Turn knowledge into action

Multiple Award Schedule (MAS)

CONTRACT NUMBER: 47QTCA20D003D
December 12, 2019 – Dec 11, 2029

GSA Schedule

Allogy is a SaaS learning solutions provider in the healthcare and government sectors.

Mobile learning increases learners' motivation and engagement while improving knowledge retention and skills acquisition.

Our Capillary platform helps organizations utilize the benefits and turn training into action by providing standards-based, high-quality training at the learners' fingertips.

Allogy 1755 Telstar Drive, Suite 300 Colorado Springs, CO 80920 | Office: (888) 341-4114 | Fax: (303) 532-1010 | www.allogy.com

PRODUCTS AND SERVICES

Allogy's Capillary Platform is a cloud service offering that supports web and mobile applications for training delivery.

- The **Base License for Capillary** is the baseline product package currently listed on GSA Advantage.
- **Multi-Tenant Apps** is a new product package that leverages Deployed Medicine as the Capillary baseline product.

The Base License for Capillary or the Multi-Tenant Apps package are required as a baseline for all other product and license purchases.

Deployed Medicine is the tenant owned by the Joint Trauma System (JTS) under the Joint Trauma Education and Training Delivery Platform (JTETDP) contract. Capillary leverages AWS Cloud Services at Impact Level 4 (IL-4) to deliver Deployed Medicine to JTS.

The Defense Health Agency categorized the system as **Moderate** in the System Categorization Memo of 28 October 2021 and further designated the system at **Level 2NI** consistent with the DoD Cloud Computing Security Requirements Guide (SRG).

SIN 511210_Software Maintenance as a Product

Description: **Term and perpetual software licenses and maintenance**[i]
Special Item Number 511210 includes telephone support, online technical support, customized support, and other technical expertise.

Multi-Tenant Apps

Product Description: Capillary administrative tool suite (branch) providing customers with an application space, distinct, configurable user data, and content tools. Each branch can be accessed from Deployed Medicine mobile applications and through a web storefront.

Product Component	Description	Number	Function
Term License	Administrator	2	Administrative tool suite
OS software	Capillary Branch	1	Technical expertise for configuring cloud infrastructure and tenant
Application software	Capillary Apps	3	Technical expertise for configuring User-facing Web, iOS, and Android applications; initial content configuration (<2 collections)
Customized Support	Collection & Content Configuration	2	Customized support for configuring initial (2) collections required for public app store submission.
Service Level Agreement	Product Maintenance	N/A	Technical expertise in publishing bug/defect fixes via patches and updates/system upgrades.[1]
Support Desk	Online Technical Support	N/A	Online technical support for user self-diagnostics

Additional administrative, team, and course access requires additional licenses detailed below.

[1] This does not include enhancements to the system's functionality or feature set.

Administrative User License

Product Description: Direct team member and Admin access to Capillary tenant. No new apps required. Customers can mix licenses up to 6 total per unit.

Product Component	Description	Number	Function
Term License	Administrator	<6 per unit	Administrative tool suite
Term License	Team (Content)	<6 per unit	Publisher tool suite
Term License	Team (Instructor)	<6 per unit	Instructor tool suite
Term License	Team (Analyst)	<6 per unit	Program analyst tool suite

Learner License Package

Product Description: Direct Learner access to Deployed Medicine tenant Courses. 10 seats per unit.

Product Component	Description	Number	Function
Term License	Course	10 per unit	Course access and certification management suite

Site Implementation Package (small)

Product Description: Direct team member and learner access to Capillary tenant. Customers can mix team licenses up to 5 total per unit Includes customized onboarding support.

Product Component	Description	Number	Function
Term License	Team (Content)	<5	Instructor tool suite.
Term License	Team (Instructor)	<5	
Term License	Course	200 per unit	Course access and certification management suite.
Customized Support	Site Onboarding asset	N/A	Training plan design and publication for onboarding and implementing site requirements

Site Implementation Package (large)

Product Description: Direct team member and learner access to Capillary tenant. Customers can mix team licenses up to 10 total per unit Includes customized onboarding support.

Product Component	Description	Number	Function
Term License	Team (Content)	<10	Instructor tool suite.
Term License	Team (Instructor)	<10	
Term License	Course	600 per unit	Course access and certification management suite.
Customized Support	Site Onboarding asset	N/A	Training plan design and publication for onboarding and implementing site requirements

Custom Analytics Dashboard

Product Description: Custom analytics dashboard configured by tenant.

Product Component	Description	Number	Function
Data model analysis	Database planning and design	Per dashboard	Professional services for database and data object planning, design, and analytics modeling.
Dashboard Configuration	Programming	Per dashboard	UI/dashboard configuration for data analytics

Mobile Content Conversion Package

Product Description: Conversion and implementation support to ensure proper configuration of content file and graphic assets for optimal product utilization. This includes design and implementation support for seamlessly transitioning current practices to the Capillary system.

