24. Notification regarding registration in System for Award Management (SAM) database. Contractor registered and active in SAM
LABOR CATEGORY DESCRIPTIONS

BPRS3 Business Process Re-Engineering Specialist Level III

**Minimum Year Experience:** 12 years  
**Minimum Education:** Master’s Degree

**Responsibilities:** Manage use of process improvement, reengineering methodologies, and internet-related methodologies and principles to conduct process modernization projects. Responsible for transitioning of existing organizations or project teams in accomplishing the organization’s goals or project activities and objectives through improved use of internet and other automated processes. Support activity and data modeling, development of modern business methods, identification of best practices, and creating and assessing performance measurements. Provide group facilitation, interviewing, training, and additional forms of knowledge transfer. Key coordinator between customers and multiple project teams to ensure enterprise-wide integration of reengineering efforts and application of best practice including e-business practices. May provide daily supervision and direction to other contractor business reengineering specialists and web architects. Commensurate education and experience.

Business Process Re-engineering Specialist - Level 1

**Minimum Year Experience:** 3 years  
**Minimum Education:** Bachelor’s Degree

**Responsibilities:** Apply process improvement, reengineering methodologies, and internet-related methodologies and principles to conduct process modernization projects. Assist senior staff with effective transitioning of existing organizations or project teams in accomplishing the organization’s goals or project activities and objectives through improved use of internet and other automated processes. Support activity and data modeling, development of modern business methods, identification of best practices, and creating and assessing performance measurements. Provide group facilitation, interviewing, training, and additional forms of knowledge transfer. Commensurate education and experience.

Business Analyst Level III

**Minimum Year Experience:** 12 years  
**Minimum Education:** Master’s Degree

**Responsibilities:** Assist in applying common best practices for the industry to the customer using a knowledge base to create conceptual business models and to identify relevant issues and considerations in selecting application software packages. Assess the operational and functional baseline of an organization and its organizational components and help to define the direction and strategy for an engagement while ensuring the organizational needs are being addressed. Typical areas addressed include Human Resources, Finance, Supply, and operations. Identify information technology inadequacies and/or deficiencies that affect the functional area’s ability to support/meet organizational goals. Generate functional area strategies for enhanced IT operations in a cross-functional area mode throughout the organization. Participate in account strategy sessions, strategic assessments and design reviews to validate enterprise approach and associated work products, such as ERP implementations coordinating the resolution of highly complex problems and tasks. Commensurate experience and education.
**Business Analyst Level 2**

**Minimum Year Experience:** 10 years  
**Minimum Education:** Bachelor’s Degree

**Responsibilities:** Assist in applying common best practices for the industry to the customer using a knowledge base to create conceptual business models and to identify relevant issues and considerations in selecting application software packages. Assess the operational and functional baseline of an organization and its organizational components and help to define the direction and strategy for an engagement while ensuring the organizational needs are being addressed. Typical areas addressed include Human Resources, Finance, Supply, and operations. Identify information technology inadequacies and/or deficiencies that affect the functional area’s ability to support/meet organizational goals. Support the development of functional area strategies for enhanced IT. Commensurate experience and education.

**Information Engineer Level 2**

**Minimum Year Experience:** 10 years  
**Minimum Education:** Bachelor’s Degree

**Responsibilities:** Apply an enterprise-wide set of disciplines for the planning, analysis, design and construction of information systems on an enterprise-wide basis or across a major sector of the enterprise. Develop analytical and computational techniques and methodology for problem solutions. Perform enterprise wide strategic systems planning, business information planning, business and analysis. Perform process and data modeling in support of the planning and analysis efforts using both manual and automated tools; such as Integrated Computer-Aided Software Engineering tools. Apply reverse engineering and re-engineering disciplines to develop migration strategic and planning documents. Provide technical guidance in software engineering techniques and automated support tools. Provide daily supervision and direction to staff.

**System Programmer**

**Minimum Year Experience:** 12 years  
**Minimum Education:** Master’s Degree

**Responsibilities:** Create and/or maintain operating systems, communications software, database packages, compilers, assemblers, and utility programs. Modify existing software as well as create special-purpose software to ensure efficiency and integrity between systems and applications.
**Systems Engineer Level 3**

**Minimum Year Experience:** 10 years  
**Minimum Education:** Bachelor’s Degree

**Responsibilities:** Supervise, coordinate and/or perform additions and changes to network hardware and operating systems, and attached devices; including investigation, analysis, recommendation, configuration, installation, and testing of new network hardware and software. Provide direct support in the day-to-day operations on network hardware and operating systems including the evaluation of system utilization, monitoring response time and primary support for detection and correction of operational problems. Troubleshoot at the physical level of the network, working with network measurement hardware and software, as well as physical checking and testing of hardware devices at the logical level working with communication protocols. Participate in planning design, technical review and implementation for new network infrastructure hardware and network operating systems for voice and data communication networks. Maintain network infrastructure standards including network communication protocols such as TCP/IP. Provide technical consultation, training and support to IT staff as designated by the government. Diagnose and resolve complex communication problems.

---

**Subject Matter Expert - Level 3**

**Minimum Year Experience:** 12 years  
**Minimum Education:** Master’s Degree

**Responsibilities:** Provide technical, managerial, and administrative direction for problem definition, analysis, requirements development, and implementation for complex to extremely complex systems in the subject matter area. Make recommendations and advise on organization-wide system improvements, optimization or maintenance efforts in the following specialties: information systems architecture; networking; telecommunications; automation; communications protocols; risk management/electronic analysis; software; lifecycle management; software development methodologies; and modeling and simulation. Commensurate experience in IT and in new and related older technology that directly relates to the required area of expertise.
