SIN 54151S Information Technology (IT) Professional Services

Commercial Job Title:	PRINCIPAL COMPUTER SYSTEMS ANALYST/PROGRAMMER
<p>Minimum/General Experience: Eight years of technical experience in applications software development with two yers experience in managing technical applications development projects nd analysis projects for medium to large scale projects and project management experience specific to the full systems development life-cycle.</p>	
<p>Functional Responsibility: Direct the development and maintenance of applications, and provide technical oversight for major projects. Formulates/defines system scope and objectives. Devises or modifies procedures to solve complex problems considering computer equipment capacity and limitations. Prepares detailed specifications from which programs will be written. Designs, codes, tests, debugs, and documents programs.</p>	
<p>Minimum Education: Bachelor's degree in Computer Science or a related field.</p>	

Schedule

Commercial Job Title:	ASSOCIATE INFORMATION TECHNOLOGY SPECIALIST
Minimum/General Experience:	
Two years experience in the analysis of problems and technical requirement in the computing, networking and application areas specified in a task order and shall possess some experience in evaluating, implementing and supporting the use of appropriate solutions for these problems and requirements.	
Functional Responsibility:	
Provide support in functional areas such as, but not limited to, design and development of appropriate IT solutions, creation of information and decision papers on IT issues, assistance in the development of IT standards, review of logical and physical database and application design, change control and problem resolution, validation and stress-testing of IT solutions, facilitating the use of IT solutions by end-users. Participate in engineering and managing hardware and software architectures and ensure compatibility and optimal integration of multiple systems. Performs reviews and recommends solutions to customer problems based on prior experience and hands-on understanding of how products and services interrelate and support the customer mission. Participate in feasibility studies and needs analysis.	
Minimum Education:	
Bachelor's degree in Computer Science or a related field.	

Commercial Job Title:	PRINCIPAL INFORMATION TECHNOLOGY SPECIALIST
Minimum/General Experience:	
Shall possess substantive IT knowledge and shall have hands-on background and/or training in related area. Ten years experience in the analysis of problems and technical requirement in the computing, networking and application areas specified in a task order and shall possess some experience in evaluating, implementing and supporting the use of appropriate solutions for these problems and requirements.	
Functional Responsibility:	
Provide technical expertise, support, oversight and needs analysis in functional areas such as, design and development of appropriate IT solutions, creation of information and decision papers on IT issues, assistance in the development of IT standards, review of logical and physical database and application design, change control and problem resolution, validation and stress-testing of IT solutions, facilitating the use of IT solutions by end-users.	
Lead process and data modeling initiatives. Apply reverse-engineering and reengineering disciplines to develop migration strategic and planning documents. Apply an enterprise-wide set of disciplines for the planning, analysis, design and construction of information systems on an enterprise-wide basis or across a major sector of the enterprise. Engineer and manage hardware and software architectures and ensure compatibility and optimal integration of multiple systems. Apply an enterprise-wide set of disciplines for the planning, analysis, design and construction of information systems on an enterprise-wide basis. Perform feasibility studies and needs analysis. May serve as task manager. Coordinate the formulation, review and recommendation of solutions to customer problems. Assist in developing cost estimates for new or modified systems. May serve as task manager.	
Minimum Education:	
Bachelor's degree in Computer Science or a related field.	

Schedule

Commercial Job Title:	TELECOMMUNICATIONS ENGINEER I
Minimum/General Experience:	Four years of experience in support of communication systems or networks. Experience may include one or more the following: (1) electronic assembly, repair, and installation including (a) module assembly, (b) repair, (c) testing or (2) practical experience in the installation of hardware, cables, antennas and supporting structures.
Functional Responsibility:	Supports the installation, testing, maintenance, and troubleshooting of operational systems or networks. Manages a variety of telecommunications support functions, including trouble ticket management, service order entry, and/or configuration management. Directs the testing of telecommunications and RF systems in support of systems planning, assembly, installation, implementation, and maintenance using both manual and automated tools. Evaluates system problems of workflow, organization, and planning. Develops appropriate corrective action. Knowledgeable of applicable telecommunications or RF systems engineering techniques and the use of automated support tools. Performs all work in accordance with established standards.
Minimum Education:	Bachelor's degree or graduate of technical school.

Commercial Job Title:	TELECOMMUNICATIONS ENGINEER II
Minimum/General Experience:	Six years of experience in support of telecommunication systems or networks.
Functional Responsibility:	Supports the planning, analysis, design, testing, and troubleshooting of networks or operational systems. Participates in systems planning, information planning, and analysis in support of telecommunications support functions, including trouble ticket management, service order entry, and/or configuration management. Tests processes and data models in support of the planning and analysis efforts using both manual and automated tools. Evaluates system problems of workflow, organization, and planning. Develops appropriate corrective action. Knowledgeable of applicable telecommunications engineering techniques and the use of automated support tools. Performs all work in accordance with established standards.
Minimum Education:	Bachelor's degree or graduate of technical school.

