CUSTOMER INFORMATION

1a. AUTHORIZED SPECIAL ITEM NUMBERS (SINs):

<u>SIN</u>	<u>DESCRIPTION</u>
54151S	Information Technology Professional Services
518210C	Cloud Related IT Professional Services
OLM	Order Level Materials

1b. Lowest Priced Service and Price for each Service Rate: See Price List

1c. SERVICES OFFERED: See Price List

2. MAXIMUM ORDER PER SIN:

<u>SIN</u>	<u>MAXIMUM ORDER</u>
54151S	\$500,000 per SIN/Order
18210C	\$500,000 per SIN/Order

This maximum order threshold is a dollar amount at which it is suggested that the ordering agency request higher discounts from the contractor before issuing the order. The contractor may: (1) Offer a new lower price, (2) Offer the lowest price available under the contract, or (3) Decline the order within five (5) days. In accordance with the Maximum Order provisions contained in the Schedule, a delivery order may be placed against the Schedule contract even though it exceeds the maximum order threshold.

3. MINIMUM ORDER LIMITATION: \$100

4. GEOGRAPHIC COVERAGE (DELIVERY AREA): The geographic scope of this contract is the 48 contiguous United States and District of Columbia.

5. POINT OF PRODUCTION: United States

6. BASIC DISCOUNT: Prices shown are NET Prices; Basic Discounts have been deducted

7. DISCOUNTS: Prices shown are Net. Basic discounts have been deducted.

8. PROMPT PAYMENT TERMS: SIN 54151S: 1%, net 15 days from receipt of invoice or date of acceptance, whichever is later.

- 9a. GOVERNMENT PURCHASE CARDS ARE ACCEPTED UP TO THE MICRO- PURCHASE THRESHOLD.
- 9b. GOVERNMENT PURCHASE CARDS ARE ACCEPTED ABOVE THE MICRO- PURCHASE THRESHOLD.
10. FOREIGN ITEMS: None
- 11a. TIME OF DELIVERY: Not applicable to professional services.
- 11b. EXPEDITED DELIVERY: Contact Contractor
- 11c. OVERNIGHT AND 2-DAY DELIVERY: Contact Contractor
- 11d. URGENT REQUIREMENTS: Contact Contractor
12. F.O.B. POINT: Destination
- 13a. ORDERING ADDRESS:
- ATTN: **GSA Order Processing**

LABOR CATEGORIES DESCRIPTIONS

SIN 54151S Information Technology Professional Services

Categories	Labor Category Description	Min Education	Min Years of Exp
Agile Coach - Level I	Develops an organization-wide strategy to implement Agile project management. Educates and trains individual employees, and teams on Agile methodology and techniques. Evaluates and enhances stand-up's, sprint meetings and overall communication to increase efficiency and effectiveness of development processes. Coaches managers and executives on Agile project management through workshops and one on one meetings to provide constructive feedback.	High School	1 year
Agile Coach - Level II		Bachelors	5 years
Agile Coach - Level III		Masters	10 years
Applications Programmer - Level I	Designs, develops, enhances, debugs, and implements software. Troubleshoots production problems related to software applications. Researches, tests, builds, and coordinates the conversion and/or integration of new products based on client requirements. Designs and develops new software products or major enhancements to existing software. Addresses problems of systems integration, compatibility, and multiple platforms. Consults with project teams and end users to identify application requirements.	High School	1 year
Applications Programmer - Level II		Bachelors	5 years
Applications Programmer - Level III		Masters	10 years
Applications Systems Analyst - Level I	Under general supervision, formulates and defines system scope and objectives through research and fact-finding to develop or modify moderately complex information systems. Prepares detailed specifications from which programs will be written. Designs, codes, tests, debugs, documents, and maintains those programs. Competent to work on most phases of applications systems analysis and programming activities but requires instruction and guidance in other phases.	High School	1 year
Applications Systems Analyst - Level II		Bachelors	5 years
Applications Systems Analyst - Level III		Masters	10 years
Business Subject Matter Expert - Level I	Provides technical knowledge and analysis of highly specialized applications and operational environments, high-level functional systems analysis, design, integration, documentation and implementation advice on exceptionally complex problems that need extensive knowledge of the subject matter for effective implementation.	High School	1 year
Business Subject Matter Expert - Level II		Bachelors	5 years

