On-line access to contract ordering information, terms and conditions, up-to-date pricing, and the option to create an electronic delivery order are available through GSA Advantage®, a menu-driven database system. The INTERNET address for GSA Advantage® is: http://www.gsaadvantage.gov.

For more information on ordering from Federal Supply Schedules click on the FSS Schedules button at http://www.gsa.gov/schedules-ordering.

Multiple Award Schedule (MAS)

**Contract Number:** 47QTCA21D000C  
**Contract Period:** 10/7/2020 through 10/6/2025  
**Effective Date:** Mod PS-0004,7/19/2022

**Large Category:** Professional Services  
**Subcategory:** Business Administrative Services  
**SIN:** 541611 - Management and Financial Consulting, Acquisition and Grants Management Support, and Business Program and Project Management Services  
**Large Category:** Information Technology  
**Subcategory:** Information Technology Services  
**SIN:** 54151S – Information Technology Professional Services  
**Subcategory:** Information Technology Software  
**SIN:** 511210 – Software Licenses  
**Large Category:** Miscellaneous  
**SIN:** OLM – Order Level Materials

**Contractor:**
Enterprise Iron Financial Industry Solutions, Inc.
14 Cliffwood Ave W  |  Suite 200
Matawan, NJ 07747

**Business Size:** Small Business  
**Telephone:** 888.242.4682  
**Fax:** 908.349.3449  
**Website:** http://enterpriseiron.com  
**Email:** jrc@eifis.com

CUSTOMER INFORMATION

1. **Table of Awarded Special Item Number(s):** 541611 - Management and Financial Consulting, Acquisition and Grants Management Support, and Business Program and Project Management Services; 54151S – Information Technology Professional Services; Order Level Materials; 511210-Software Licenses

1b. **Lowest priced model and lowest unit prices:** Prices shown in pricelist are net.

1c. **Labor Category Descriptions:** See page 6.

2. **Maximum Order:** SIN 541611 $1,000,000.00; SIN 54151S $500,000; SIN 511210 $500,000; OLM $250,000

3. **Minimum Order:** $100.00

4. **Geographic Coverage (delivery Area):** Domestic only

5. **Point(s) of production (city, county, and state or foreign country):** Matawan, NJ

6. **Discount from list prices or statement of net price:** Government net prices (discounts already deducted).

7. **Quantity discounts:** $350k or greater, additional 1%

8. **Prompt payment terms:** Net 30 days

9a. **Notification that Government purchase cards are accepted up to the micro-purchase threshold:** Yes

9b. **Notification whether Government purchase cards are accepted or not accepted above the micro-purchase threshold:** will not accept over micro purchase threshold

10. **Foreign items (list items by country of origin):** None

11a. **Time of Delivery (Contractor insert number of days):** Specified on the Task Order

11b. **Expedited Delivery.** The Contractor will insert the sentence “Items available for expedited delivery are noted in this price list.” under this heading. The Contractor may use a symbol of its choosing to highlight items in its price list that have expedited delivery: Contact Contractor

11c. **Overnight and 2-day delivery.** The Contractor will indicate whether overnight and 2-day delivery are available. Also, the Contractor will indicate that the schedule customer may contact the Contractor for rates for overnight and 2-day delivery: Contact Contractor

11d. **Urgent Requirements.** The Contractor will note in its price list the “Urgent Requirements” clause of its contract and advise agencies that they can also contact the Contractor’s representative to effect a faster delivery: Contact Contractor

12. **F.O.B Points(s):** Destination
13a. **Ordering Address(es):** Same as company address

13b. **Ordering procedures:** For supplies and services, the ordering procedures, information on Blanket Purchase Agreements (BPA’s), and a sample BPA can be found at the GSA/FSS Schedule homepage (fss.gsa.gov/schedules).

14. **Payment address(es):** Same as company address

15. **Warranty provision:** N/A

16. **Export Packing Charges (if applicable):** N/A

17. **Terms and conditions of Government purchase card acceptance (any thresholds above the micro-purchase level):** Contact Contractor

18. **Terms and conditions of rental, maintenance, and repair (if applicable):** N/A

19. **Terms and conditions of installation (if applicable):** N/A

20. **Terms and conditions of repair parts indicating date of parts price lists and any discounts from list prices (if applicable):** N/A

20a. **Terms and conditions for any other services (if applicable):** N/A

21. **List of service and distribution points (if applicable):** N/A

22. **List of participating dealers (if applicable):** N/A

23. **Preventive maintenance (if applicable):** N/A

24a. **Environmental attributes, e.g., recycled content, energy efficiency, and/or reduced pollutants:** N/A

24b. If applicable, indicate that Section 508 compliance information is available on Electronic and Information Technology (EIT) supplies and services and show where full details can be found (e.g. contractor’s website or other location.) The EIT standards can be found at: www.Section508.gov/.

25. **SAM UEI:** G2ENMHUFHS73

26. **Notification regarding registration in Central Contractor Registration (CCR) database:** Registered in SAM.

27. **Final Pricing:** Rates shown in this schedule include the Industrial Funding Fee (IFF) of .75%
Description of Services

Founded in 2002, Enterprise Iron Financial Industry Solutions, Inc. is a firm of technical and operational practitioners who have held the roles that our clients need. As a result, we know the business and technology drivers of the industries we serve. We have specialties in the areas of:

- Integration
- Application and Systems Architecture
- Custom Application Development and Support
- Program and Project Management
- Quality Assurance and Testing
- Business Analysis
- Process Control
- Technical Design
- Implementation Services

We work to maximize our clients' investments by aligning their business and technology divisions. We appreciate the value of maximizing the technology budgets of our clients and have the industry experience to lead our clients to such pursuits. End to end integration, along with business process reengineering to fully take advantage of technologies are intended to provide lower costs, better efficiencies, and reduced potential for human error. Our large-scale program and project management approach is tailored to fit our client's specific needs that is based on our comprehensive understanding of their business and industry best practices. Integrating our Quality Assurance oversight and execution into large-scale programs will provide reliability along the way and enhance overall performance and efficiency.
Labor Category Descriptions

Substitutions and Equivalencies
Enterprise Iron Financial Industry Solutions, Inc. recognizes that successful performance depends on having personnel with the right skills and experience. These skills are acquired through a proper mix of education and professional experience. We have found that skills required to support today’s problems and tomorrow’s challenges are not always supported by the traditional formal education and work experience combination. Therefore, we have incorporated substitution allowances between equivalent education, certifications, and experience to provide the services required by the customer at the most reasonable price.

Equivalencies:
The following equivalencies apply, unless otherwise explicitly stated:
Bachelor’s Degree is equivalent to four (4) years of relevant experience (and vice versa)
Master’s Degree is equivalent to bachelor’s degree + four (4) years of relevant experience, and/or six (6) years of relevant experience
One or more certifications is equivalent to one (1) year of relevant experience (and vice versa).

