GENERAL SERVICES ADMINISTRATION FEDERAL SUPPLY SERVICE
AUTHORIZED FEDERAL SUPPLY SCHEDULE CATALOG/PRICE LIST

SCHEDULE TITLE: Multiple Award Schedule
CONTRACT NUMBER: 47QTCA19D00CS
CONTRACT PERIOD: 05/29/2019 through 05/28/2024 [Base Period]

SPECIAL ITEM NUMBER 54151S- INFORMATION TECHNOLOGY
FPDS Code D399 Other Information Technology Services, Not Elsewhere Classified

CONTRACTOR:
Dulles Systems Inc
DUNS: 010102140
Cage Code: 68W12
Business Type: Small/ SDB/WOSB/EDWOSB/Certified HUBZone
Principal Office: 21 N Broad Street, Suite#4
Luray, VA 22835
Registered Office: 42913 Via Veneto Way
Ashburn, VA 20148
Phone: (703)-517-1737
Fax: (703)-552-9290
Email: Mmishra@DullesSystems.com

17. TERMS AND CONDITIONS FOR ALL IT CONTRACTORS

1) Organizational Conflicts of Interest
   a) Definitions. "Contractor" means the person, firm, unincorporated association, joint venture, partnership, or corporation that is a party to this contract.
   "Contractor and its affiliates" and "Contractor or its affiliates" refers to the Contractor, its chief executives, directors, officers, subsidiaries, affiliates, subcontractors at any tier, and consultants and any joint venture involving the Contractor, any entity into or with which the Contractor subsequently merges or affiliates, or any other successor or assignee of the Contractor.
   An "Organizational conflict of interest" exists when the nature of the work to be performed under a proposed ordering activity contract, without some restriction on ordering activities by the Contractor and its affiliates, may either (i) result in an unfair competitive advantage to the Contractor or its affiliates or (ii) impair the Contractor's or its affiliates' objectivity in performing contract work.
   b) To avoid an organizational or financial conflict of interest and to avoid prejudicing the best interests of the ordering activity, ordering activities may place restrictions on the Contractors, its affiliates, chief executives, directors, subsidiaries and subcontractors at any tier when placing orders against schedule contracts. Such restrictions shall be consistent with FAR 9.505 and shall be designed to avoid, neutralize, or mitigate organizational conflicts of interest that might otherwise exist in situations related to individual orders placed against the schedule contract. Examples of situations, which may require restrictions, are provided at FAR 9.508.

2) Services Performed
   a) All services performed by the Contractor under the terms of this contract shall be as an independent Contractor, and not as an agent or employee of the ordering activity.
   b) The Contractor shall commence performance of services on the date agreed to by the Contractor and the ordering activity.
   c) The Contractor agrees to render services only during normal working hours, unless otherwise agreed to by the Contractor and the ordering activity.

3) Travel.
   Any Contractor travel required in the performance of services must comply with the Pub. L. 99-234 and FAR Part 31.205-46, as applicable, in effect on the date(s) the travel is performed. Established Federal Government per diem rates will apply to all Contractor travel.

4) Warranty
   a) Unless otherwise specified in this contract, the Contractor's standard commercial warranty as stated in the contract's commercial pricelist will apply to this contract.
   b) The Contractor's commercial guarantee/warranty shall be included in the Commercial Supplier Agreement to include Enterprise User License Agreements or Terms of Service (TOS) agreements, if applicable.
   c) Except as otherwise provided by an express or implied warranty, the Contractor will not be liable to the ordering activity for consequential damages resulting from any defect or
deficiencies in accepted items.

