## GSA Awarded Terms and Conditions

- 1a. TABLE OF AWARDED SPECIAL ITEM NUMBERS (SINS)**  
Special Item No. 54151S Information Technology Professional Services  
Special Item No. 518210C Cloud Computing and Cloud Related IT Professional Services
- 1b. LOWEST PRICED MODEL NUMBER AND PRICE FOR EACH SIN**  
See attached Price List.
- 1c. HOURLY RATES (Services Only)**  
See attached Price List.
- 2. MAXIMUM ORDER**  
The Maximum Order value for the following Special Item Numbers (SINs) is \$500,000:  
Special Item No. 54151S Information Technology Professional Services  
Special Item No. 518210C Cloud Computing and Cloud Related IT Professional Services
- 3. MINIMUM ORDER**  
The minimum dollar value of orders to be issued is \$100.00.
- 4. GEOGRAPHIC COVERAGE**  
Domestic
- 5. POINT OF PRODUCTION**  
USA
- 6. DISCOUNT FROM LIST PRICES**  
Net GSA pricing is listed in attached Price List. Basic discounts have been deducted.
- 7. QUANTITY/VOLUME DISCOUNTS**  
N/A
- 8. PROMPT PAYMENT TERMS**  
Net Thirty (30) Days
- 9a. GOVERNMENT PURCHASE CARDS ARE ACCEPTED AT OR BELOW THE MICRO-PURCHASE THRESHOLD**
- 9b. GOVERNMENT PURCHASE CARDS ARE NOT ACCEPTED ABOVE THE MICRO-PURCHASE THRESHOLD**
- 10. FOREIGN ITEMS**  
None

---

**11a. TIME OF DELIVERY**

To be Determined by Task

**11b. EXPEDITED DELIVERY**

To be Determined by Task

**11c. OVERNIGHT AND 2-DAY DELIVERY**

Please contact contractor for overnight and 2-day delivery.

**11d. URGENT REQUIREMENTS**

When the Federal Supply Schedule contract delivery period does not meet the bona fide urgent delivery requirements of an ordering activity, ordering activities are encouraged, if time permits, to contact the Contractor for the purpose of obtaining accelerated delivery. The Contractor shall reply to the inquiry within 3 workdays after receipt. (Telephonic replies shall be confirmed by the Contractor in writing.) If the Contractor offers an accelerated delivery time acceptable to the ordering activity, any order(s) placed pursuant to the agreed upon accelerated delivery time frame shall be delivered within this shorter delivery time and in accordance with all other terms and conditions of the contract.

**12. F.O.B. POINT**

## **54151S Labor Category Descriptions**

<b>Job Title:</b> Cloud Engineer
<b>Minimum/General Experience:</b> 3 Years
<b>Functional Responsibility:</b> Analyze problems in collaboration with researchers and propose solutions with appropriate combination of on-premises and cloud-based technologies such as Amazon Web Services (AWS), Google Cloud, and Microsoft Azure . Design solutions and maintain infrastructure as a Code with technologies such as Terraform and Ansible. Use extensive knowledge of APIs to design RESTful services, and integrate them with existing data providers, using JSON or XML as needed. Set up, maintain, and monitor various services in the IT portfolio, ensuring high quality, efficiency and availability. Integrate on-premises and cloud services with products from various strategic partners to provide clients with a comprehensive package covering all their needs. Assess overall configuration and integration along with a big-picture/enterprise view. Automate and optimize technical tasks using available tools. Actively participate in solution design sessions with leadership and present sound and creative cloud-based ideas and solutions. Plan and deploy production solutions to client-hosted or cloud-hosted infrastructure, administer users and roles on deployed solutions and train client personnel on deployed solutions.
<b>Minimum Education/Training:</b> Bachelors

<b>Job Title:</b> Business Analyst
<b>Minimum/General Experience:</b> 3 Years
<b>Functional Responsibility:</b> Assist in applying common best practices for the industry to the customer using a knowledge base to create conceptual business models and to identify relevant issues and considerations in selecting application software packages. Assess the operational and functional baseline of an organization and its organizational components, and help to define the direction and strategy for an engagement while ensuring the organizational needs are being addressed. Typical areas addressed include Human Resources, Finance, Supply, and operations. Identify information technology inadequacies and/or deficiencies that affect the functional area's ability to support/meet organizational goals. Support the development of functional area strategies for enhanced IT. Commensurate experience and education. Key Words: Research, planning, assessment, reporting
<b>Minimum Education/Training:</b> Bachelors

<b>Job Title:</b> Data Management Specialist
<b>Minimum/General Experience:</b> 2 Years
<b>Functional Responsibility:</b> Provide support for overall data management needs. Generate ad-hoc data queries from client database. Integrate databases using available APIs or database connectivity. Generate datasets and reports to meet management needs.