Application Systems Analyst I (SIN 54151S, 541611)
Functional Responsibility: Under general direction, applies both business and technical expertise through industry recognized methods in the delivery of work products. Analyzes business/technical needs and processes for configuration or programming within applications, gathers and organizes data to configure standard reports, analyzes data to identify trends and patterns. Develops diagrams and flowcharts, analyzes and modifies systems to support an organization’s application systems. Identifies required inputs and formats the output to meet user’s needs.  Can work with either Commercial Off the Shelf (COTS) applications or proprietary applications.

Minimum Experience: Three (3) years of relevant experience
Minimum Education: Bachelor’s degree

Application Systems Analyst II (SIN 54151S, 541611)
Functional Responsibility: Under general direction, applies both business and technical expertise through industry recognized methods in the delivery of work products. Analyzes business/technical needs and processes for configuration or programming within applications, gathers and organizes data to configure standard reports, analyzes data to identify trends and patterns. Develops diagrams and flowcharts, analyzes and modifies systems to support an organization’s application systems. Identifies required inputs and formats the output to meet user’s needs.  Can work with either Commercial Off the Shelf (COTS) applications or proprietary applications.

Minimum Experience: Five (5) years of relevant experience
Minimum Education: Bachelor’s degree

Application Systems Analyst III (SIN 54151S, 541611)
Functional Responsibility: Applies both business and technical expertise through industry recognized methods in the delivery of work products. Analyzes business/technical needs and processes for configuration or programming within applications, gathers and organizes data to configure standard reports, analyzes data to identify trends and patterns. Develops diagrams and flowcharts, analyzes and modifies systems to support an organization’s application systems. Identifies required inputs and formats the output to meet user’s needs.
Can work with either Commercial Off the Shelf (COTS) applications or proprietary applications. Provides supervisory direction to junior application systems analysts.

Minimum Experience: Seven (7) years of relevant experience

Minimum Education: Bachelor’s degree

**Business Analyst I (SIN 54151S, 541611)**
Functional Responsibility: Under general direction, reviews, analyzes, and evaluates user needs to create systems solutions that support overall business and IT strategies. Assists in the preparation and conduct of business analyses and studies, needs assessments, requirements analysis/definition and cost/benefit analyses to align business systems, solutions, and initiatives. Prepares forecasts and analyzes trends and metrics, performance measurements, reports and recommendations. Documents system requirements, defines scope and objectives, and creates system specifications that drive system development and implementation.

Minimum Experience: Two (2) years of relevant experience

Minimum Education: Bachelor’s degree

**Business Analyst II (SIN 54151S, 541611)**
Functional Responsibility: Under general direction, reviews, analyzes, and evaluates user needs to create systems solutions that support overall business and IT strategies. Assists in the preparation and conduct of business analyses and studies, needs assessments, requirements analysis/definition and cost/benefit analyses to align business systems, solutions, and initiatives. Prepares forecasts and analyzes trends and metrics, performance measurements, reports and recommendations. Documents system requirements, defines scope and objectives, and creates system specifications that drive system development and implementation. Provides knowledge and analysis of highly specialized applications and operational environments, high-level functional systems analysis, design, integration, documentation, and implementation advice. Identifies causes for deviations, business and/or technical risks and recommends corrective action.

Minimum Experience: Four (4) years of relevant experience

Minimum Education: Bachelor’s degree

**Business Analyst III (SIN 54151S, 541611)**
Functional Responsibility: Reviews, analyzes, and evaluates user needs to create systems solutions that support overall business and IT strategies. Assists in the preparation and conduct of business analyses and studies, needs assessments, requirements analysis/definition and cost/benefit analyses to align business systems, solutions, and initiatives. Prepares forecasts and analyzes trends and metrics, performance measurements, reports and recommendations. Documents system requirements, defines scope and objectives, and creates system specifications that drive system development and implementation. Provides knowledge and analysis of highly specialized applications and operational environments, high-level functional systems analysis, design, integration, documentation, and implementation advice. Identifies causes for deviations, business and/or technical risks and recommends corrective action.

Minimum Experience: Seven (7) years of relevant experience

Minimum Education: Bachelor’s degree
**Process Consultant I (SIN 54151S, 541611)**
Functional Responsibility: Conducts process modeling and analysis. Experienced in areas of performance measurement and Business Process Reengineering (BPR) methodologies. Provides input and participates in performing business improvement efforts. Performs process re-engineering, with an understanding of technical problems and solutions. Identifies new approaches and solutions to business issues identified through analysis of processes. Creates process change by integrating new processes with existing ones and recommends and facilitates quality improvement efforts.

Minimum Experience: Four (4) years of relevant experience

Minimum Education: Bachelor’s degree

**Process Consultant II (SIN 54151S, 541611)**
Functional Responsibility: Leads process modeling and analysis teams. Experienced in areas of performance measurement and Business Process Reengineering (BPR) methodologies. Provides input and participates in performing business improvement efforts. Performs process re-engineering, with an understanding of technical problems and solutions. Identifies new approaches and solutions to business issues identified through analysis of processes. Creates process change by integrating new processes with existing ones and recommends and facilitates quality improvement efforts.

Minimum Experience: Seven (7) years of relevant experience

Minimum Education: Bachelor’s degree

**Process Consultant III (SIN 54151S, 541611)**
Functional Responsibility: Provides oversight of process modeling and analysis programs. May lead re-engineering team and act as project manager in some cases. Experienced in areas of performance measurement design and solutions using Business Process Reengineering (BPR) methodologies. Has in-depth understanding of organization and industry's high-level business systems and their requirements. Focus is on process analysis and re-engineering, with an understanding of technical problems and solutions as they relate to the current and future business environment. Recommends and facilitates quality improvement efforts.

Minimum Experience: Nine (9) years of related experience leading and providing business process modeling and analysis

Minimum Education: Bachelor’s degree

**Data Architect (SIN 54151S)**
Functional Responsibility: Defines and applies data policies in data discovery, data analysis and data architecture design across the enterprise. Works closely with other experts to uncover, document, validate and model business requirements into specifications used to develop conceptual, logical, and physical data structures. Ensures reuse and consistency of use of data across all applications. Monitors the implementation of business rules associated with data as reflected in the metadata. Provides oversight and leadership in technology solutions development with emphasis on database development, delivery of information systems and business transformation projects.
Minimum Experience: Five (5) years of relevant experience providing architectural leadership in database design, database development, database administration and consulting for application support using standard relational database technologies (Oracle, Sybase, SQL Server, etc.) and client specific technical environments.

Minimum Education: Bachelor’s degree

Application Developer I (SIN 54151S)
Functional Responsibility: Provide applications and / or systems programming, technical support and consulting for applications support using specific tools relative to the application and technical environment being utilized. Apply expertise in programming procedures to analyze, design, create or modify code / programs based on and related to system design specifications or operating systems. Sample technologies included, but not limited to Visual Studio, Eclipse, .NET, Java, C#, C++, COBOL, etc.

