Contractor Information

Profile: RAZR's moto, "Simple solutions in a complex world" exemplifies our approach to providing the most direct, impactful solutions to our client's most important challenges. Business and government are growing more complex with technologies, regulations, and increasingly complicated organizational entanglements. We use a collaborative approach for understanding along with our team and industry experience to take you from your most challenging situation to a direct route for an effective solution.

CompanyName : RAZR Solutions, LLC

Attention : David Crandall

Address1 : 111 E Monument Avenue

Address2 : Suite 803

City : Kissimmee

State : FL

Zip : 34741

Country : USA

Phone : 703-398-6437

Email : crandall_david@razrsolutions.com

Business Types :

Business Type	Description
2X	2X - For-Profit Organization
LJ	LJ - Limited Liability Company
QF	QF - Svc-Related Disabld Vet O
XX	XX - Historically Underutilize
A5	A5 - Veteran Owned Business

Contract Information

Contract Number: 47QTCA19D00MC

Contract Period : September 26, 2019 through September 25, 2024

Business Size : Small Business

Volume Discounts: Additional 1% for orders of \$500,000

518210C - Cloud and Cloud-Related IT Professional Services – Labor Category Descriptions

Labor Category	Description
Cloud Systems Architect - Mid	<p>Responsible for converting the technical requirements into the cloud architecture and design that will guide the final product. Expected to oversee the efforts of a limited number of less senior staff. Responsible for bridging the gaps between complex business problems and solutions in the cloud. Understands and can apply cloud architectural patterns optimize system design for performance, cost, security and other customer requirements. Has broad knowledge cloud-based tools and their use in the broader system architecture. Has solid understanding of other members of the cloud technology team, including DevOps engineers and developers, and works with them to ensure that the right technology or technologies are being built.</p> <p>Education and experience - 9-11 years of experience with Bachelor’s degree OR at least 7-8 years of experience with Master’s Degree. Or, 13 years of related experience in lieu of Bachelor’s and Master’s degree.</p>
Cloud Systems Architect - Senior	<p>Responsible for converting the technical requirements into the cloud architecture and design that will guide the final product. Responsible for bridging the gaps between complex business problems and solutions in the cloud. Expected to oversee the efforts of less senior staff and/or be responsible for the efforts of all staff assigned to a specific project. Understands and can apply cloud architectural patterns optimize system design for performance, cost, security and other customer requirements. Has broad knowledge cloud-based tools and their use in the broader system architecture. Has solid understanding of other members of the cloud technology team, including DevOps engineers and developers, and works with them to ensure that the right technology or technologies are being built.</p> <p>Education and experience - 12+ years of experience with Bachelor’s degree OR at least 10+ years of experience with Master’s Degree. Or, 17 years of related experience in lieu of Bachelor’s and Master’s degree.</p>
Cloud Data Scientist - Junior	<p>Use the scaling, data storage, diverse capability of cloud computing to develop machine learning, data mining, statistical, and graph-based algorithms to analyze and make sense of data sets. Expected to assist more senior positions and/or Perform functional duties under the oversight of more senior positions. Prototype/consider several algorithms and decide upon final model based on suitable performance metrics. Build models or develop experiments to generate data when training/example data sets are unavailable. Generate reports and visualizations that summarize data sets and provide data driven insights to customers. Partner with subject matter experts to translate manual data analysis into automated analytics. Work closely with developers to ensure proper algorithm implementation. Experience in at least 2 of the following areas is required: Mathematics/Statistics; Computer Science; Domain Expertise/Analysis; and Presentation.</p> <p>Education and experience - Bachelor’s Degree and 0-3 years of experience. Or, 5 years of related experience in lieu of Bachelor’s degree.</p>

