimum Education: Bachelors

Minimum Years of Experience: Six (6) years' experience

EVM implementation as well as the monthly reporting and analysis. Oversee the implementation and operation of the EVM tools and processes, develop and maintain EVMS documentation, develop and provide EVM training to management and project staff, and oversee gathering and maintenance of metrics on program performance. Assist program teams in the execution of EVM through scheduling, time tracking, reporting, and variance analysis. Develop strong relationships with Control Account Managers (CAMs) and serve as a valuable resource for any EVM related questions and issues. Support developing and improving processes required to effectively implement EVMS. Prepare contractually required EV and program deliverables and reports such as the Integrated Master Schedule (IMS), Monthly Performance Reports (MPR), Baseline Plans, Control Accounts and Analytic Reports. Participate in Integrated Baseline Reviews (IBRs), perform EVM analysis, and develop independent Estimates at Completion (EAC) and Estimates to Complete (ETC) as required.

Minimum Education: Bachelors

Minimum Years of Experience: Four (4) years' experience

Financial Analyst

Analyze financial data by gathering, monitoring, and producing models for IT decision support and provide financial guidance required for the IT investment decision-making process. Assess financial performance of past, present and future IT projects in the organizational pipeline and assist in forecasting of quarterly and annual results through data metrics & analysis.

Minimum Education: Bachelors

Minimum Years of Experience: Two (2) years' experience

Financial SME

Utilize expert knowledge of the federal appropriation budget cycles to develop project schedule, delivery strategies, content and exercises relevant to IT projects and programs. Operate within established procedures, work independently with clients, participate and facilitate meetings on subject matter and provide expert advice and recommendations on relevant financial management policy and guidance. Provides guidance through decision-making processes for IT investment decisions with the use of subject matter expertise. Assess current, past, and future financial costs related to highly specialized areas of industry.

Minimum Education: Bachelors

Minimum Years of Experience: Five (5) years' experience

Help Desk Analyst

Answers phones and responds to customer requests. Provides customers with service information. Transfers customer calls to appropriate staff. Identifies, researches, and resolves customer issues using the computer system. Follows up on customer inquiries not immediately resolved. Completes call logs and reports. Recognizes, documents and alerts the supervisor of trends in customer calls. Recommends process improvements and other duties as assigned.

Minimum Education: Associates

Minimum Years of Experience: One (1) year experience

Information Technology SME

Apply expert knowledge of Information Technology to develop requirements for projects relevant to subject matter. Work within a connected team environment to support and guide client to reduce critical issues to practical recommendations. Support projects throughout their development lifecycle by developing requirements essential to the health of the project. Development and/or maintenance in any one the following specialties: information system architecture, networking, telecommunications, automation, communications protocols, risk management/electronic analysis, software, lifecycle management, software development methodologies, and modeling and simulation. Information Technology SMEs must have a thorough knowledge of all jobs and responsibilities within the information technology field with focuses on: Networking, Cyber security, Databases, Technical writing, Network Architecture, Enterprise Strategy, Change Management, Cloud, Virtualization, and Information assurance.

Minimum Education: Bachelors

Minimum Years of Experience: Six (6) years' experience

IT Specialist

Provides journeyman-level IT expertise in the analysis, design, development, integration, documentation, and implementation assistance on problems which require a thorough knowledge of the related technical subject matter for effective system deployment. Participates in all phases of systems development. Applies principals and methods of the technical area to difficult problems to arrive at automated solutions. Designs and prepares technical reports and related documentation and makes charts and graphs to record results. Prepares and delivers presentations and briefings as required by the task order.

Minimum Education: Bachelors

Minimum Years of Experience: Four (4) years' experience

IT Specialist, Senior

Provides expert-level technical IT expertise in the analysis, design, development, integration, documentation, and implementation assistance on problems which require a detailed

knowledge of the related technical subject matter for effective system deployment. oversees all phases of systems development. Applies principals and methods of the technical area to difficult problems to arrive at automated solutions. Designs and prepares technical reports and related documentation and makes charts and graphs to record results. Prepares and delivers presentations and briefings regularly. Senior IT Specialists possess a thorough knowledge in: Networking, Cyber security, Databases, Technical writing, Network Architecture, Enterprise Strategy, Change Management, Cloud, Virtualization, and Information assurance. Engage in design and implementation of solutions to perform routine penetration and vulnerability tests on enterprise applications and systems. Develop test plans, manage project initiative test plans, and report on findings discovered during testing phase of lifecycle. Perform validation testing of security vulnerabilities that have been discovered, identified, or remediated. Proven expertise and thorough knowledge of common application security tools and applications.

