Contract Number: 47QTCA20D00DU

**Period Covered by Contract:** August 13, 2020 through August 12, 2025

Pricelist current through Modification # PS-0002, dated November 9, 2021.

Products and ordering information in this Authorized Information Technology Schedule Pricelist are also available on the GSA Advantage! System (http://www.gsaadvantage.gov).
CUSTOMER INFORMATION

1a. Table of awarded special item number(s) with appropriate cross-reference to item descriptions and awarded price(s).
- SIN 54151S/STLOC/RC - Information Technology Professional Services
- SIN 518210C/STLOC/RC – Cloud and Cloud-Related IT Professional Services

1b. Identification of the lowest priced model number and lowest unit price for that model for each special item number awarded in the contract. This price is the Government price based on a unit of one, exclusive of any quantity/dollar volume, prompt payment, or any other concession affecting price. Those contracts that have unit prices based on the geographic location of the customer, should show the range of the lowest price, and cite the areas to which the prices apply. Not Applicable

1c. If the Contractor is proposing hourly rates, a description of all corresponding commercial job titles, experience, functional responsibility and education for those types of employees or subcontractors who will perform services shall be provided. If hourly rates are not applicable, indicate “Not applicable” for this item. See attached pricelist on page 9.

2. Maximum order. $500,000 per order/ per SIN

3. Minimum order. $100

4. Geographic coverage (delivery area). Domestic - Domestic delivery is delivery within the 48 contiguous states, Alaska, Hawaii, Puerto Rico, Washington, DC, and U.S. Territories. Domestic delivery also includes a port or consolidation point, within the aforementioned areas, for orders received from overseas activities.

5. Point(s) of production (city, county, and State or foreign country). Not Applicable

6. Discount from list prices or statement of net price. Prices shown are NET prices; Basic discounts have been deducted.

7. Quantity discounts. None

8. Prompt payment discount. None

9. Foreign items (list items by country of origin). Not Applicable

10a. Time of delivery. To be negotiated with end user

10b. Expedited Delivery. To be negotiated with end user.

10c. Overnight and 2-day delivery. Not Applicable

10d. Urgent Requirements. The Contractor will note in its price list the “Urgent Requirements” clause of its contract and advise agencies that they can also contact the Contractor’s representative to effect a faster delivery. To be negotiated with end user.

11. F.O.B. point(s). Destination
12a. Ordering address(es).
CoreSphere, LLC.
10411 Motor City Drive Suite 410
Bethesda, MD 20817
Phone: (301) 830-4035
Fax: (301) 825-8990
http://www.coresphere.com/
Email: gsa@coresphere.com

12b. Ordering procedures: For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPA’s) are found in Federal Acquisition Regulation (FAR) 8.405-3.

13. Payment address(es).
CoreSphere, LLC.
10411 Motor City Drive Suite 410
Bethesda, MD 20817

14. Warranty provision. Not Applicable

15. Export packing charges, if applicable. Not Applicable

16. Terms and conditions of rental, maintenance, and repair (if applicable). Not Applicable

17. Terms and conditions of installation (if applicable). Not Applicable

18. Terms and conditions of repair parts indicating date of parts price lists and any discounts from list prices (if applicable). Not Applicable

19. Terms and conditions for any other services (if applicable). Not Applicable

20. List of service and distribution points (if applicable). Not Applicable

21. List of participating dealers (if applicable). Not Applicable

22. Preventive maintenance (if applicable). Not Applicable

23a. Special attributes such as environmental attributes (e.g., recycled content, energy efficiency, and/or reduced pollutants). Not Applicable

23b. If applicable, indicate that Section 508 compliance information is available on Electronic and Information Technology (EIT) supplies and services and show where full details can be found (e.g. contractor’s website or other location.) The EIT standards can be found at: www.Section508.gov/. Not Applicable

24. Data Universal Number System (DUNS) number. 184768583

25. Notification regarding registration in the System for Award Management (SAM) database. Coresphere, LLC is registered with the SAM. The Cage Code is 37GU

Labor Category Descriptions

Substitutions and Equivalencies:
Note: It is CoreSphere’s company policy to accept:
6 years of related experience in lieu of a Bachelor’s degree
9 years of related experience in lieu of a Master’s degree
This experience must be in addition to the experience requirement specified under Minimum/General Experience in each of the descriptions below.