Electronically load data into database applications. Interact with stakeholders to gather and consolidate requirements. Train and Support end-users on software enhancements.

**Minimum Education/Training:** Bachelors

**Job Title:** Mobile Application Developer

**Minimum/General Experience:** 3 years

**Functional Responsibility:** Serve as the Designer, Developer, and Engineer on Mobile Projects. Develop Mobile applications using Objective C, Swift, Xcode, Android, and iOS Operating system. Meet with end users and technical staff to gather business and system requirements. Architect, design, develop, and engineer user interface, service tier, data tier components, infrastructure and security for Mobile Projects. Develop standards, repeatable processes, and reusable components for Mobile applications. Assists in project planning, developing timelines, composition of technical teams, and planning resources. Assists and often leads in the development and review of technical deliverables on Mobile projects. Propose comprehensive solutions based on business and technical requirements. Develop the iOS Mobile applications using UIKit, Core Data, AVFoundation, Cocoa Touch, Health Kit, Care Kit, Research Kit, SQLite, and Apple iOS SDK. Implement Mobile apps using Table views, Collection views, Delegates, Push Notifications, Storyboards, Tab bars, Navigation bars, Completion Handlers, Protocols, NSURL Session, Singleton classes, Automatic Reference Counting (ARC), Multithreading, MVC/MVVM design patterns, REST API's, and JSON Serialization. Work with tools like Jira for project management and bugs tracking, and GitHub for Version control and Agile/Scrum Methodology. Design database architecture, create the relationship between the tables using RDBMS, and develop the SQL database tables, views, stored procedures using SQL queries. Test the Mobile apps using Appium and XCTest to confirm that they meet the initial functional specifications. Release the iOS applications in App Store, support and maintain the mobile applications in production.

**Minimum Education/Training:** Bachelors

**Job Title:** Clinical Programmer III

**Minimum/General Experience:** 3 years

**Functional Responsibility:** "Lead teams of Clinical Programmers to support clinical research. Develop protocol specific clinical data management forms, validation, and derivation rules. Create clinical, management, and audit reports using reporting tools. Develop and maintain standard electronic Case Report Forms (eCRF) libraries and user manual. Migrate data from legacy systems. Participate in research team meetings to develop Database Design Specifications. Collaborate with informatics personnel to develop interfaces with other clinical and electronic health record systems. Compile datasets in SAS and other formats for statisticians. Train end-users."

**Minimum Education/Training:** Bachelors

<b>Job Title:</b> Clinical Programmer II
<b>Minimum/General Experience:</b> 2 years
<b>Functional Responsibility:</b> "Provide Clinical Programming expertise to support clinical research. Develop protocol specific clinical data management forms, validation, and derivation rules. Create clinical, management, and audit reports using reporting tools. Develop and maintain standard electronic Case Report Forms (eCRF) libraries and user manual. Migrate data from legacy systems. Participate in research team meetings to develop Database Design Specifications. Collaborate with informatics personnel to develop interfaces with other clinical and electronic health record systems. Compile datasets in SAS and other formats for statisticians."
<b>Minimum Education/Training:</b> Bachelors

<b>Job Title:</b> Clinical Programmer I
<b>Minimum/General Experience:</b> 1 year
<b>Functional Responsibility:</b> "Develop protocol specific clinical data management forms, validation, and derivation rules. Create clinical, management, and audit reports using reporting tools. Develop and maintain standard electronic Case Report Forms (eCRF) libraries and user manual. Migrate data from legacy systems. Compile datasets in SAS and other formats for statisticians."
<b>Minimum Education/Training:</b> Bachelors

