SIN 54151S Labor Category Descriptions

Job Title: IT Subject Matter Expert II
Minimum/General Experience: 15 Years
Functional Responsibility: Provide technical, managerial, and administrative direction for problem definition, analysis, requirements development, and implementation for complex to extremely complex systems in the subject matter area. Make recommendations and advise on organization-wide system improvements, optimization or maintenance efforts in the following specialties: information systems architecture; networking; telecommunications; automation; communications protocols; risk management/electronic analysis; software; lifecycle management; software development methodologies; and modeling and simulation. Commensurate experience in IT and in new and related older technology that directly relates to the required area of expertise.
Minimum Education/Training: Master's Degree and 15 years Information Technology experience OR Bachelor's Degree and 15 years OR Technical Certification and/or College Courses and 20 years Information Technology experience OR 25 years Information Technology experience

Job Title: IT Senior Project Manager / Architect
Minimum/General Experience: 10 Years
Functional Responsibility: Serve as the program manager typically responsible for organizing, directing, and managing all aspects of contract operational support functions involving multiple complex and inter-related project tasks that often require managing teams of contractor personnel at multiple locations. Provide overall direction of program activities. Manage and maintain contractor interface with the senior levels of the customer's organization. Consult with customer and contractor personnel to formulate and review task plans and deliverables, ensuring conformance with program and project task schedules and costs and contractual obligations. Establish and maintain technical and financial reports to show progress of projects to management and customers, organize and assign responsibilities to subordinates, oversee the successful completion of all assigned tasks, and assume the initiative and provide support to marketing personnel in identifying and acquiring potential business.
Minimum Education: Master's Degree and 10 years Information Technology experience OR Bachelor's Degree and 15 years OR Technical Certification and/or College Courses and 20 years Information Technology experience OR 25 years Information Technology experience

Job Title: IT Subject Matter Expert
Minimum/General Experience: 10 Years
Functional Responsibility: Analyze user needs to determine functional requirements and define problems and develop plans and requirements in the subject matter area for moderately complex to complex systems related to information systems architecture, networking; telecommunications, automation, communications protocols, risk management/electronic analysis, software, lifecycle management, software development methodologies, and modeling and simulation. Perform functional allocation to identify

required tasks and their interrelationships. Identify resources required for each task. Possess requisite knowledge and expertise so recognized in the professional community that the government is able to qualify the individual as an expert in the field for an actual task order. Demonstrate exceptional oral and written communication skills. Commensurate experience in IT and in new and related older technology that directly relates to the required area of expertise.

Minimum Education: Master's Degree and 10 years Information Technology experience OR Bachelor's Degree and 15 years OR Technical Certification and/or College Courses and 20 years Information Technology experience OR 25 years Information Technology experience

Job Title: IT Application Migration Specialist II

Minimum/General Experience: 10 Years

Functional Responsibility: Leads tasks related to the day-to-day operations of several large software implementations including managing user access, sharing model, creation and maintenance of custom objects and fields, handling bulk data migration, workflows, validation rules, page layouts, and troubleshooting and integrations;

- Develop/Collaborate with the development scrum teams and other interconnected IT groups to optimize the end-to-end process including monitoring, deployment and support;
- System performance management;
- Systems change / configuration management;
- Business requirements management;
- Problem solving /analytical thinking;
- Creative thinking;

Strong knowledge of all aspects of software configuration and technical/functional capabilities, including all changes and potential system implications related to ongoing releases entity and data mapping for data integration and migration

Minimum Education: Master's Degree and 10 years Information Technology experience OR Bachelor's Degree and 15 years OR Technical Certification and/or College Courses and 20 years Information Technology experience OR 25 years Information Technology experience

Job Title: IT Program/Engagement Manager

Minimum/General Experience: 5 Years

Functional Responsibility: Typically oversee all aspects of the project, leading a team on large projects or a significant segment of large and complex projects. Analyze new and complex project-related problems and create innovative solutions that normally involve the schedule, technology, methodology, tools, solution components, and financial management of the project. Provide applications systems analysis and long and short-range plans for application selection, systems development, systems maintenance, and production activities for necessary support resources. Commensurate experience and education for the specific level.