SIN 54151S IT Professional Services

Application Architect
Duties: Demonstrates experience in architecting and planning large and complex information systems implementation, package application implementation including ERP and CRM packages, analysis, change management, and business process redesign. Utilize special skills in premium technologies such as enterprise software tools and methodologies. Utilize extensive experience in planning and managing large scale, complex projects including controlling change control, scheduling, performance, budgets, and overall project scope. Set overall application policy direction for client engagements; communicate with client executive management to ensure critical issues are addressed in application architecture; provide expert guidance to application implementation projects in industry, technical and functional areas; and oversee contract and financial management.
Minimum Education: Bachelors
Years of Experience: 10

Business Analyst
Duties: Applies process improvement and reengineering methodologies and principles to conduct process modernization technology projects. Responsible for effective transitioning of existing project teams and the facilitation of project teams in the accomplishment of technical project activities and objectives. Provides group facilitation, interviewing, training, and provides additional forms of knowledge transfer. Key coordinator between multiple project teams to ensure enterprise-wide integration of reengineering and technical efforts.
Minimum Education: Bachelors
Years of Experience: 4

Developer/Engineer I
Duties: Provision of general software/database development and or application/infrastructure engineering support. Creates and/or maintains operating systems, communications software, database packages, compilers, repositories, and utility and assembler programs. Modifies existing software, configures COTS and SaaS applications and develops special-purpose software to ensure efficiency and integrity between systems and applications.
Minimum Education: Bachelors
Years of Experience: 3

Developer/Engineer II
Duties: Provision of general software/database development and or application/infrastructure engineering support. Creates and/or maintains operating systems, communications software, database packages, compilers, repositories, and utility and assembler programs. Modifies existing software, configures COTS and SaaS applications and develops special-purpose software to ensure efficiency and integrity between systems and applications.
Minimum Education: Bachelors
Years of Experience: 5
Developer/Engineer III  
**Duties:** Provision of general software/ database development and or application/infrastructure engineering support. Creates and/or maintains operating systems, communications software, database packages, compilers, repositories, and utility and assembler programs. Modifies existing software, configures COTS and SaaS applications and develops special-purpose software to ensure efficiency and integrity between systems and applications. 

**Minimum Education:** Bachelors  
**Years of Experience:** 7

Enterprise Architect  
**Duties:** Works independently under general guidance. Fully knowledgeable in all aspects of program, technical or functional area. Manages multiple systems acquisition program/project of major technical or functional areas. Coordinates and establishes policies, architectures, interrelationships between multiple and related technologies and or programs within an Enterprise. Establishes objectives and requirements, develops program budgets, standards, and schedules for multiple projects/programs. Monitors outside resources with experience or extensive knowledge with the processes and procedures related to the technical and functional areas. Coordinates, reviews, and supervises work of assigned staff. Provide knowledge transfer and mentoring as appropriate. Orient and train consulting staff. Demonstrates highly developed written, technical, interpersonal communication, and conflict resolution skills.  

**Minimum Education:** Masters  
**Years in Experience:** 10

Industry Expert  
**Duties:** Provision of thought leadership with industry recognition and supporting credentials in a specific area. Possesses advanced industry, technical and managerial skills, fully knowledgeable and experienced in all aspects of an industry, technology, and functional area. Provides best practices, governance, and guidance for implementing programs, policies, standards, technologies, and solutions within the specific technology or industry.  

**Minimum Education:** Masters  
**Years in Experience:** 12

Junior Project Manager  
**Duties:** Leads team on small to midsize projects or small segments of large complex projects. Analyzes new project or task related problems and creates innovative solutions involving finance, scheduling, technology, methodology, tools, and solution components.  

**Minimum Education:** Bachelors  
**Years in Experience:** 4

Principal Subject Matter Expert  
**Duties:** Works independently under general guidelines or objectives. Possesses demonstrated advanced technical and managerial skills; fully knowledgeable and experienced in all aspects of a program or functional area. Applicable functional areas include systems engineering, network engineering, acquisition management, business process reengineering, specialty engineering (e.g., communications, systems safety, quality assurance, test and evaluation, human factors, reliability and maintainability, systems security etc.), organizational planning, financial management, acquisition logistics, configuration and data information systems, and support or program management. Manages large, complex systems acquisition projects or major functional areas. Plans, develops or supports programs/projects. Establishes objectives and requirements. Adapts and applies applicable technical, administrative, financial and business processes and procedures. Develops budgets. Develops program/ project standards and schedules. Monitors outside resources. Coordinates and reviews work of assigned staff. Reviews/oversees the preparation of all related documentation. Chairs reviews, technical interchange meetings, etc. Directly participates and coordinates with the highest echelons and authority on all aspects pertinent to the successful implementation of the program or functional area. Employs a high degree of
creativity, foresight and mature judgment to plan, organize and guide complex programs for which approach and precedents may be unclear or nonexistent. Performs other related duties as assigned.