Minimum Experience: Four (4) years of relevant experience providing computer system programming, technical support and consulting for application support using specific tools relative to the application and client specific technical environments.

Minimum Education: Bachelor’s degree

Application Developer II (SIN 54151S)
Functional Responsibility: Provide applications and / or systems programming, technical support and consulting for applications support using specific tools relative to the application and technical environment being utilized. Apply expertise in programming procedures to analyze, design, create or modify code / programs based on and related to system design specifications or operating systems. Sample technologies included, but not limited to Visual Studio, Eclipse, .NET, Java, C#, C++, COBOL, etc.

Minimum Experience: Six (6) years of relevant experience providing computer system programming, technical support and consulting for application support using specific tools relative to the application and client specific technical environments.

Minimum Education: Bachelor’s degree

Application Developer III (SIN 54151S)
Functional Responsibility: Provides applications and / or systems programming, technical support and consulting for applications support using specific tools relative to the application and technical environment being utilized. Apply expertise in programming procedures to analyze, design, create or code / modify programs based on and related to system design specifications or operating systems. Sample technologies included, but not limited to Visual Studio, Eclipse, .NET, Java, C#, C++, COBOL, etc.

Minimum Experience: Eight (8) years of relevant experience providing computer system programming, technical support and consulting for application support using specific tools relative to the application and client specific technical environments.

Minimum Education: Bachelor’s degree

Lead Application Developer (SIN 54151S)
Functional Responsibility: Directs and manages other Application Developers. Provides applications and / or systems programming, technical support and consulting for applications support using specific tools relative to
the application and technical environment being utilized. Apply expertise in programming procedures to
analyze, design, create or code / modify programs based on and related to system design specifications or
operating systems. Sample technologies included, but not limited to Visual Studio, Eclipse, .NET, Java, C#, C++,
COBOL, etc.

Minimum Experience: Eleven (11) years of relevant experience providing computer system programming,
technical support and consulting for application support using specific tools relative to the application and client
specific technical environments.

Minimum Education: Bachelor’s degree

**Project Manager (SIN 54151S, 541611)**
Functional Responsibility: Manages cost, schedule, and performance of projects. Organizes and directs
personnel, contracts, and materials for the performance of assigned professional services. Provides primary
interface and leadership for the successful implementation of contracted projects to achieve customer and
business objectives. Works in traditional project management models or in Agile / SCRUM methodologies as
required by client needs.

Minimum Experience: Five (5) years relevant professional experience with at least two (2) years providing
project management and consulting for the quality and delivery of products and services for a project or subtask
within a larger program. PMP and/or Certified SCRUM Master as needed.

Minimum Education: Bachelor’s degree

**Senior Project Manager (SIN 54151S, 541611)**
Functional Responsibility: Manages significant work planning and resource allocation, process design and
contract development including cost, schedule, and performance of projects. Organizes and directs personnel,
contracts, and materials for the performance of assigned professional services. Provides primary interface and
leadership for the successful implementation of contracted projects to achieve customer and business
objectives. Works in traditional project management models or in Agile / SCRUM methodologies as required by
client needs.

Minimum Experience: Seven (7) years of relevant experience with at least three (3) years in project managemen
and implementation. Must possess excellent oral and written communication skills and the ability to conduct
business briefings and presentations. PMP and/or Certified SCRUM Master as needed.

Minimum Education: Master’s degree

**Program Manager (SIN 54151S, 541611)**
Functional Responsibility: Responsible for managing all aspects of programs of moderate risk and complexity
and/or may have deputy responsibility for a larger program. Can manage several programs simultaneously.
Oversees the program budget, schedule, and compliance with contractual requirements. Supervises project
managers and oversees direction, scope, and quality of work related to contracts. Serves as the primary
customer contact.

Minimum Experience: Ten (10) years of program related experience or prior management experience. Must
possess excellent oral and written communication skills and the ability to conduct business briefings and
presentations.
Minimum Education: Master’s degree

**Senior Program Manager (SIN 54151S, 541611)**

Functional Responsibility: Responsible for managing all aspects of complex programs simultaneously. Oversees the program budget, schedule, and compliance with contractual requirements. Organizes, directs, and coordinates planning and production of all contract support activities. Responsible for formulating and enforcing work standards, assigning contractor schedules, reviewing work discrepancies, supervising contractor personnel, and communicating policies, purposes, and goals of the organization to subordinate personnel. Responsible for overall contract performance.

Minimum Experience: Twelve (12) years of program related experience, with at least five (5) years functional or prior program management experience. Must possess excellent oral and written communication skills and the ability to conduct business briefings and presentations.

Minimum Education: Master’s degree

**Deputy Program Executive (SIN 54151S, 541611)**

Functional Responsibility: Responsible for management of multiple projects and task orders. Provides daily oversight and supervision of multiple staff teams and support staff. Serves as Client Customer Relationship Manager. Manages communications with the client, prepares project plans, coordinates activities, and supervises project reports, resources, and training of personnel. Monitors project performance, controls project or program scope and budget. Directs program development from inception to deployment. Manages funds and resources using complex reporting mechanisms. Possesses capability to manage multi-task contracts and/or subcontracts of various types and complexity. Generally principal or senior executive of the company.

Minimum Experience: Twelve (12) years of experience in a leadership/management role directly of directly related experience and progressively greater responsibilities.

Minimum Education: Master’s Degree

**Program Executive (SIN 54151S, 541611)**

Functional Responsibility: Engages with senior level clients to define the project agenda and key objectives. Conceptualizes game changing ideas and fosters continuous thought leadership. Provides high level direction for horizon scanning, strategic planning, resource analysis, and department-level implementation plans. Generates innovative approaches to address department-level challenges and opportunities. Manages programs composed of multiple complex projects to ensure successful completion of tasks on time and within budget. Maintains relationships with high-level government customers to ensure customer satisfaction. May include Subject Matter Experts, with recognized expertise in multiple aspects of business operations.