</thead>
</table>
| 5 years of system development, integration and management experience with multiple technologies.  
- 5 years of experience with the design and development of computer networks.  
- Prior experience in system analysis, data analysis, database management and Data Architecture.  
- Experience in full lifecycle SDLC both waterfall and agile development environment  
- Analyze customer applications and systems requirements and be able to match with product solutions  
- Maintaining, configuring, and monitoring virus protection software and email applications.  
- Designing, configuring and testing application software, Systems software, networking software, computer hardware, and operating system software.  
- Monitor the performance of systems, networks and computer applications systems.  
- Able to work independently at the task level, participate in a project team environment, and coordinate and interface with Technical and Management team member | Install, configure, maintain operating systems, application software and system management tools  
- Consult with hardware engineers and other engineering staff to evaluate interface between hardware and software, and operational and performance requirements of overall system  
- Maintaining and administering computer networks and related computing environments including systems software, applications software, hardware, and configurations.  
- Develop and support deployment architecture and scripts for automated system deployment.  
- Protecting data, software, and hardware by coordinating, planning and implementing network security measures.  
- Evaluates and recommends COTS applications and methodologies to provide interoperable information technology (IT) solutions.  
- Troubleshooting, diagnosing and resolving hardware, software, and other network and system problems.  
- Provide program and system development, application development and code integration services by choosing and applying existing programming techniques  
- Strong Application development skills, experience in Cloud, AWS, bigdata and emerging technologies.  
- Provide design, planning documentation, application, Systems, Network remedial fixes, Tier-2 and Tier-3 support as required. |
| Systems Business Analyst I | 5 years of experience in analysis of new and existing systems.  
- Advanced skill identifying and analyzing business requirements and recommending solutions  
- Significant experience that demonstrates the ability to research, compile, and document data, business processes, and workflow.  
- Significant experience in problem resolution including determining root cause, scope and scale of issues  
- Significant experience in leading collaborative work teams  
- Experience in leading large projects/initiatives which have business risk and impact  
- Significant experience in managing multiple priorities independently and/or in a team environment to achieve goals  
- Knowledge of data querying, reporting, forecasting, analysis and operations research  
- Advanced research, analytical, and problem solving skills  
- Advanced organizational, planning and time management skills  
- Advanced skill interpreting and synthesizing large amounts of information  
- Advanced verbal and written communication skills  
- Database and presentation software skills | Identifying business requirements and uses elicitation techniques to gather information at the right level of detail and scope to represent all of the stakeholder’s needs  
- Develop, recommend and document adjustments to workflow to streamline processes  
- Work with project teams to plan, coordinate and support software changes to Controlled Testing and Production –  
- Conduct and/or facilitate user acceptance testing to include developing and executing test cases, communication with project teams, validating and documenting results  
- Coordinate integration of solutions with existing applications; identify and resolve existing conflicts to ensure compatibility  
- Develop test plans, test criteria, scenarios and documentation; ensure acceptance of delivered solutions  
- Perform other duties as assigned | Bachelor's Degree (BA. or BS.) from four-year college |

</tbody>
</table>
| Data Management Specialist II | 5 years of professional experience participating in the entire software development process.  
- Data design, Database Modeling, ETL and BI experience.  
- DB query using SQL query, DB performance tuning and optimization  
- Perform all duties specified to Data and application development implementation.  
- Understanding of software lifecycle, software change control and importance of documentation  
- Experience in using version control  
- Ability to efficiently interact with other teams | Implements and maintains smooth operation and physical design of databases.  
- Experience with performance tuning techniques  
- Reviews database design and integration of systems, provides backup recovery and makes recommendations regarding enhancements and/or improvements.  
- Maintains security and integrity controls.  
- Formulates policies, procedures, and standards relating to database management, and monitors transaction activity and utilization.  
- Participate in the definition of standards and identification of process improvement opportunities for the platforms supported.  
- Operating System and third-party software installation, upgrades and maintenance  
- Installation of hardware and software  
- Maintenance and setup of file systems  
- Resolve software problems with operating systems or third-party products  
- File System and Database Backups/restores (NetBackup and TSM knowledge)  
- Organize and manage hardware repairs  
- Performance Monitoring  
- Maintain system security  
- Configuration management | Bachelor's Degree (BA. or BS.) from four-year college |
| Training Specialist | 4 years of related technical support experience.  
- Must possess excellent presentation skills, have a quick grasp of subject matter, and excellent interpersonal skills. | Consult with customer or management on most appropriate methodology to transfer knowledge to the end-user  
- Develop Knowledge transfer (KT) objectives and content and conduct in-depth research on technical/functional/business related concepts to incorporate into course content  
- Develop complex training materials appropriate for the team and deliver to team members.  
- Troubleshoot technical problems with computer systems used for training  
- Evaluate course content and make changes to the curriculum and course content as appropriate  
- Provide guidance to less experienced Technical Trainers  
- Creates manual and web based training materials for business users.  
- Creates and updates business knowledge guides, helpdesk materials as relevant to the team.  
- Recommend outside training as required | Bachelor's Degree (BA. or BS.) from four-year college |