<b>Job Title:</b> Data Manager II
<b>Minimum/General Experience:</b> 3 years
<b>Functional Responsibility:</b> Responsible for transcribing data from a variety of source documents into appropriate databases. Accountable for quality assurance (QA) for data entry, spreadsheets and advanced data management. Responsible for meeting all reporting requirements as designated by the client and as a result of Quality Control (QC) measures. Communicate with appropriate staff on a regular basis regarding information updates or changes. Initiate changes in computer data to update information and record accurate results.
<b>Minimum Education/Training:</b> Bachelors

<b>Job Title:</b> Data Manager I
<b>Minimum/General Experience:</b> 1 Year
<b>Functional Responsibility:</b> Responsible for transcribing data from a variety of source documents into appropriate databases. Accountable for quality assurance (QA) for data entry, spreadsheets and entry-level data management. Responsible for meeting all reporting requirements as designated by the client and as a result of Quality Control (QC) measures. Communicate with appropriate staff on a regular basis regarding

information updates or changes. Initiate changes in computer data to update information and record accurate results.

**Minimum Education/Training:** High School

**Job Title:** Quality Assurance

**Minimum/General Experience:** 3 years

**Functional Responsibility:** Develop, manage and execute test plans and test cases. Generate test reports and traceability matrix. Decompose high-level business requirements into test scenarios. Setup and maintain test environments. Deploy software in Linux and Windows environments. Build automated data-driven test harnesses. Use several open source testing tools/frameworks such as SOAPUI, Selenium. Work as part of a team and interact effectively with others.

**Minimum Education/Training:** Bachelors

**Job Title:** Software Developer

**Minimum/General Experience:** 2 years

**Functional Responsibility:** Participates in the design, development, and implementation of software solutions to meet business needs. Performs development, unit testing, and system testing utilizing Java technology. Collaborate with team members and technical leads to understand customer requirements and design working solutions. Contribute expertise in specific technical areas to the team as a whole. Ensures completed modules provide all functionality and meet performance guidelines. Coordinates development and deployment activities within the project team. Investigates and understand requirements to identifying systems' integration points. Creates the necessary documentation for application functionality.

**Minimum Education/Training:** Bachelors

**Job Title:** Mid-Level Software Developer

**Minimum/General Experience:** 3 years

**Functional Responsibility:** Participates in the design, development, and implementation of software solutions to meet business needs. Performs development, unit testing, and system testing utilizing Java technology. Collaborate with team members and technical leads to understand customer requirements and design working solutions. Contribute expertise in specific technical areas to the team as a whole. Ensures completed modules provide all functionality and meet performance guidelines. Coordinates development and deployment activities within the project team. Investigates and understand requirements to identifying systems' integration points. Creates the necessary documentation for application functionality.

**Minimum Education/Training:** Bachelors

<b>Job Title:</b> Senior Software Developer
<b>Minimum/General Experience:</b> 5 years
<b>Functional Responsibility:</b> Leads and performs design, development, unit testing, and system testing utilizing Java technology.
<b>Minimum Education/Training:</b> Bachelors

<b>Job Title:</b> Project Manager
<b>Minimum/General Experience:</b> 2 years
<b>Functional Responsibility:</b> Serve as the program manager typically responsible for organizing, directing, and managing all aspects of contract operational support functions involving multiple complex and inter-related project tasks that often require managing teams of contractor personnel at multiple locations. Provide overall direction of program activities. Manage and maintain contractor interface with the senior levels of the customer's organization. Consult with customer and contractor personnel to formulate and review task plans and deliverables, ensuring conformance with program and project task schedules and costs and contractual obligations. Establish and maintain technical and financial reports to show progress of projects to management and customers, organize and assign responsibilities to subordinates, oversee the successful completion of all assigned tasks, and assume the initiative and provide support to marketing personnel in identifying and acquiring potential business. Key Words: cybersecurity, cloud migration, IT modernization, Project/Program Management
<b>Minimum Education/Training:</b> Bachelors

<b>Job Title:</b> Subject Matter Expert
<b>Minimum/General Experience:</b> 5 years
<b>Functional Responsibility:</b> Analyze user needs to determine functional requirements and define problems and develop plans and requirements in the subject matter area for moderately complex to complex systems related to information systems architecture, networking; telecommunications, automation, communications protocols, risk management/electronic analysis, software, lifecycle management, software development methodologies, and modeling and simulation. Perform functional allocation to identify required tasks and their interrelationships. Identify resources required for each task. Possess requisite knowledge and expertise so recognized in the professional community that the government is able to qualify the individual as an expert in the field for an actual task order. Demonstrate exceptional oral and written communication skills. Commensurate experience in IT and in new and related older technology that directly relates to the required area of expertise. Key Words: cybersecurity, cloud, application rationalization, IT strategy, digital transformation
<b>Minimum Education/Training:</b> Bachelors