Product Component	Description	Number	Function
DAM analysis and conversion	Systems analysis, integration, and design	1 collection	Identify and prepare selected files for mobile UX. This includes analysis of existing systems, user workflows data/records management, and testing lifecycles.
Configure UI	Conversion and Implementation Support	1 collection	Media asset library and UI configuration
Convert and upload assets	Conversion and Implementation Support	1 collection	Convert assets into mobile-ready assets in support of planned user workflows, data/records management, and certification lifecycles

This package includes any combination of the following:

Asset Type	Number	Description
App & Collection Graphics	2	Graphic banners for app and collection.
Media Content Items	15	Includes publications of video files, audio files, and PDF files.
Book	1	Publication of native mobile asset equivalent to a bundled work of media content items.
Course	1	Publication of certificate-bearing native mobile asset equivalent to a bundled work of media content items. Includes question banks and assessments

Custom Development Package

Product Description: Software development for new functional features and/or enhancements to existing features at the tenant level. Development adheres to current cybersecurity frameworks and requirements per JTETDP contract. Priced per unit according to task order requirements.

Product Component	Description	Number	Function
Architecture & design	Systems analysis, design, database planning, network services	1 unit	Architecture and design spike for change control order and approval.
Software development on CSO tenant	Programming, conversion, and implementation support	1 unit	Software development and deployment to staging environment.
Security & Quality Assurance Testing	Testing	1 unit	Security and Quality Assurance testing (internal). Allows for User Acceptance Testing protocols per customer.

SIN 54154S_ Information Technology Professional Services

Description **Information Technology Professional Services**[ii]
Special Item Number 54151S offers identity and access management solutions that meet requirements established in the Federal Information Security Management Act of 2002 and NIST guidance. IT Professional Services includes:

- Network services, data/records management, and testing
- Systems analysis, integration, and design
- Programming, conversion and implementation support
- Professional services and/or labor categories for database planning and design

LABOR CATEGORY DESCRIPTIONS

Application Engineer II	
Minimum Experience	Four (4) years general experience managing or performing software engineering activities (including increasing responsibilities and knowledge of applicable standards) to include two (2) years specialized experience in the following: • Demonstrated experience working with Ada, SQL, and third/fourth generation languages in the design and implementation of systems and using database management systems.
Functional Responsibility	• Analyzes and studies complex system requirements. • Designs software tools and subsystems to support software reuse and domain analyses and manages their implementation. • Manages software development and support using formal specifications, data flow diagrams, other accepted design techniques, and CASE tools. • Estimates software development costs and schedule. • Reviews existing programs and assists in making refinements, reducing operating time, and improving current techniques. • Supervises software configuration management.
Minimum Education	Bachelor's degree in Computer Science, Information Systems, Engineering, Business, or other related discipline.

Business Analyst	
Minimum Experience	Five (5) years general experience working under general direction to include thre (3)hre years specialized experience developing functional requirements for complex integrated IT systems

Functional Responsibility	• Analyzes user needs to determine functional requirements • Performs functional allocation to identify required tasks and their interrelationships. Identifies resources required for each task. • Creates content and marketing resources to meet identified needs • Collaborates with creative design team
Minimum Education	Bachelor's degree in Computer Science, Information Systems, Engineering, Business, or other related scientific or technical discipline

Compliance Engineer	
Minimum Experience	Four (4) years general experience (including working with quality control methods and tools) to include two (2) years specialized experience in the following: • Software testing and integration and demonstrated knowledge of system and project life cycles. • Must demonstrate the ability to work independently or under only general direction
Functional Responsibility	• Assists in the evaluation of software and associated documentation. • Participates in formal and informal reviews to determine quality.
Minimum Education	Bachelor's degree in Computer Science, Information Systems, Engineering, Business, or other related scientific or technical discipline.

Machine Learning Engineer	
Minimum Experience	Two (2) years specialized experience including: • Machine Learning software engineering, program design and implementation, configuration management, maintenance, and integration. • Must have experience in heterogeneous computer networking technology and work in protocol and/or interface standards specification.
Functional Responsibility	• Technical management and support in Machine Learning algorithms including supervised and unsupervised learning tasks
Minimum Education	Ph.D. degree in Computer Science or a related field and two years programming and/or software design experience

Principal Systems Architect I	
Minimum Experience	Eight (8) years general experience with increasing responsibilities in systems engineering to include 5 years specialized experience in the following: • Supervision of system architects • Use of structured analysis, design methodologies and design tools (such as IDEF Ix, entity relationship diagrams, and other design techniques), object-oriented principles, and experience with the logical and physical functional, operational, and technical architecture of large and complex information systems.
Functional Responsibility	• The Principal Systems Architect I plans architecture and development needs, schedules tasks, and supervises an integrated Agile Development and

	Quality Assurance (QA) Team to ensure requirements translate to functional capabilities on schedule • Establishes system information requirements using analysis provided by information engineers in the development of enterprise-wide or large-scale information systems. • Designs architecture including the software, hardware, and communications to support the total requirements as well as provide for present and future cross-functional requirements and interfaces. • Ensures that these systems are compatible and in compliance with the standards for open systems architectures, the OSI and ISO reference models, and profiles of standards (such as the IEEE, OSE reference model) as they apply to the implementation and specification of IM solutions of the application platform, across the API, and the external environment/software application. • Ensures that the common operating environment is TAFIM compliant. Analytically and systematically evaluates problems of workflows, organization, and planning and develops appropriate corrective action. • Provides daily supervision and direction to staff.
Minimum Education	Master's degree in Computer Science, Information Systems, Engineering, Business, or other related discipline.