Categories	Labor Category Description	Min Education	Min Years of Exp
Business Subject Matter Expert Level III	Participates as needed in all phases of software development with emphasis on the planning, analysis, testing, integration, documentation, and presentation phases.	Masters	10 years
Business Analyst - Level I	Formulates and defines systems scope and objectives based on both user needs and a good understanding of applicable business systems and industry requirements. Devises or modifies procedures to solve complex problems considering computer equipment capacity and limitations, operating time, and form of desired results. Includes analysis of business and user needs, documentation of requirements, and translation into proper system requirement specifications. Guides and advises less-experienced Business Systems Analysts.	High School	1 year
Business Analyst - Level II		Bachelors	5 years
Business Analyst - Level III		Masters	10 years
Communications Analyst - Level I	Assists in the planning, design, and implementation of communications networks. Responsible primarily for the assessment and optimization of network design through review and assessment of user needs. Conducts feasibility studies for large projects, develops requests for proposal, evaluates vendor products, and makes recommendations on selection. May function as lead position providing guidance and training to less-experienced analysts.	High School	1 year
Communications Analyst - Level II		Bachelors	5 years
Communications Analyst - Level III		Masters	10 years
Computer Operations Manager - Level I	Responsible for all activities relating to the operation of centralized data processing equipment and peripheral information systems equipment. Establishes detailed schedules for the utilization of all equipment in the computer operations section to obtain maximum utilization. Assigns personnel to various operations and directs their activities. Reviews and evaluates work and prepares performance reports. Confers with and advises subordinates on administrative policies and procedures, technical problems, priorities, and methods.	High School	1 year
Computer Operations Manager - Level II		Bachelors	5 years
Computer Operations Manager - Level III		Masters	10 years
Consultant - Level I	Works with end user groups to evaluate and solve technical problems. Evaluates existing systems and/or user needs to analyze, design, recommend, and implement system changes.	High School	1 year
Consultant - Level II		Bachelors	5 years
Consultant - Level III		Masters	10 years
Data Architect - Level I	Designs and builds databases. Develops strategies for data acquisitions, archive recovery, and implementation of a database. Works in a data warehouse environment, which includes data design, database architecture, metadata and repository creation. Translates business needs into long-term architecture solutions.	High School	1 year
Data Architect - Level II		Bachelors	5 years

Categories	Labor Category Description	Min Education	Min Years of Exp
Data Architect - Level III	Defines, designs, and builds dimensional databases. Develops data warehousing blueprints, evaluating hardware and software platforms, and integrating systems.	Masters	10 years
Database Administrator - Level I	Administrates organization's database, using database management system to organize and store data. Ascertains user requirements, creates computer databases, and tests and coordinates changes. Interacts with development and end-user personnel to determine application data access requirements, transaction rates, volume analysis, and other pertinent data required to develop and maintain integrated databases.	High School	1 year
Database Administrator - Level II		Bachelors	5 years
Database Administrator - Level III		Masters	10 years
DevSecOps Solutions Architect - Level I	Analyze user needs and software requirements to determine feasibility of design within time and cost constraints. Applies coding and testing standards, security testing tools, threat modeling, CI/CD tools, configuration management/scripting technologies, cloud platforms architecture, and deployment of containerized applications/microservices architectures. Incorporate security measures that must be taken when a product reaches end of life. Perform integrated quality assurance testing for security functionality and resiliency attacks	High School	1 year
DevSecOps Solutions Architect - Level II		Bachelors	5 years
DevSecOps Solutions Architect - Level III		Masters	10 years
Documentation Specialist - Level I	Responsible for preparing and/or maintaining systems, programming, and operations documentation, procedures, and methods including user manuals and reference manuals. Maintains a current internal documentation library. Provides or coordinates special documentation services as required. Competent to work at the highest level of all phases of documentation. May act as project leader for large positions.	High School	1 year
Documentation Specialist - Level II		Bachelors	5 years
Documentation Specialist - Level III		Masters	10 years
Enterprise Architect - Level I	Provides high-level architectural expertise to managers and technical staff. Develops architectural products and deliverables for the enterprise and operational business lines. Develops strategy of system and the design infrastructure necessary to support that strategy. Advises on selection of technological purchases with regards to processing, data storage, data access, and applications development. Sets standards for the client/server relational database structure for the organization.	High School	1 year
Enterprise Architect - Level II		Bachelors	5 years
Enterprise Architect - Level III		Masters	10 years
UI/UX/CX Specialist - Level I	Provides user-centered interaction and visual design methodology to improve the usability, ease of use, and enhance appeal, and maximize functionality provided through the interaction between the customer and a product or service, addressing all aspects of a product or service as perceived by users. Designs the visual layout for software Web applications which leverage emergent technologies, electronics, and/or desktop and mobile devices.	High School	1 year
UI/UX/CX Specialist - Level II		Bachelors	5 years
UI/UX/CX Specialist - Level III		Masters	10 years

