Functional Responsibility: Consultant 1s apply their skills in such areas as systems development, knowledge of business processes, technical background or supervisory capacity to implement business solutions. For example, Consultants may perform tasks such as:
• Develop functional and technical information system designs
• Supervise business integration analysts in the development of software designs, computer programming, system testing or training curricula
• Lead business process redesign teams in the development of new business process architectures
• Design training programs for information systems users
• Participate in quality reviews to ensure work complies with specified standards
• Develop team work plans
• Perform workflow analyses
• Design and manage databases
• Define information systems requirements
• Assist in project budget preparation.
Level 1 performs more routine aspects of the position and is supervised by higher levels.” Minimum Education: Bachelor

Commercial Job Title: IT Consultant II Minimum/General Experience: 5
Functional Responsibility: Consultant 2s apply their skills in such areas as systems development, knowledge of business processes, technical background or supervisory capacity to implement business solutions. For example, Consultants may perform tasks such as:
• Develop functional and technical information system designs
• Supervise business integration analysts in the development of software designs, computer programming, system testing or training curricula
• Lead business process redesign teams in the development of new business process architectures
• Design training programs for information systems users
• Participate in quality reviews to ensure work complies with specified standards
• Develop team work plans
• Perform workflow analyses
• Design and manage databases
• Define information systems requirements
• Assist in project budget preparation.
Level 2 performs more varied and difficult tasks compared to Level 1, yet has less autonomy than Level 3. Minimum Education: Bachelor

Commercial Job Title: IT Consultant III Minimum/General Experience: 7
Functional Responsibility: Consultant 3s apply their skills in such areas as systems development, knowledge of business processes, technical background or supervisory capacity to implement business solutions. For example, Consultants may perform tasks such as:
• Develop functional and technical information system designs
• Supervise business integration analysts in the development of software designs, computer programming, system testing or training curricula
• Lead business process redesign teams in the development of new business process architectures
• Design training programs for information systems users
• Participate in quality reviews to ensure work complies with specified standards
• Develop team work plans
• Perform workflow analyses
• Design and manage databases
• Define information systems requirements
• Assist in project budget preparation.
  Level 3 is competent in subject matter and concepts and may lead individuals assisting in the work. Minimum Education: Bachelor

Commercial Job Title: Network Engineer Minimum/General Experience: 3
Functional Responsibility: Designs, configures, tests, implements and maintains telecommunications capabilities, including wide area and local area networks without review by supervisor or senior employee. Performs operations and support activities. Assists applications programmers working in the telecommunications environment. Evaluates network changes for operational impact. Evaluates network performance and resolves network and processor problems. Familiar with hardware and software diagnostic tools.
Minimum Education: Bachelor

Commercial Job Title: Software Engineer Minimum/General Experience: 3
Functional Responsibility: Works independently on designs, develops, and provides customization of various applications to meet a series of pre-defined requirements. Requirements will be met through the use of various programming languages and possibly machine and assembly languages.
Minimum Education: Bachelor

Commercial Job Title: Solutions Architect Minimum/General Experience: 2
Functional Responsibility: Responsible for leading the full systems life cycle with solution design, development, implementation, and product support using scrun and other agile methodologies. Designs and develops IT solutions that most efficiently and effectively meet defined business needs and requirements, while ensuring alignment to an organization’s Enterprise Architecture and IT strategic goals. Supports creation of new agile processes and recommends changes and improvements to current processes and supporting tools.
Minimum Education: Bachelor

Minimum Education: Bachelor

Commercial Job Title: Health Programmer Analyst I Minimum/General Experience: 2
Functional Responsibility: Capable of performing as technical lead to Provides medical and/or health technical oversight of tasks within projects. Capable of performing as Project Manager to oversee both technical and programmatic aspects of projects. Works independently with no supervision. Functional Description: include, but not limited to: health systems requirements analysis, definition, traceability, and documentation; systems analysis and definition; design, development, testing, documentation, integration, troubleshooting, and deployment of computer software of various complexities; system modeling and simulations; system definition using software design methodologies using CASE tools; database design, implementation, and deployment; software configuration management; software performance analysis and tuning; analysis, design, installation, configuration, testing, troubleshooting, tuning, operations, and maintenance of local and wide-area network hardware and software environments; network security analysis, vulnerability assessment, and correction; network capacity planning; network monitoring; customer network problem resolution; network documentation; systems architecture development and definition; analysis of system hardware, software, and network anomalies; identification of solutions; maintenance of hardware and software components; tracking of hardware and software inventories; administration of computer server and client environments; troubleshooting and resolving user technical problems; Minimum Education: Bachelors

Commercial Job Title: Health Programmer Analyst II Minimum/General Experience: 5
Functional Responsibility: Capable of performing as technical lead to Provides medical and/or health technical oversight of tasks within projects. Capable of performing as Project Manager to oversee both technical and programmatic aspects of projects. Works independently with no supervision. Functional Description: include, but not limited to: health systems requirements analysis, definition, traceability, and documentation; systems analysis and definition; design, development, testing, documentation, integration, troubleshooting, and deployment of computer software of various complexities; system modeling and simulations; system definition using software design methodologies using CASE tools; database design, implementation, and deployment; software configuration management; software performance analysis and tuning; analysis, design, installation, configuration, testing, troubleshooting, tuning, operations, and maintenance of local and wide-area network hardware and software environments; network security analysis, vulnerability assessment, and correction; network capacity planning; network monitoring; customer network problem resolution; network documentation; systems architecture development and definition; analysis of system hardware, software, and network anomalies; identification of solutions; maintenance of hardware and software components; tracking of hardware and software inventories; administration of computer server and client environments; troubleshooting and resolving user technical problems; tracking and reporting of problems and resolutions; risks analysis and mitigation definition; systems process
definition and documentation; systems process oversight and compliance monitoring; hardware engineering, systems integration, system testing, COTS tool evaluation; performs market and systems studies; systems planning, capacity planning, performance analysis and planning; external data interface identification, RFC/ECP analysis and response; cost analysis of technical solutions; provide technical/programmatic interface with internal and external organizations, definition of training approaches; creation of training materials; conducting of training course in sizes ranging from one-on-one to formal classroom environments; utilization of computer based and web based tools; development of training documentation manual, quick reference guides; and other engineering related activities not specifically identified.

Minimum Education: Bachelors

Commercial Job Title: Data Scientist I Minimum/General Experience: 2
Functional Responsibility: Data Scientist consultant works closely and collaborates with the product development, Information technology software development and implementation team and management team. Build health forecasting models for quarterly and annual traffic patterns. Lead analytical health projects that deliver key insights, including revenue modeling, trend analysis, and product impact analysis. Design, develop, and maintain all the aspects of Health IT projects including reports, dashboards and reporting portals. Build an Health IT product KPI dashboard report. Develop effective data visualizations for Health IT managers as well as other executives.