## **518210C Labor Category Descriptions**

<b>Job Title:</b> Cloud Architect Senior
<b>Minimum/General Experience:</b> 12 years
<b>Functional Responsibility:</b> Responsible for designing, engineering, building, testing, and deployment of cloud service offerings for new and existing cloud infrastructures. Supports members of the architecture team to complete integration with required core services, system security plan and existing infrastructure. Participates in high-level enterprise architecture analysis, evaluation, design, integration, documentation, and development. Applies high-level business and technical principles and methods to difficult technical problems to arrive at creative engineering solutions. Substantial experience architecting, designing, engineering, integrating, deploying, and maintaining cloud solutions and implementing security controls. Works with cloud implementation and operations teams to resolve cloud architecture issues. Requires substantial experience designing, integrating, and implementing complex cloud solutions and services at a large enterprise scale.
<b>Minimum Education/Training:</b> Bachelors

<b>Job Title:</b> Cloud Engineer IV
<b>Minimum/General Experience:</b> 10
<b>Functional Responsibility:</b> Responsible for designing, engineering, building, testing, and deployment of cloud service offerings for new and existing cloud infrastructures. Supports members of the architecture team to complete integration with required core services, system security plan and existing infrastructure. Participates in high-level enterprise architecture analysis, evaluation, design, integration, documentation, and development. Applies high-level business and technical principles and methods to difficult technical problems to arrive at creative engineering solutions. Substantial experience architecting, designing, engineering, integrating, deploying, and maintaining cloud solutions and implementing security controls. Works with cloud implementation and operations teams to resolve cloud architecture issues. Requires substantial experience designing, integrating, and implementing complex cloud solutions and services.
<b>Minimum Education/Training:</b> Bachelors

<b>Job Title:</b> Cloud Engineer III
<b>Minimum/General Experience:</b> 7 years
<b>Functional Responsibility:</b> Responsible for designing, engineering, building, testing, and deployment of cloud service offerings for new and existing cloud infrastructures. Strong knowledge of the complete set of CSP services including security, identity and management features, networking and content delivery services, other advanced CSP offerings. Leading member of the architecture team to complete integration with

required core services, system security plan and existing infrastructure. Participates in high-level enterprise architecture analysis, evaluation, design, integration, documentation, and development. Applies high-level business and technical principles and methods to difficult technical problems to arrive at creative engineering solutions. Substantial experience architecting, designing, engineering, integrating, deploying, and maintaining cloud solutions and implementing security controls. Works with cloud implementation and operations teams to resolve cloud architecture issues.

**Minimum Education/Training:** Bachelors

**Job Title:** Cloud Engineer II

**Minimum/General Experience:** 6 years

**Functional Responsibility:** Responsible for designing, engineering, building, testing, and deployment of cloud service offerings for new and existing cloud infrastructures. Able to expand from designing a single cloud solution for an application to designing an enterprise level virtual cloud-based data center supporting multiple applications. Key member of the cloud architecture team to complete integration with required cloud services, system security plan and existing infrastructure. Supports all phases of a cloud operation from initial design of the cloud stack and services, to migration, to managed hosting. Participates in high-level enterprise architecture analysis, evaluation, design, integration, documentation, and development. Applies high-level business and technical principles and methods to difficult technical problems to arrive at creative engineering solutions. Experience architecting, designing, engineering, integrating, deploying, and maintaining cloud solutions and implementing security controls.

**Minimum Education/Training:** Bachelors

**Job Title:** Cloud Engineer I

**Minimum/General Experience:** 2 years

**Functional Responsibility:** Responsible for designing, engineering, building, testing, and deployment of cloud service offerings for new and existing cloud infrastructures. Can develop a cloud-based hosting solutions based upon the application processing requirements. Supports members of the architecture team to complete integration with required core services, system security plan and existing infrastructure. Participates in high-level enterprise architecture analysis, evaluation, design, integration, documentation, and development. Applies high-level business and technical principles and methods to difficult technical problems to arrive at creative engineering solutions. Some experience architecting, designing, engineering, integrating, deploying, and maintaining cloud solutions and implementing security controls.