Categories	Labor Category Description	Min Education	Min Years of Exp
Help Desk Manager - Level I	Has overall responsibility for help desk operations associated with the identification, prioritization and resolution of reported problems. Ensures that all phases of help desk support are properly coordinated, monitored, logged, tracked and resolved appropriately. May maintain responsibility for development, maintenance and integrity of help desk software.	High School	1 year
Help Desk Manager - Level II		Bachelors	5 years
Help Desk Manager - Level III		Masters	10 years
Help Desk Support Services Specialist - Level I	Provides support to end users on a variety of issues. Identifies, researches, and resolves technical problems. Responds to telephone calls, email and personnel requests for technical support. Documents, tracks, and monitors the problem to ensure a timely resolution.	High School	1 year
Help Desk Support Services Specialist - Level II		Bachelors	5 years
Help Desk Support Services Specialist - Level III		Masters	10 years
Information Security SME - Level I	Responsible for determining enterprise information security standards. Develops and implements information security standards and procedures. Provides tactical information security advice and examining the ramifications of new technologies. Ensures that all information systems are functional and secure.	High School	1 year
Information Security SME - Level II		Bachelors	5 years
Information Security SME - Level III		Masters	10 years
Security Analyst - Level I	Plans, implements, and updates security measures and controls to protect an organization's computer systems, networks, and data. Analyzes successful and unsuccessful breaches of data security, determines their root cause, and rectifies security weaknesses. Protects digital files and information systems against unauthorized access, modification, or destruction.	High School	1 year
Security Analyst - Level II		Bachelors	5 years
Security Analyst - Level III		Masters	10 years
Scrum Master - Level I	Facilitates and guides a software development product owner, team, and organization on how to use Agile/Scrum concepts, values, practices, and principles focusing on improving team effectiveness. Encourages getting work done without coercion, assigning, or dictating the work. Facilitates discussions and decision making, and assists in mediation of conflict resolution.	High School	1 year
Scrum Master - Level II		Bachelors	5 years
Scrum Master - Level III		Masters	10 years
Training Specialist - Level I	Responsible for preparing and/or maintaining systems, programming, and operations documentation, procedures, and methods including user manuals and reference manuals. Maintains a current internal documentation library. Provides or coordinates special documentation services as required. Competent to work at the highest level of all phases of documentation. May act as project leader for large positions.	High School	1 year
Training Specialist - Level II		Bachelors	5 years
Training Specialist - Level III		Masters	10 years
Network Engineer - Level I	Manages the purchase, installation, and support of network communications, including LAN/WAN systems. Responsible for evaluating current systems. Works on	High School	1 year