Minimum Experience: Fifteen (15) years of relevant experience in a senior program leadership/management role

Minimum Education: Master’s Degree

**Software Engineer I (SIN 54151S, 541611)**

Functional Responsibility: Designs and develops software applications. Performs coding, debugging, testing, and troubleshooting throughout the application development process. Executes software testing tasks, reviewing
results for correctness and adherence to the design concept and user standards. Typically reports to a manager. Coordinates with the program/project manager to ensure project deadlines are met. Services provided include:

- monitor applications and software systems
- carry out stress testing, performance testing, functional testing, user acceptance testing, and scalability testing (includes QA support)
- write and execute test scripts
- run manual and automated tests
- test in different environments including web and mobile
- design tests to mitigate risk
- present findings to software development and business user teams

Minimum Experience: One (1) year of relevant experience with industry standard software testing tools and techniques

Minimum Education: Bachelor’s degree

**Software Engineer II (SIN 54151S, 541611)**

Functional Responsibility: Designs and develops software applications. Performs coding, debugging, testing, and troubleshooting throughout the application development process. Executes complex software testing tasks, reviewing results for correctness and adherence to the design concept and user standards. Typically reports to a manager. Coordinates with the program/project manager to ensure project deadlines are met. Services provided include:

- monitor applications and software systems
- carry out stress testing, performance testing, functional testing, user acceptance testing, and scalability testing (includes QA support)
- write and execute test scripts
- run manual and automated tests
- test in different environments including web and mobile
- design tests to mitigate risk
- present findings to software development and business user teams

Minimum Experience: Three (3) years of relevant experience with industry standard software testing tools and techniques

Minimum Education: Bachelor’s degree

**Software Engineer III (SIN 54151S, 541611)**

Functional Responsibility: Experience with complex application problems involving all phases of systems analysis. Designs and develops software applications. Performs coding, debugging, testing, and troubleshooting throughout the application development process. Provides daily supervision and direction to other software engineers performing software testing tasks, including the review of work products for correctness, adherence to the design concept and user standards. Coordinates with the program/project manager to ensure project deadlines are met.
Minimum Experience: Five (5) years of relevant experience with leading teams of QA resources, analysis, and design of business applications, experienced with industry standard testing tools and techniques, and management. Proven ability to work independently and lead a team.

Minimum Education: Bachelor’s degree

Security Specialist IV (SIN 54151S)
Functional Responsibility: Analyzes and defines security requirements for multilevel security issues. Tailors security requirements frameworks (e.g. NIST 800.53) into organizational policies. Facilitates POAM (Plan of Actions and Milestones) for the design and implementation of remediations to vulnerabilities. Performs risk analyses, which includes risk assessment. Performs maintenance of systems to protect data from unauthorized users. Identifies, reports, and resolves security violations. Familiar with standard concepts, practices, and procedures.

Minimum Experience: Seven (7) years of relevant experience in systems/network administration, three (3) of which should include information technology security experience. Relevant experience working in a mission critical production environment, development experience is a plus and previous consulting experience is helpful.

Minimum Education: Bachelor's degree

Security Specialist V (SIN 54151S)
Functional Responsibility: Conducts security audits, risk assessments, disaster recovery planning and documents results in technical reports. Responsible for advising others on implementation of hardware, operating systems, network design and deployment tools to ensure security requirements compliance. Responsible for developing and managing Information Systems security, including disaster recovery, database protection and software development. Analyzes information security systems and applications and recommends and develops security measures to protect information against unauthorized modification or loss. Ensures that all system platforms are functional and secure. Works with upper management to determine acceptable level of risk for enterprise computing platforms. Performs a variety of complicated tasks. May lead and direct the work of others.

Minimum Experience: Nine (9) years of relevant experience working on multiple complex information technology projects, which include security and vulnerability assessments

Minimum Education: Bachelor's degree

Subject Matter Expert I (SIN 54151S, 541611)
Functional Responsibility: Provides technical / business knowledge and analysis of highly specialized applications and operational environment, high-level functional systems analysis, design, integration, documentation, and implementation advice on moderately complex problems that require an appropriate level of knowledge of the subject matter for effective implementation. Is responsible for working with customers and stakeholders to provide analysis and present system implementation or operational options. Experience includes working with COTS applications and/or custom proprietary applications.

Minimum Experience: Six (6) years of relevant experience working on multiple complex information technology projects, performing difficult and complex or highly specialized analysis. Provides technical / business knowledge and assistance to the team.

Minimum Education: Bachelor’s degree
Subject Matter Expert II (SIN 54151S, 541611)
Functional Responsibility: Provides technical / business knowledge and analysis of highly specialized applications and operational environment, high-level functional systems analysis, design, integration, documentation, and implementation advice on moderately complex problems that require an appropriate level of knowledge of the subject matter for effective implementation. Responsible for working with customers and stakeholders to provide analysis and present system implementation or operational options. Experience includes working with COTS applications and/or custom proprietary applications.

Minimum Experience: Eight (8) years of relevant experience working on multiple complex information technology projects, performing difficult and complex or highly specialized analysis. Provides technical / business knowledge and assistance to the team.

Minimum Education: Bachelor’s degree

Subject Matter Expert III (SIN 54151S, 541611)
Functional Responsibility: Provides technical / business knowledge and analysis of highly specialized applications and operational environment, high-level functional systems analysis, design, integration, documentation, and implementation advice on moderately complex problems that require an appropriate level of knowledge of the subject matter for effective implementation. Responsible for working with customers and stakeholders to provide analysis and present system implementation or operational options. Experience includes working with COTS applications and/or custom proprietary applications.

Minimum Experience: Eleven (11) years of relevant experience working on multiple complex information technology projects, performing difficult and complex or highly specialized analysis. Provides technical / business knowledge and assistance to the team.

Minimum Education: Bachelor’s degree

Subject Matter Expert IV (SIN 54151S, 541611)
Functional Responsibility: Provides technical / business knowledge and analysis of highly specialized applications and operational environment, high-level functional systems analysis, design, integration, documentation, and implementation advice on moderately complex problems that require an appropriate level of knowledge of the subject matter for effective implementation. Responsible for working with customers and stakeholders to provide analysis and present system implementation or operational options. Experience includes working with COTS applications and/or custom applications.

Minimum Experience: Ten (10) years of relevant experience working on multiple complex information technology projects, performing difficult and complex or highly specialized analysis. Provides technical / business guidance and leadership to the team.

Minimum Education: Master’s degree

Subject Matter Expert Principal (SIN 54151S, 541611)
Functional Responsibility: Provides leadership and oversight of Subject Matter Experts. Experienced in technical / business knowledge and analysis of highly specialized applications and operational environment, high-level functional systems analysis, design, integration, documentation, and implementation advice on moderately complex problems that require an appropriate level of knowledge of the subject matter for effective...
implementation. Responsible for working with customers and stakeholders to provide analysis and present system implementation or operational options. Experience includes working with COTS applications and/or custom applications.

Minimum Experience: Fifteen (15) years of relevant experience working on multiple complex information technology projects, performing difficult and complex or highly specialized analysis. Provides technical / business guidance and leadership to the team.

Minimum Education: Master’s degree

**Technical Writer I (SIN 54151S, 541611)**

Functional Responsibility: Creates business / functional requirements and technical design documentation based on a clear understanding of the business needs and applications being developed. Partners with development team to manage the flow of information among project teams to ensure successful delivery.

Minimum Experience: Two (2) years of experience as a technical writer

Minimum Education: Bachelor’s Degree

**Technical Writer II (SIN 54151S, 541611)**

Functional Responsibility: Creates complex business / functional requirements and technical design documentation based on a clear understanding of the business needs and applications being developed. Partners with development team to manage the flow of information among project teams to ensure successful delivery.

