**Computer Programmer I**
Computer programmers write and test code that allows computer applications and software programs to function properly. They turn the program designs created by software developers and engineers into instructions that a computer can follow. In addition, programmers test newly created applications and programs to ensure that they produce the expected results. If they do not work correctly, computer programmers check the code for mistakes and fix them.
Min Education: Bachelors
Min Years of Experience: 1

**Web Software Developer I**
Web Software Developers write and test code to develop software applications, this could include enterprise software applications and web-based software applications. WSD I will modify existing software to correct errors, to adapt it to new hardware, or to upgrade interfaces and improve performance.
Min Education: Bachelors
Min Years of Experience: 1

**Business Systems Analyst Senior**
Business Systems Analyst Senior will analyze user requirements, procedures, business processes and problems to automate or improve existing systems. They will review computer system capabilities, workflow, and scheduling limitations to create solutions. Will analyze or recommend commercially available software for a specific business need.
Min Education: Bachelors
Min Years of Experience: 4

**Web Software Developer II**
Web Software Developer II analyzes information to determine, recommend, and plan installation of a new system or modification of an existing system. WSD II analyze user needs and software requirements to determine feasibility of design within time and cost constraints. Confer with systems analysts, engineers, programmers and others to design system and to obtain information on project limitations and capabilities, performance requirements and interfaces.
Min Education: Bachelors
Min Years of Experience: 4

**System Programmer**

Business System Programmer will design, develop and modify software systems, using system design and requirements. Business System Programmer will be familiar with business logic of the systems and will work at the middle tier level to enable business level functionalities.

Min Education: Masters
Min Years of Experience: 8

**Project Manager**

Project managers plan, organize and oversee the completion of specific projects. They are concerned with the schedule of a project: making sure it is completed on time or, even better, early. They also carefully plan to ensure that a project comes in at or below its budget. They communicate with project personnel, clients, supervisors and others to define goals and make sure a project stays on track.

Min Education: Masters
Min Years of Experience: 4

**Program Manager**

A program manager acts as a coordinator between multiple projects at the organization to be sure their benefiting each other and aligning with overall business goals. They organize programs and projects in accordance with customers mission and vision. Program Managers map long term goals, develop budget and operating plan. They ensure goals are met in areas including customer satisfaction, safety, quality and team member performance.

Min Education: Masters
Min Years of Experience: 10

**Systems Architect**

System Architects design, configure, operate and perform maintenance on computer systems. They define the architecture of a system in order to fulfill certain requirements. They analyze the system from a security, performance and scalability perspective. Systems architect will consider business objectives as well as its size, budget, and resources in order to figure out what kind of computing power it needs. They also consider how much data storage is needed, the size and speed they require, and the best user experience for the customers.

Min Education: Masters
Min Years of Experience: 10

**Cloud Engineer I**

Implements and designs server, network, and software configurations for a cloud computing infrastructure and applications with a focus on DevOps principles. Monitors the performance of systems. Familiar with standard concepts, practices, and procedures of cloud technology, including Software as Service (SaaS), Platform as Service (PaaS), or Infrastructure as a Service (IaaS).

Min Education: Bachelors
Min Years of Experience: 2

**Cloud Engineer II**

Implements and designs server, network, and software configurations for a cloud computing infrastructure and applications with a focus on DevOps principles. Monitors the performance of systems. Familiar with standard concepts, practices, and procedures of cloud technology, including Software as Service (SaaS), Platform as Service (PaaS), or Infrastructure as a Service (IaaS) with minimum 4 years of experience.

Min Education: Bachelors
Min Years of Experience: 4

**Cloud Architect**

Designs and implements enterprise infrastructure and platforms required for cloud computing. Analyzes system requirements and ensures that systems will be securely integrated with current applications. Has a deep understanding of system development in cloud environments, including Software as Service (SaaS), Platform as Service (PaaS), or Infrastructure as a Service (IaaS). Reports to a manager or head of a unit/department. Work is generally independent and collaborative in nature. Requires a bachelor's degree in area of specialty.

Min Education: Masters
Min Years of Experience: 5
Service Contract Labor Standards: The Service Contract Labor Standards (SCLS), formerly known as the Service Contract Act (SCA), is applicable to this contract as it applies to the entire Multiple Award Schedule (MAS) and all services provided. While no specific labor categories have been identified as being subject to SCLS/SCA due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CRF 541.300), this contract still maintains the provisions and protections for SCLS/SCA eligible labor categories. If and/or when the contractor adds SCLS/SCA labor categories to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCLS/SCA matrix identifying the GSA labor category titles, the occupational code,
SCLS/SCA labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.