<p>Cloud Data Scientist - Journeyman</p>	<p>Use the scaling, data storage, diverse capability of cloud computing to develop machine learning, data mining, statistical, and graph-based algorithms to analyze and make sense of data sets. Expected to perform functional duties independently. Prototype/consider several algorithms and decide upon final model based on suitable performance metrics. Build models or develop experiments to generate data when training/example data sets are unavailable. Generate reports and visualizations that summarize data sets and provide data driven insights to customers. Partner with subject matter experts to translate manual data analysis into automated analytics. Work closely with developers to ensure proper algorithm implementation. Experience in at least 2 of the following areas is required: Mathematics/Statistics; Computer Science; Domain Expertise/Analysis; and Presentation.</p> <p>Education and experience - Bachelor's Degree and 4-6 years of experience. Or, 9 years of related experience in lieu of Bachelor's degree.</p>

Designs and implements computer database systems in network configurations.</p> <p>Education and experience - 9-11 years of experience with Bachelor's degree OR at least 7-8 years of experience with Master's Degree. Or, 13 years of related experience in lieu of Bachelor's and Master's degree.</p>
<p>Database Engineer - Senior</p>	<p>Analyzes complex organizational and database systems, designs and implements computer database systems in network configurations, and develops technical documentation detailing the installation procedures. Understands the interaction between database software and different hardware configurations and architectures. Performs analyses of computer database systems. Expected to oversee the efforts of less senior staff and/or be responsible for the efforts of all staff assigned to a specific</p>

	<p>project. Designs and implements computer database systems in network configurations.</p> <p>Education and experience - 12+ years of experience with Bachelor's degree OR at least 10+ years of experience with Master's Degree. Or, 17 years of related experience in lieu of Bachelor's and Master's degree.</p>
Database Engineer - SME	<p>Analyzes complex organizational and database systems, designs and implements computer database systems in network configurations, and develops technical documentation detailing the installation procedures. Understands the interaction between database software and different hardware configurations and architectures. Expected to be a recognized expert in a specific discipline. Performs analyses of computer database systems. Designs and implements computer database systems in network configurations.</p> <p>Education and experience - 14 years of experience and a PhD degree. Or, in place of the degree and years of experience requirements: recognized by a national or internationally professional organization or academia within a discipline relevant to the work described in the SOW.</p>
Systems Engineer - Junior	<p>Performs technical planning, system integration, verification and validation, cost and risk, and supportability and effectiveness analyses for total systems. Understands the impact of various architectures on system development, testing, deployment and maintenance. Expected to assist more senior positions and/or Perform functional duties under the oversight of more senior positions. Analyses are performed at all levels of total system product to include concept, design, fabrication, test, installation, operation, maintenance and decommissioning. Ensures the logical and systematic conversion of customer or product requirements into total systems solutions that acknowledge technical, schedule, and cost constraints. Performs functional analysis, timeline analysis, detail trade studies, requirements allocation and interface definition studies to translate customer requirements into hardware and software specifications.</p> <p>Education and experience - Bachelor's Degree and 0-3 years of experience. Or, 5 years of related experience in lieu of Bachelor's degree.</p>
Systems Engineer - Journeyman	<p>Performs technical planning, system integration, verification and validation, cost and risk, and supportability and effectiveness analyses for total systems. Understands the impact of various architectures on system development, testing, deployment and maintenance. Expected to perform functional duties independently. Analyses are performed at all levels of total system product to include concept, design, fabrication, test, installation, operation, maintenance and decommissioning. Ensures the logical and systematic conversion of customer or product requirements into total systems solutions that acknowledge technical, schedule, and cost constraints. Performs functional analysis, timeline analysis, detail trade studies, requirements allocation and interface definition studies to translate customer requirements into hardware and software specifications.</p> <p>Education and experience - Bachelor's Degree and 4-6 years of experience. Or, 9 years of related experience in lieu of Bachelor's degree.</p>
Systems Engineer - Mid	<p>Performs technical planning, system integration, verification and validation, cost and risk, and supportability and effectiveness analyses for total systems. Understands the impact of various architectures on system development, testing, deployment and maintenance. Expected to oversee the efforts of a limited number of less senior staff. Ensures the logical and</p>