Minimum Experience: Five (5) years of experience as a technical writer

Minimum Education: Bachelor’s Degree

**Technical Writer III (SIN 54151S, 541611)**

Functional Responsibility: Oversees creation of business / functional requirements and technical design documentation based on a clear understanding of the business needs and applications being developed. Partners with development team to manage the flow of information among project teams to ensure successful delivery.

Minimum Experience: Eight (8) years of experience as a technical writer

Minimum Education: Bachelor’s Degree

**Service Contract Act:** The Service Contract Act (SCA) is applicable to this contract as it applies to the entire Multiple Award Schedule and all services provided. While no specific labor categories have been identified as being subject to SCA due to exemptions for professional employees (FAR 22.1101, 22.1102 and 29 CRF 541.300), this contract still maintains the provisions and protections for SCA eligible labor categories. If and / or when the contractor adds SCA labor categories / employees to the contract through the modification process, the contractor must inform the Contracting Officer and establish a SCA matrix identifying the GSA labor category titles, the occupational code, SCA labor category titles and the applicable WD number. Failure to do so may result in cancellation of the contract.

ResQSoft Engineer – Software Tool Suite  SIN 511210

About ResQSoft Engineer – software tool suite
ResQSoft Engineer software tools modernize, or re-architect older software systems based on legacy programming languages such as COBOL and Natural. Numerous government agencies need to modernize software source code created in the 70s and 80s for their systems.

ResQSoft, Inc. is the only company that has automated this process to update the software source code to languages of today, through their ResQSoft Engineer Software. The only other method for doing this is to hand rewrite the code which is cost prohibitive and inefficient for the government and taxpayers.

Enterprise Iron Financial Industry Solutions, Inc is pleased to be an authorized reseller for ResQSoft to assist our government clients with their business process modernization initiatives.

Software License

1. IDENTIFICATION. The term “software” or “software products” means computer programs and applications created and delivered or made available by ResQSoft, Inc. along with any associated technical documents, database definitions, and data. Some of the software licensed by ResQSoft, Inc. under this agreement includes software which constitutes or incorporates software libraries, frameworks, and application program interface (API) code, as well as software created by the operation of the software. For example, and without limitation, ResQSoft® Engineer is software that can be used to create completely new (or modernized) computer applications, programs, documentation, and data; it is software that outputs software under the control of a human operator or user. These outputs are also “software” under the terms of this software license. The term “licensor” means ResQSoft, Inc. and its successors and assigns. The terms “Licensee”, “you” and “your” mean the Ordering Activity under GSA Schedule contracts identified in the Order who acquires, rents, leases, or otherwise uses the software or the outputs of the software, as well as any intermediary or prime contractor who acquires the software for the use of the software on behalf of another party. In the case of a Licensee who enters into a transaction with ResQSoft, Inc. to make available the software or outputs of the software to a third party, the Licensee shall ensure that the third party adheres to the terms of this software license and shall bind any parties to whom it may in turn provide the software or outputs to the terms of this agreement. Any entity who receives, through operation of contract or by any other valid legal transaction, the software or outputs is a Licensee under this agreement and shall be responsible for adherence to its terms. No party who obtains the software or outputs without the permission of ResQSoft, Inc., including without limitation by an act of theft, fraud, unauthorized sale, seizure, or intellectual property misappropriation shall be considered a Licensee and shall be required to return the software and outputs, if any, to ResQSoft, Inc. and destroy any copies made thereof. The license terms and conditions below apply to your acquisition and/or use of ResQSoft, Inc. software, whether for your own use or on the behalf of another party. In the case of transfer of the software (including, as always and without limitation, outputs of the software such as computer-generated source code, web pages, documentation, or database definitions) to a third party, it is your responsibility to disclose any such intended or actual transfer to ResQSoft, Inc. and to bind that third party to the terms of this software license.

2. AGREEMENT. These license terms constitute an agreement between ResQSoft, Inc. and you. Please read them. They apply to the software provided or made accessible to you by ResQSoft, Inc. including without limitation ResQSoft® Engineer, Dynamic Web, WebSurvey, and any other computer software, documentation, or databases which is provided or made accessible to you by ResQSoft. These terms also apply to any updates, modifications, or improvements made to the software and to any derivative works based wholly or partially upon the
ResQSoft Software License

By executing a written Order for THE SOFTWARE, YOU ACCEPT THESE TERMS. If you do not accept them, do not use the SOFTWARE. Instead, return it to RESQSOFT, INC. or to the reseller, agent, or business partner of RESQSOFT, INC. from whom you received the SOFTWARE or access thereto, for a refund or credit. If you cannot obtain a refund or credit from such a reseller, agent, or business partner, then contact ResQSoft, Inc. for information about ResQSoft, Inc.’s refund and credit policy in your specific circumstances.

As described below, using the SOFTWARE also operates as your consent to transmission of certain computer information during validation of use, warranty support, and for internet-based services. If you comply with these license terms, you have the rights below for each license you acquire.

3. OVERVIEW. These license terms permit installation and use of one copy of the software on one device, along with other rights, all as described below. Your use of the software may conform to any of the following modes, as determined by ResQSoft, Inc. in its sole discretion: (a) Hosted Mode, where the software is accessed by you over a public network; (b) Workstation Mode, where the software is installed on a computer owned by ResQSoft, Inc. and provided to you for a defined period of time during which you may use the software; (c) Customer Installation Mode, where the software is installed on a server or workstation owned or leased by you or a third party and is executed and used there, or (d) Services Mode, where the software is operated by ResQSoft, Inc. or its designee (collectively, “the operator”) and you provide inputs to the operator and receive outputs from the software only via transmission from the operator.

4. INSTALLATION AND USE RIGHTS. Before you use the software under a license, you must assign that license to one device for Customer Installation mode, unless otherwise permitted by ResQSoft, Inc. in writing. That device is the licensed device. A hardware partition or blade is considered to be a separate device.

- a. Licensed Device. You may install and use one copy of the software on the licensed device.
- b. Portable Device. You may install another copy on a portable device for use by the single primary user of the licensed device.
- c. Separation of Components. The components of the software are licensed as a single unit. You may not separate the components and install them on different devices.

For Workstation Mode, Hosted Mode, and Services Mode, you must designate one individual by name who will be responsible for the use of the software, and that user will be pre-authorized with administrative rights in the applicable database or security software. The single primary user of the licensed device may access and use the software installed on the licensed device remotely from any other device. No user other than the primary user or alternate user may use the software under the
same license at the same time for any other purpose, unless specifically authorized in writing by ResQSoft, Inc.