**Minimum Education:** Bachelors  
**Years of Experience:** 8

**Program Analyst**  
**Duties:** Applies management analysis processes, statistical methods, and advanced technical and analytical research techniques to determine solutions based on client requirements with an IT services/solutions-based scope. Analyzes operational activities to obtain a quantitative, rational basis for decision making and resource allocation. Employs process improvements and reengineering methodologies and principles for modernization of systems and projects. Creates project plans to achieve performance-based objectives, enhancing implementation, systems and service. Provides integral support in mission requirements determination, conceptualization, design, development, testing, verification and validation, documentation, and implementation of system applications.

**Minimum Education:** Bachelors  
**Years of Experience:** 3

**Program Manager**  
**Duties:** Manages complex, mission-critical, strategic and advanced technology-based programs. Serves as focal point for the contract and client regarding programs direction, task scheduling and budget control. Directs internal and subcontractor team(s) and performs overall strategic management, planning, contract level performance metrics and production of overall contract/task order support operations. Effectively manages funds, personnel, production standards, and resources and ensures quality and timely delivery of all contractual items.

**Minimum Education:** Bachelors  
**Years of Experience:** 10

**Project Manager**  
**Duties:** Leads team on large projects or significant segment of large complex projects or manages multiple smaller projects. Analyzes new and complex project related problems and creates innovative solutions involving finance, scheduling, technology, methodology, tools, and solution components.

**Minimum Education:** Bachelors  
**Years of Experience:** 6

**Security Specialist**  
**Duties:** Provision of security consulting support in a complex IT environment.

**Minimum Education:** Bachelors  
**Years of Experience:** 5

**Senior Business Analyst**  
**Duties:** Applies process improvement and reengineering methodologies and principles to conduct process modernization technology projects. Responsible for effective transitioning of existing project teams and the facilitation of project teams in the accomplishment of technical project activities and objectives. Provides group facilitation, interviewing, training, and provides additional forms of knowledge transfer. Key coordinator between multiple project teams to ensure enterprise-wide integration of reengineering and technical efforts.

**Minimum Education:** Bachelors  
**Years of Experience:** 6

**Senior Security Specialist**  
**Duties:** Provision of advanced security consulting expertise in a complex IT environment.

**Minimum Education:** Bachelors  
**Years of Experience:** 8
Senior Subject Matter Expert

**Duties:** Works independently under general guidelines or objectives set by supervisor. Possesses advanced technical and managerial skills; fully knowledgeable and experienced in all aspects of a program, technical, or functional area. Applicable functional areas include systems engineering, package application implementation, ERP systems, CRM systems, acquisition management, business process reengineering, specialty engineering (e.g., communications, systems safety, quality assurance, test and evaluation, human factors, reliability and maintainability, systems security etc.), organizational development and planning, financial management, acquisition logistics, configuration and data information systems, and support or program management. Manages a single systems acquisition program/project or major technical/functional area. Fully knowledgeable of all aspects of the program or programs under his/her management. Establishes objectives and requirements. Develops budgets. Develops program/project standards and schedules. Monitors outside resources. Has experience or extensive knowledge with the processes and procedures relative to the technical and functional area. Coordinates, reviews and supervises work of assigned staff. Reviews/oversees the preparation of all related documentation. Conducts program reviews, meetings, etc.

**Minimum Education:** Bachelors

**Years of Experience:** 6

Senior Testing Specialist

**Duties:** Oversees others in the development and implementation of quality control methodologies to ensure compliance with quality assurance standards, guidelines, and procedures in a large computer-based organization. Oversees others in developing and defining major and minor characteristics of quality including quality metrics and scoring parameters and helps determine requisite quality control resources. Establishes and maintains a process for evaluating hardware, software, and associated documentation and/or assists in the evaluation. Conducts and/or participates in formal and informal reviews at pre-determined points throughout the development life cycle. Conducts software and system testing to include Unit, System, Integration, Regression and support User Acceptance Testing.

