APPENDIX A LABOR CATEGORY DESCRIPTIONS

APPENDIX B GSA PRICE LIST

BL King Consulting LLC
Labor Category Descriptions

Engineering Technician II

Duties/Responsibilities: The Engineering Technician provides deployment, fielding, installation, operation and field support on systems, system elements, interfacing systems, components, devices and processes. Possesses a broad knowledge of industry practices, standards and technology areas and develops, implements, installs, removes, tests, modifies and/or operates complex equipment and systems. Prepares and executes integrated system test plans for preventative maintenance programs and instructs customers in the operations and system maintenance. Serves as liaison with customer and provides technical and engineering expertise at field sites. Conducts installation and preventive and remedial maintenance of systems/equipment, and provides associated training to customer personnel. Identifies and orders spare and replacement parts.

Engineering Technician levels are determined by the type and complexity of activities that assigned personnel are required to perform, the degree of supervision available, the degree of responsibility for task or program performance and the level of authority to be exercised over the resources assigned to the program.

LEVEL	MINIMUM EDUCATION	MINIMUM EXPERIENCE
Engineering Technician II	B.A. or B.S. Degree	3 or More years

Engineer I

Duties/Responsibilities: Performs engineering tasks, research, studies and analysis that provide engineering, technical, and managerial direction for problem definition, analysis, requirement development, and implementation for complex systems in the engineering disciplines. These tasks are required to meet technical requirements in support of associated large scale mission critical projects. Makes recommendations and advises on system development, improvements, optimization, or support efforts. Performs risk assessments and analysis employing modeling and simulation techniques.

Engineering disciplines include but are not limited to electrical, communications (voice, data, and video), nuclear, radar, mission, environmental, aircraft integration, hardware, industrial, logistics, materials, mechanical, production and manufacturing, and reliability.

Engineer levels are determined by the type and complexity of activities that assigned personnel are required to perform, the degree of supervision available, the degree of responsibility for task or program performance and the level of authority to be exercised over the resources assigned to the program.

LEVEL	MINIMUM EDUCATION	MINIMUM EXPERIENCE
Engineer I	B.S. Degree	1 years

Subject Matter Expert II

Duties/Responsibilities: Subject Matter Experts serve as technical or management experts on executive-level project teams providing technical or management direction, analysis, research, interpretation and alternatives for exceptionally complex problems and processes relating to the subject matter. SMEs generate strategies for enhanced operations in a cross-functional area mode throughout the organization and utilize their specialized expertise to assess the operational and functional baseline for clients and their organizational components. SMEs develop advanced technological or management concepts, principles, and solutions to complex problems which are highly innovative and ingenious and guide their development into a final product/solution. The SME has domain, management and expert technical knowledge of functional areas and programmatic knowledge practice-wide.

Subject Matter Expert levels are determined by the type and complexity of activities that assigned personnel are required to perform, the specialized experience required to effectively perform the tasks, the degree of responsibility for task or program performance and the level of authority to be exercised over the resources assigned to the program. Subject Matter Experts operate independently in a specific functional area or a domain including but not limited to engineering, information assurance, logistics, modeling and simulation, network/communications, quality assurance, requirements analysis, risk analysis, systems design and development, operations research, configuration/data management, defense/intelligence analysis, business process reengineering, financial management, planning, policy analysis and test and evaluation.

LEVEL	MINIMUM EDUCATION	MINIMUM EXPERIENCE
Subject Matter Expert II	M.A. or M.S. Degree	10 or More years
Subject Matter Expert III	PhD Degree	10 or More years

Subject Matter Expert III

Duties/Responsibilities: Subject Matter Experts serve as technical or management experts on executive-level project teams providing technical or management direction, analysis, research, interpretation and alternatives for exceptionally complex problems and processes relating to the subject matter.