5. ADDITIONAL LICENSING REQUIREMENTS AND/OR USE RIGHTS.

a. Project Restriction. The software is licensed for use on a single project unless otherwise specified by ResQSoft, Inc. in writing. Often, but not always, a project is identified by the name of the system or application under development and is the subject of a single task order or contract issued to a single vendor. In the case where multiple development contracts are issued to or by Licensee or its customer to develop software, only one such contracted effort will be licensed for use of the software. THIS LICENSE IS FOR THE USE OF THE SOFTWARE BY RESQSOFT, INC. OR A SINGLE CONTRACTOR ON A SINGLE CONTRACT OR TASK ORDER WHILE THAT CONTRACT OR TASK ORDER IS IN EFFECT unless other arrangements are made in advance and approved by ResQSoft, Inc. This is not an enterprise license nor a license for use by multiple contractors, organizations or agencies, nor is it a license to use the software anywhere within an organization and on any project or phase thereof that that organization may undertake, unless specifically authorized in writing by ResQSoft, Inc. THE SCOPE OF USE OF THE SOFTWARE LIES WITHIN THE SCOPE OF THE CONTRACT OR CONTRACT MODIFICATION OR TASK ORDER OR PROJECT OR PROJECT PHASE UNDER WHICH THE USE OF THE SOFTWARE IS PROCURED, WHICHEVER OF THESE IS MOST RESTRICTIVE. IN THE CASE OF A MASC, FSS CONTRACT, BASIC ORDERING AGREEMENT, BASIC PURCHASING AGREEMENT, OR SIMILAR TASK ORDER CONTRACTING MECHANISM, IT IS THE SCOPE OF THE APPLICABLE TASK ORDER OR MODIFICATION THAT CONTROLS, NOT THE SCOPE OF THE MASTER OR BASIC CONTRACT.

b. Paid Up License. Your right to use the software may be granted subject to a single license fee payment. In that case, your right to use the software terminates when the project or application for which the software is used is complete or the scope of use as defined in 5.a above under which the payment is made and the use is paid for is terminated, whichever comes first, or as otherwise described herein. In the case of a Basic Ordering Agreement or other contract under which work is performed subject to task order, the task order and not the umbrella contract or Basic Ordering Agreement shall determine the term of use under this provision.

c. Monthly or Subscription License. If you licensed the software on a monthly or subscription basis, your rights to use the software do not extend beyond the subscription period. You may have the option to extend your subscription or convert to a perpetual license, if such option is granted by ResQSoft, Inc. in writing and at its sole discretion. If your subscription is extended, you may continue using the software until the end of your extended subscription period. After the expiration of your subscription, whether extended or not, you must stop using the software, directing all staff and subcontractors to cease using the software and in the case of Customer Install mode, delete all copies of the software including the database(s) if
any created by the software and all backup copies, and permit ResQSoft, Inc. access to verify that deletion was successful. In the case of Workstation Mode, the hardware and software must be returned in good working condition with software and databases intact.

d. In the event that you are not done using the software at the end of your monthly or subscription license period, ResQSoft, Inc. may, at its sole option, agree to continue your right to use the software on a month-to-month basis, and the prevailing monthly license fee will be due and payable according to the terms of the initial subscription for each month subsequent to the original term, whether or not the software is actually used. Monthly or subscription licenses always have a minimum term, and the monthly fees must be paid on the later of thirty (30) days after the effective date of the minimum term, or thirty (30) days after the invoice receipt date; otherwise, use of the software is not licensed and the Licensee shall return the software including any outputs, copies, or derivative works thereof and neither they nor any customer of theirs shall have any right to retain or use the software or outputs, copies, or derivative works thereof.

6. INCORPORATION OF TERMS AND FLOW DOWN PROVISIONS. In the event that Licensee’s customer requires incorporation of certain terminology or provisions in Licensee’s contracts and licensing agreements, ResQSoft, Inc. shall negotiate in good faith, to permit Licensee to fulfill this requirement, if and when requested to do so by Licensee. However, under no circumstances shall ResQSoft, Inc. be obliged to modify the terms of this Software License Agreement, particularly in the case where no compensation is offered for agreeing to additional terms or where the terms requested conflict with ResQSoft’s rights in its own software or its ability to continue to improve, operate, and sell its software to others. Compliance with the requirements of any contract between Licensee and its customer or any other third party is the sole responsibility of Licensee, even if ResQSoft, Inc. should have been aware or was aware that such requirements or provisions exist or might exist in some version of said contract. ResQSoft’s rights under this software license agreement shall not be modified or abridged by the existence of such provisions in any other contract and in such cases, it is the obligation of Licensee to resolve inconsistencies or conflicting provisions with the customer or third party.

7. INTELLECTUAL PROPERTY. You acknowledge that the software is copyright by and is the intellectual property of ResQSoft, Inc. and that this software license does not modify, transfer, or affect ResQSoft, Inc.’s exclusive ownership rights therein. In the event that you provide computer software or content to ResQSoft, Inc. to be included in the software or software outputs or to be used as an input or example in the generation thereof, then you grant ownership of that provided software or content to ResQSoft as a work for hire and you agree that ResQSoft may use, modify, re-sell or distribute that software or content without further restriction or payment.
In the event of a court finding that you are not able to transfer ownership as a work for hire, then you grant to ResQSoft, Inc. a fully paid, perpetual, non-cancellable, transferrable and unrestricted license and right without limitation to modify, copy, create derivative works, provide, re-sell, and use the aforesaid software or content on other contracts and/or for other customers, for internal use, for demo, for resale, or in any other legal manner that ResQSoft, Inc. in its sole discretion deems necessary or desirable.

8. USE OF OUTPUTS AFTER THE PAID LICENSE PERIOD. Some of the software products that may be licensed under this agreement produce outputs which are intended for use by Licensees for an indefinite period of time. ResQSoft DynamicWeb produces software in HTML form which constitutes web pages and web sites that do not necessarily require DynamicWeb to operate. ResQSoft® Engineer produces complete computer applications in source code form (other than portions in third-party libraries) and that also incorporates significant source code that was previously developed by ResQSoft, Inc., and do not require ResQSoft® Engineer to operate. If the license fee invoice for this license and all other ResQSoft invoices have been paid by Licensee as agreed and in accordance with the invoice terms, ResQSoft, Inc. will offer a license that permits Licensee or Licensee’s customer (but not both) the right to retain and use those outputs without further payment to ResQSoft. The permitted use of those outputs is as follows:

- a. Outputs from DynamicWeb that are in HTML may be retained and modified, enhanced, run, copied, backed up, and provided to third parties to perform maintenance or enhancements; and
- b. Outputs from ResQSoft® Engineer consisting of complete applications (also known as Foundation Code) may be retained and modified, enhanced, run, copied, backed up, and provided to third parties to perform maintenance or enhancements; and
- c. Derivative works may be created from the outputs, but neither the outputs nor derivative works may be used to build new and different applications nor may they be resold or disclosed to the public whether through publication, sale, lease, rent, or in response to a Freedom of Information Act request or other similar disclosure request by a third party.
- d. The ResQSoft® Engineer Repository and database, the software development work files and database (including Wiki, Tech Issues, customized templates, and software development folders or notes), and the DynamicWeb content database contain substantial trade secret information and may not be retained by Licensees or any other party beyond the end of the project or applicable task order or license subscription term, whichever occurs first, without the express written permission of ResQSoft, Inc.