| Systems Engineer I | Under Supervision install, configure, test and maintain operating systems, application software and system management tools  
- Create large scale deployments using newly researched methodologies.  
- Prior experience with DevOps techniques and practices like Continuous Integration, Continuous Deployment, Test Automation, Build Automation and Test-Driven Development to enable the rapid delivery.  
- Work in Agile environment  
- 2 years of work experience in system analysis, data management engineering, DB, SQL etc.  
- 3 years of experience in scripting languages (e.g. UNIX shell scripting, perl, etc.).  
- 3+ years of experience in an Agile delivery environment | Bachelor's Degree (BA. or BS.) from four-year college |

| 3 years of system development, integration and management experience with multiple technologies.  
- Create large scale deployments using newly researched methodologies.  
- Prior experience with DevOps techniques and practices like Continuous Integration, Continuous Deployment, Test Automation, Build Automation and Test-Driven Development to enable the rapid delivery.  
- Work in Agile environment  
- 2 years of work experience in system analysis, data management engineering, DB, SQL etc.  
- 3 years of experience in scripting languages (e.g. UNIX shell scripting, perl, etc.).  
- 3+ years of experience in an Agile delivery environment | Under Supervision install, configure, test and maintain operating systems, application software and system management tools  
- Monitor and test application performance for potential bottlenecks, identify possible solutions, and work with developers to implement those fixes  
- Maintain security, backup, and redundancy strategies  
- Write and maintain custom scripts to increase system efficiency and lower the human intervention time on any tasks  
- Participate in the design of information and operational support systems  
- Provide 2nd and 3rd level support  
- Develop scalable and reliable data solutions to move data across systems from multiple sources in real time as well as batch modes  
- Utilize expertise in technologies and tools, such as Python, Hadoop, Spark, AWS, as well as other cutting-edge tools and applications for Big Data  
- Develop and support deployment architecture and scripts for automated system deployment. | Bachelor's Degree (BA. or BS.) from four-year college |

Visit us at [www.Dullessystems.com](http://www.Dullessystems.com)
| Technical SME I | 7 Yrs. of industry experience. - worked on Continuous integration and continuous deployment CI/CD. - Thorough knowledge of modern methods, techniques and experience designing system and application architecture - Ability to effectively adapt to rapidly changing technology and apply it to business needs; - Ability to use strong analytical and conceptual skills to create original concepts/theories for various projects; Advanced research, analytical and problem-solving skills - Ability to plan, organize, coordinate, assign, and evaluate the work of junior resources - Experience in leading large projects/initiatives which have business risk and impact - Advanced organizational, planning and time management skills - Advanced verbal and written communication among both technical and non-technical stakeholders. | conceptualize| design and deliver product / sustenance delivery through the team as per defined scope and standards in a particular technology - Reviews on the architecture and design deliverables and support as an SME - Coordinate integration of solutions with existing applications; identify and resolve existing conflicts to ensure compatibility. Ensure acceptance of delivered solutions - Ability to quickly learn new technologies and adapt to changing customer needs to provide solution that meets quality standards and the client requirements - To recommend client value creation initiatives and implement industry best practices - To cross-train and develop team members on modern skills to mitigate key resource dependency - Perform other duties as assigned | Bachelor's Degree (BA. or BS.) from four-year college |
| Application | Developer I          | 6 years’ experience with the design and development of computer software.  
- Develop S/W from program specifications or low-level design documents;  
- Prepare component designs from general requirements statements;  
- Develop component test cases and scenarios and execute application tests at the unit level  
- Develop design documentation at the component level and prepare program documentation.  
- Working knowledge of operating system concepts and familiarity with several operating environments.  
- Understand principles of design and code inspection techniques, group design sessions, and code walk-throughs.  
- Familiar with several programming languages with expert knowledge in one, for example Oracle, SAP, Peoplesoft, JAVA Notes, Visual C++, and Visual Basic.  
- Experience on large scale distributed systems in spring boot based microservices architecture in any cloud platforms - like Amazon Web Services, PCF.  
- Exposure to CI/CD/Build tools like Jenkins, Artifactory, Maven.  
- Experience in Test-Driven Development like Mockito.  
- Basic knowledge in Unix commands and Oracle/PL SQL