**Minimum Education:** Bachelors

**Years of Experience:** 5

Senior Trainer

**Duties:** The Senior Trainer directs others in the creation and delivery of the instructional software and hardware system design. Oversees technical programs involving the development and delivery of curriculums and supporting training materials. Training materials can include user guides, training manuals, instructor manuals, reference guides, and system documentation for software, network, and database applications. Also able to perform individual and classroom training in the use of advanced computer hardware and software applications.

**Minimum Education:** Bachelors

**Years of Experience:** 5

Subject Matter Expert

**Duties:** Works independently under general guidelines or objectives set by supervisor. Possesses advanced technical and managerial skills; fully knowledgeable and experienced in all aspects of a program, technical, or functional area. Applicable functional areas include systems engineering, package application implementation, ERP systems, CRM systems, acquisition management, business process reengineering, specialty engineering (e.g., communications, systems safety, quality assurance, test and evaluation, human factors, reliability and maintainability, systems security etc.), organizational development and planning, financial management, acquisition logistics, configuration and data information systems, and support or program management. Manages a single systems acquisition program/project or major technical/functional area. Fully knowledgeable of all aspects of the program or programs under his/her management. Establishes objectives and requirements. Develops budgets. Develops program/project standards and schedules. Monitors outside resources. Has experience or extensive knowledge with the processes and procedures relative to the technical and functional area.
area. Coordinates, reviews and supervises work of assigned staff. Reviews/oversees the preparation of all related documentation. Conducts program reviews, meetings, etc. Performs other related duties as assigned.

**Minimum Education:** Bachelors  
**Years of Experience:** 5

**Technical Specialist I**  
**Duties:** Must be capable of translating IT mission requirements and information problems into solutions employing current state-of-the-art information system equipment and software including COTS, SaaS, and Mobile. Must be able to define interactions and interfaces among different categories of requirements and develop appropriate design to support the requirements while employing IT methodologies. Must be able to serve as a liaison for interpreting and translating various disciplines represented on the task team and as a point of contact for evaluation of problems arising from the interdisciplinary nature of the task.

**Minimum Education:** Bachelors  
**Years of Experience:** 4

**Technical Specialist II**  
**Duties:** Must be capable of translating IT mission requirements and information problems into solutions employing current state-of-the-art information system equipment and software including COTS, SaaS, and Mobile. Must be able to define interactions and interfaces among different categories of requirements and develop appropriate design to support the requirements while employing IT methodologies. Must be able to serve as a liaison for interpreting and translating various disciplines represented on the task team and as a point of contact for evaluation of problems arising from the interdisciplinary nature of the task.

**Minimum Education:** Bachelors  
**Years of Experience:** 6

**Technical Writer/Editor**  
**Duties:** Writes a variety of technical articles, reports, brochures, and/or manuals for documentation for a wide range of uses. Coordinates the display of graphics and the production of the document. Ensures that documents follow the style laid out in the style guide.

**Minimum Education:** Associates  
**Years of Experience:** 2

**Testing Specialist**  
**Duties:** Develops and implements quality control methodologies to ensure compliance with quality assurance standards, guidelines, and procedures in a large computer-based organization. Develops and defines major and minor characteristics of quality including quality metrics and scoring parameters and determines requisite quality control resources. Establishes and maintains a process for evaluating hardware, software, and associated documentation and/or assists in the evaluation. Conducts and/or participates in formal and informal reviews at pre-determined points throughout the development life cycle. Conducts software and system testing to include Unit, System, Integration, Regression and support User Acceptance Testing.

**Minimum Education:** Bachelors  
**Years of Experience:** 3

**Trainer**  
**Duties:** The Trainer applies the principles and techniques of the instructional systems design methodology to develop and deliver training materials and programs for hardware and software. Training materials include user guides, training manuals, instructor manuals, reference guides, and system documentation for software, network, and database applications. Performs individual and classroom training for the use of computer hardware and software.

**Minimum Education:** Bachelors  
**Years of Experience:** 3
SIN 518210C Cloud Information Technology Professional Services

Cloud Data Lead

Duties: Develops and delivers data migration strategy and design for data migration on and for cloud platforms and solutions. Develops cloud data migration mappings and plans. Manages execution of the cloud data migration strategy. Supports data modeling and data architecture for cloud based solutions to optimize the use of data within cloud based environments.