It shall be the responsibility of the Licensee to put a written agreement in place, if one is needed, with its customer(s) to implement and enforce the terms of this Article 8 of the software license; normally this is accomplished by a Government rights in
data for restricted computer software clause or a similar provision.

9. VALIDATION AND UPDATE.
   • a. The software may from time to time update or require download of updated components of the software. Validation verifies that the software has been activated and is properly licensed and used. Validation is performed by ResQSoft, Inc. using software tools that operate over computer networks, including the Internet.
   • b. During a validation check, the software may send information about the software to ResQSoft, Inc. This information includes the version of the software and the project usage as applicable. ResQSoft, Inc. does not use the information transmitted for any competitive purpose, but only to verify license compliance and for support purposes such as examining log file contents. **BY USING THE SOFTWARE, YOU CONSENT TO THE TRANSMISSION OF THIS INFORMATION.** The same validation and update steps may be performed for any of the modes of operation listed above.
   • c. If the software is not properly licensed, the functionality of the software may be affected. For example, you may need to reinstall the software, or receive reminders to obtain a properly licensed copy of the software, or not obtain certain updates, upgrades or services from ResQSoft, Inc.
   • d. You may only obtain updates or upgrades for the software from ResQSoft, Inc. or entities authorized by ResQSoft, Inc. Updates or upgrades may be provided during the term of this license agreement at the sole discretion of ResQSoft, Inc.; this software license does not include any updates or major version releases or point releases unless ResQSoft, Inc. explicitly waives the license fee for same or those fees are paid.

10. BACKUP COPY. You may make one backup copy of the software (Customer Install Mode and Workstation Mode only). You may use it only to reinstall the software.

11. DOCUMENTATION. Any person that has valid access to your computer or internal network may copy and use the documentation for your internal, reference purposes.

12. NOT FOR TRANSFER OR RESALE. You may not re-sell the software, the use of the software, or the outputs of the software, unless specifically authorized to do so by ResQSoft, Inc. in writing. You may not transfer the software, nor your usage rights under this agreement.

13. REASSIGN TO ANOTHER DEVICE. For Customer Install mode licensing, you may reassign the license to a different device any number of times, but not more than one time every 90 days. If you reassign, that other device becomes the licensed device. If you retire the licensed device due to hardware failure, you may reassign the license sooner.

14. EXPORT RESTRICTIONS. To the extent that any of the software is subject to United States export laws and regulations, you must comply with all domestic and
international export laws and regulations that apply to the software. These laws include restrictions on destinations, end users and end use.

15. SUPPORT SERVICES. ResQSoft, Inc. provides support services for the software as may be agreed with Licensee. Absent a specific written agreement between ResQSoft, Inc. and Licensee regarding provision of support services for the software, ResQSoft, Inc. will respond to defect reports and will investigate reported problems that arise in using validly licensed software for its intended purpose. In no case will Licensee use support services to avoid paying for applicable training if training on the software is offered by ResQSoft, Inc. or its partners.

16. TERMINATION FOR CAUSE. When the End User is an instrumentality of the U.S., recourse against the United States for any alleged breach of this Agreement must be brought as a dispute under the contract Disputes Clause (Contract Disputes Act). During any dispute under the Disputes Clause, ResQSoft shall proceed diligently with performance of this Agreement, pending final resolution of any request for relief, claim, appeal, or action arising under the Agreement, and comply with any decision of the Contracting Officer.

17. ENTIRE AGREEMENT. This agreement (including the warranty below), any addendum or amendment included with the software, and any signed Master Services Agreement contract from ResQSoft, Inc. for supplements, updates, validation and support services that you may use, is the entire agreement for the software and support services.Any modifications to this agreement must be in writing and signed by an authorized representative of ResQSoft, Inc. and by the Licensee. In the event of a conflict with the provisions of another agreement, this agreement shall take precedence.

18. APPLICABLE LAW.

a. The Federal law of the United States governs the interpretation of this agreement and applies to claims for breach of it, regardless of conflict of laws principles.

19. LEGAL EFFECT. This agreement describes certain legal rights. You may have other rights under the laws of your state or country. You may also have rights with respect to the party from whom you acquired the software or use thereof, whether such party may be an agent or representative of ResQSoft, Inc. This agreement does not change your rights under the laws of your state or country if the laws of your state or country do not permit it to do so. If any provision of this software license is found to be invalid or non-binding by a court having proper jurisdiction to do so, the Court is requested and directed to construe or modify such provision(s) so that they permissibly bind the parties in a manner as similarly restrictive as possible to the original provision(s), rather than simply striking the provision or declaring the agreement to be invalid or non-binding in whole or in part.
20. LIMITATION ON AND EXCLUSION OF DAMAGES. YOU CAN RECOVER FROM RESQSOFT, INC. AND ITS SUPPLIERS ONLY DIRECT DAMAGES UP TO THE AMOUNT YOU PAID FOR THE SOFTWARE LICENSE, WHETHER OR NOT RESQSOFT, INC. IS ADVISED OF SUCH DAMAGES OR THE POSSIBILITY THEREOF. YOU CANNOT RECOVER ANY OTHER DAMAGES, INCLUDING CONSEQUENTIAL, LOST REVENUES OR PROFITS, SPECIAL, INDIRECT OR INCIDENTAL DAMAGES. This limitation applies to (1) anything related to the software, services, content (including source code) within or produced by the licensed software or on third party Internet sites, or third party frameworks or programs used by the software; and (2) claims for breach of contract, breach of warranty, guarantee or condition, strict liability, or other tort to the extent permitted by applicable law. It also applies even if repair, replacement or a refund for the software does not fully compensate you for any losses; or if ResQSoft, Inc. knew or should have known about the possibility of the damages. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. They also may not apply to you because your country may not allow the exclusion or limitation of incidental, consequential or other damages. The foregoing limitation of liability shall not apply to (1) personal injury or death resulting from Licensor’s negligence; (2) for fraud; or (3) for any other matter for which liability cannot be excluded by law.

21. LIMITED WARRANTY.

A. LIMITED WARRANTY. If you follow the instructions for use of the software, the software will perform substantially as described in the ResQSoft, Inc. materials that you may receive in or with the software. The software is complex and all software contains “bugs” (defects); ResQSoft, Inc. does not warrant that the software is free of defects, and the determination of what constitutes a defect as well as what functionality is or is not included in the software is reserved absolutely and exclusively to ResQSoft, Inc. in its sole discretion.