**Minimum Education/Training:** Bachelors

<b>Job Title:</b> Cloud Business Process Re-Engineering Specialist
<b>Minimum/General Experience:</b> 7 years
<b>Functional Responsibility:</b> Responsible for and leads team on large complex projects. Translates customer requirements into formal agreements and plans to culminate in customer acceptance or results. Possesses expert knowledge of the business processes. Responsible for performance, cost, scope, schedule, quality, and appropriate business measurements for their project, according to their project charter. Has extensive professional knowledge of market segment/industry/technology/discipline trends. Works with client to identify business requirements and develops the proposal. Subsequently leads a team in the initiating, planning, controlling, executing, and closing tasks of a project (or segment of a project) to produce the solution deliverable. Executes a wide range of process activities beginning with the request for proposal through development, test, and final delivery. Anticipates future customer, industry, and business trends. Applies this understanding to complex problems to meet project objectives. As appropriate, challenges the validity of given procedures and processes with a view toward enhancement or improvement. Analyzes information and situations and implements actions independently and or through the management team, to ensure project objectives are met. Analyzes new and complex project related business problems and creates innovative solutions involving finance, scheduling, technology, methodology, tools and solution components. Possesses significant breadth of knowledge in business matters, finance, planning, and forecasting and personnel in order to manage team and business processes.
<b>Minimum Education/Training:</b> Bachelors

<b>Job Title:</b> Cloud Quality Assurance Analyst
<b>Minimum/General Experience:</b> 6 years
<b>Functional Responsibility:</b> Responsible for development of project Quality Assurance Plan and the implementation of procedures that conforms to the requirements of the contract. Responsible for verifying that each functional component of the project follows a defined process which is in conformance with contractual requirements. Report's findings to project staff, line management of the organization, and the customer, as appropriate. Provides an independent assessment of how the project's processes are being implemented relative to the defined process and recommends methods to optimize the organization's process.
<b>Minimum Education/Training:</b> Bachelors

<b>Job Title:</b> Cloud IT Systems Analyst
<b>Minimum/General Experience:</b> 10 years
<b>Functional Responsibility:</b> Analyzes and develops computer software possessing a wide range of capabilities, including numerous engineering, business, and records management functions. Develops plans for automated information systems from project inception to conclusion. Analyzes user interfaces, maintains hardware and software

performance tuning, analyzes workload and computer usage, maintains interfaces with outside systems, analyzes downtimes, analyzes proposed system modifications, upgrades and new COTS. Analyzes the problem and the information to be processed. Defines the problem, and develops system requirements and program specifications, from which programmers prepare detailed flow charts, programs, and tests. Coordinates closely with programmers to ensure proper implementation of program and system specifications. Develops, in conjunction with functional users, system alternative solutions.

**Minimum Education/Training:** Bachelors

**Job Title:** Cloud Senior IT Project Manager

**Minimum/General Experience:** 10 years

**Functional Responsibility:** Serves as project manager for a large, complex task order (or a group of task orders affecting the same common/standard/migration system) and shall assist the Program Manager in working with the ordering activity Contracting Officer (CO), the contract-level Contracting Officer's Representative (COR), the task order-level COR(s), ordering activity management personnel and customer agency representatives. Under the guidance of the Program Manager, responsible for the overall management of the specific task order(s) and insuring that the technical solutions and schedules in the task order are implemented in a timely manner. Performs enterprise wide horizontal integration planning and interfaces to other functional systems.

**Minimum Education/Training:** Bachelors

**Job Title:** Cloud IT Subject Matter Expert

**Minimum/General Experience:** 13 years

**Functional Responsibility:** Applies subject matter knowledge to high level analysis, collection, assessment, design, development, modeling, simulation, integration, installation, documentation, and implementation. Resolves problems, which require an intimate knowledge of the related technical subject matter. Applies principles and methods of the subject matter to specialized solutions. Includes but not limited to; identity management, medical and legal transcription, scientific encoding, environmental, scientific, maintenance and repair processes, business processes, and logistical support activities.

**Minimum Education/Training:** Bachelors