Categories	Labor Category Description	Min Education	Min Years of Exp
Network Engineer - Level II	complex problems where analysis of situation requires in-depth evaluation of various factors. Plans large-scale systems projects through vendor comparison and cost studies. Provides work leadership and training to lower level network engineers.	Bachelors	5 years
Network Engineer - Level III		Masters	10 years
Project Manager - Level I	Responsible for all aspects of the development and implementation of assigned projects and provides a single point of contact for those projects. Takes projects from original concept through final implementation. Interfaces with all areas affected by the project including end users, computer services, and client services. Defines project scope and objectives. Develops detailed work plans, schedules, project estimates, resource plans, and status reports. Conducts project meetings and is responsible for project tracking and analysis. Ensures adherence to quality standards and reviews project deliverables	High School	1 year
Project Manager - Level II		Bachelors	5 years
Project Manager - Level III		Masters	10 years
Quality Assurance Analyst - Level I	Conducts routine and non-routine tests using variety of testing devices and procedures to maintain product quality. Constructs and alters quality assurance test plans according to product specifications. Assists in the creation and maintenance of testing standard, processes and systems that align with industry standards.	High School	1 year
Quality Assurance Analyst - Level II		Bachelors	5 years
Quality Assurance Analyst - Level III		Masters	10 years
Systems Administrator - Level I	Administers, develops, runs tests on, implements, and maintains operating system and related software. Establishes and implements standards for computer operations for compatibility between hardware and software, according to specifications and parameters. Troubleshoots and resolves software, operating system, and networking problems. Schedules, performs, and monitors system backups and, when necessary, performs data recoveries.	High School	1 year
Systems Administrator - Level II		Bachelors	5 years
Systems Administrator - Level III		Masters	10 years

LABOR CATEGORIES DESCRIPTIONS
SIN 518210C Cloud Related IT Professional Services

Categories	Labor Category Description	Min Education	Min Years of Exp
Chief Information Security Officer - Level I	Oversees the Information Security Management function of an organization, including the development, documentation, implementation, operation, and maintenance of an information security program, and heads ongoing activities to preserve the availability, integrity, and confidentiality of organization information resources in compliance with applicable security policies and standards. Safeguards the organization's computers, networks, and data against threats, such as security breaches, computer viruses, or attacks by cyber-criminals, avoiding loss of confidential information, lost revenue, and fines from regulatory agencies for failing to protect data.	High School	1 year
Chief Information Security Officer - Level II		Bachelors	5 years
Chief Information Security Officer - Level III		Masters	10 years
Cloud Architect – Level I	Designs, develops, implements, utilizes, and conforms to enterprise cloud architecture application solutions, strategies, processes, and standards, focusing on expertise in cloud technologies. Collaborates with business owners, Analysts, Engineers, development teams, and infrastructure services to define, establish, and communicate application and data architecture standards, policies, and directions. Designs high quality architectures, and drives architecture activities that are aligned to organization requirements set by leadership on behalf of stakeholders and are consistent with enterprise architectural standards.	High School	1 year
Cloud Architect – Level II		Bachelors	5 years
Cloud Architect – Level III		Masters	10 years
Cloud Solutions Architect – Level I	Designs, develops, implements, utilizes, and conforms to enterprise cloud architecture application solutions, strategies, processes, and standards, focusing on expertise in cloud technologies. Collaborates with business owners, Analysts, Engineers, development teams, and infrastructure services to define, establish, and communicate application and data architecture standards, policies, and directions.	High School	1 year
Cloud Solutions Architect – Level II		Bachelors	5 years
Cloud Solutions Architect – Level III		Masters	10 years
Cloud Consultant – Level I	Provides high-level cloud-based specialized technical support and consultation to businesses and IT management. Researches and evaluates new cloud-based technological developments and evolving business requirements; analyzes findings and seeks opportunities for improvement. Implements cloud infrastructure solution offerings on commercial and government public cloud, private cloud, and hybrid customer environments	High School	1 year
Cloud Consultant – Level II		Bachelors	5 years
Cloud Consultant – Level III		Masters	10 years

Categories	Labor Category Description	Min Education	Min Years of Exp
DevSecOps Engineer - Level I	Analyze user needs and software requirements to determine feasibility of design within time and cost constraints. Applies coding and testing standards, security testing tools, threat modeling, and conducts code reviews. Evaluate factors such as reporting formats required, cost constraints, and need for security restrictions to determine hardware configuration. Identify security issues around steady state operation and management of software. Incorporate security measures that must be taken when a product reaches end of life. Perform integrated quality assurance testing for security functionality and resiliency attacks	High School	1 year
DevSecOps Engineer - Level II		Bachelors	5 years
DevSecOps Engineer - Level III		Masters	10 years
Program Manager - Level I	Manages programs to ensure that implementation and prescribed activities are carried out in accordance with specified objectives. Plans and develops methods and procedures for implementing programs, directs and coordinates program activities, and exercises control over personnel responsible for specific functions or phases of programs.	High School	1 year
Program Manager - Level II		Bachelors	5 years
Program Manager - Level III		Masters	10 years