B. TERM OF WARRANTY; WARRANTY RECIPIENT; LENGTH OF ANY IMPLIED WARRANTIES. THE LIMITED WARRANTY COVERS THE SOFTWARE FOR 90 DAYS AFTER ACQUIRED BY LICENSEE OR MADE ACCESSIBLE TO THE FIRST USER, WHICHEVER IS EARLIER. IF YOU RECEIVE SUPPLEMENTS, UPDATES, OR REPLACEMENT SOFTWARE DURING THAT PERIOD, THEY WILL BE COVERED FOR THE REMAINDER OF THE WARRANTY OR 30 DAYS, WHICHEVER IS LONGER. TO THE EXTENT PERMITTED BY LAW, ANY IMPLIED WARRANTIES, GUARANTEES OR CONDITIONS LAST ONLY DURING THE TERM OF THE LIMITED WARRANTY. Some states do not allow limitations on how long an implied warranty lasts, so these limitations may not apply to you. They also might not apply to you because some countries may not allow limitations on how long an implied warranty, guarantee or condition lasts.

C. EXCLUSIONS FROM WARRANTY. This warranty does not cover problems caused by your acts (or failures to act), the acts of others, or events
beyond ResQSoft, Inc.’s reasonable control including without limitation lack of training, misuse of the software, hardware failure, system software or component failure, insufficiency of hardware, software, or networking at the customer’s site or on customer’s computer platform, or related to telecommunications, networking, power, and Internet failures or attacks.

D. REMEDY FOR BREACH OF WARRANTY. RESQSOFT, INC. WILL REPAIR OR REPLACE THE SOFTWARE, OR PROVIDE A WORKAROUND, AT NO CHARGE. IF RESQSOFT, INC. CANNOT REPAIR OR REPLACE IT, RESQSOFT, INC. WILL REFUND THE AMOUNT PAID FOR THE SOFTWARE IF THE SOFTWARE COULD NOT BE USED, AS RESQSOFT, INC. IN ITS SOLE DISCRETION MAY DETERMINE, AS A RESULT OF THE DEFECT. IT WILL ALSO REPAIR OR REPLACE SUPPLEMENTS, UPDATES AND REPLACEMENT SOFTWARE AT NO CHARGE UNDER THESE SAME TERMS. IF RESQSOFT, INC. CANNOT REPAIR OR REPLACE THEM, IT WILL REFUND THE AMOUNT YOU PAID FOR THEM, IF ANY PAYMENT WAS REQUIRED. YOU MUST UNINSTALL THE SOFTWARE (IF USED IN CUSTOMER INSTALL MODE) AND RETURN ANY MEDIA AND OTHER ASSOCIATED MATERIALS (INCLUDING ANY EQUIPMENT PROVIDED ALONG WITH THE SOFTWARE) TO RESQSOFT, INC. WITH PROOF OF PURCHASE TO OBTAIN A REFUND. THESE ARE YOUR ONLY REMEDIES FOR BREACH OF THE LIMITED WARRANTY.

E. CONSUMER RIGHTS NOT AFFECTED. YOU MAY HAVE ADDITIONAL CONSUMER RIGHTS UNDER YOUR LOCAL LAWS, WHICH THIS AGREEMENT CANNOT CHANGE.

F. WARRANTY AND SUPPORT PROCEDURES. You must have paid for your license as agreed between you and ResQSoft, Inc., according to the terms of the invoice issued for the software license and use of the software, to be eligible to receive support or warranty service under this license agreement.

i. For warranty service or information about how to obtain a refund for software acquired in the United States and Canada, contact ResQSoft, Inc. at +1 (703) 783-1070 or by email at support@resqsoft.com. You may also correspond concerning this topic to ResQSoft, Inc., 2210 Mount Vernon Ave., Suite 103-113 Alexandria, VA 22301.

ii. (Reserved.)

G. NO OTHER WARRANTIES. THE LIMITED WARRANTY IS THE ONLY DIRECT WARRANTY FROM RESQSOFT, INC. RESQSOFT, INC. GIVES NO OTHER EXPRESS WARRANTIES, GUARANTEES OR CONDITIONS. WHERE ALLOWED BY YOUR LOCAL LAWS, RESQSOFT, INC. EXCLUDES AND DISCLAIMS IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NON-INFRINGEMENT. If your local laws give you any implied warranties, guarantees or conditions, despite this exclusion, your remedies are described in the Remedy for Breach of Warranty clause above, to the extent permitted by your local laws.

H. LIMITATION ON AND EXCLUSION OF DAMAGES FOR BREACH OF WARRANTY. THE LIMITATION ON AND EXCLUSION OF DAMAGES
CLAUSE ABOVE APPLIES TO BREACHES OF THIS LIMITED WARRANTY. THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS WHICH VARY FROM STATE TO STATE. YOU MAY ALSO HAVE OTHER RIGHTS WHICH VARY FROM COUNTRY TO COUNTRY.

22. SCOPE OF LICENSE. The software is licensed, not sold. This agreement only gives you some rights to use the software. The manufacturer or installer (if any) and ResQSoft, Inc. reserve all other rights. Unless applicable law gives you more rights despite this limitation, you may use the software only as expressly permitted in this agreement. In doing so, you must comply with any technical limitations in the software that only allow you to use it in certain ways. For more information, see the software documentation. Notwithstanding any other provision of this software license, you may not:

- a) Work around any technical limitations on usage in the software;
- b) remove ResQSoft, Inc. copyright notices or identifying names, comments, file or library names, or other information that identifies ResQSoft;
- c) reverse engineer, decompile or disassemble the software, except and only to the extent that applicable law expressly permits, despite this limitation;
- d) use what you learn from using or examining the software or the documentation or outputs to participate, directly or indirectly, in developing software that competes with the software provided to you by ResQSoft, Inc. under this agreement, or permit your employees, contractors, agents, consultants, or other third parties to use information obtained about the software to do so;
- e) make more copies of the software than specified in this agreement or allowed by applicable law, despite this limitation;
- f) publish the software for others to copy;
- g) use the software in any way that is against the law;
- h) rent, lease or lend the software; or
- i) use the software for commercial software hosting services.

23. BACKUP COPY. You may make one backup copy of the software media if you were given physical possession of the software by ResQSoft, Inc. You may use it only to reinstall the software.

24. DOCUMENTATION. Any person that has valid access to your computer or internal network may copy and use the documentation for your internal, reference purposes only so that you can successfully operate the software. ResQSoft software and documentation and technical information are not published works; they contain trade secrets and are only issued on a need to know basis, and only to the extent that ResQSoft, Inc. in its sole discretion deems it necessary to do so. Documentation is subject to the applicable Non Disclosure Agreement between ResQSoft, Inc. and you, but it may not be shown or given or otherwise transferred to third parties at any time without the consent of ResQSoft, Inc.
25. Waiver and Severability. No failure on the part of ResQSoft, Inc. to enforce any provision of this agreement shall be deemed to waive that provision. Each provision herein is severable and may stand on its own in the event that other provisions are invalidated. Headings are for convenience and shall not be interpreted as containing legal meaning or affecting the content of this agreement. No provision shall be interpreted for or against a party by virtue of that party's role in drafting same.

Version 06/06/2022.