Program Manager I	
Minimum Experience	Twelve (12) years general experience of increasing responsibilities in information systems design and/or management to include 9 years specialized experience in

	the following: • Project development from inception to deployment • Expertise in the management and control of funds and resources using complex reporting mechanisms, and demonstrated capability in managing multitask contracts and/or subcontracts of various types and complexity
Functional Responsibility	The Program Manager (PM) manages the contract translating contract deliverables to product requirements, performing project planning, and program documentation. This role oversees adaptive planning along Agile principles and works closely with the customer to ensure product requirements align with contract deliverables, and business processes run efficiently. The PM also supervises a **Technical Writer** responsible for service desk communications and weekly reporting, and a **Business Analyst** responsible for analyzing user engagement and creating marketing content. • Serves as the project manager for a large, complex task order (or a group of task orders affecting the same common/standard/migration system) Assists the Program Manager in working with the Government CO, the contract level COR, the task order level COR(s), Government management personnel, and customer agency representatives. • Under the guidance of the Program Manager, responsible for the overall management of the specific task order(s) and ensuring that the technical solutions and schedules in the task order are implemented in a timely manner. • Performs enterprise-wide horizontal integration planning and interfaces to other functional systems.
Minimum Education	Bachelor's degree in Computer Science, Information Systems, Engineering, Business, or other related discipline

Program Manager II	
Minimum Experience	Fifteen (15) Years Experience • Must have demonstrated information technology expertise and communications skills to be able interface with all levels of management.
Functional Responsibility	Allogy's Program Manager II coordinates both technical and business operations through a Principal Software Architect and Program Manager. This role also sets testing criteria and maintains the Risk Management Framework (RMF). • Serves as the contractor counterpart to the Government program/technical manager for the program. • Manages substantial program/technical support operations involving multiple projects/task orders and personnel at diverse locations. Organizes, directs, and coordinates planning and execution of all program/technical support activities. • Simultaneously plans and manages the transition of several highly technical projects. • Establishes and alters (as necessary) management structure to effectively direct program/technical support activities. Meets and confers with Government management officials regarding the status of specific contractor program/technical activities and problems, issues, or conflicts regarding resolution.
Minimum Education	Bachelor's Degree

Program Manager III	
Minimum Experience	Three (3) years programming experience may include one (1) year journeyman-level programming experience.

Functional Responsibility	Under general supervision, • Develops block diagrams and logic flow charts. Translates detailed design into computer program-coded instructions. • Develops computer programs in accordance with program and system design specifications. • Tests, debugs, and refines programs to produce desired results. Revises programs to make refinements, reduce operating time, or improve efficiency. Develops necessary program documentation including operational procedures.
Minimum Education	Bachelor's degree in Computer Science, Information Systems, Engineering, Business, or other related discipline.

Senior Software Engineer	
Minimum Experience	Ten (10) years general experience
Functional Responsibility	Software development (i.e., software requirements analysis, top- down design, structured analysis) and software testing
Minimum Education	Bachelor's degree in Computer Science, Information Systems, Engineering, Business, or other related discipline

Software Developer	
Minimum Experience	Two (2) years general experience programming in development teams

Functional Responsibility	Under general supervision: Software programming and development using relevant languages as directed
Minimum Education	Bachelor's degree in Computer Science, Information Systems, Engineering, Business, or other related discipline.

Technical Writer	
Minimum Experience	Three (3) years writing experience working under only general direction to include one (1) year specialized experience editing technical documents
Functional Responsibility	• Assists in collecting and organizing information required for preparation of user manuals, training materials, installation guides, proposals, and reports. • Edits functional descriptions, system specifications, user manuals, special reports, or any other customer deliverables and documents. • Assists in performing financial and administrative functions.
Minimum Education	Bachelor's degree in English, Literature, or other related discipline.

Degree/Experience Equivalency

The labor category definitions in our Pricelist describe the functional responsibilities, education, and experience requirements for each labor category. These requirements are a guide to the types of experience and educational background of typical personnel in each labor category.

Education and experience may be substituted for each other. Each year of relevant experience may be substituted for 1 year of education, and vice versa. In addition, certifications, professional licenses, and vocational technical training may be substituted for experience or education with the written approval of the ordering activity.

Required Education	Experience Equivalent	Other Equivalence
Associate's Degree	1 year relevant experience	Vocational or technical training in work-related field
Bachelor's Degree	Associate's degree + 2 years relevant experience, or 4 years relevant experience	Professional certification
Master's Degree	Bachelor's + 2 years relevant experience, or Associate's + 4 years relevant experience	Professional license
Doctorate	Master's + 2 years relevant experience, or Bachelor's + 4 years relevant experience