Minimum Education: Bachelor's Degree and 5 years Information Technology experience OR Technical Certification and/or College Courses and 7 years Information Technology experience OR 9 years Information Technology experience

Job Title: IT Application Migration Specialist I

Minimum/General Experience: 5 Years

Functional Responsibility: Performs under supervision tasks related to the day-to-day operations of several large software implementations including managing user access, sharing model, creation and maintenance of custom objects and fields, handling bulk data migration, workflows, validation rules, page layouts, and troubleshooting and integrations;

- Develop/Collaborate with the development scrum teams and other interconnected IT groups to optimize the end-to-end process including monitoring, deployment and support;
- System performance management;
- Systems change / configuration management;
- Business requirements management;
- Problem solving /analytical thinking;
- Creative thinking;

Strong knowledge of all aspects of software configuration and technical/functional capabilities, including all changes and potential system implications related to ongoing releases entity and data mapping for data integration and migration

Minimum Education: Bachelor's Degree and 5 years Information Technology experience OR Technical Certification and/or College Courses and 7 years Information Technology experience OR 9 years Information Technology experience

Job Title: IT Technical Writer II

Minimum/General Experience: 5 Years

Functional Responsibility: Write and/or edit technical documents, including business proposals, reports, user manuals, briefings and presentations, functional descriptions, system specifications, guidelines, special reports, and other project deliverables to meet contract requirements. Develop outlines and drafts for review and approval by technical specialists and project management ensuring that final documents meet applicable contract requirements and regulations. Research and gather technical and background information for inclusion in project documentation and deliverables. Consult relevant information sources, including library resources, technical and financial documents, and client and project personnel, to obtain background information, and verify pertinent guidelines and regulations governing project deliverables. Commensurate experience, education, and level of supervision and direction.

Minimum Education: Bachelor's Degree and 5 years Information Technology experience OR Technical Certification and/or College Courses and 7 years Information Technology experience OR 9 years Information Technology experience

Job Title: IT Business Analyst

Minimum/General Experience: 5 Years

Functional Responsibility: Assist in applying common best practices for the industry to the customer using a knowledge base to create conceptual business models and to identify relevant issues and considerations in selecting application software packages. Assess the operational and functional baseline of an organization and its organizational components, and help to define the direction and strategy for an engagement while ensuring the organizational needs are being addressed. Typical areas addressed include Human Resources, Finance, Supply, and operations. Identify information technology inadequacies and/or deficiencies that affect the functional area's ability to support/meet organizational goals. Support the development of functional area strategies for enhanced IT. Commensurate experience and education.

Minimum Education: Bachelor's Degree and 5 years Information Technology experience OR Technical Certification and/or College Courses and 7 years Information Technology experience OR 9 years Information Technology experience

Job Title: IT Database Management Specialist II

Minimum/General Experience: 5 Years

Functional Responsibility: Provide highly technical expertise in the use of DBMS. Evaluate and recommend available DBMS products to support validated user requirements. Define file organization, indexing methods, and security procedures for specific user applications. Test and assist in the implementation of changes or new database designs. Monitor database usage and statistics. Knowledge of relational database environment.

Minimum Education: Bachelor's Degree and 5 years Information Technology experience OR Technical Certification and/or College Courses and 7 years Information Technology experience OR 9 years Information Technology experience

Job Title: IT Training Specialist I

Minimum/General Experience: 5 Years

Functional Responsibility: Provide leadership and management for training tasks that are being performed by the contractor. Prepare training documents and services that are required to support training requirements drawing input from the researchers, test engineers, systems analysts, training specialists, logisticians, and the government and applying customer training policies. Supervise the activity of the Training Specialist(s). Maintain contact with the customer to insure that the training meets their needs.

Minimum Education/Training: Bachelor's Degree and 5 years Information Technology experience OR Technical Certification and/or College Courses and 7 years Information Technology experience OR 9 years Information Technology experience