Minimum Education: Bachelors
Years of Experience: 6

Cloud Developer

Duties: Provision of cloud software/ platform development and or application/infrastructure engineering support for cloud technologies. Creates and/or maintains cloud platforms including IaaS, PaaS, and SaaS. Develops large scale and complex cloud applications/solutions with guidance and support. Uses best practices for cloud development. Modifies existing cloud applications, configures PaaS and SaaS applications and develops general-purpose cloud applications.

Minimum Education: Bachelors
Years of Experience: 3

Cloud Manager

Duties: Manages Cloud Technology solutions including Infrastructure as a Service (IaaS), Platform as a Service (PaaS), and Software as a Service (SaaS) clouds. Provides governance and best practices for cloud environments, solutions, and projects. Works on environment, Org, and licensing strategies to allow customers to fully leverage and maximize investments in the cloud. Supports all aspects of managing cloud-based technologies.

Minimum Education: Bachelors
Years of Experience: 6

Cloud Program Manager

Duties: Manages complex, mission-critical, strategic and cloud technology-based programs. Serves as focal point for the cloud contract and client regarding cloud programs direction, task scheduling and budget control. Directs internal and subcontractor team(s) and performs overall strategic management, planning, contract level performance metrics and production of overall contract/task order support operations for cloud-based solutions. Effectively manages funds, personnel, production standards, and resources and ensures quality and timely delivery of all contractual items for cloud-based solutions.

Minimum Education: Bachelors
Years of Experience: 8

Cloud Project Manager

Duties: Leads team on large cloud-based projects or significant segment of large complex cloud projects or manages multiple smaller cloud projects. Analyzes new and complex cloud project related problems and creates innovative solutions involving finance, scheduling, technology, methodology, tools, and solution components for cloud-based solutions.

Minimum Education: Bachelors
Years of Experience: 4

Cloud QA Manager

Duties: Oversees others in the development and implementation of quality control/assurance methodologies to ensure compliance with quality assurance standards, guidelines, and procedures for cloud solutions. Oversees others in developing and defining major and minor characteristics of quality including quality metrics and scoring parameters and helps determine requisite quality control resources specifically for cloud solutions. Conducts and/or participates in formal and informal reviews at pre-determined points throughout the
development life cycle for cloud applications. Conducts software and system testing to include Unit, System, Integration, Regression and support User Acceptance Testing for cloud applications.

**Minimum Education:** Bachelors  
**Years of Experience:** 5

**Cloud Scrum Manager**  
**Duties:** Provide the management of cloud software and technology projects using the application of Agile Development practices. Scrum Masters bring experience in the management of user stories, the prioritization of stories in a software backlog, the management of Sprint Planning, Spring Review and Sprint Retrospective activities and facilitate daily standup meetings of the cloud software development team, technology experts, and product owners to implement successful cloud strategies.

**Minimum Education:** Bachelors  
**Years of Experience:** 6

**Cloud Solution Architect**  
**Duties:** Demonstrates experience in architecting and planning large and complex cloud implementation including IaaS, PaaS, and SaaS. Utilize special skills in cloud technologies such as enterprise cloud software tools and methodologies. Utilize extensive experience in solutioning and supporting large scale, complex cloud projects. Set overall cloud policy direction for client engagements; communicate with client executive management to ensure critical issues are addressed in cloud solution architecture; provide expert guidance to cloud implementation projects in industry, technical and functional areas.

**Minimum Education:** Bachelors  
**Years of Experience:** 6

**Cloud Subject Matter Expert**  
**Duties:** Works independently under general guidelines or objectives set by supervisor. Possesses advanced technical and functional cloud skills; fully knowledgeable and experienced in all aspects of a cloud technical, or functional area. Provides expert advice and guidance in understanding and implementing cloud based solutions, applications, and technologies in one or more cloud environments. Offers expert knowledge in specific cloud processes, verticals, or emerging cloud platforms.

**Minimum Education:** Bachelors  
**Years of Experience:** 6

**Cloud Technical Architect**  
**Duties:** Works independently under general guidance. Fully knowledgeable in all aspects of cloud technical area. Manages the overall technical architecture and design for cloud-based solutions. Manages the cloud technical environments. Coordinates and establishes policies, architectures, inter-relationships between multiple cloud technologies. Establishes DevOps, CI/CD, and source control environments for cloud-based technologies and platforms.

**Minimum Education:** Bachelors  
**Years of Experience:** 6

**Principal Cloud Business Analyst**  
**Duties:** Applies process improvement and reengineering methodologies and principles to conduct process modernization cloud projects.