Commercial Job Title:	PROGRAM MANAGER
Minimum/General Experience:	Combination of ten years information technology experience, including three years of experience in a management or supervisory capacity, plus three years of experience in the functional area of the project to be managed.
Functional Responsibility:	Responsible for planning and executing projects of various sizes. Prepares and maintains the project schedule and budget. Prepares and delivers status reports to the customer. Primary point of contact for the customer. Oversees all work and takes corrective action as necessary to ensure project success. Manages staffing, budget, prioritization, and other personnel matters. May serve as technical lead for the project.
Minimum Education:	Bachelor's degree in Computer Science or a related field, or in the project's functional area.

Schedule

Commercial Job Title:	PROJECT MANAGER/SUPERVISOR
Minimum/General Experience:	Three years information technology or supervisory experience, plus two years of experience in the functional area of the project to be supervised.
Functional Responsibility:	Responsible for day-to-day operations of projects of various sizes. Monitor the project schedule and budget. Prepares and delivers status reports to the customer. Primary point of contact for the customer. Oversees all work and takes corrective action as necessary to ensure project success. Serve as technical lead for the project.
Minimum Education:	Bachelor's degree in Computer Science or a related field or technical training in electronics or computer repair.

Commercial Job Title:	SENIOR DATA MANAGEMENT SPECIALIST
Minimum/General Experience:	Three years experience in automated data management. Shall possess some experience in developing, tracking, and evaluating data used in support of program management functions. Shall possess supervisory experience.
Functional Responsibility:	Provide support in functional areas such as, but not limited to, program management support, quality control, design and development of appropriate IT solutions, creation of information and decision papers, development of standards. Maintain and operate software use to support professional administrative functions such as conference planning and management scheduling systems, and logistics, and deliver high level briefing.
Minimum Education:	Bachelor's degree in Computer Science or a related field.

Commercial Job Title:	DATA MANAGEMENT SPECIALIST
Minimum/General Experience:	One years experience in automated data management. Shall possess some experience in developing, tracking, and evaluating data used in support of program management functions.
Functional Responsibility:	With limited supervision provide support in functional areas such as, but not limited to, program management support, quality control, design and development of appropriate IT solutions, creation of information and decision papers, development of standards. Operate software use to support professional administrative functions such as conference planning and management, and logistics.
Minimum Education:	Bachelor's degree in Computer Science or a related field

Schedule

Commercial Job Title:	IT CUSTOMER SUPPORT TECHNICIAN
Minimum/General Experience: One year experience in maintaining and upgrading personal computers, installing software, and performing small hardware repairs.	
Functional Responsibility: Provide customer technical helpdesk and desktop support. Performs preventive maintenance, troubleshooting, and repair of computer systems and peripheral equipment. Responsible for maintaining an adequate spare parts inventory. May maintain network hardware. May configure Commercial off-the-shelf (COTS) software to operate on specific hardware and install software.	
Minimum Education: Bachelor's degree in Computer Science or a related field or technical training in electronics or computer repair.	

Commercial Job Title:	SENIOR IT CUSTOMER SUPPORT TECHNICIAN
Minimum/General Experience: Four years of maintaining and upgrading personal computers, installing software, and performing small hardware repairs.	
Functional Responsibility: Provide customer technical helpdesk and desktop support. Provide supervisory support to other technicians. Performs preventive maintenance, troubleshooting, and repair of computer systems and peripheral equipment. Responsible for maintaining an adequate spare parts inventory. May maintain network hardware. Configure Commercial off-the-shelf (COTS) software to operate on specific hardware and install software.	
Minimum Education: Bachelor's degree in Computer Science or a related field or technical training in electronics or computer repair.	

Commercial Job Title:	NETWORK SYSTEM ADMINISTRATOR
Minimum/General Experience: Combination of ten years information technology experience, including three years of experience in determining an organization's system needs and install network hardware and software, making needed upgrades and repairs to networks and ensure that systems are operating correctly. Adding users to a network, and assign and update security permissions on the network, and evaluating and optimize network or system performance.	
Functional Responsibility: Responsible for the day-to-day operation of the networks. Organize, install, and support an organization's computer systems, including local area networks (LAN), wide area networks (WANs), network segments, intranets, and other data communication systems. Train users in the proper use of hardware and software. Interpret and solve problems when a user or an automated monitoring system alerts them that a problem exists.	
Minimum Education: Bachelor's degree in Computer Science or a related field.	

Schedule

Commercial Job Title:	DOCUMENTATION SPECIALIST
Minimum/General Experience:	Must have four (4) years of experience in technical writing and documentation experience pertaining to all aspects of IT. A minimum of two (2) years of experience in preparing technical documentation, which is to include researching for applicable standards.
Functional Responsibility:	Gathers, analyzes, and composes technical information. Conducts research and ensures the use of proper technical terminology. Translates technical information into clear, readable documents to be used by technical and non-technical personnel. For applications built to run in a Windows environment uses the standard help compiler to prepare all on-line documentation.
Minimum Education:	A Bachelor's degree is preferred or Associate's Degree in related field with two years experience.