Minimum Education: Bachelors

Minimum Years of Experience: Six (6) years' experience

IT Technician

Provides journeyman-level functional IT expertise in the analysis, design, development, integration, documentation, and implementation assistance on problems which require a thorough knowledge of the related functional subject matter for effective system deployment. Participates in all phases of systems development. Applies principals and methods of the functional area to difficult problems to arrive at automated solutions. Designs and prepares functional reports and related documentation and makes charts and graphs to record results. Prepares and delivers presentations and briefings as required.

Minimum Education: Associates

Minimum Years of Experience: Four (4) years' experience

Junior IT Specialist

Provides entry-level technical IT expertise in analysis, design, development, integration, documentation, and implantation assistance on problems which require a fundamental knowledge of the related technical subject matter for effective system deployment. Participates in all phases of systems development. Applies principals and methods of the technical area to difficult problems to arrive at automated solutions. Designs and prepares technical reports and related documentation and makes charts and graphs to record results. Prepares and delivers presentations and briefings as required by the task order.

Minimum Education: Associates

Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of tasks. Leads and directs the work of others. A wide degree of creativity and latitude is expected. Typically reports to a manager or head of a unit/department.

Minimum Education: Bachelors

Minimum Years of Experience: Four (4) years' experience

Project Scheduler

Manages the planning and establishment of production schedules, monitoring of materials inventories, tracking of progress of production, and reviewing of factors which affect production schedules. Familiar with standard concepts, practices, and procedures within a particular field. Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of complex tasks. A certain degree of creativity and latitude is required. Typically reports to a unit/department head.

Minimum Education: Bachelors

Minimum Years of Experience: Two (2) years' experience

Security Specialist

Responsible for planning, implementing and maintaining the information security program, which is designed to ensure the confidentiality, integrity and availability of the information technology environment in compliance with industry regulations. This position will also have responsibility for other information technology functions such as IT strategic planning, and disaster recovery and business continuity planning.

Minimum Education: Bachelors

Minimum Years of Experience: Two (2) years' experience

Software Architect

Applies in-depth knowledge of programming techniques. Makes high-level design choices dictating technical standards, including coding standards, tools, and platforms. Engaged in the design of the architecture of the hardware environment and the design strategy of the code.

Minimum Education: Bachelors

Minimum Years of Experience: Four (4) years' experience

Software Engineer

Applies basic knowledge of programming techniques. Develops program specifications for writing and testing programs. Develops, modifies and maintains assigned software according to specifications. Develops test data, performs thorough testing and corrects faulty code to ensure compliance with specifications. Documents programs according to Government standards and procedures. Provide advisory and guidance on various engagements in support of establishing goals of vulnerability management and road maps to achieve the goals. Perform ad-hoc and scheduled vulnerability scans on enterprise networks across different engagements. Participate in analysis and validation phase of vulnerability scanning findings to

prepare reporting deliverables for customers and clients. Proven expertise in providing remediation strategies in support of any potential findings or indicators of risk.

Minimum Education: Bachelors

Minimum Years of Experience: Two (2) years' experience

Systems Engineer

Able to apply knowledge of computer concepts and techniques to develop and apply automated solutions to engineering, scientific, or business data acquisition and management problems. Uses scientific and engineering logic to independently identify conceptual or theoretical solutions to problems of computer hardware or software design and operation. Assists in developing alternative approaches to design, test, and evaluation techniques for solving automation problems. Formulates systems design, functional specification, interfaces and documentation of computer systems considering system interrelationships, operating modes, and equipment configurations. Validating vulnerability and risk assessments are running at optimal performance on a routine basis across the environment. Communication with other key team members in support of vulnerability findings and providing detailed strategies of remediation as necessary. Performing validation scans on network systems to ensure remediation efforts are fulfilled and meeting the requirements provided by the client across different engagements. Proven knowledge of various software system vulnerabilities, identified security threats, and common attack vectors. Engage in strategies for planning incident response practices and handling of potential threats aimed at compromising systems or sensitive enterprise data.

Minimum Education: Bachelors

Minimum Years of Experience: Two (2) years' experience

Systems Engineer, Senior

Expertise in computer concepts and techniques. Uses scientific and engineering logic to independently identify conceptual or theoretical solutions to problems of computer hardware or software design and operation. Capable of developing alternative approaches to design, test, and evaluation techniques for solving automation problems. Formulates systems design, functional specification, interfaces and documentation of computer systems considering system interrelationships, operating modes, and equipment configurations. Responsible for developing project plans, justifications, guidelines, and controls.

Minimum Education: Bachelors

Minimum Years of Experience: Four (4) years' experience

Testing Specialist

Utilize Quality Center application in support of Release. Write and execute test plans, test cases for Software as well as Infrastructure releases. Manage release related documentation including Test Execution Plans as well as post release Test Analysis Report (TAR). Develop and successfully communicate test strategies and results for releases. Follow standard test policies and procedures. Interface closely with other teams during the test cycle of a release. This includes the requirements, development, configuration management, and release management teams.

Minimum Education: Bachelors

Minimum Years of Experience: Three (3) years' experience
